

Mary Scott Community Orchard

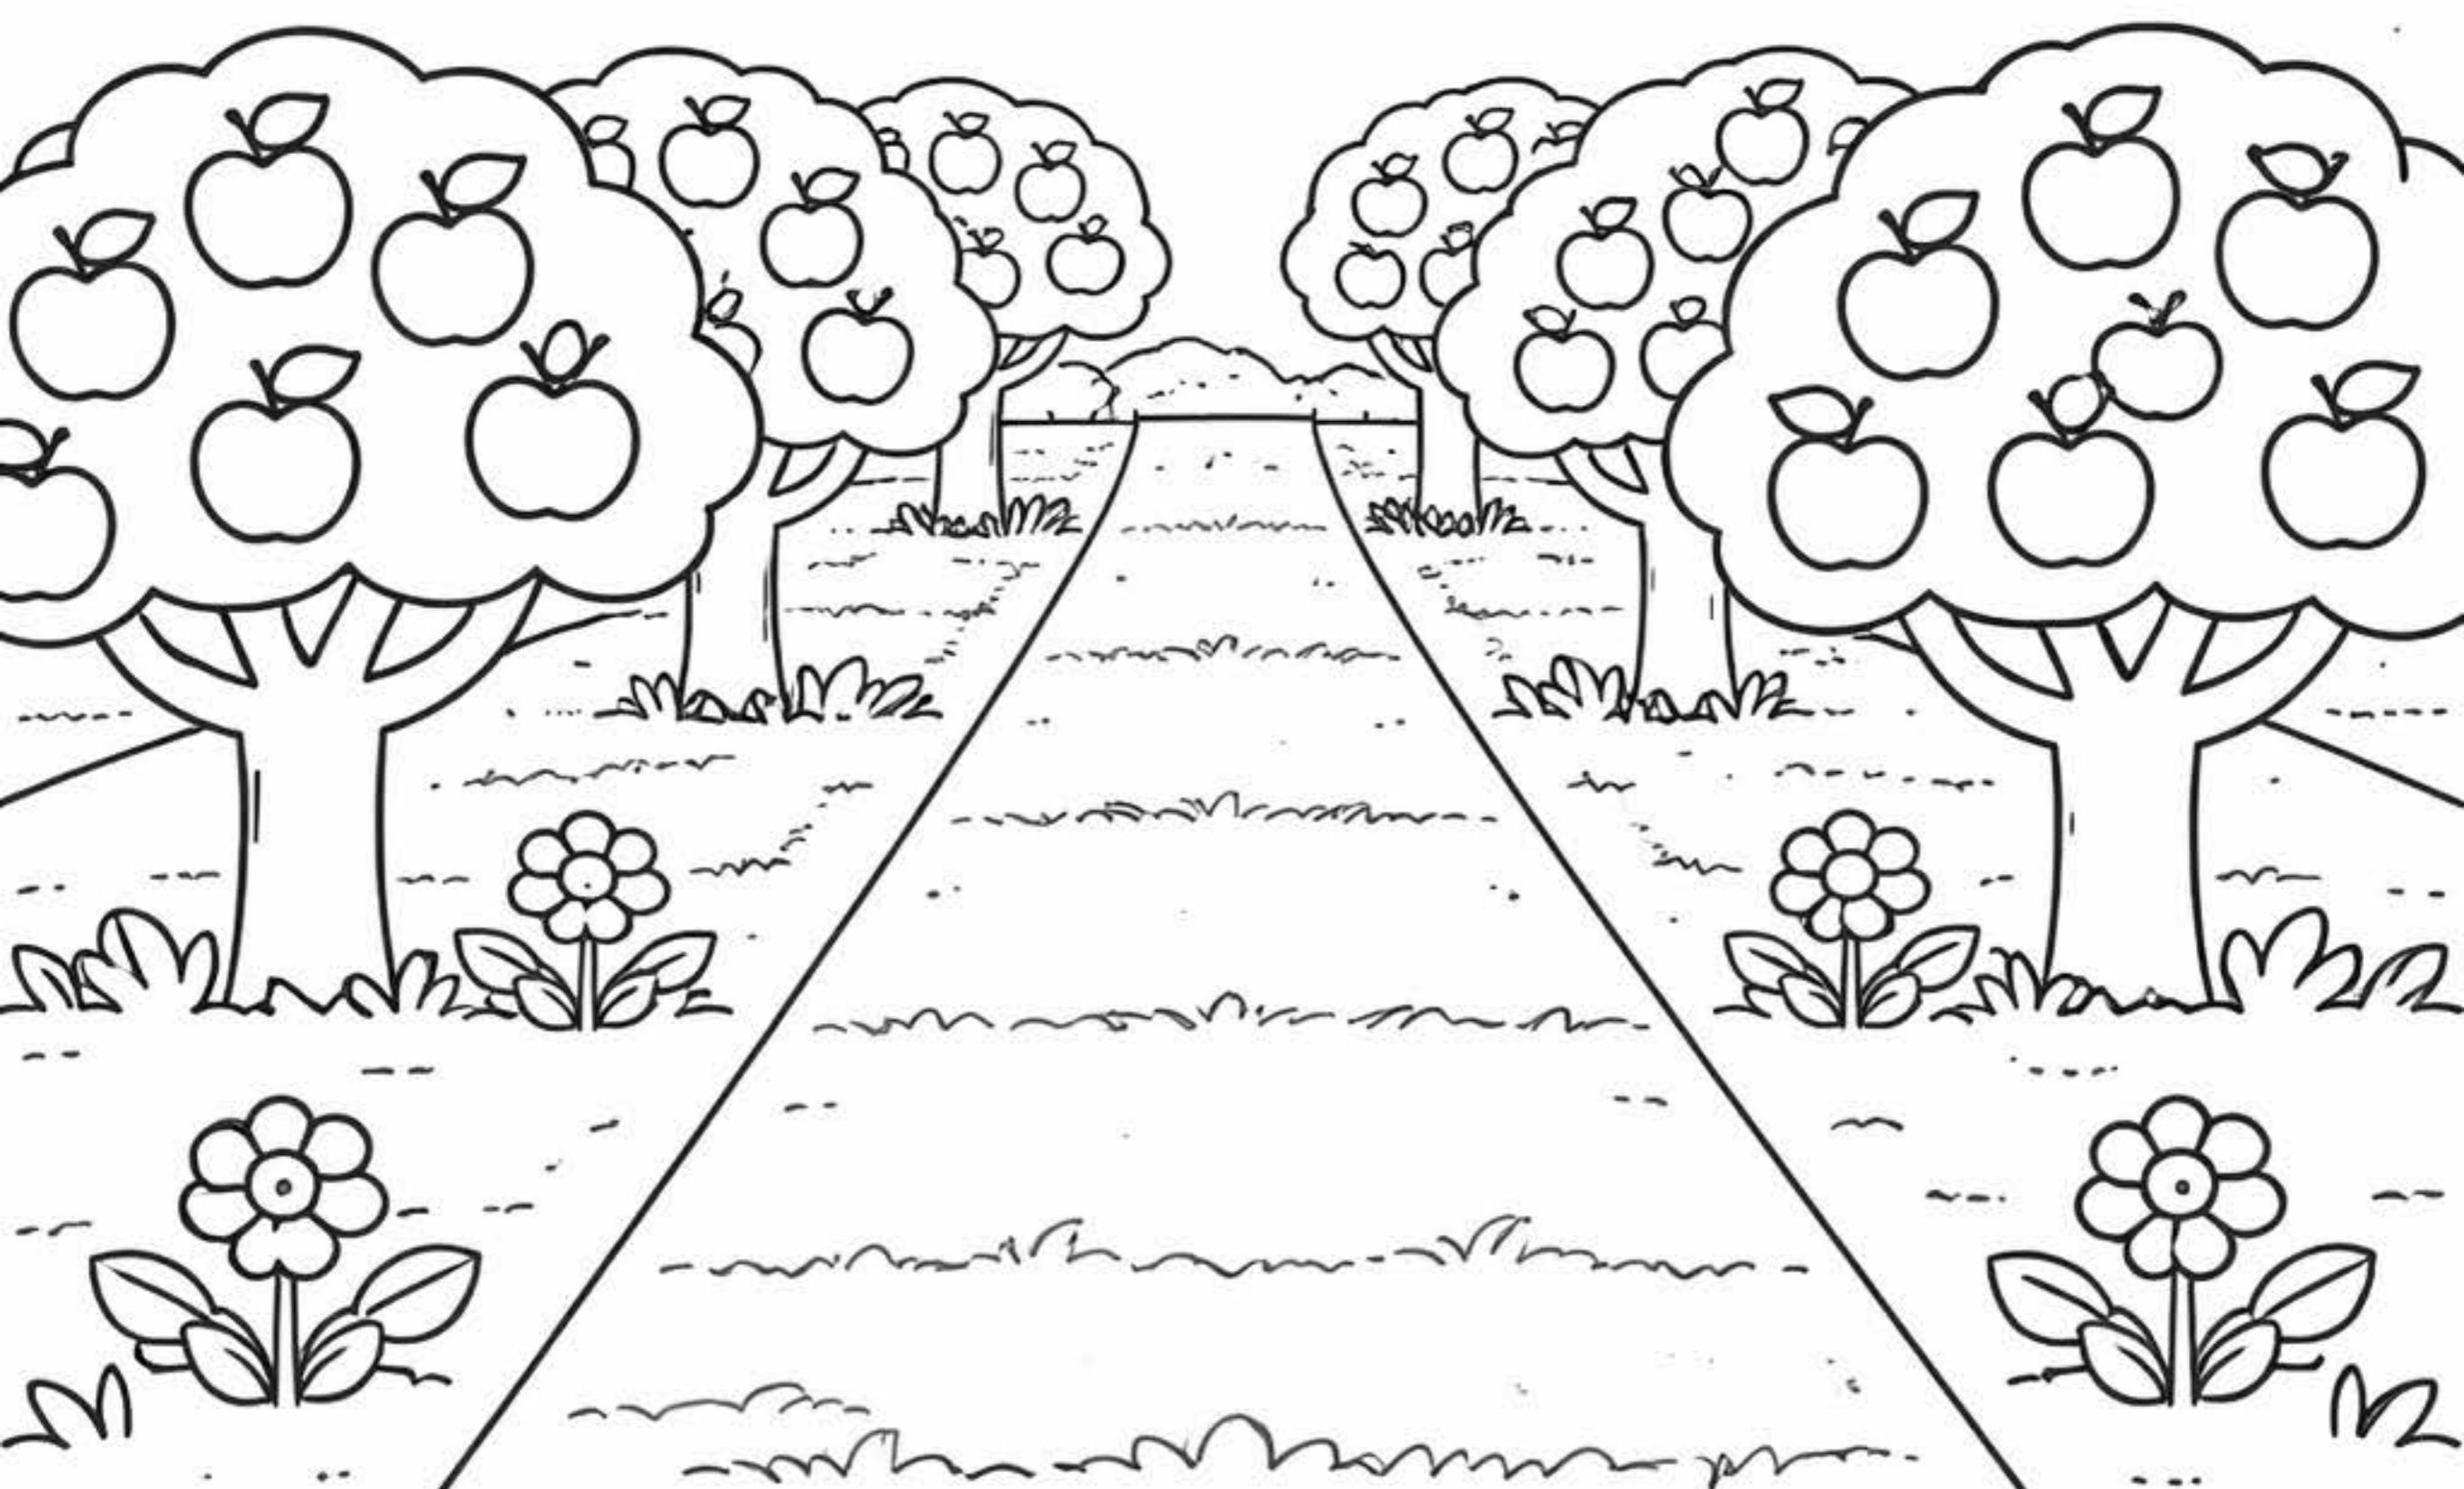

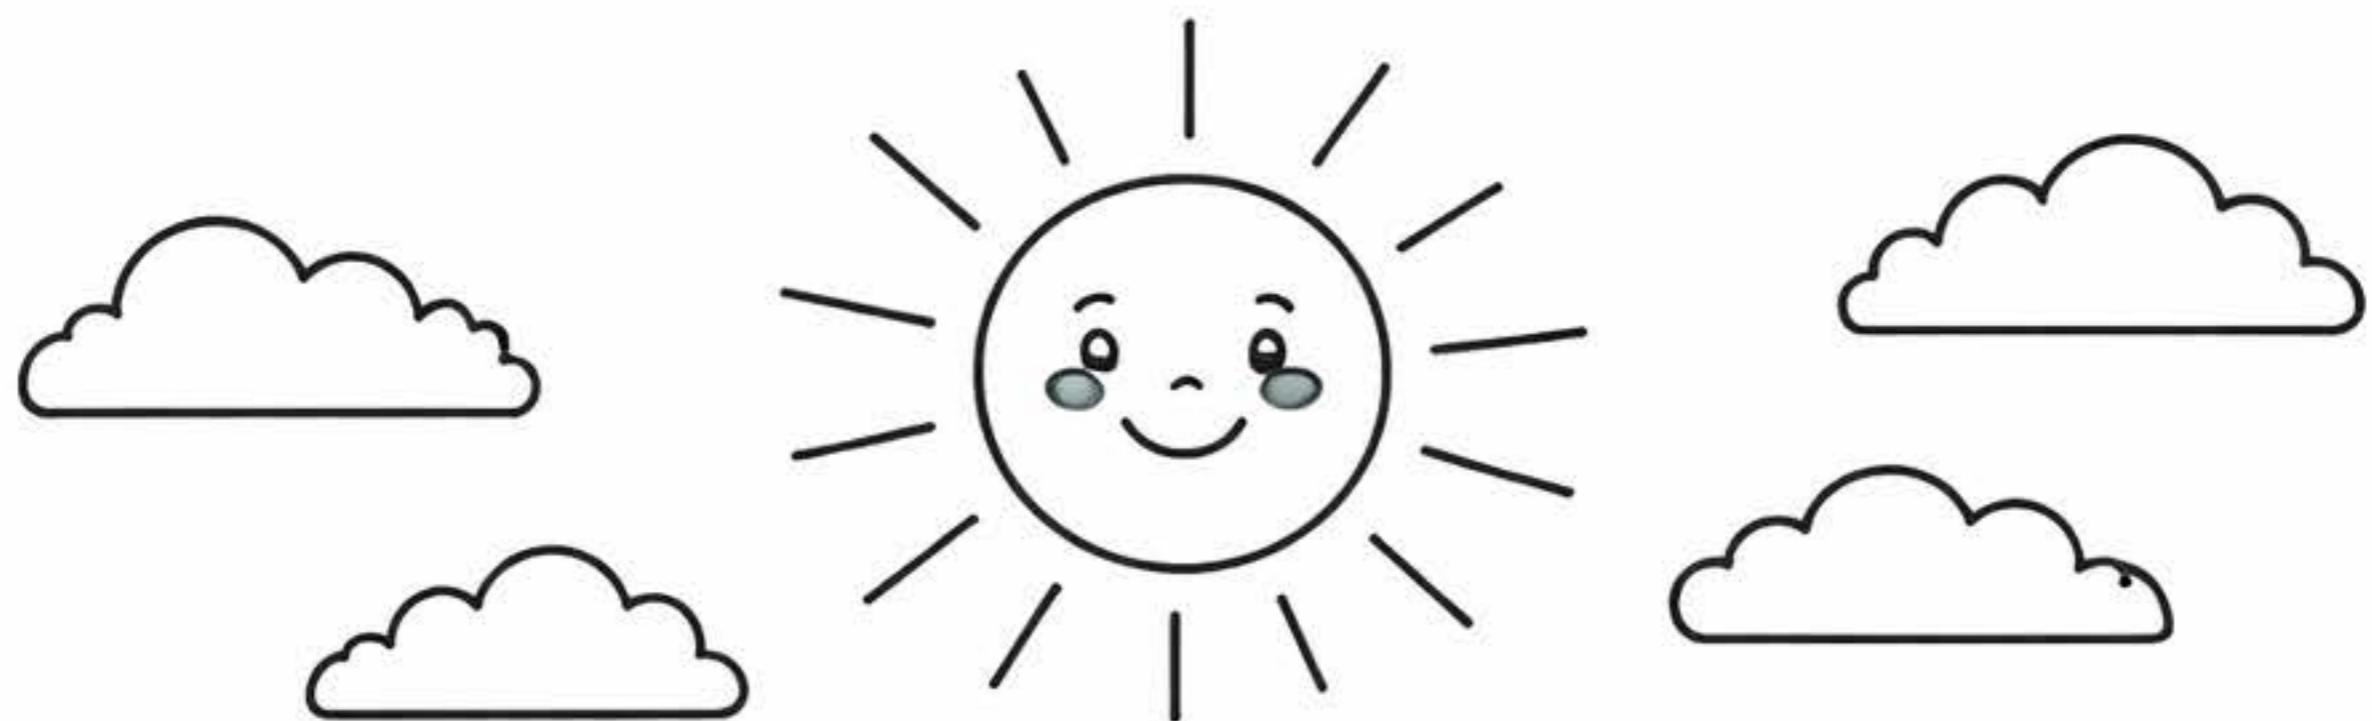

Welcome!

