| Test                | Test Description Summary   |
|---------------------|--|
| <b>1. GeneDiet</b>  | Obesity Risk; exercise responsiveness (how to train for weight loss); type of diet to manage your weight (ideal macronutrient distribution), micronutrient requirements; likelihood of becoming overweight/struggling with weight loss.  |
| <b>2. GeneSport</b> | Sport potential; injury risk + recovery rate; athletic potential (strength /endurance); nutritional and training recommendations based on your body's genetic responsiveness to exercise.  |
| <b>3. GeneRenew</b> | Anti-aging and Skin Health: The test gives you an indication of your skin's sensitivity to the sun and certain reagents or creams. It also provides advice on skin care products that should be used or avoided, as well as an indication of collagen synthesis for firmness and elasticity. |
| <b>4. GeneWell</b>  | Health and Wellness:<br>Overall wellness predisposition (e.g., type 2 diabetes, heart disease, cholesterol, hypertension, bone health, caffeine sensitivity, salt sensitivity, blood clotting, inflammation, and mood disorders).  |
