What Is ISO 27001?

ISO/IEC 27001:2022 is the internationally recognised standard for Information Security Management Systems (ISMS). It provides a systematic, risk-based approach to managing sensitive information — across IT systems, people, and processes — to keep it secure, confidential, and available. In the UAE, it aligns with the Personal Data Protection Law (PDPL), NESAs controls, and IA regulations — and is increasingly required by enterprise clients, financial institutions, government bodies, and global supply chain partners.

Why Does Your Organisation Need ISO 27001?

5 Business-Critical Reasons to Get Certified

1 UAE Personal Data Protection Law (PDPL)

The UAE's PDPL mandates appropriate technical and organisational controls to protect personal data. ISO 27001 provides the certified framework to demonstrate compliance and avoid significant regulatory penalties.

2 Required by Enterprise & Government Clients

Financial services, healthcare, government, telecom and technology sectors increasingly mandate ISO 27001 certification from suppliers, vendors and service providers as a prequalification requirement.

3 Reduce Cyber Incident Risk & Costs

The average cost of a UAE data breach exceeded AED 25M in 2023. ISO 27001 systematically reduces the likelihood and impact of cyber incidents, data breaches and ransomware attacks.

4 Demonstrate Trusted Data Governance

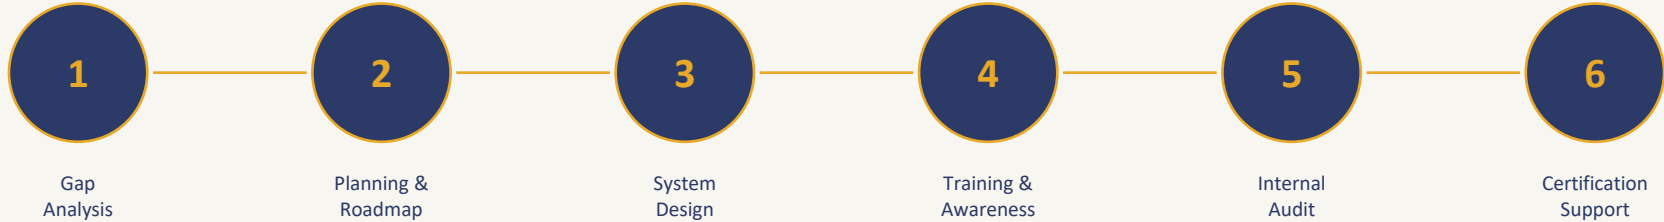

In an era of escalating cyber threats, ISO 27001 certification signals to clients, partners, and regulators that your organisation takes information security seriously — building trust and competitive advantage.

5 Align with NESAs & UAE IA Regulations

ISO 27001 Annex A controls map directly to UAE National Electronic Security Authority (NESAs) requirements and IA cybersecurity frameworks — streamlining multi-regulatory compliance.

How QnE Delivers Your ISO 27001 Certification

End-to-End Implementation — Gap Analysis through to Audit Day

What QnE Does For You

- ◆ Information asset inventory and information security risk assessment (Annex A controls)
- ◆ Statement of Applicability (SoA) — tailored to your business scope and risk appetite
- ◆ ISMS policy suite covering all 93 Annex A control domains (2022 version)
- ◆ UAE PDPL, NESAs and IA regulatory alignment built into your control mapping
- ◆ Staff security awareness training, phishing simulation design, and competency programmes
- ◆ Business continuity and disaster recovery planning integrated with your ISMS

The QnE Advantage

- ✓ UAE regulatory expertise built-in
- ✓ First-time audit pass rate
- ✓ Practical — built for your business
- ✓ Lead auditor qualified team
- ✓ 22-template document library
- ✓ Post-cert. maintenance support

ISO 27001 — What You Receive from QnE

Your Complete Documentation Suite & Implementation Package

01 Information Security Policy Suite

03 Statement of Applicability (SoA)

05 Incident Response & Breach Notification Procedure

07 Supplier Security Assessment Framework

02 Information Asset & Risk Register

04 Access Control & Acceptable Use Policies

06 Business Continuity & Disaster Recovery Plan

08 Internal Audit Programme & Management Review Pack

QnE Guarantee:

Every document is UAE regulatory-aligned, audit-ready, and customised to your business — not generic templates.