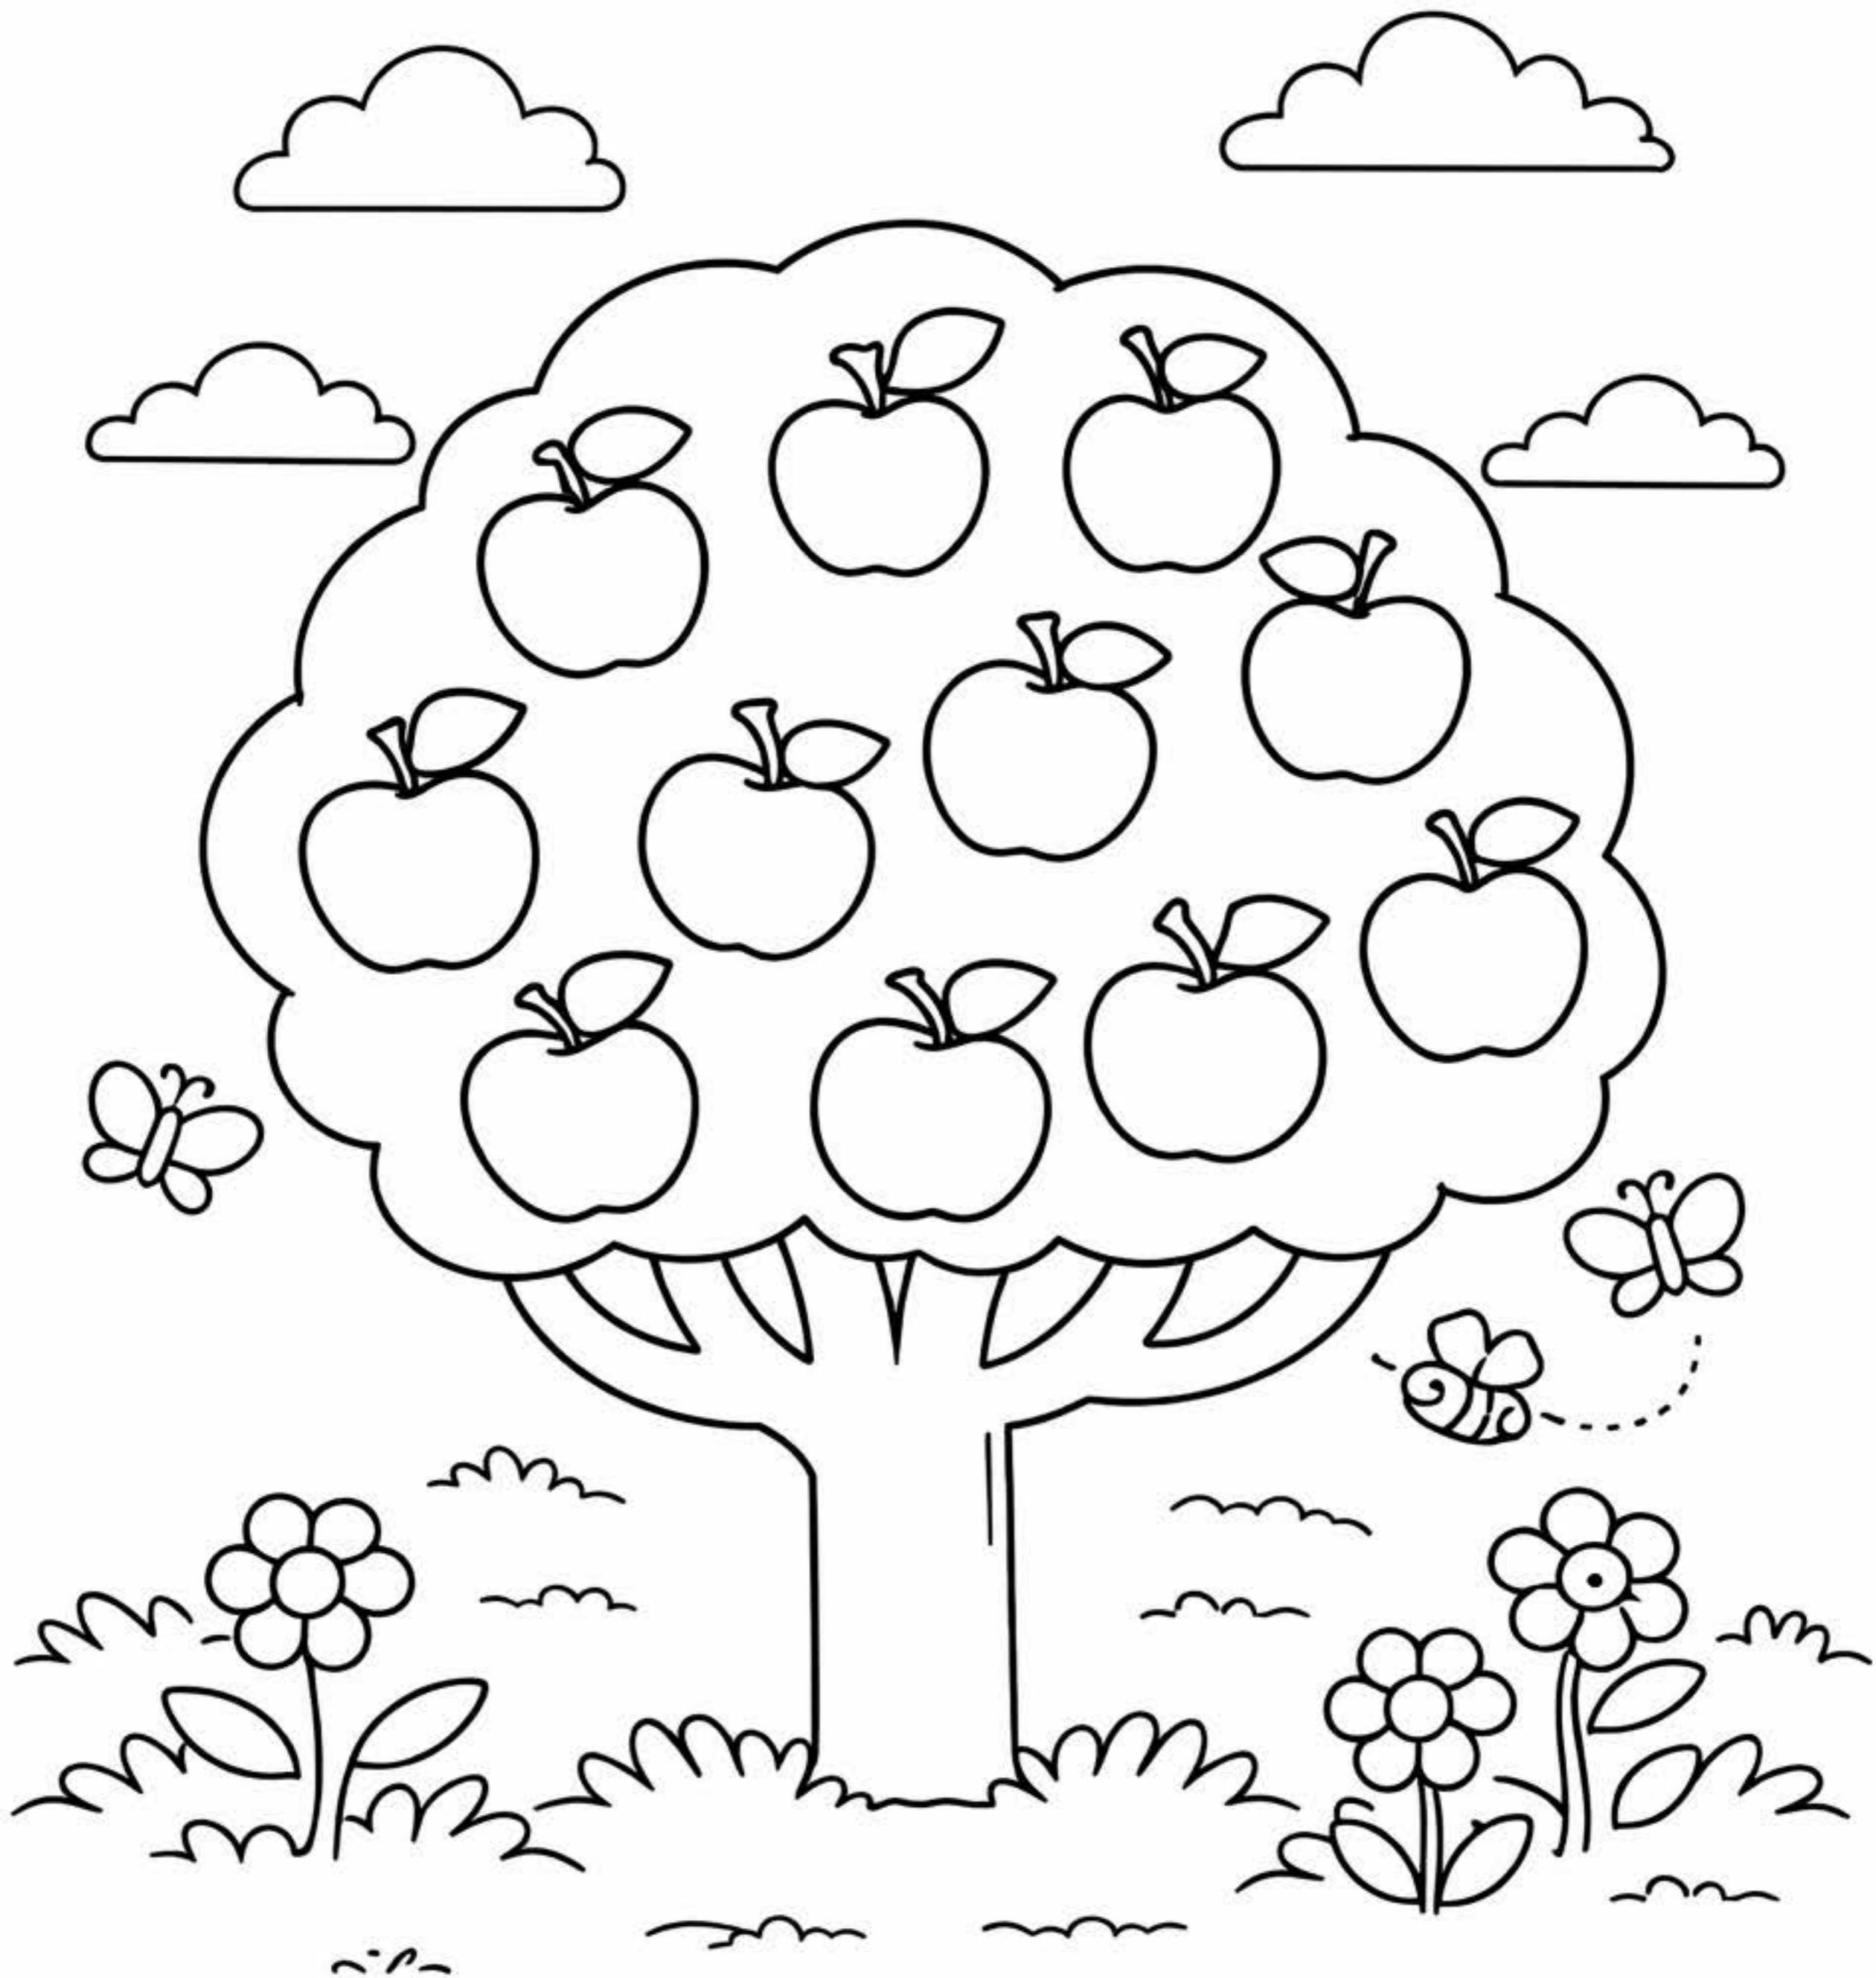

Let's explore the orchard together.

