eLearning Day Guidelines

Why eLearning Days?

eLearning Days are intended to provide access to learning on days when there are school cancellations due to inclement weather. While these days cannot replace the face-to-face time students have with their teachers, it can provide continuous learning when school is cancelled. eLearning Days also eliminates the need for makeup days at the end of the school year, helping families plan summer activities.

Attendance

Attendance will be based on the completion of the work for eLearning Days. Students who do not have the necessary resources may make arrangements with the teacher for additional time to complete the work. Students will be granted 3 school days to submit work after an eLearning day if circumstances prevent timely work completion. Students not completing the necessary requirements within the established timeline may be marked as an EXCUSED ABSENCE.

eLearning Day Communication

Three Rivers Montessori will communicate with you using the following methods when an eLearning Day goes into effect. Cancellations will be announced via phone, email, district website and social media indicating that there will be an e-Learning Day.

- Social media sites:
 - Facebook
- JMC family email/text messages
- SeeSaw
- News media notifications (TV Channel 4 WCCO)

Options for contacting your child's teacher on an eLearning Day

1. Send your child's teacher an email to their school email address.
2. Teachers, principals, and other licensed professionals will be available by email

or phone (via voicemail) from 7 a.m. to 3 p.m.

3. Staff will respond to all communication requests in a timely manner during scheduled hours.
4. Staff contact information can be found on our website in the About Us page

If an extended disruption of service occurs for any of our priority learning systems on an eLearning day we will communicate to all stakeholders and determine at that time if we need to provide any additional extensions to work completion guidelines for staff and students. The length of the interruption will determine if an extension would be warranted. Similar communication methods described above will be used if this situation occurs.
