From paddock to property – Central Vic Civil is your one-stop-shop for all aspects of civil construction.

OUR PURPOSE

Central Vic Civil champions diversity and inclusion – we are guided by strong female leadership that brings new perspectives and fresh approaches to the civil construction industry.

✓ **COMMUNITY**

We prioritise the local community in all our projects by supporting local suppliers, hiring local labour and undergoing extensive community consultation before every project.

✓ **TRANSPARENCY AND EFFICIENCY**

Our fully paperless system ensures real-time project updates and cost tracking, allowing us to make immediate adjustments, increase efficiency and keep clients informed throughout every stage.

✓ **PROFESSIONALISM**

At Central Vic Civil, we uphold the highest standards of professionalism, drawing on our founder's former experience both on the Civil Contractors Federation national board and as President of the Victorian branch.

Central Vic Civil combines modern technology, skilled leadership and decades of experience for a seamless project delivery.

OUR SERVICES

Central Vic Civil is committed to sustainable practices, striving to minimise environmental impact and promote eco-conscious solutions across all our civil construction projects.

Central Vic Civil offers a comprehensive range of civil construction services, combining advanced technology, skilled crews and a modern fleet to deliver quality solutions for every project.

✓ CIVIL AND ROADWORKS

Central Vic Civil delivers high-quality road construction with a modern fleet of equipment and experienced road building crews, ensuring safety, durability and efficiency for roadworks of any scale.

✓ BULK EARTHWORKS

With a modern fleet consisting of over 70 items of plant and GPS-equipped machinery, Central Vic Civil handles large-scale earthworks projects with ease.

✓ LAND DEVELOPMENT

Complete land development solutions for residential, commercial and industrial projects with a strong focus on efficiency, safety and compliance.

✓ PIPELINES

Experts in small and large diameter pipeline construction across the spectrum of materials and applications. We are accredited by numerous water authorities for works all around Victoria.

✓ SEWERAGE & WATER PUMP STATIONS

Constructing pump stations and related infrastructure, including the effective management of specialist subcontractors, providing effective solutions for water management.

✓ RETENTION BASINS

Designing and constructing retention basins for stormwater management, ensuring proper flow control and reducing environmental impact on surrounding areas.

✓ WATER STORAGE

Building robust water storage solutions to support various projects, from agricultural needs to large-scale residential developments, ensuring reliability and safety.

✓ HEAVY HAULAGE, TRANSPORT AND TIPPER WORKS

Heavy haulage, transport and tipper services for all your transport and logistics needs. Our transport team includes heavy floats up to 60 tonnes, tilt trays, truck and trailer combinations and water cartage.

OUR FLEET

Central Vic Civil maintains a modern fleet of over 70 items of plant and machinery, regularly maintained and serviced to ensure reliability for your most important projects. Our diverse and capable fleet, outfitted with a wide range of attachments, delivers versatility and efficiency, suitable for operations of all types.

✓ EXCAVATORS

✓ BULLDOZERS

✓ BACKHOES

✓ LOADERS

✓ DUMPERS

✓ GRADERS

✓ TRUCKS & TRAILERS

✓ ROLLERS

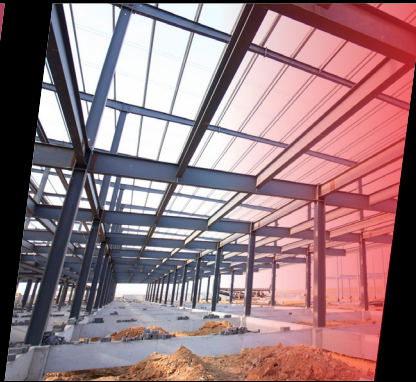

WHO WE SERVE

Central Vic Civil's experienced team brings a deep understanding of the needs of each industry we serve, allowing us to adapt quickly to varying project requirements and ensuring high-quality across ever evolving industry landscapes.

✓ GOVERNMENT

✓ COMMERCIAL

✓ INDUSTRIAL

✓ RESIDENTIAL

✓ ENERGY & RENEWABLES

Central Vic Civil has built strong relationships with a wide range of clients across both public and private sectors. Our capabilities, transparency and reliability have made us a trusted partner for state and local government, water authorities, developers and other private companies throughout Victoria.

Our team's reputation as a premier civil construction provider is backed by a range of accreditations, memberships and awards.

Choosing Central Vic Civil means choosing quality, dedication and professionalism, ensuring your project's success.

SAFETY AND ACCREDITATIONS

At Central Vic Civil, safety is our top priority. Our dedicated team undergoes continuous training to ensure a secure work environment and has been recognised with numerous safety awards.

Supported by a full-time OH&S manager and paperless safety systems, we proactively manage risks and uphold the highest standards of workplace safety, ensuring the well-being of our team, clients and the community.

- ✓ SAFETY-AWARD-WINNING TEAM
- ✓ SAFETY CHAMPION PAPERLESS SYSTEM
- ✓ IN-DEPTH HEALTH AND SAFETY POLICIES
- ✓ REGULAR TAKE-FIVES
- ✓ INTERNAL, MONTHLY SAFETY AWARD

* Accredited by numerous local councils and water authorities.

CASE STUDIES

CHERRY FLAT ROAD PUMP STATION AND RISING MAIN

CLIENT: GOLDFIELDS WINTERFIELDS PTY LTD

✓ THE CHALLENGE

Central Vic Civil was tasked with installing a 1.3 km sewer rising main and a 10-metre-deep pump station for Central Highlands Water in Ballarat. The project involved running a 280mm PE Poly line through solid rock, under low voltage powerlines and alongside a busy roadway, creating significant safety and logistical challenges.

✓ OUR SOLUTION

Our experienced team drafted and implemented a detailed traffic management plan that minimised risk while maintaining road access for the duration of the project.

We then utilised directional boring to efficiently tunnel through the solid rock. Two boring crews worked in tandem from either end, significantly cutting down project time.

During the construction phase, our skilled team was able to make rapid adjustments to the design alignment to accommodate existing infrastructure in unexpected locations.

✓ THE RESULT

Central Vic Civil completed the \$3 million project within six months, efficiently connecting both the pipeline and pump station. We maintained strict safety standards throughout the project and our adaptable approach overcame various site challenges, delivering a successful outcome for Goldfields Winterfields.

SOHO ROAD CONSTRUCTION

CLIENT: H.TROON PTY LTD

✓ THE CHALLENGE

Central Vic Civil was contracted to construct a 750-metre road extension in the Ballarat Western Employment Zone, providing essential access for a new industrial factory on a strict four-month deadline.

Additionally, the project faced significant obstacles due to solid rock in the subbase and culvert alignment. Overcoming these geological challenges demanded careful machinery selection and a phased construction approach to stay on track.

✓ OUR SOLUTION

CVC's project team developed a detailed scope and phased timeline to optimise efficiency. We divided the work into two main sections: completing the southern section of the road first, while a major culvert crossing was built on the northern section.

Specialised equipment was chosen to expedite rock excavation, critical for maintaining the project schedule.

A third crew managed footpath construction and utility installations, including water, gas and NBN services, while the main roadworks proceeded.

✓ THE RESULT

Central Vic Civil successfully delivered the \$2 million project on time and within budget, thanks to thorough planning and effective project management.

The new road met all quality standards, providing a reliable and high-performing access route for the industrial facility, showcasing our ability to deliver complex projects under challenging conditions.