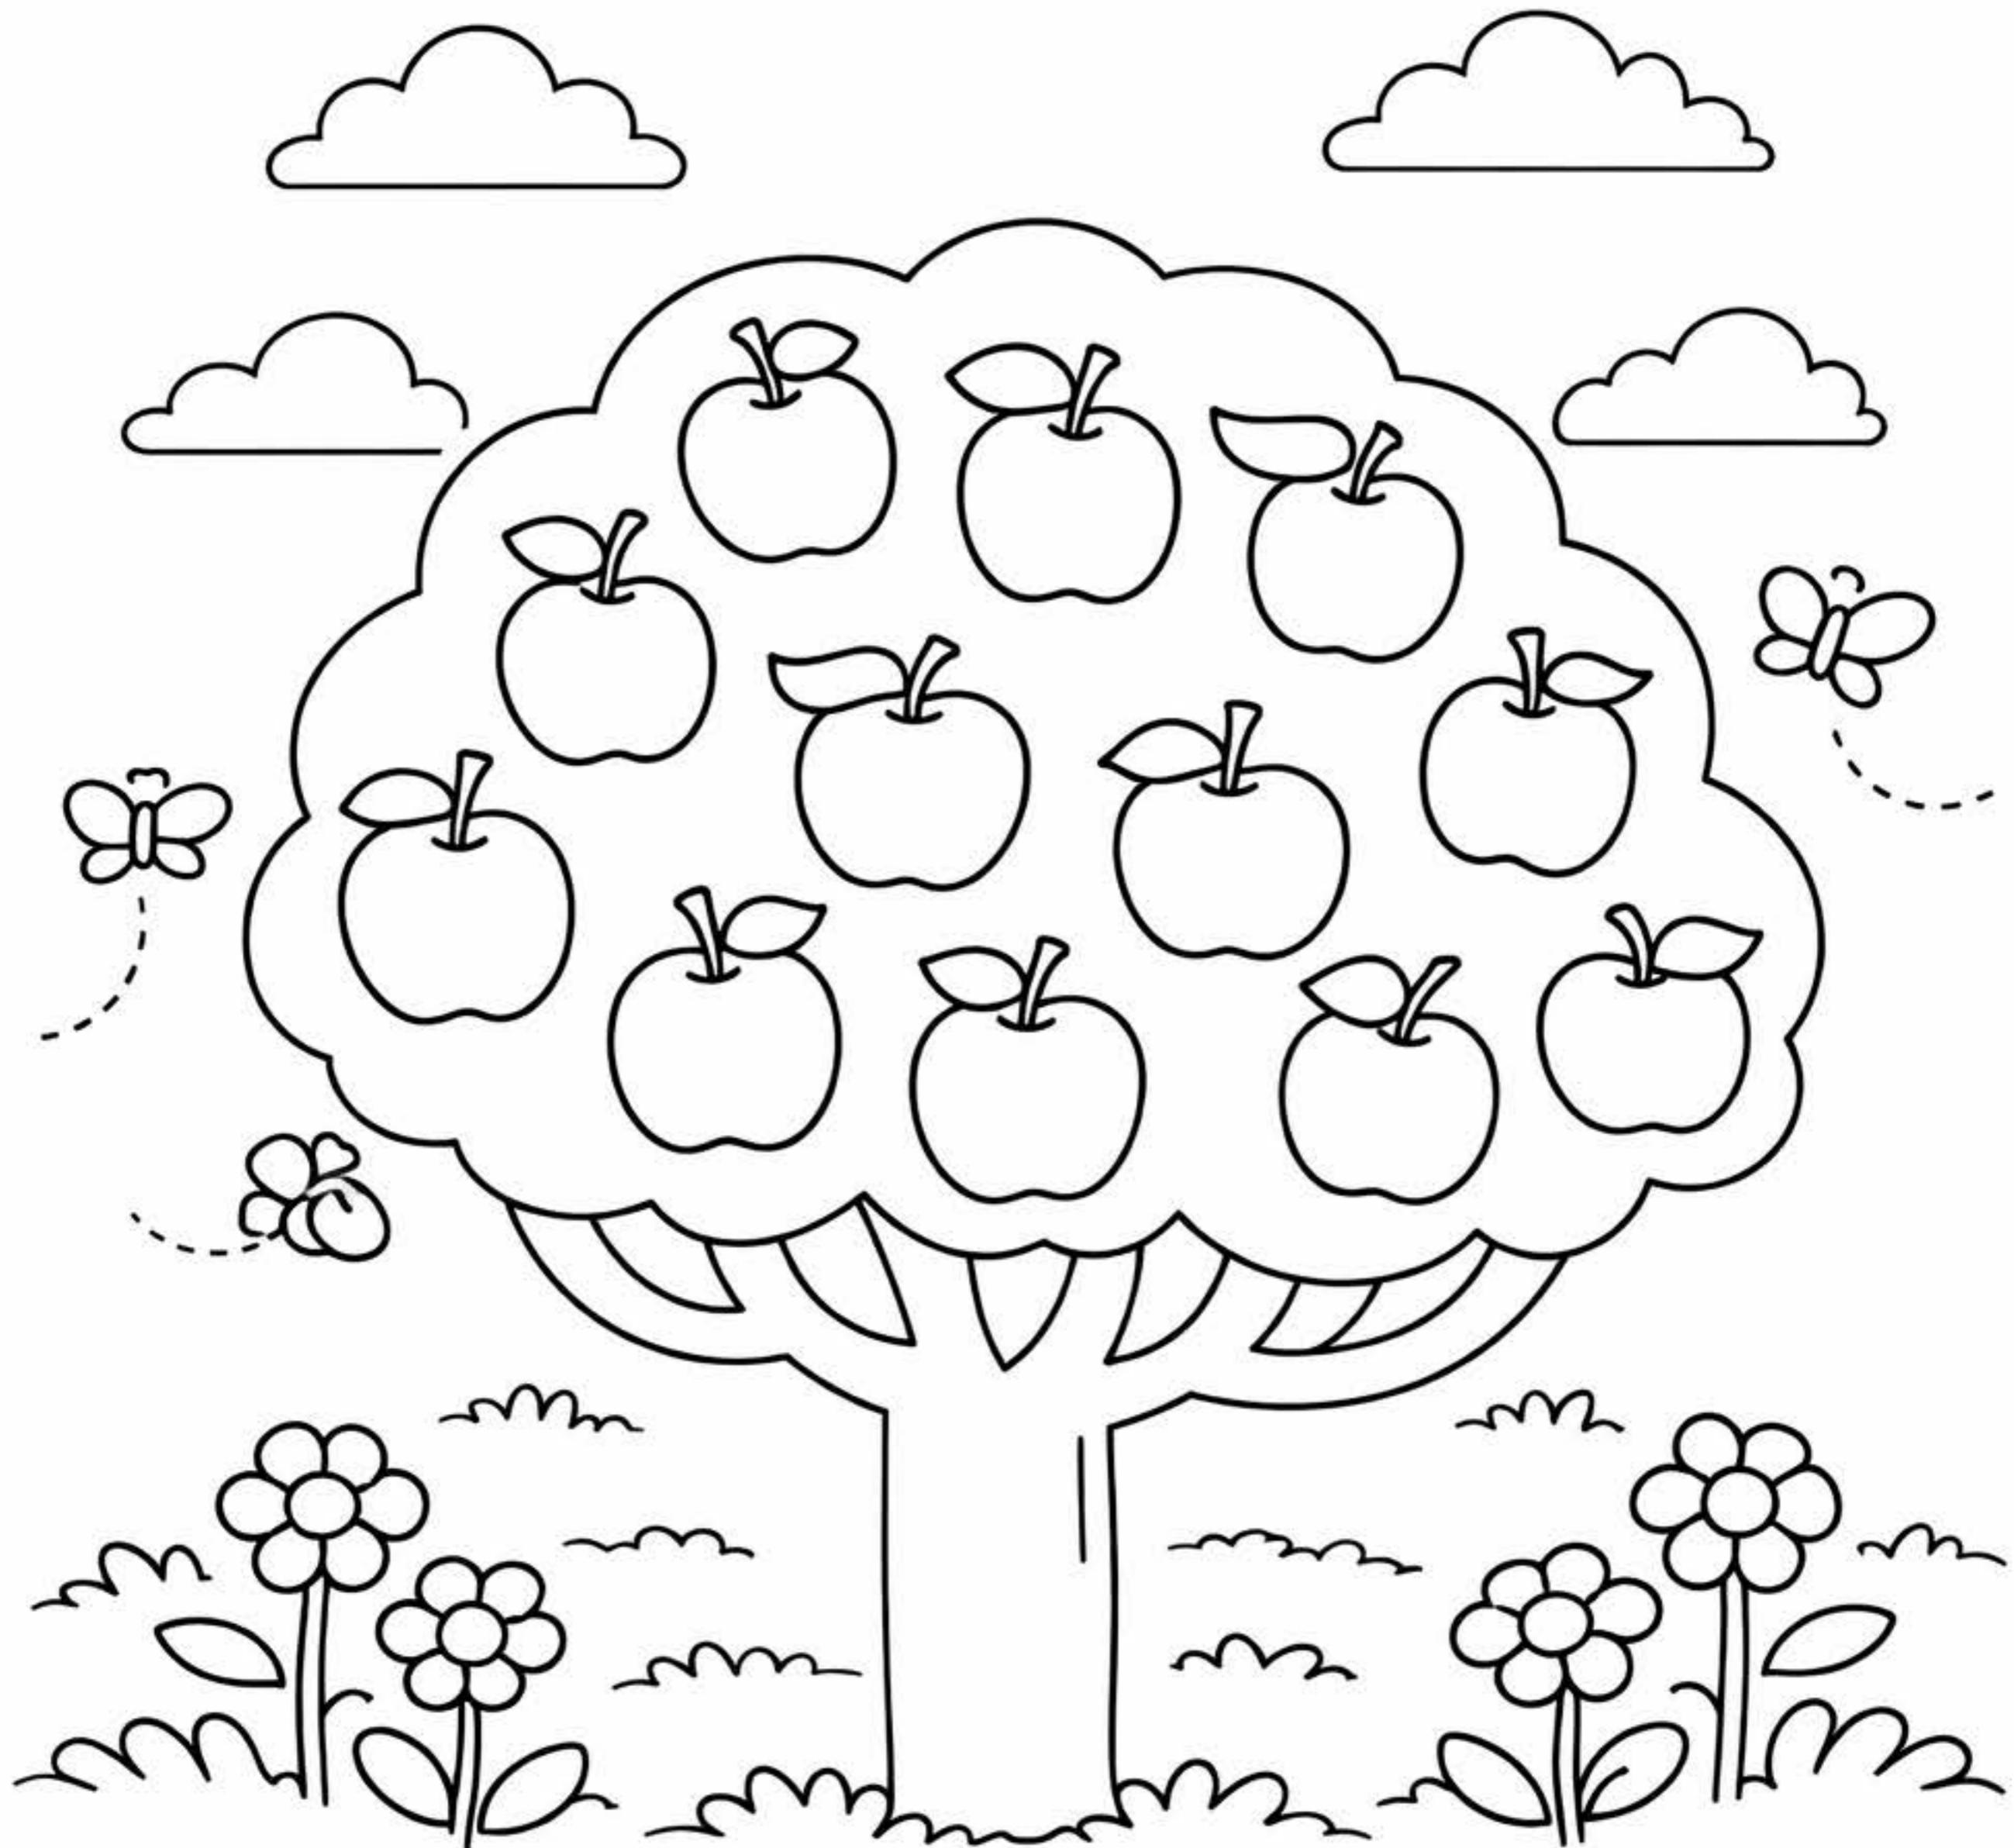

**This is our orchard. Can you find the
trees and flowers?**

**Apple trees grow best when they
have space and sunshine.**

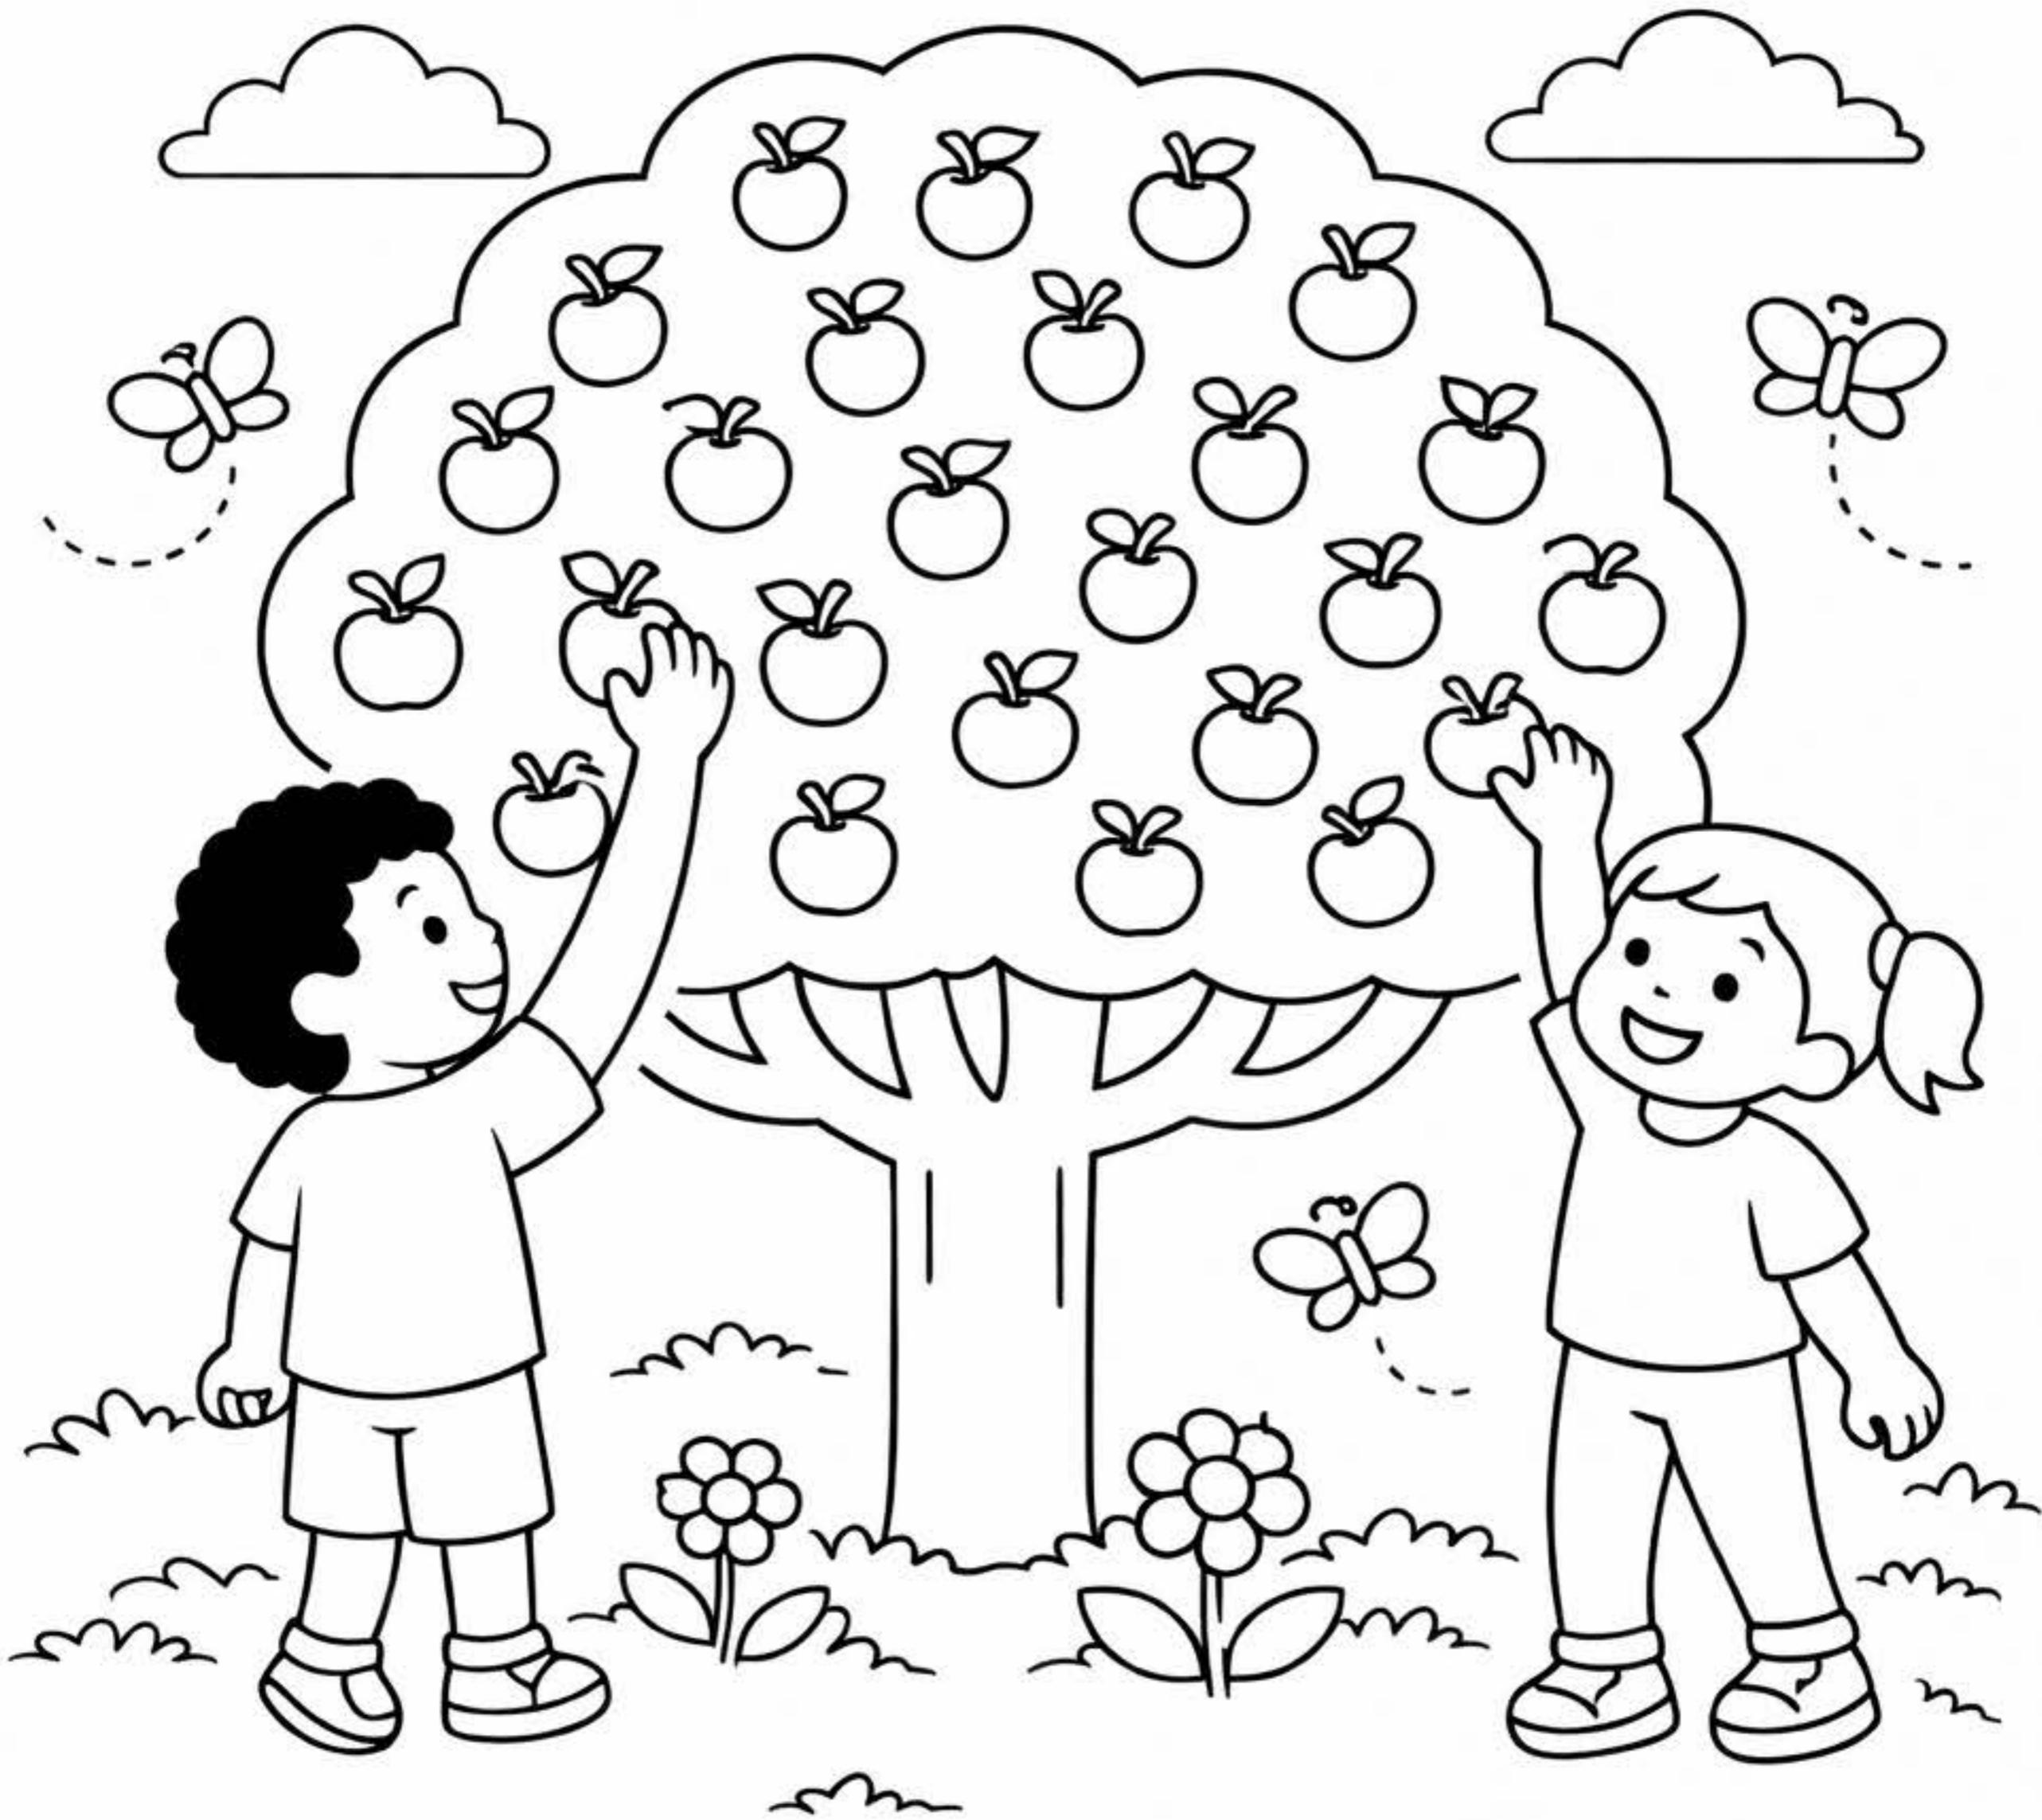

Some apples are sweet and some are tart.

