What Is ISO 45001?

ISO 45001:2018 is the global standard for Occupational Health and Safety Management Systems (OHSMS), replacing OHSAS 18001. It provides a framework to proactively prevent work-related injury and illness, and to provide safe, healthy workplaces. In the UAE, it directly complements the OSHAD Safety Framework (Abu Dhabi) and Dubai OHS requirements — and is increasingly mandated by major project owners and government contracts.

Why Does Your Organisation Need ISO 45001?

5 Business-Critical Reasons to Get Certified

1 OSHAD SF & Dubai OHS Compliance

ISO 45001 directly aligns with the Abu Dhabi OSHAD Safety Framework and Dubai's OHS legislation — simplifying your regulatory compliance obligations in both Emirates.

2 Mandatory for UAE Major Projects

Required for prequalification on ADNOC, Aldar, Emaar, DEWA, and most UAE government infrastructure and construction contracts.

3 Reduce Incidents, Injuries & Liability

Organisations implementing ISO 45001 report an average 25–60% reduction in lost time incidents (LTI), reducing human cost and legal liability exposure.

4 Lower Insurance Premiums

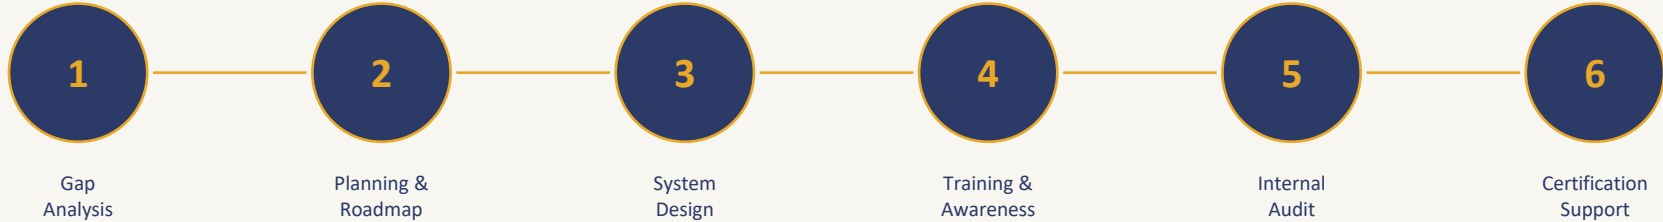

Certified organisations benefit from significantly reduced workers' compensation costs, public liability insurance premiums, and third-party claims.

5 Protect Reputation & Workforce Trust

Demonstrating structured duty-of-care to your employees, contractors and regulators builds a safety culture that attracts and retains quality workforce.

How QnE Delivers Your ISO 45001 Certification

End-to-End Implementation — Gap Analysis through to Audit Day

What QnE Does For You

- ◆ Hazard Identification, Risk Assessment and Risk Control (HIRAC) tailored to your operations
- ◆ OSHAD SF and Dubai OHS clause-by-clause regulatory alignment and gap analysis
- ◆ Permit-to-work, contractor management and site induction procedures
- ◆ Incident investigation framework and root cause analysis methodology
- ◆ OH&S competence matrix, training plans and awareness campaigns
- ◆ Emergency response, first aid and crisis management planning

The QnE Advantage

- ✓ UAE regulatory expertise built-in
- ✓ First-time audit pass rate
- ✓ Practical — built for your business
- ✓ Lead auditor qualified team
- ✓ 22-template document library
- ✓ Post-cert. maintenance support

ISO 45001 — What You Receive from QnE
