

Summer Reading Incentive Program – June 1 to August 17, 2025

We are excited to invite your child to participate in our **Summer Reading Incentive Program**, designed to foster a love of reading in students from **kindergarten through 12th grade**. While **participation is not required**, it is **strongly encouraged** as a meaningful way to build strong literacy habits that benefit students for years to come.

Elementary students (K–4) will track their reading progress by **coloring in fun images** on reading logs. Each image represents **20 minutes of reading**. These age-appropriate and engaging logs make reading fun and easy to monitor.

Middle and high school students (grades 5–12) will track their progress by logging the **total number of minutes read** as well as the **titles of the books or materials** they have read using either a print log or the **Bookmory app** (free version). This encourages independent choice and allows students to explore genres and topics that interest them.

To recognize our readers, we will hold a **prize drawing during the first week of school**. Students who submit their completed reading logs will be eligible for tickets based on how much they read:

- **1,100 minutes** (20 minutes/day, 5 days/week) = **5 tickets**
- **660 minutes** (20 minutes/day, 3 days/week) = **3 tickets**
- **440 minutes** (20 minutes/day, 2 days/week) = **1 ticket**

In addition, **high school students** who log at least **660 minutes** of reading this summer will also earn a **"Special Assignment Ticket,"** which allows them to be **exempt from a project assigned during the first nine weeks** of the school year.

Reading logs or Bookmory App screenshot must be submitted to teachers by Friday, August 22nd to be considered for prize drawings and eligibility.

We encourage you to support your child in this summer adventure: **encourage them to read, to read what they love, and to read often**. Developing a passion for reading will enrich their vocabulary, strengthen their imagination, sharpen their thinking skills, and give them tools for success that will last a lifetime.

Sincerely,

Dr. Wharton-Michael
Academic Dean

Discover the Joy of Reading with the Bookmory App!

Track Your Reading. Build a Habit. Celebrate Your Progress.

If students would like an easy way to track the summer reading, they can check out Bookmory. (notes students must provide a screen shot of their reading time to redeem tickets)

★ Why Use Bookmory?

- **Easily Log Your Reading**
 - Record the books you're reading
 - Track your reading time with the built-in timer
 - Make notes and reflections as you read
- **Set Goals & Stay Motivated**
 - Set daily or monthly reading goals
 - Watch your progress with visual charts and timelines
 - Celebrate milestones as you reach them
- **Organize Your Library**
 - Keep a digital bookshelf of what you're currently reading, what you've finished, and what you want to read next!

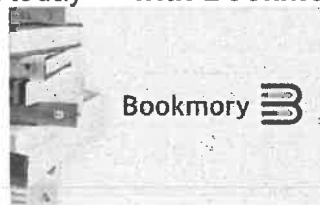

Free to Use!

- Bookmory offers a **free version** with all the essential features

➡️ How to Get Started

1. **Download for Free**
 - Available in the **App Store** (iPhone/iPad)
 - Available on **Google Play** (Android)
2. **Create Your Profile**
 - Start adding books from your shelf or search the online catalog
3. **Start Logging**
 - Tap the timer when you start reading (remember students will need to share their time to earn tickets).
 - Add notes or quotes you want to remember
 - Watch your reading stats grow!

Reading builds focus, vocabulary, imagination, and lifelong learning skills.
Start building your reading habit today — **with Bookmory!**

**Level Up This Summer:
Boost Math Skills and Start the Year Strong!!!**

Dear Parents,

As summer approaches, we encourage you to support your child's learning and reinforce their skills using Khan Academy, a free online educational platform offering lessons in a variety of subjects. Students can study by grade level or subject. While it can be used to strengthen any area, we are especially encouraging practice and development of math skills.

Khan Academy offers clear, step-by-step video lessons and interactive practice activities that help students master math concepts at their own pace. With personalized learning paths, Khan Academy helps fill in learning gaps and gives children the extra support they need to build confidence in math.