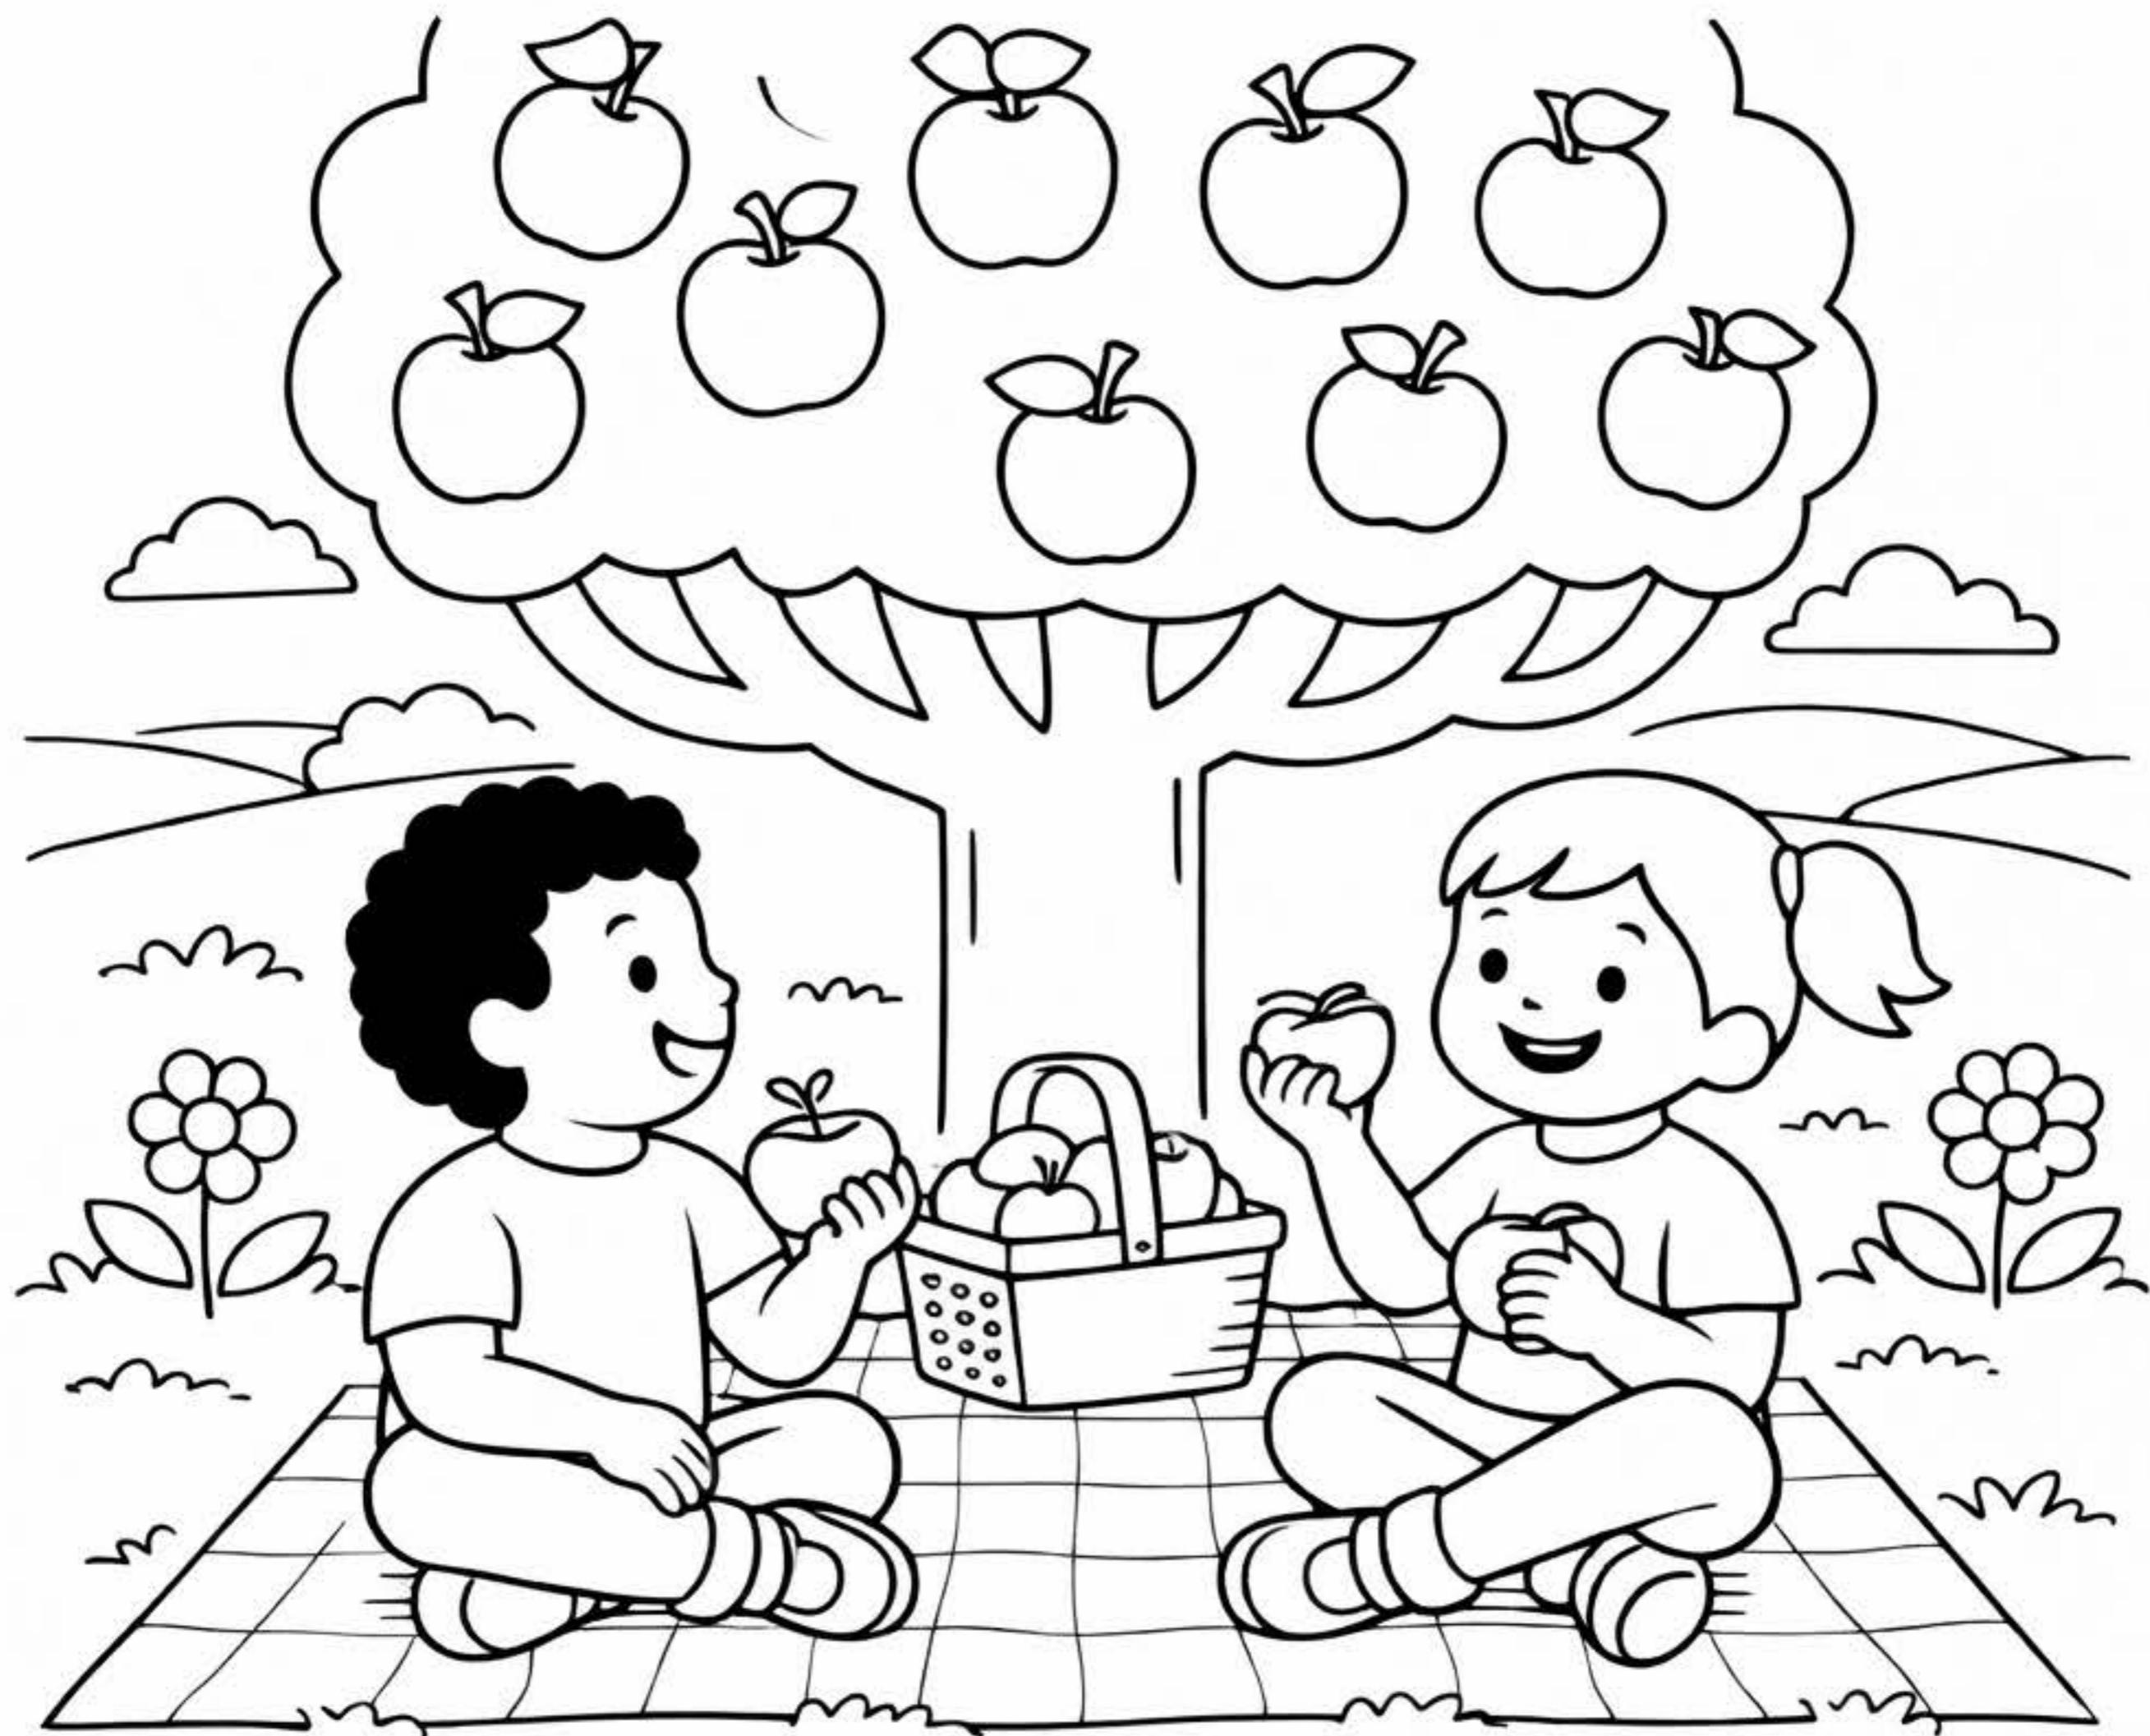

Galarina Apple Tree

Different apple trees grow different apples.

