

4th Grade Math & Science - Week of May 4th

Hello Parents and Students!

I hope this message finds everyone healthy and enjoying some of this beautiful weather! The days are so warm and sunny!

This week's math lessons are L102-106.

Please find them on the school website. By now, your child should have taken Test #19. Many of you have sent me the scores or emails/texts of the results. But, I am missing quite a few. Please remember to send me the scores or pictures of the test so I can grade it. Thanks! I also need to know if they are completing their daily lessons. I have been checking the Science Weekly website and there are several students who haven't completed many weeks of lessons. I am basing their science grades on this participation. Please have them login and continue to work through Earth/Space Unit. There are tests available. Thanks so much! We will have our weekly Zoom meeting this Tuesday the 5th. I emailed the link and password.

Thanks for all of your help with this!
