

Tint Patch Test

Allergic reactions to the products are manifested through:

- Redness
- Itching
- Rashes
- Blisters
- Swelling
- Burning
- Stinging

If you have any of the above after your patch test, it means you have allergic reaction to a cosmetic product. Treatment cannot be completed.

Please get in touch with me; info@kristipmuandwax.co.uk or 07463694057

If you don't develop any reaction(s), the treatment can be done. Keep in mind allergic reactions can develop at any time.

The patch test must be completed as soon as you receive it and no less than 48 hours prior to the appointment. If you do not comply with these instructions your appointment may be cancelled or rescheduled.

*a negative patch test will not guarantee that you won't develop an allergic reaction.

Tint Patch Test

Patch test must be done at least 24h prior to the appointment

Pack Includes

- 1 Sample size of tint stored in a small container
- 1 Sample size of activator stored in a small container
- 1 Cotton pad
- 1 Cotton bud

Test Usage Guide

Step 1: Pour the activator into the tint container.

Step2: Mix the tint with the activator using the cotton bud.

Step3: Using the cotton bud, place a small amount of the mixture behind the ear (select).

Step 4: Wait 24 hours and use the cotton pad to wipe it off.