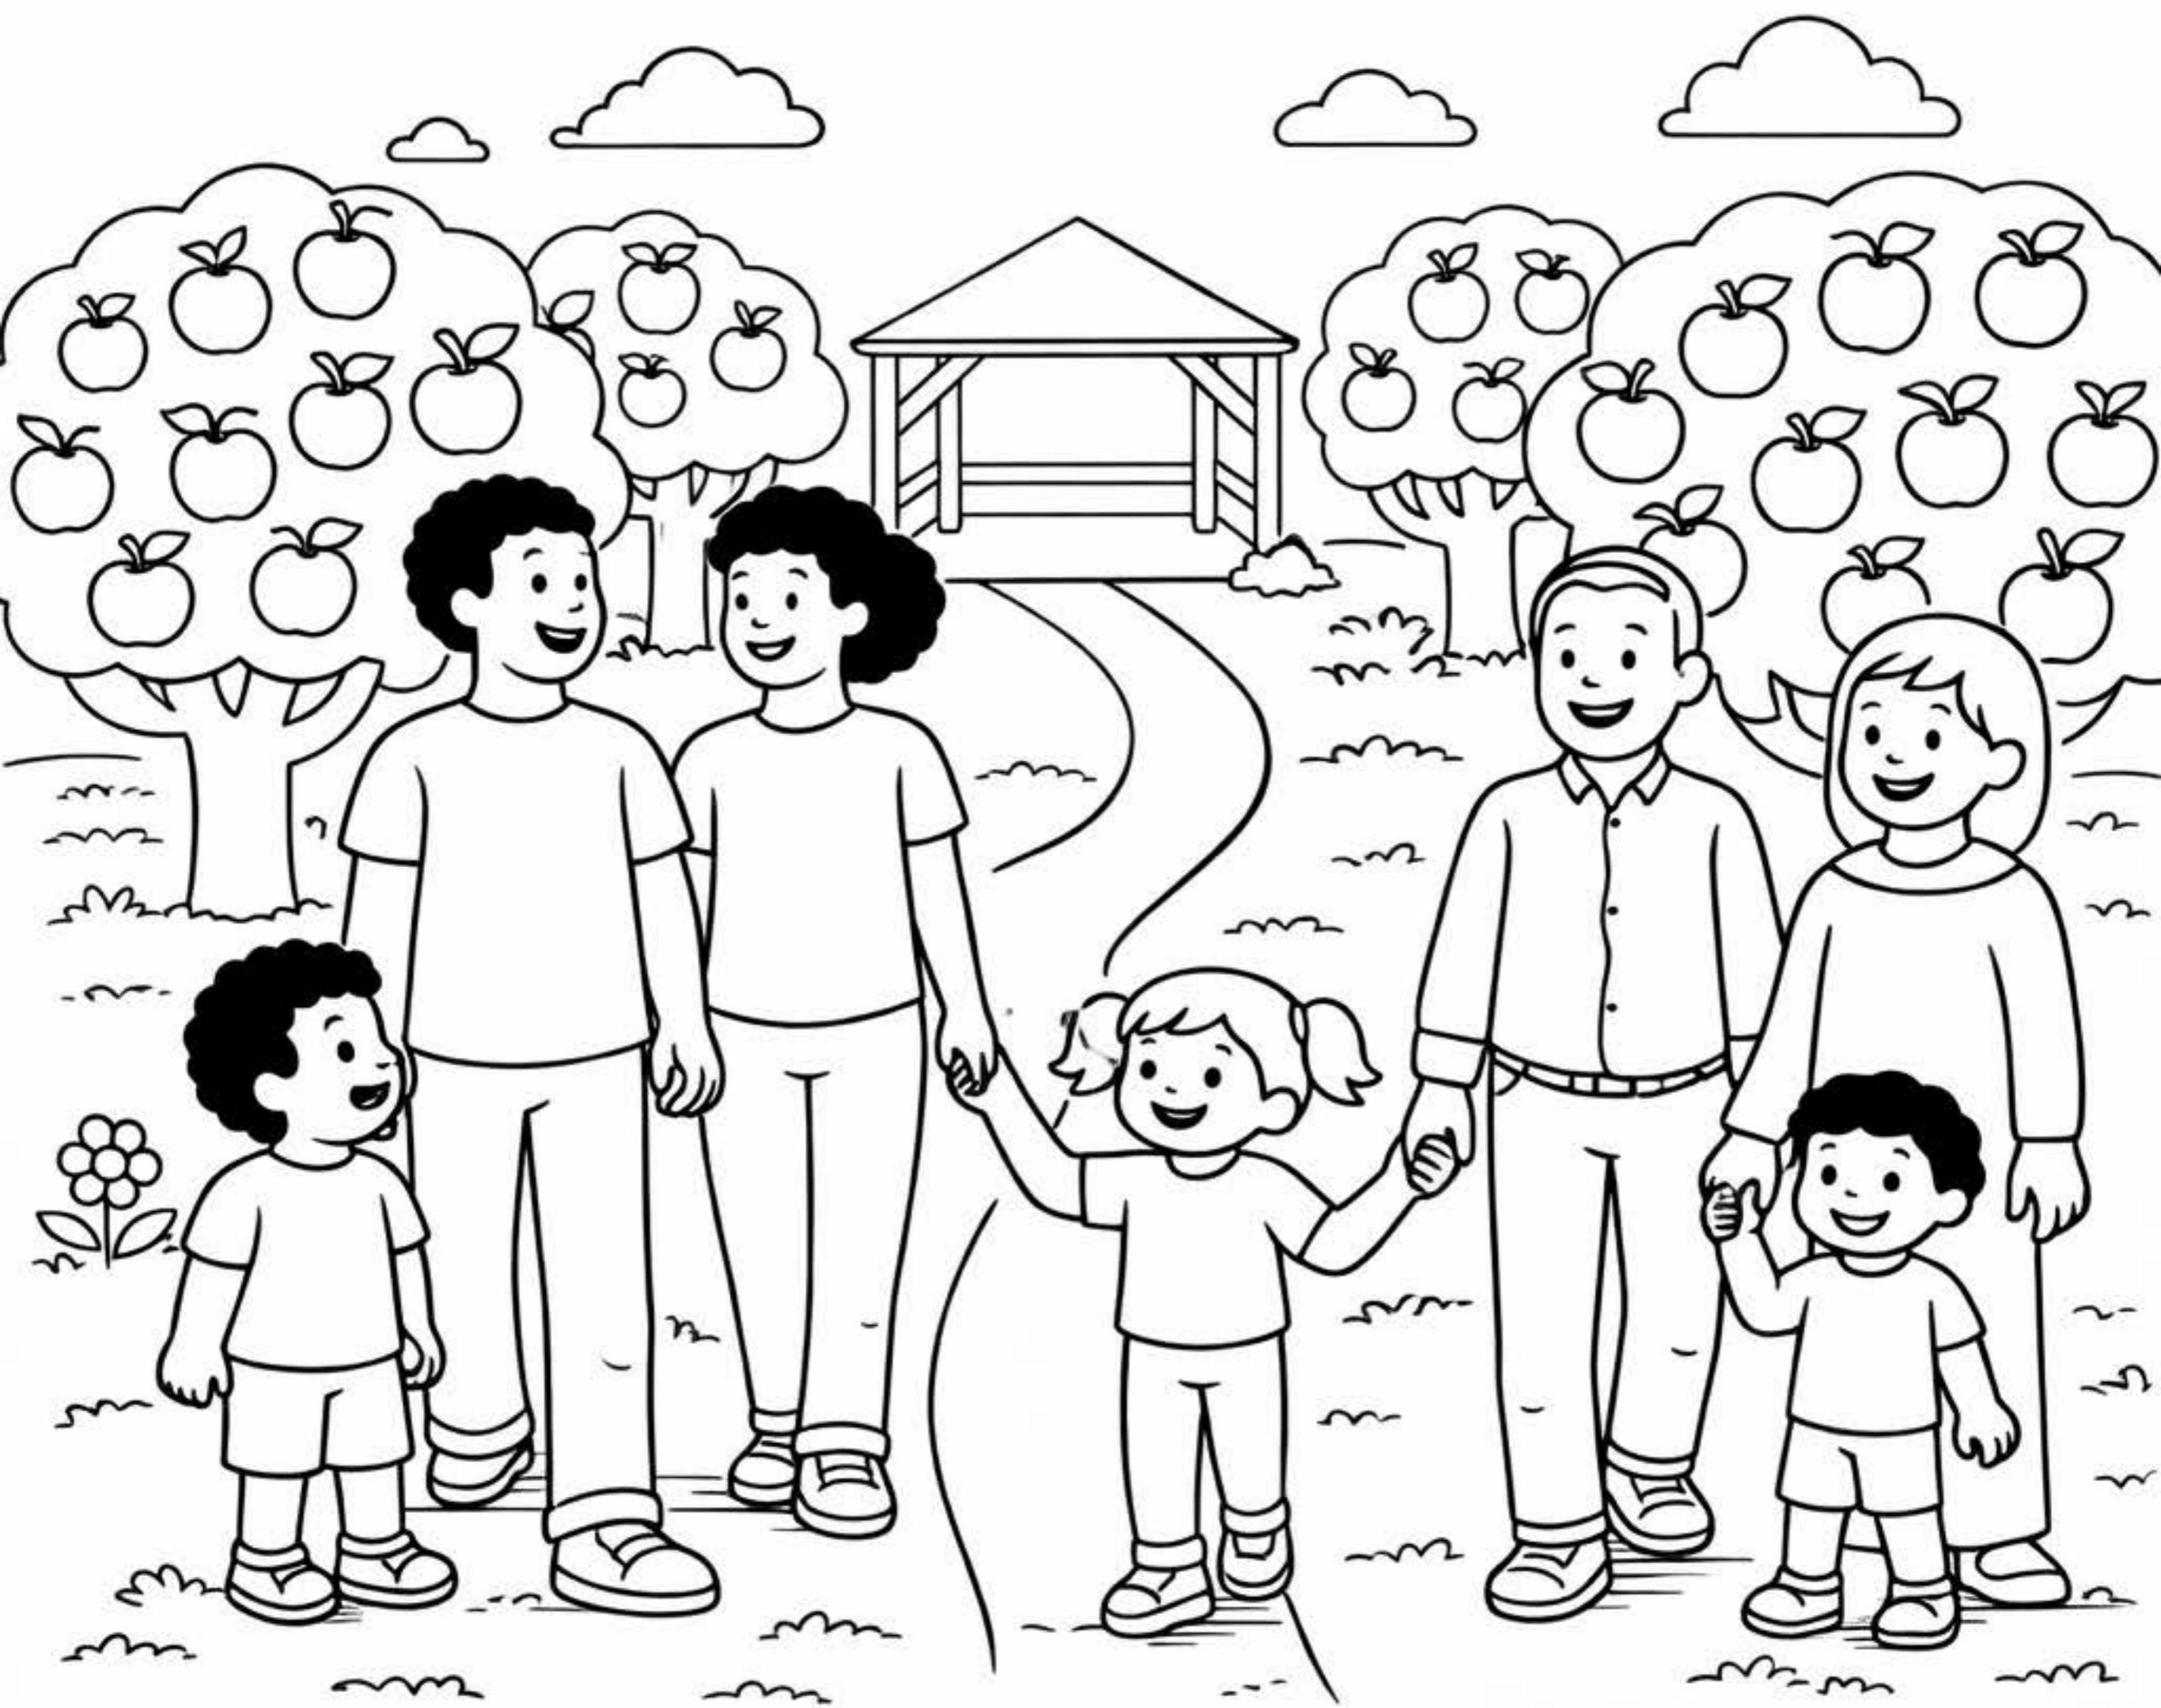

Pixie Crunch Apples

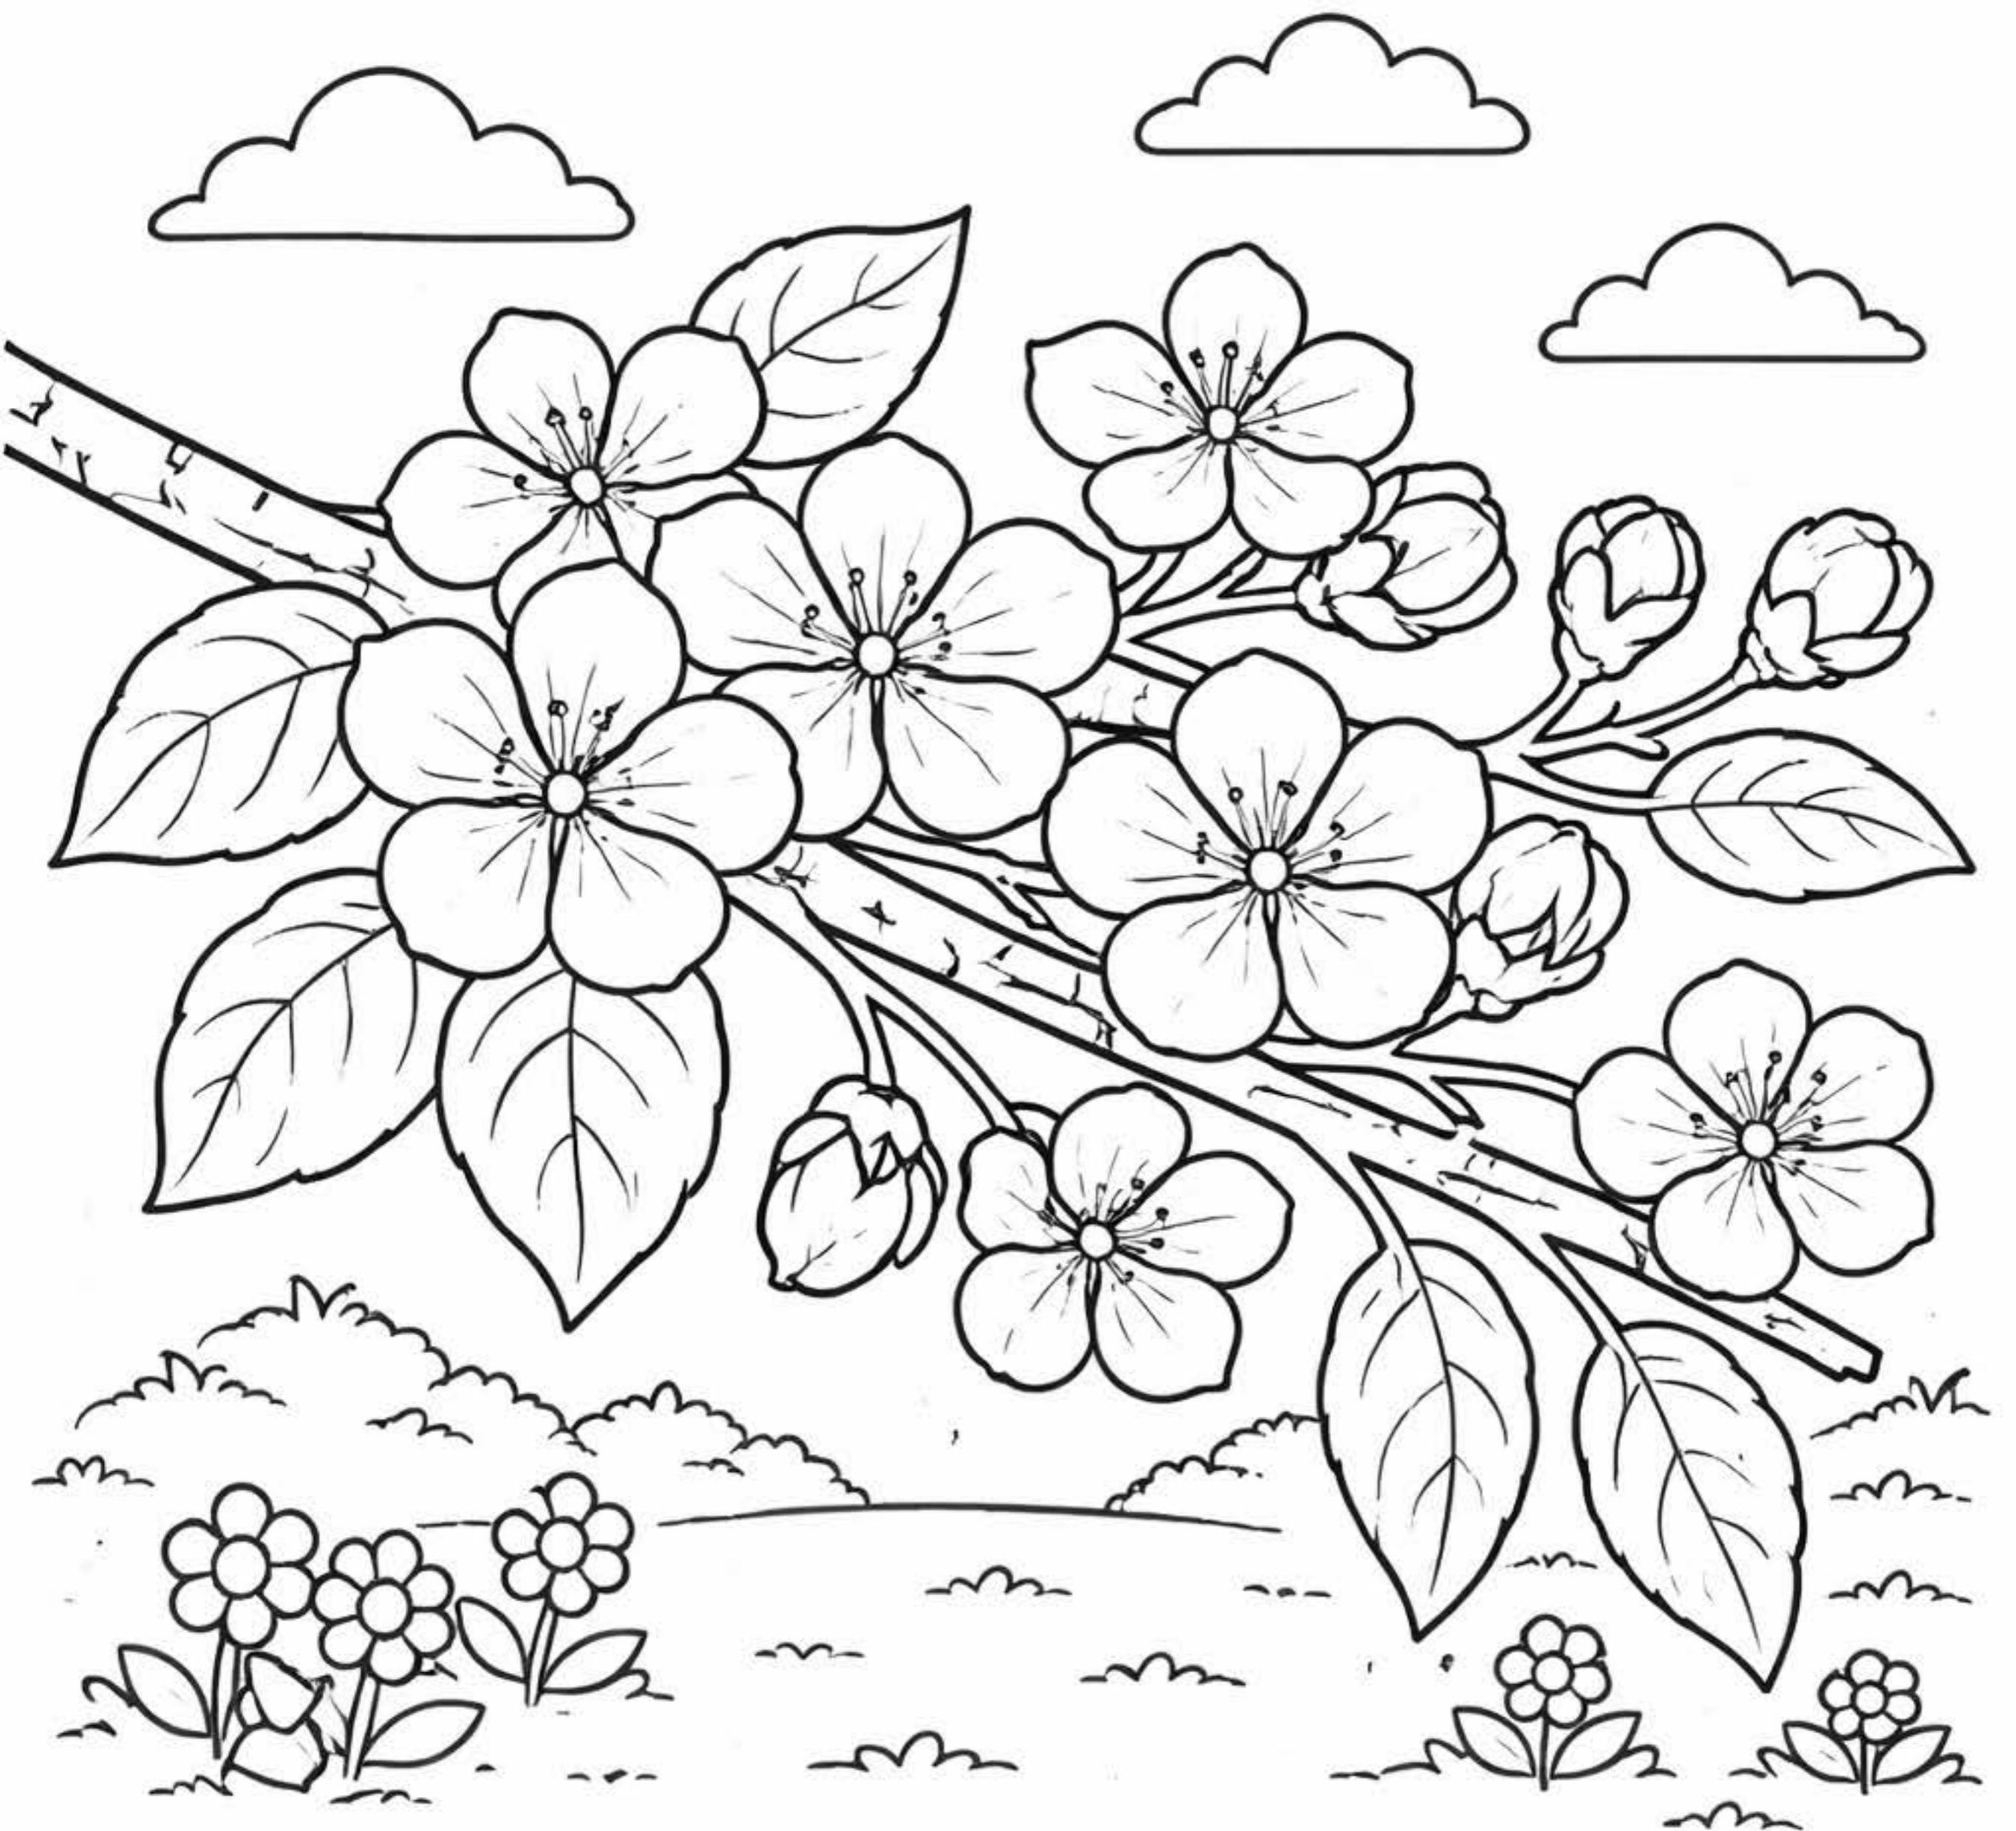

