ABOUT COMPANY

Our story begins in the Coachella Valley and its surrounding desert cities. We started by going to jobsites and asking for work, as time passed along we started to receive notice from all our work. For so many years we worked out of a storage unit and now we have our own showroom located in Palm Desert, CA. Our work has been noticed between San Francisco and Southern California. We are proud to be Glaziers by trade and we service all residential and commercial locations no matter how small the project is.

Today, we are fortunate to connect with many general contractors, homeowners, and designers to offer the industry's top of the line glass products.

Our Mission is always going to be Customer Satisfaction. Our business relies on our clients to be satisfied with their product and to recommend us. Our goal is to ensure the highest standards of quality is provided by our vendors so we can make your dream a reality.

Shower Glass Units

A Frameless shower glass unit is easier to maintain: The lack of frame makes cleaning a frameless shower door far easier than a framed glass door. The crevices in a frame might collect soap scum and moisture over time. A frameless shower door will carry less of this grimy debris. However, A custom framed glass doors are available in different styles to fit your decor theme. Framed glass doors also use thinner tempered glass than frameless glass doors. Overall, a glass shower unit allows more light in the shower and gives the illusion of a larger bathroom space.
