

# Brow Lamination

## Aftercare Guide

Thank you for choosing **Kristi PMU & Wax** for your Brow Lamination treatment.

Proper aftercare will help your brows set beautifully, maintain their shape and prolong your results. Please follow the guidance below carefully.

### **The First 24 Hours**

To prepare your skin for treatment:

This is the most important period while the brow hairs are setting into their new shape.

Please avoid:

- Applying make-up to the brow area
- Additional eye or brow treatments
- Touching or rubbing the brows unnecessarily

Keeping the area dry and undisturbed helps the lamination process fully set.

### **The First 48 Hours**

- Do not apply self-tanning products to the face
- Avoid products that may stain or alter brow colour

### **Skincare & Beauty Products**

Use a brow conditioner daily.

To protect both the lamination and tint:

- Avoid exfoliating products (including scrubs, AHAs and BHAs) around the brow area
- Avoid anti-ageing or active skincare near the brows
- Avoid facial tanning products, including gradual tan

These should be avoided for **3 days before and after** your treatment.

## Make-Up Guidance

Your stylist may apply light finishing make-up after your appointment.

However:

- Avoid applying heavy make-up (such as foundation and powders) around the brow area for at least 24 hours

## Long-Term Care & Maintenance

Brow Lamination is designed to be a low-maintenance treatment, however gentle care will help maintain the shape, condition and overall appearance of your brows.

- Brush brows daily into your desired shape to keep them neat and lifted
- Apply a nourishing brow conditioner to keep hairs hydrated and healthy
- Avoid over-touching or excessively manipulating the brow hairs
- Be mindful when cleansing the face — avoid harsh rubbing in the brow area
- Limit exposure to strong skincare products (such as exfoliants and active ingredients) around the brows

Brow hairs naturally shed and renew as part of their growth cycle, so results will gradually soften over time.

Most clients choose to repeat their Brow Lamination every **4–6 weeks** to maintain a consistently groomed, fuller look.

Extra care in the first 24–48 hours helps set the foundation for longer-lasting results.