Tiny apples can be very crunchy!

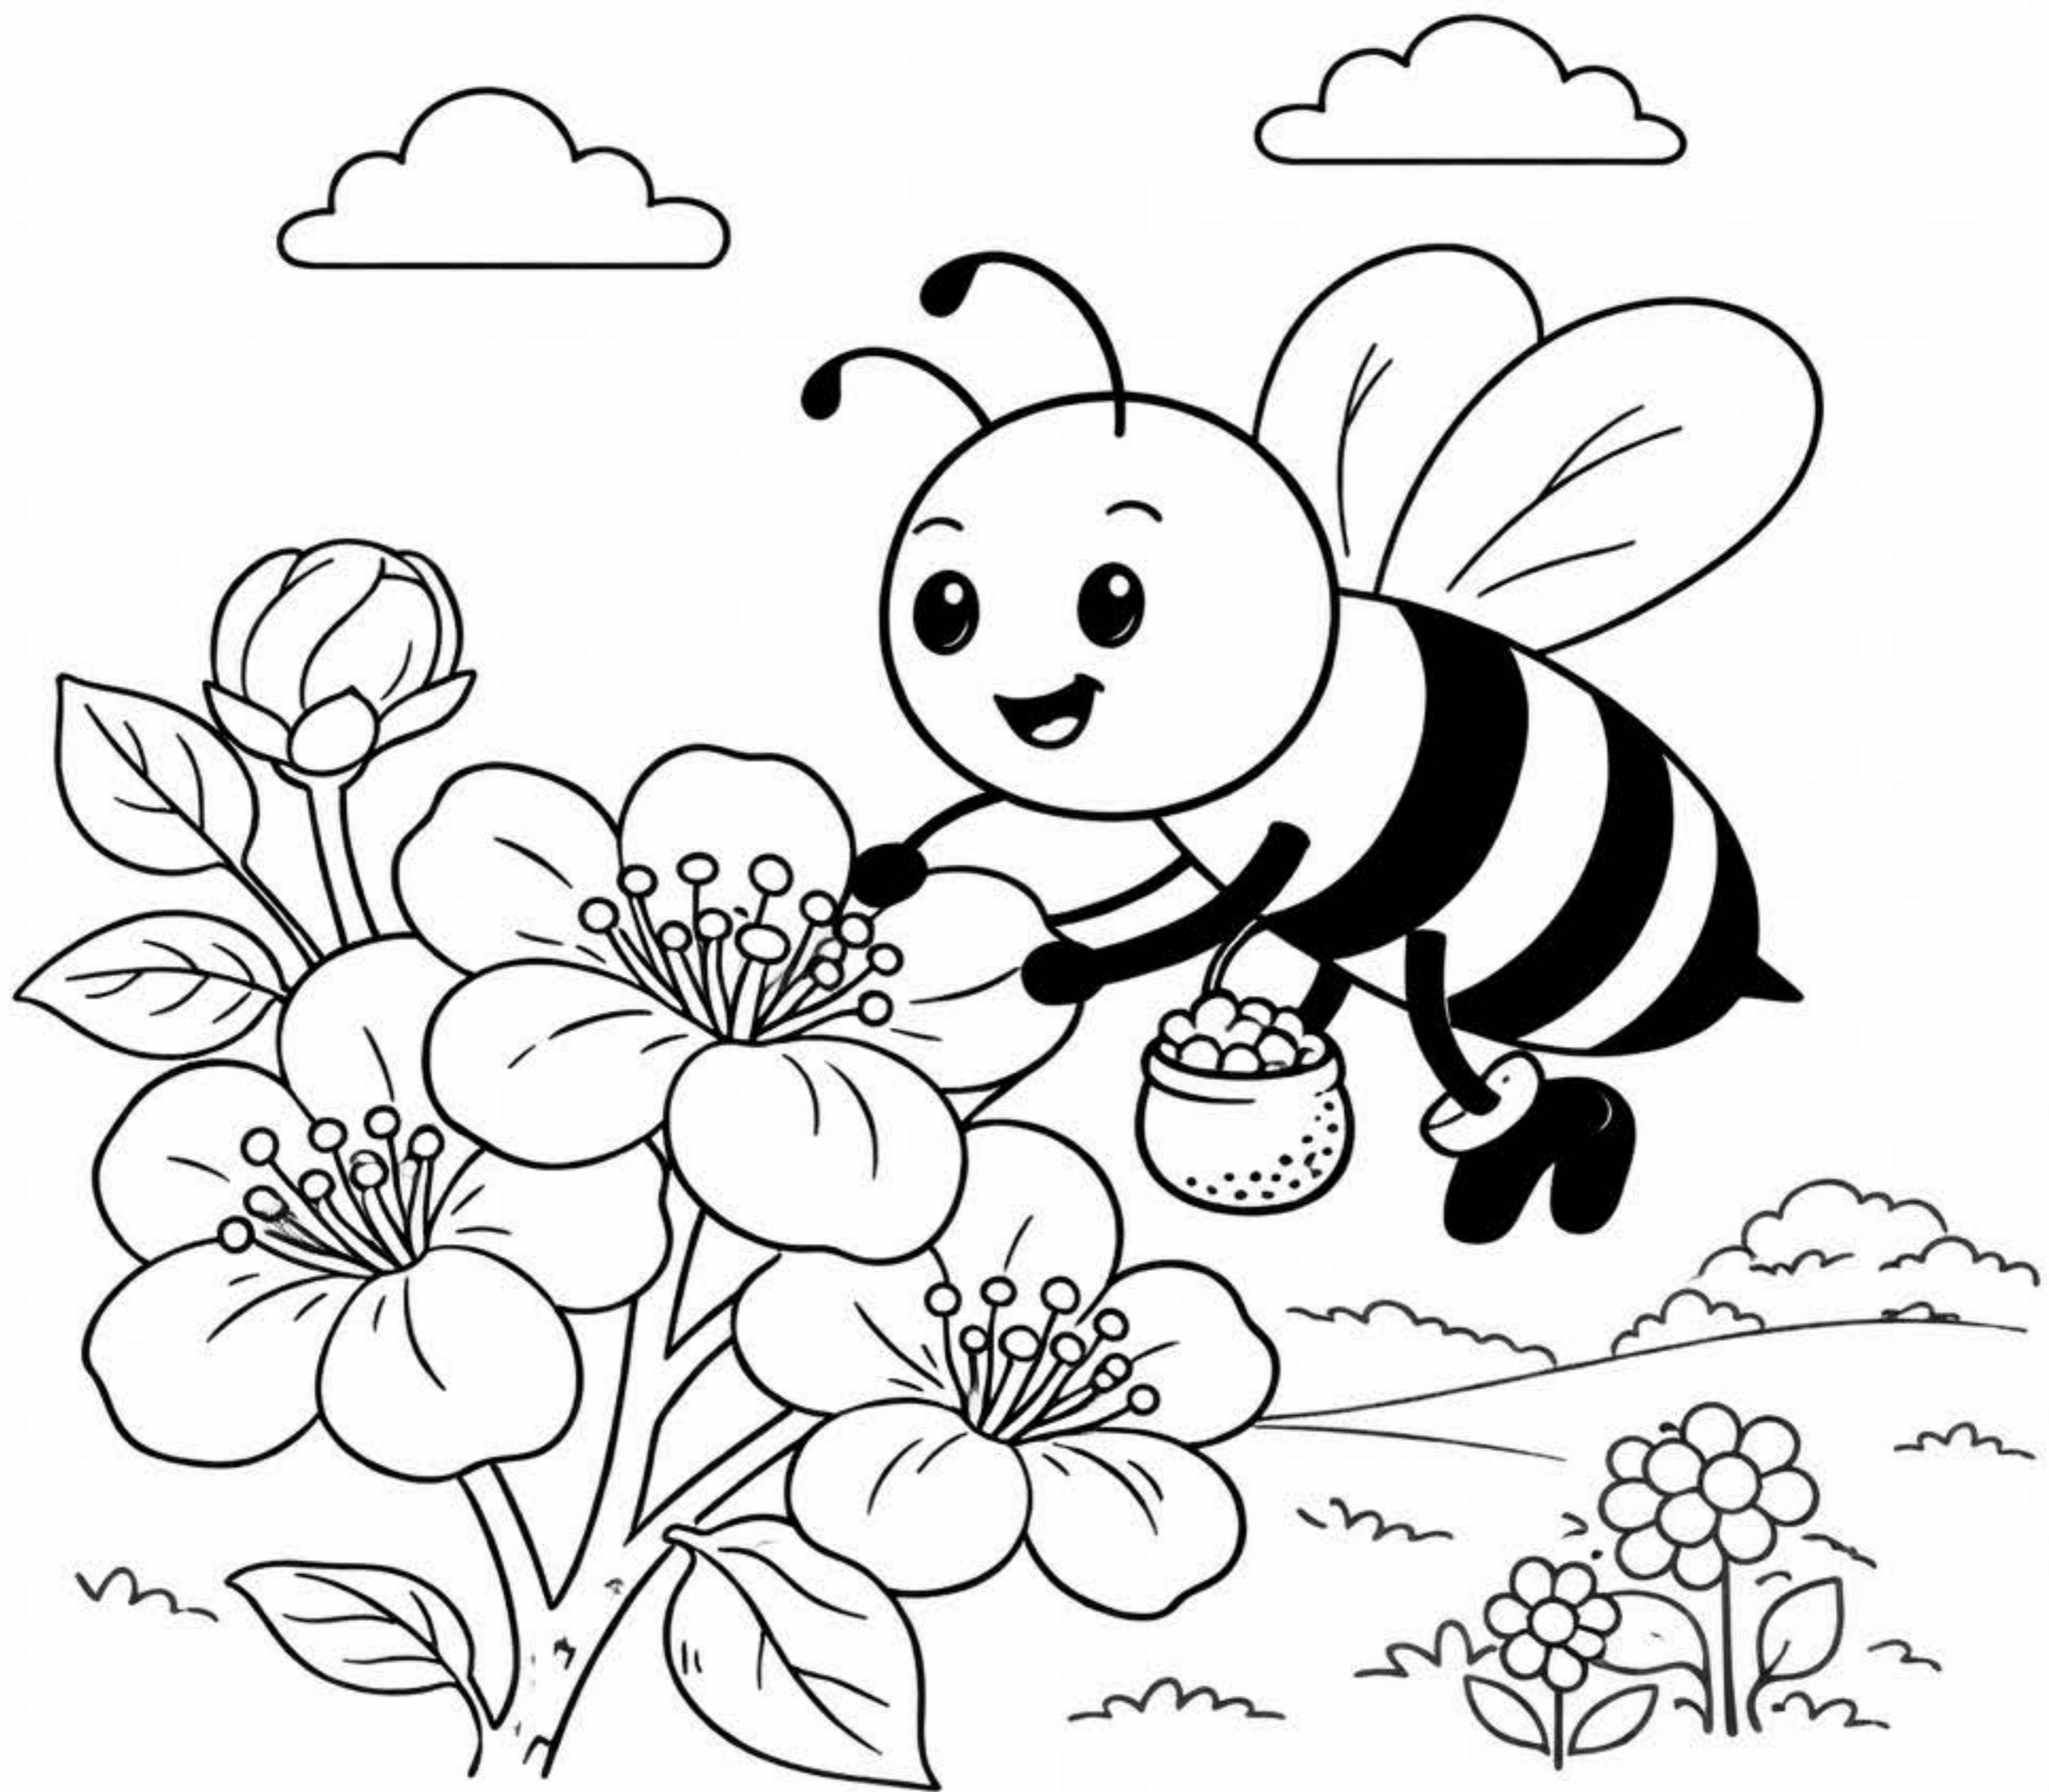

The orchard is a great place to rest and share.

