

## **Defensive Publication: Enhanced Cornhole Game with Integrated Transportation and Storage Features**

**DATE: February 1st, 2025**

**Abstract:** This defensive publication describes an enhanced cornhole game system designed for improved portability and storage. The system includes two cornhole boards with unique features to facilitate transportation over various terrains and provide storage for additional recreational accessories such as coolers and beach chairs.

**Technical Description:** The cornhole game system comprises two boards, each with specialized design elements to enhance usability and transport.

### **Board One Features:**

#### **1. All-Terrain Mobility:**

- Equipped with wide wheels to accommodate diverse terrains, including sand, grass, gravel, and pavement.
- Wheels are positioned for balance and ease of movement while pulling.

#### **2. Handle for Transportation:**

- A sturdy handle is attached to the top of the board, allowing a user to pull the system when both boards are latched together.

#### **3. Fastening Clamp:**

- A built-in fastening clamp mechanism securely connects Board One and Board Two during transport, ensuring a stable unit that prevents separation.

### **Board Two Features:**

#### **1. Foldable Leg for Cooler Storage:**

- The bottom leg of Board Two incorporates a foldable support that provides a designated space for a cooler.
- When in use, the leg folds out to accommodate the cooler's placement without interfering with gameplay.

#### **2. Cooler Security Strap:**

- A secure strap with an easy-access clip is attached to Board Two to hold the cooler firmly in place during transport.

#### **3. U-Shaped Bracket for Beach Chairs:**

- A U-shaped bracket is located near the top of Board Two to allow for hanging beach chairs securely.

#### **4. Chair Securing Strap:**

- **An additional strap is provided on Board Two to wrap around and secure the beach chairs, preventing them from shifting during transport.**

#### **Game Rules:**

- **The cornhole game also has a different set of rules to follow.**
- **Both boards have the number 1 painted in the middle of the board with a shape of a rocket that is approximately 16' long by 8" wide.**
- **On each side of the rocket, there are the number two scoring areas.**
- **Each number two box is approximately 6" wide by 8" long.**

#### **Advantages and Benefits:**

- **Improved Portability:** The integration of wide wheels and a handle makes it easier to transport the boards over various surfaces.
- **Compact Storage:** The fastening clamp ensures that both boards remain together, reducing storage space.
- **Convenient Accessory Transport:** The addition of a cooler compartment and chair brackets minimizes the need for additional carrying equipment.
- **User-Friendly Design:** The foldable leg and quick-release straps allow for quick setup and breakdown of the system.

**This defensive publication ensures the described cornhole game system remains publicly accessible and prevents proprietary claims on the described innovations. The design provides a novel and efficient method for transporting cornhole boards along with associated recreational accessories.**