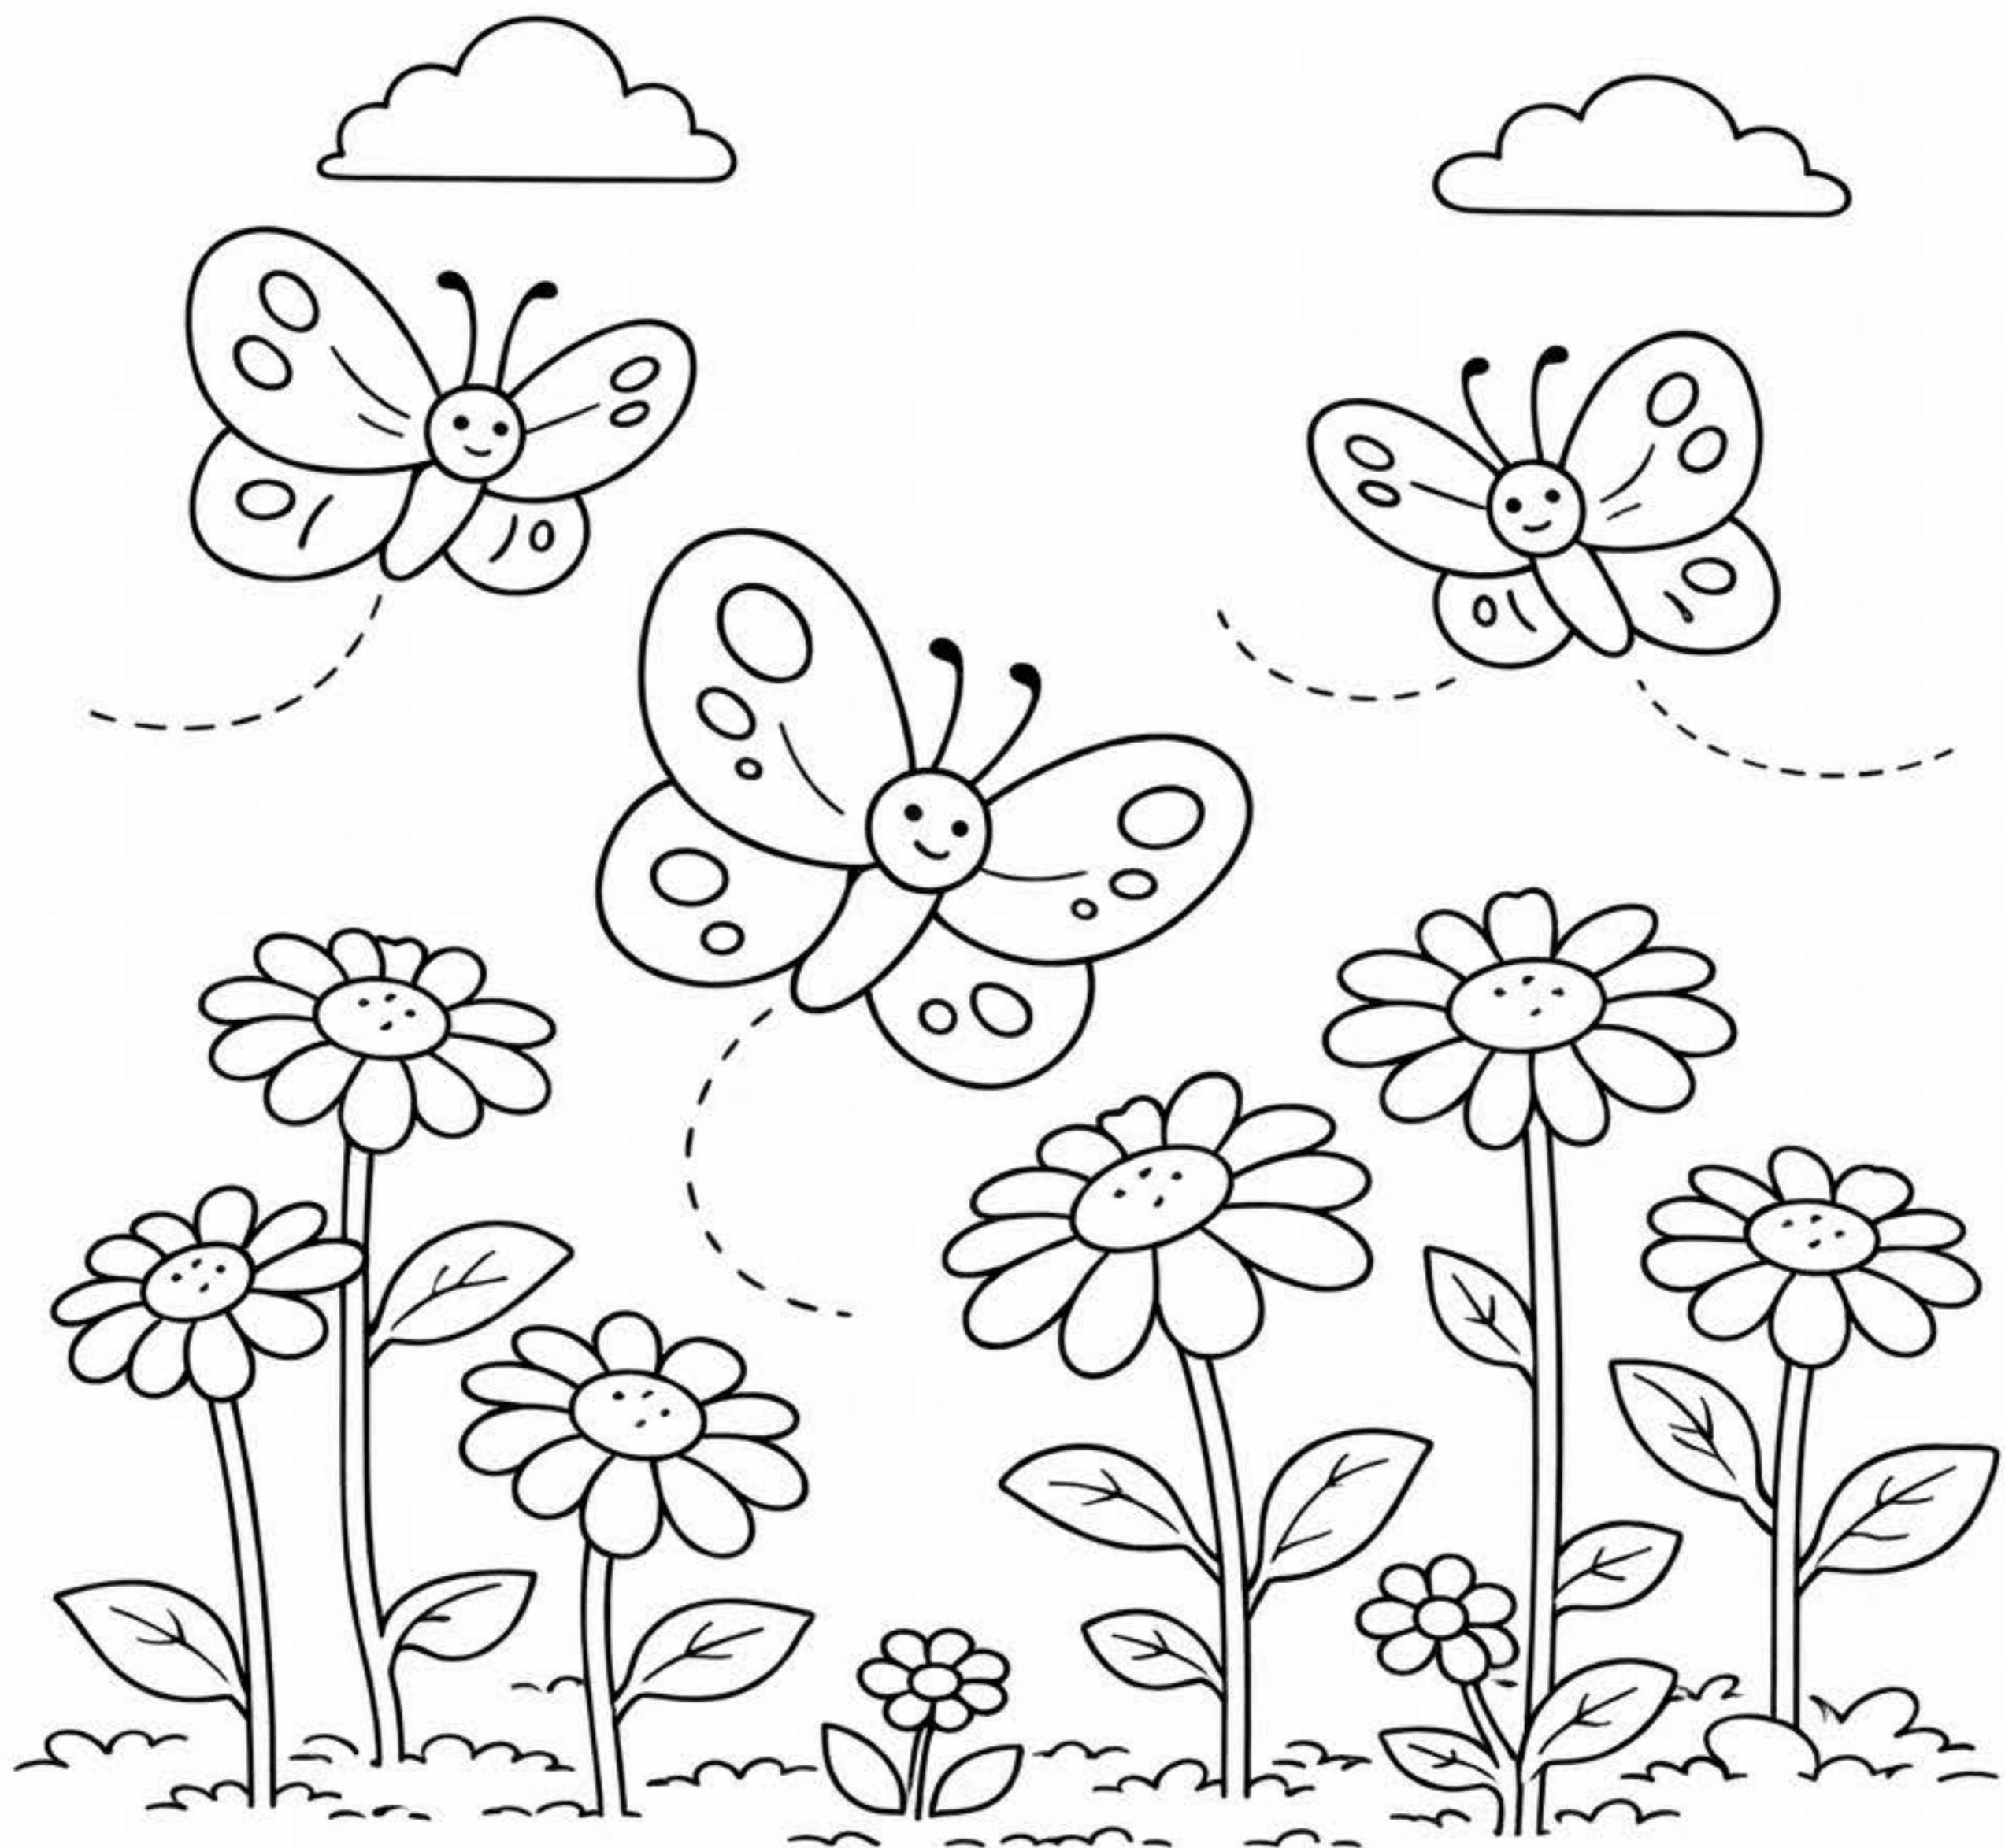

The orchard is for everyone

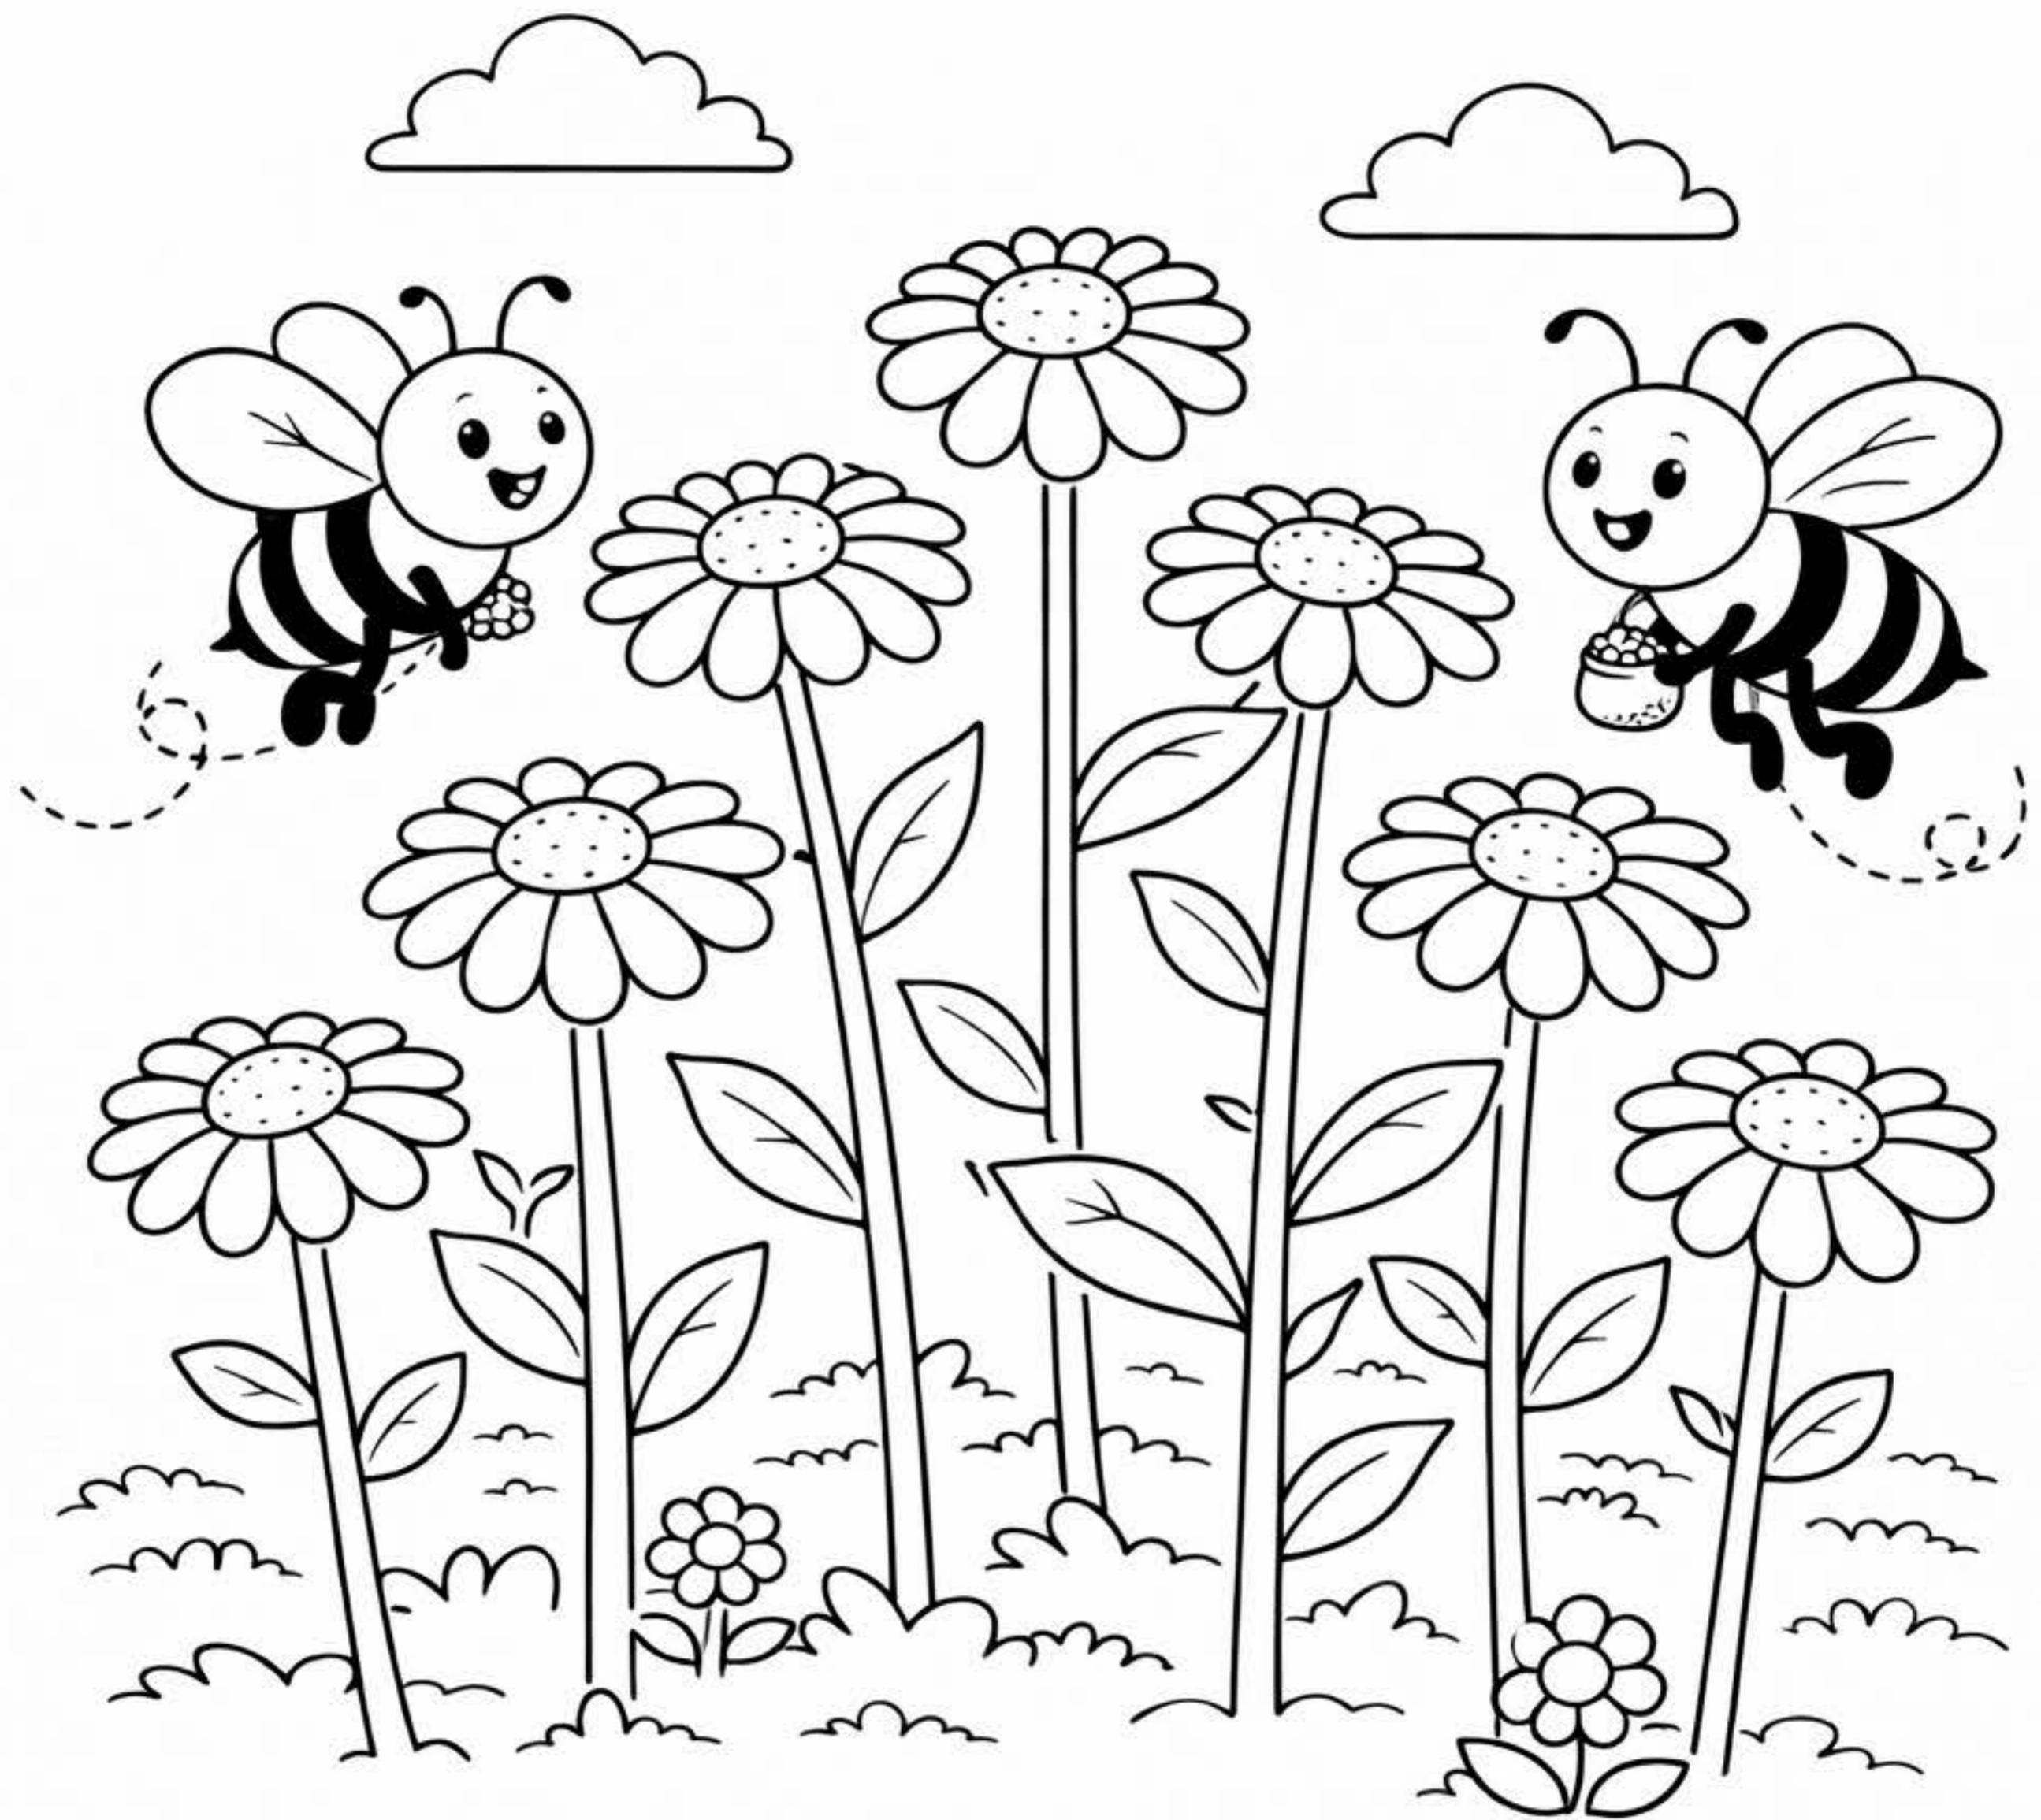

Flowers grow before apples.

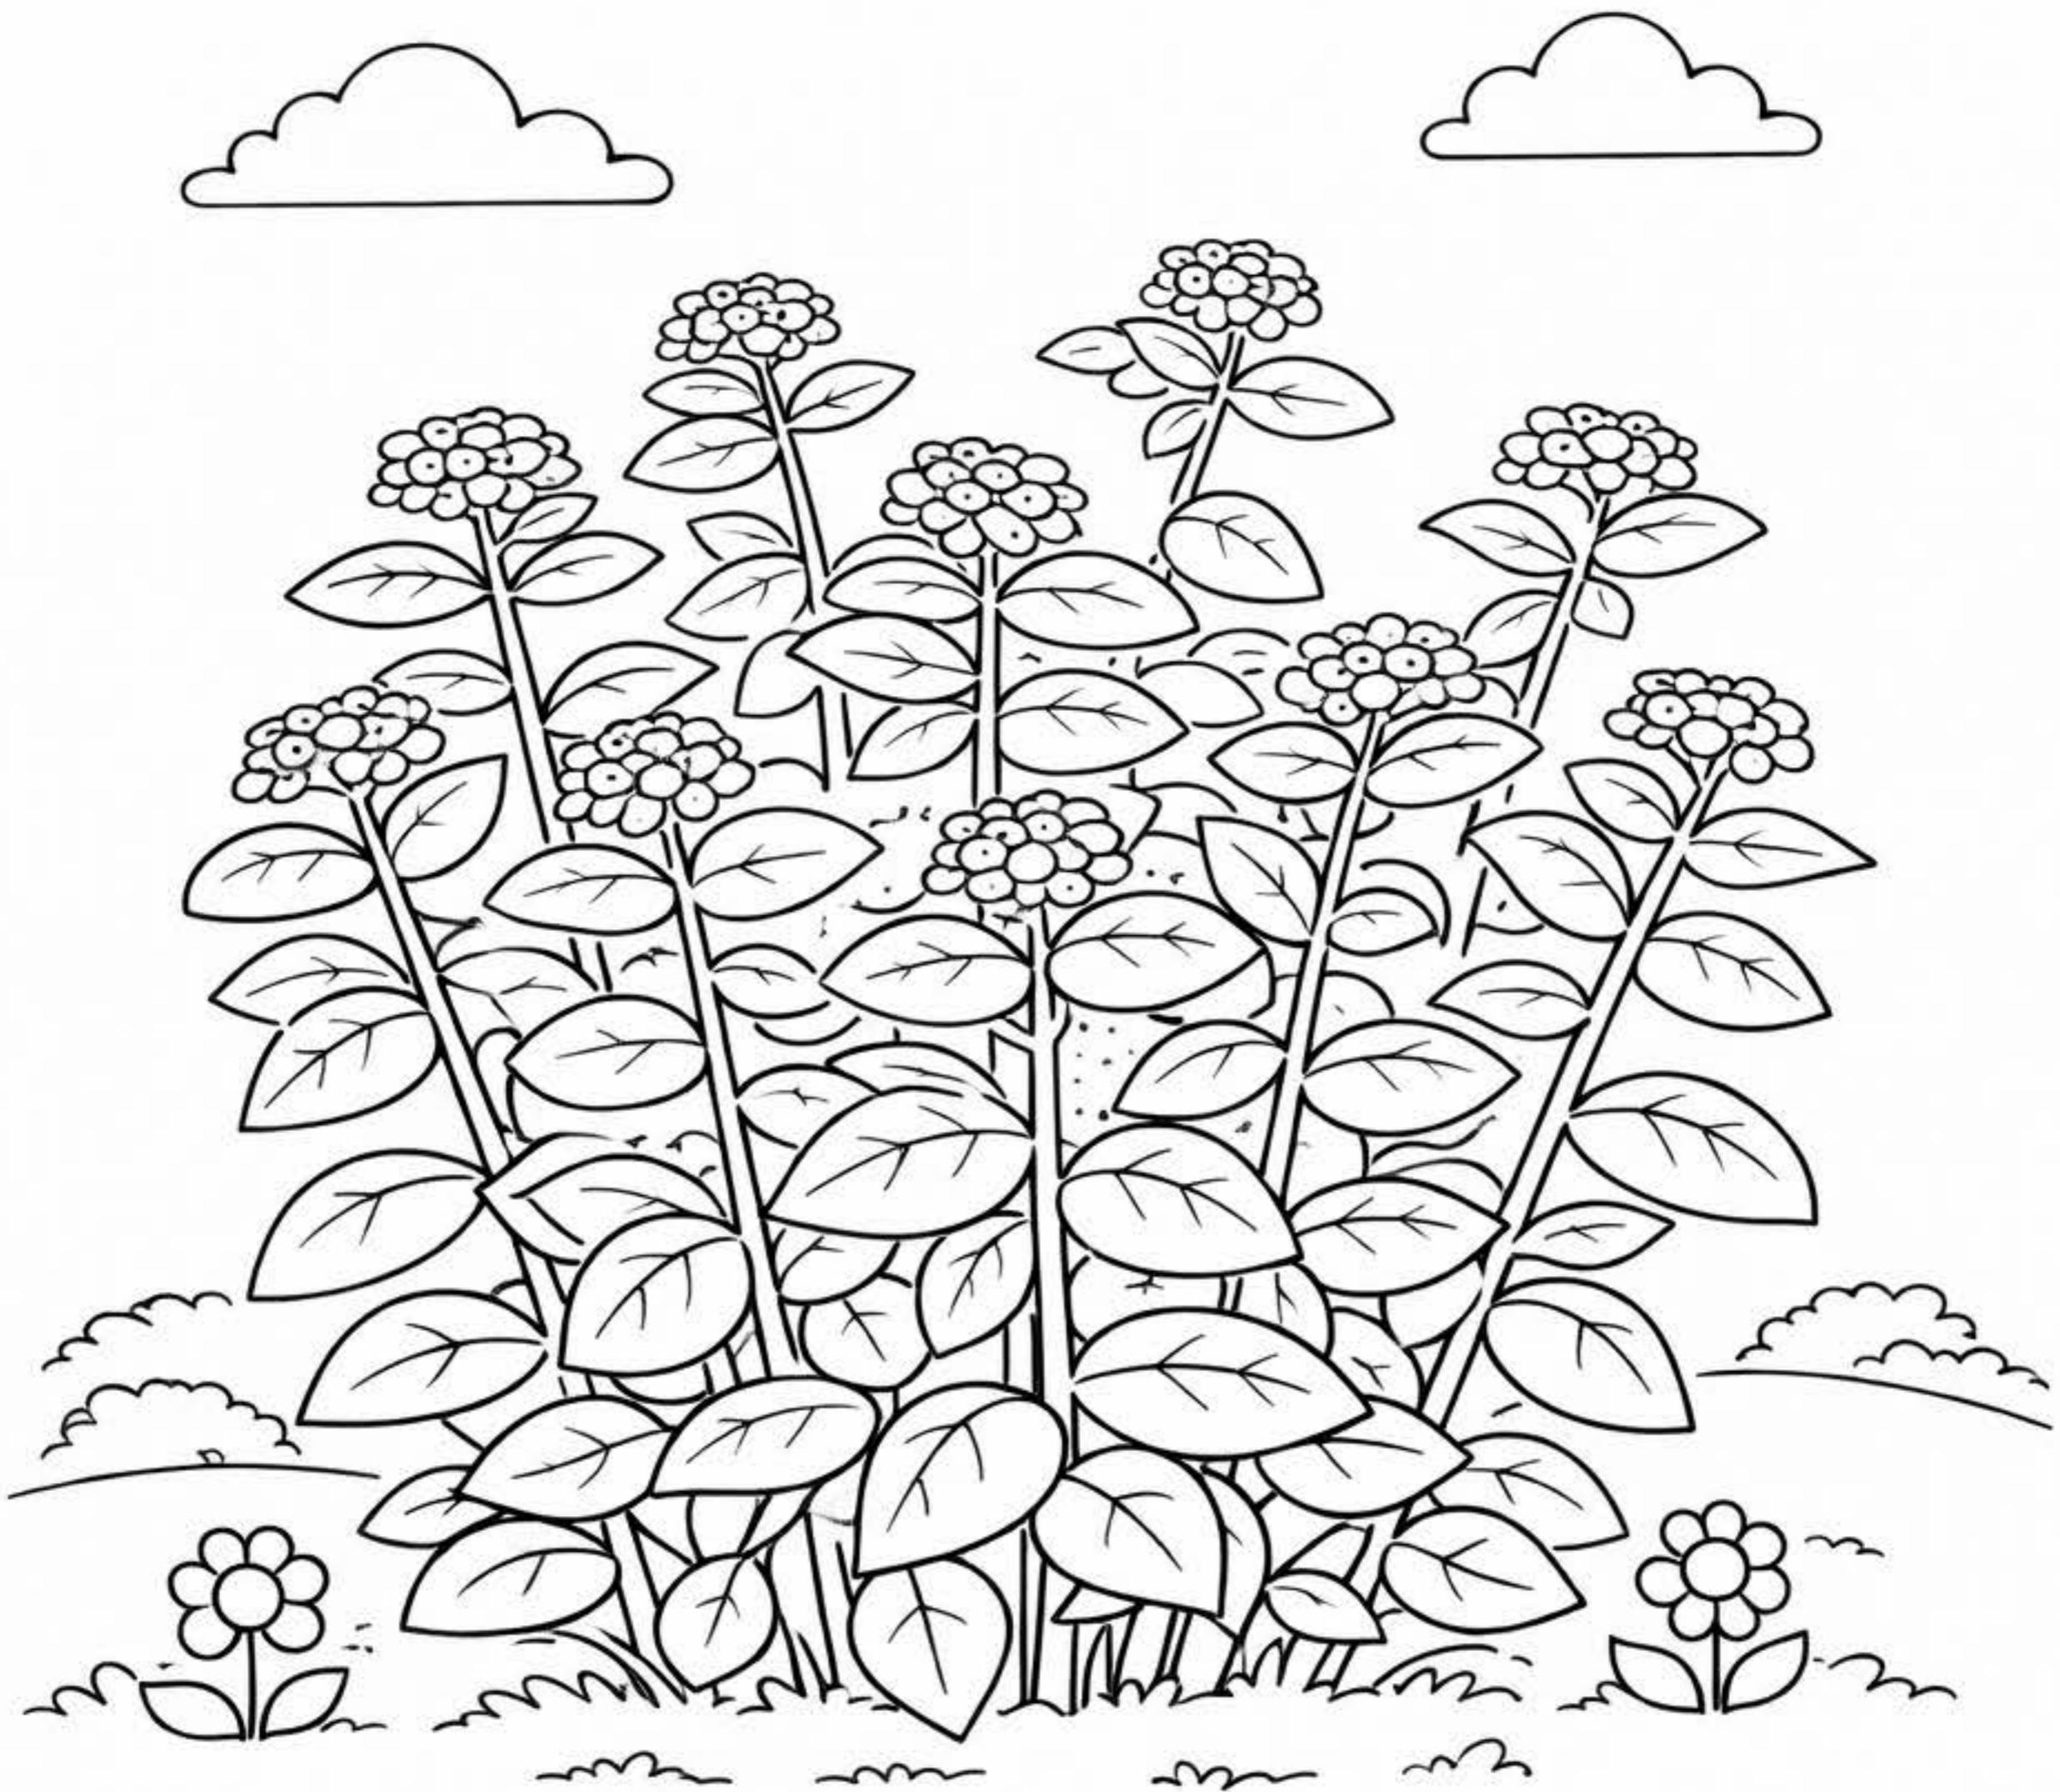

Bees help flowers become fruit.

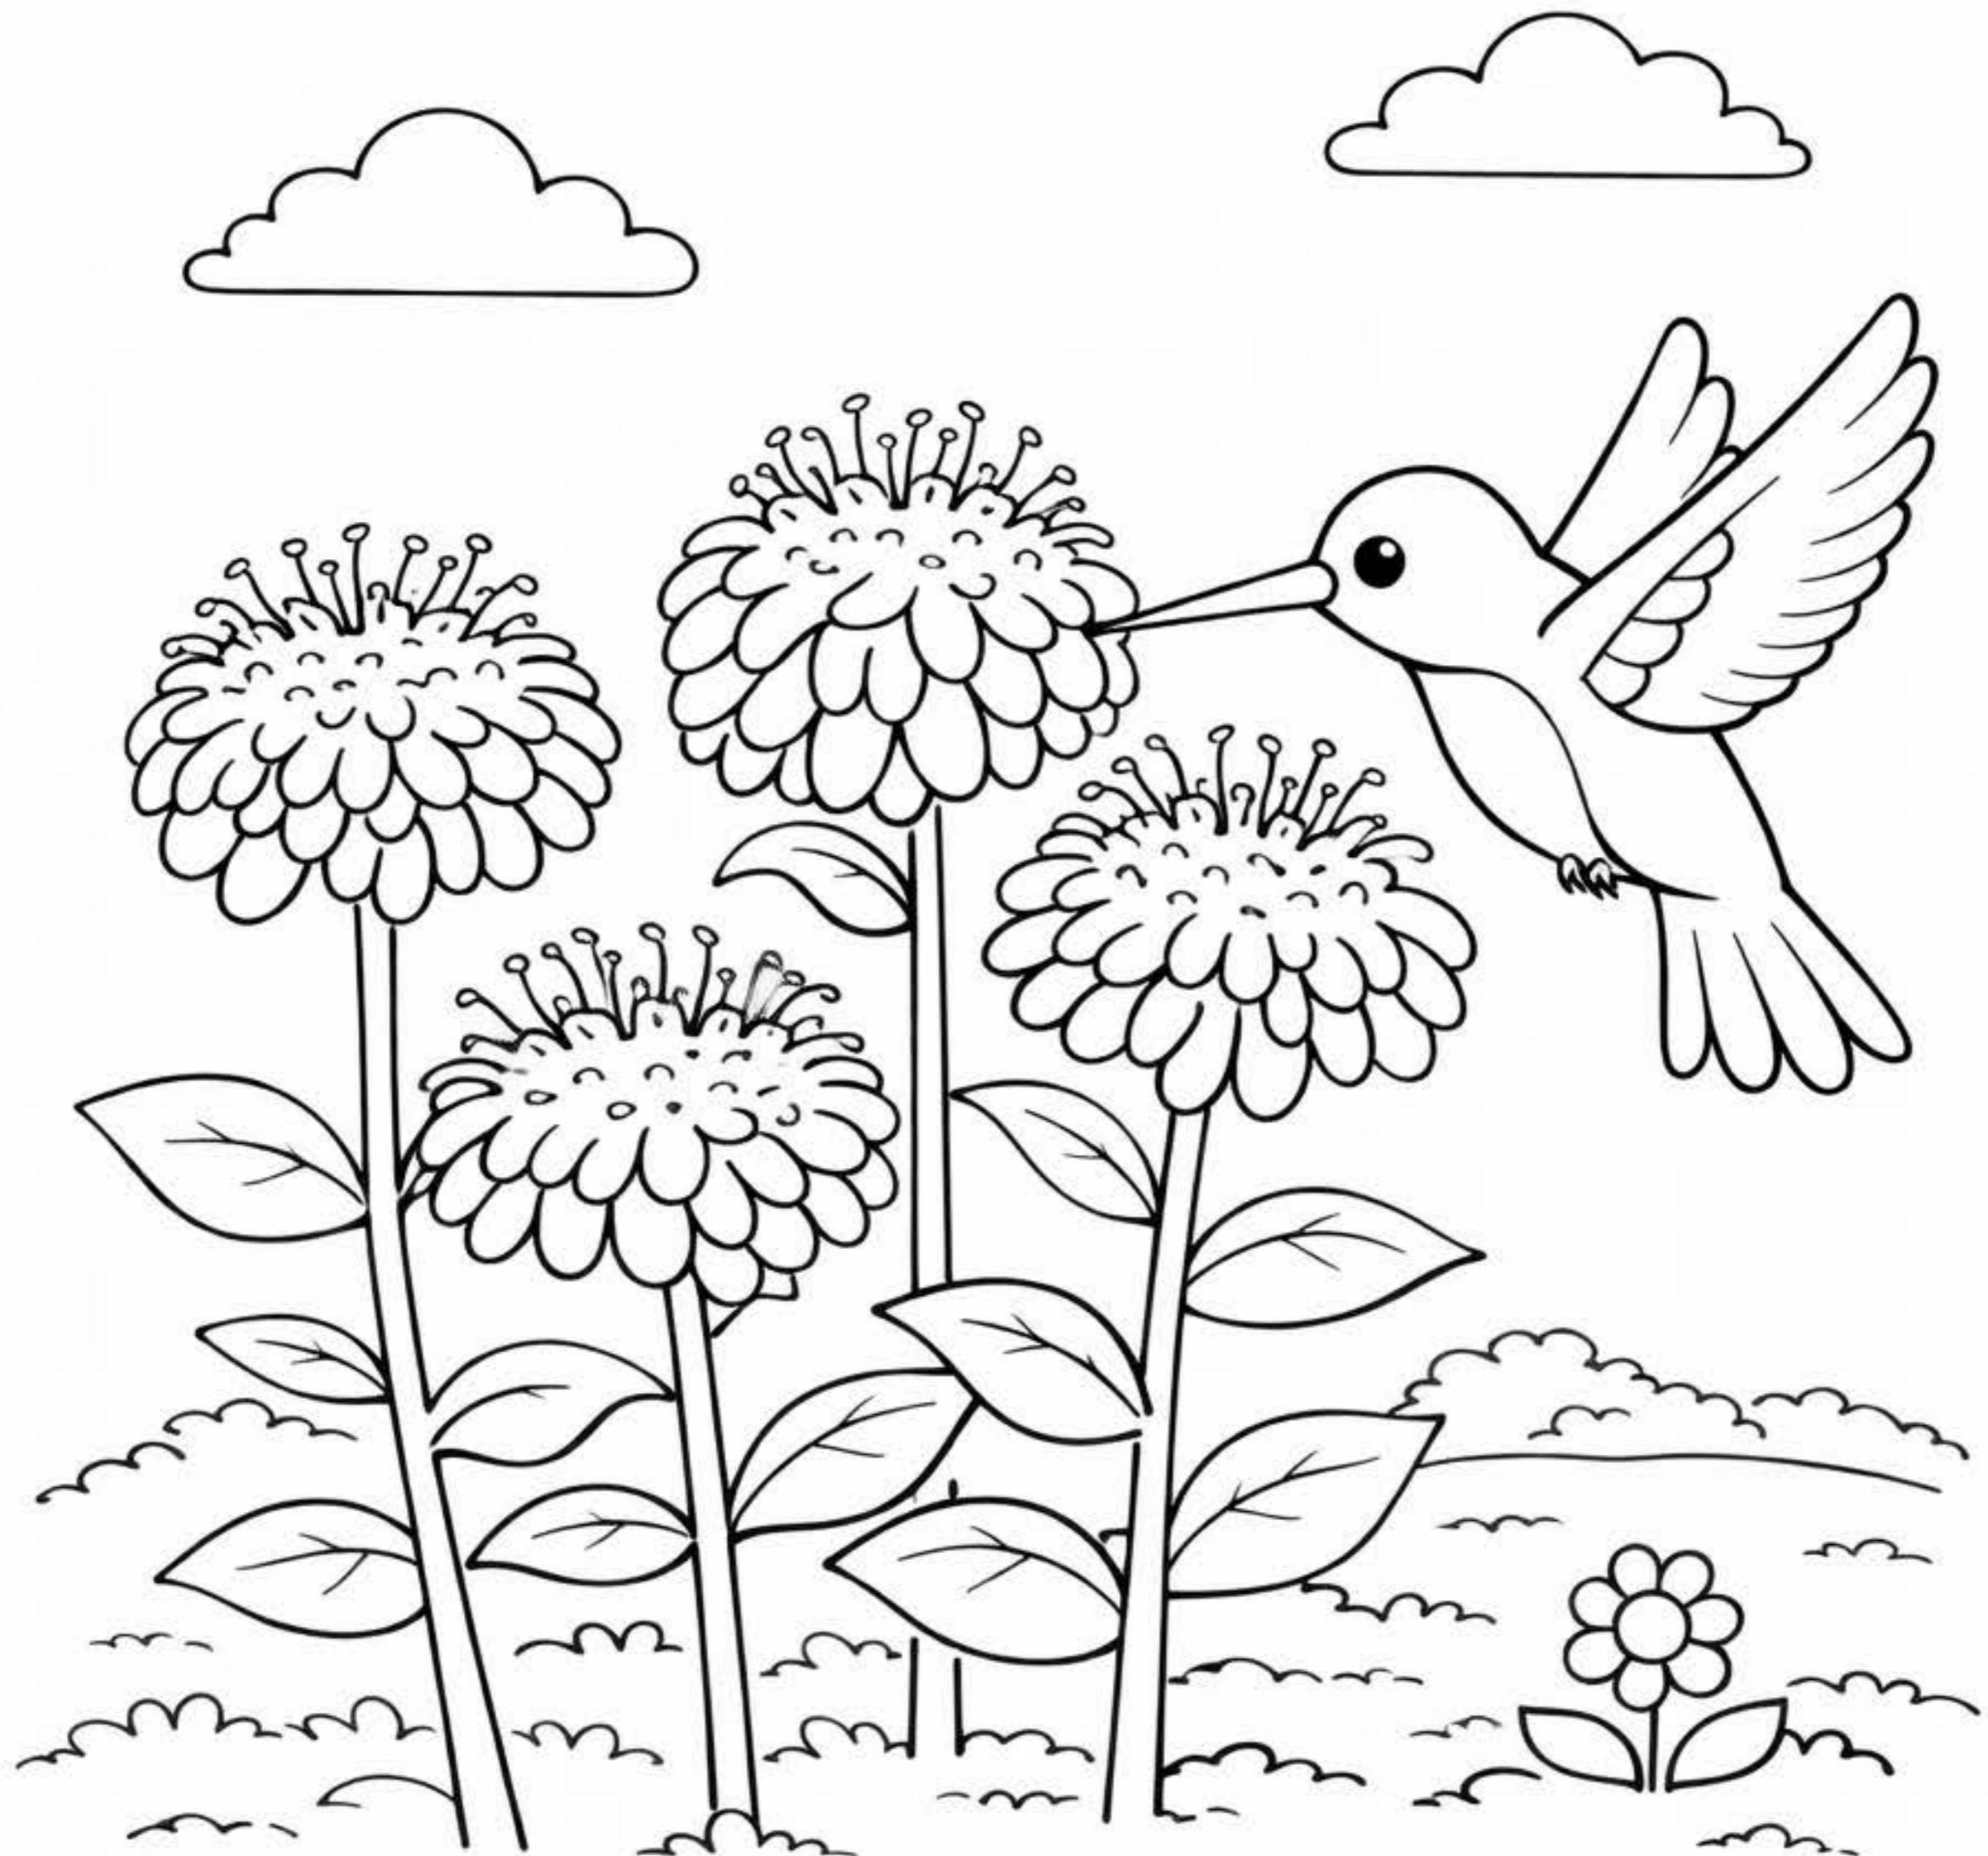

Butterflies love nectar from flowers.

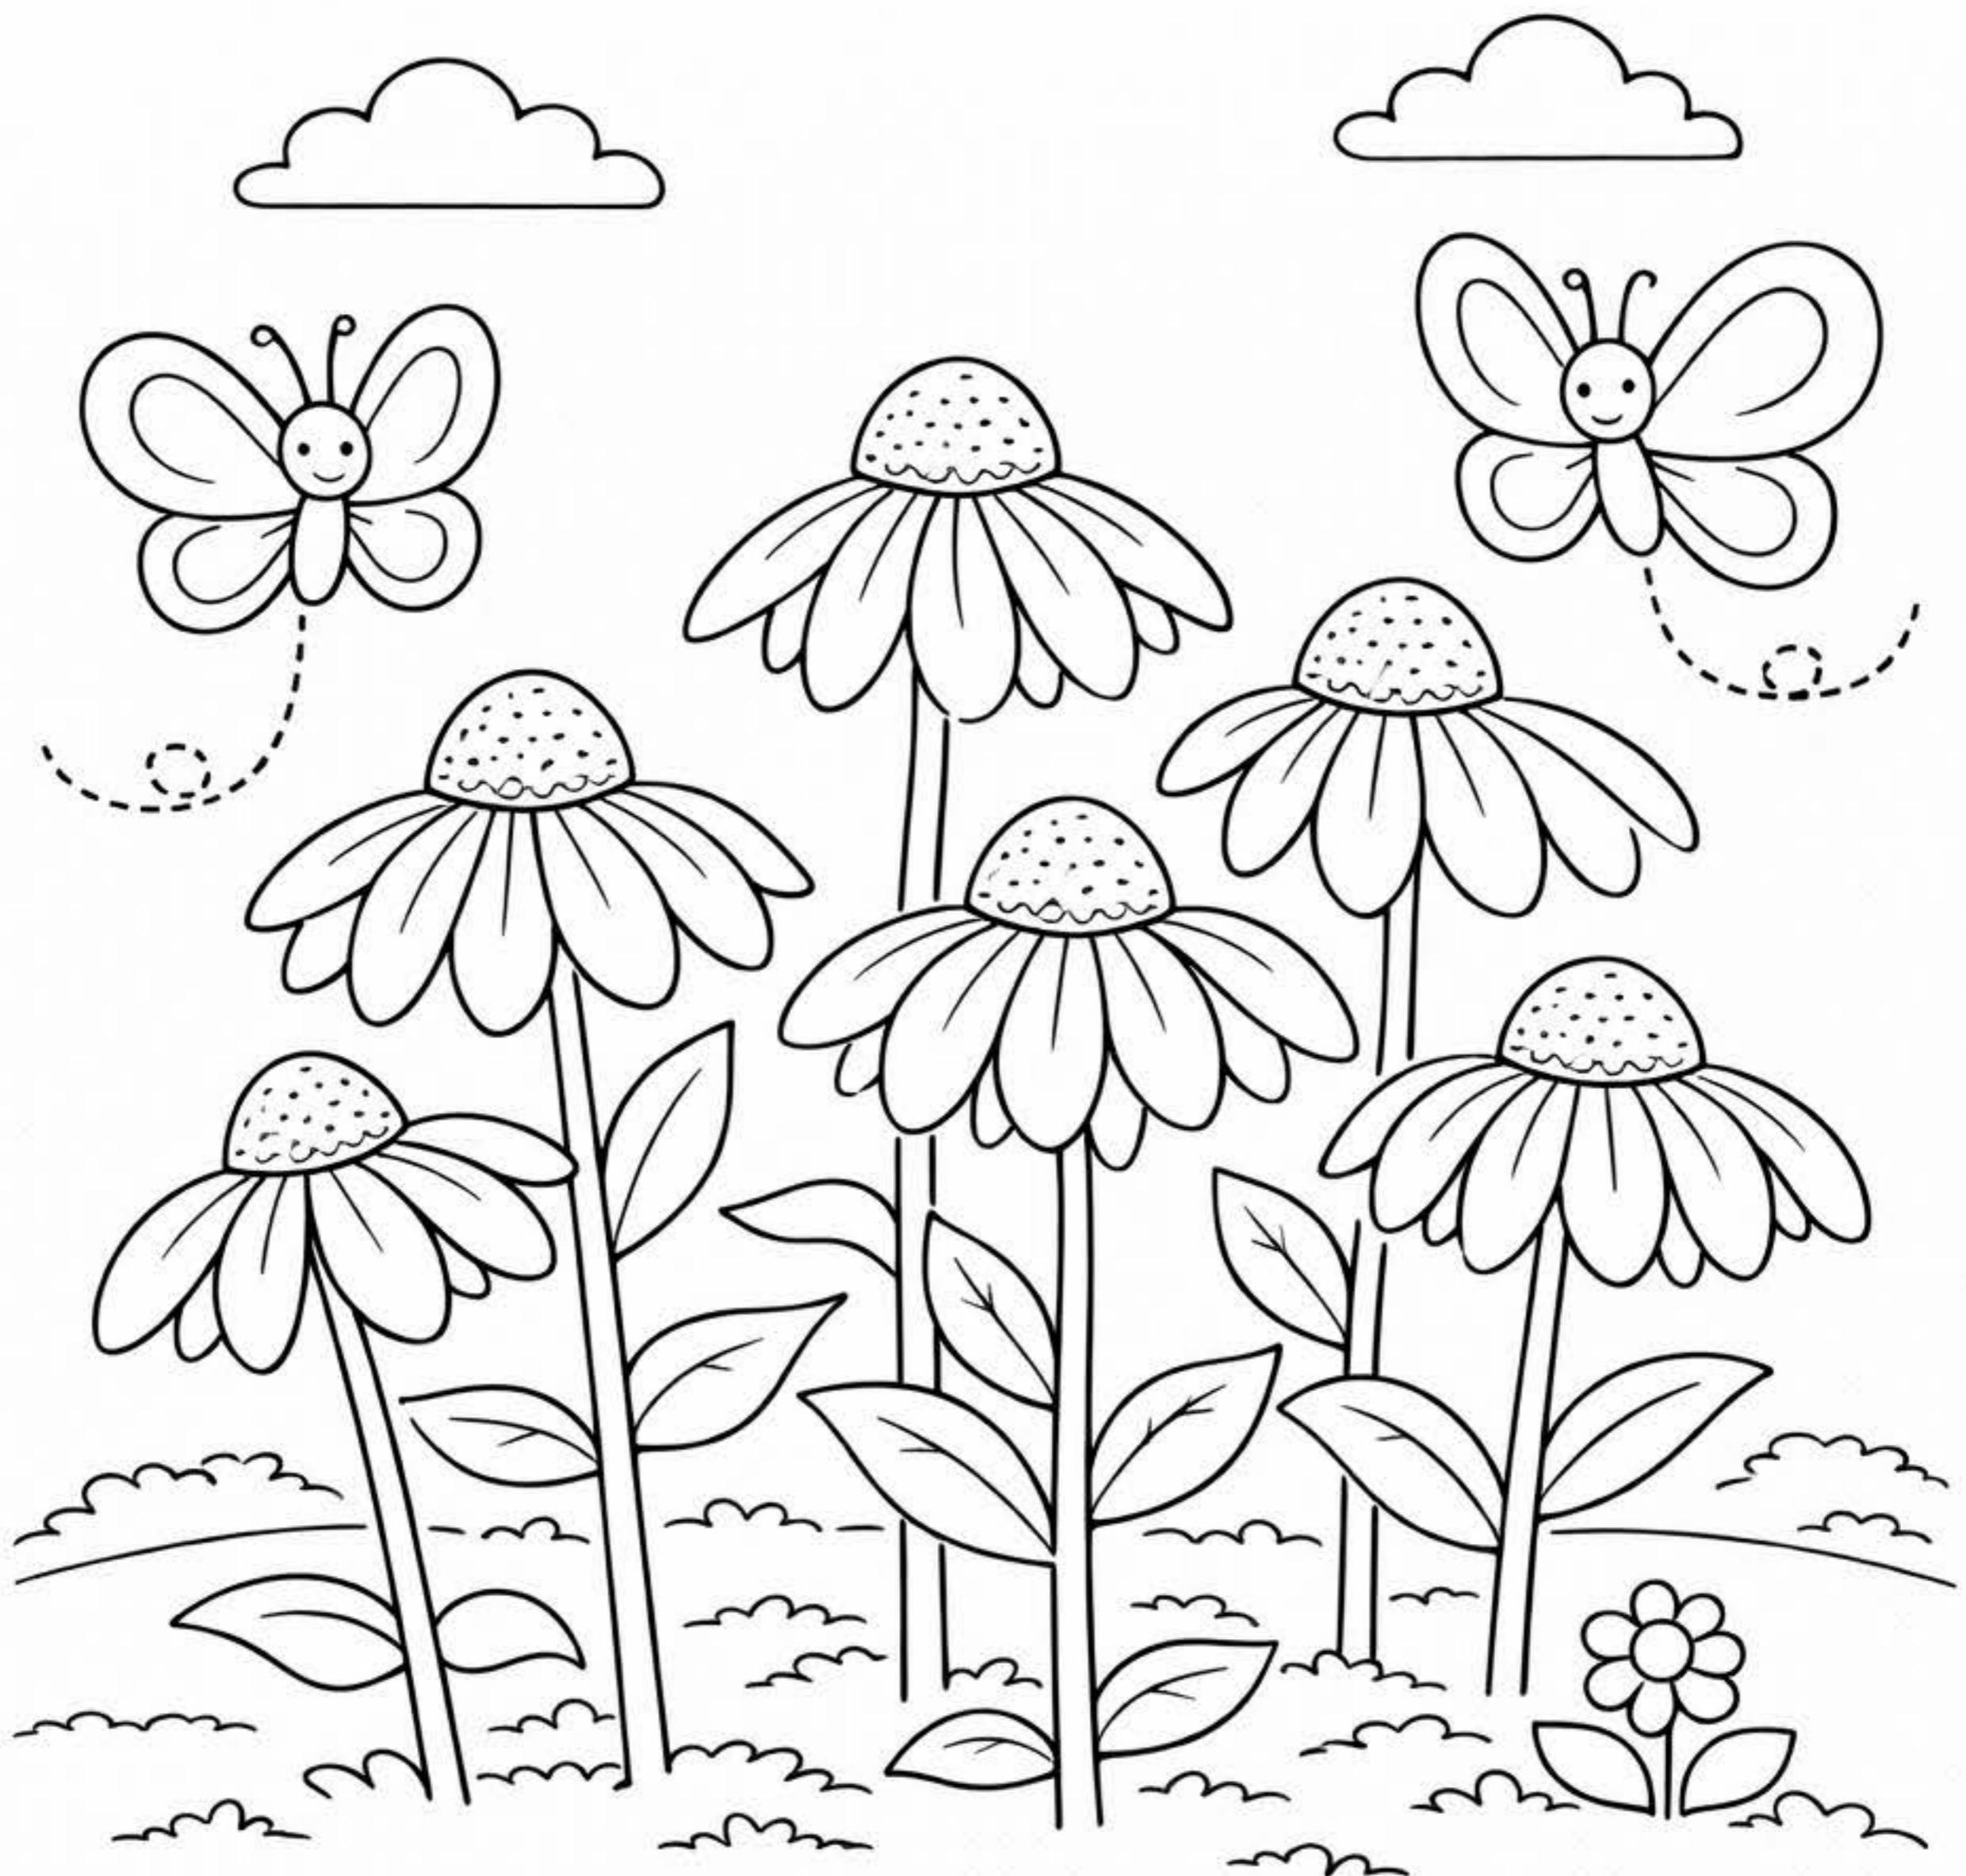

Pollinator plants help insects thrive.

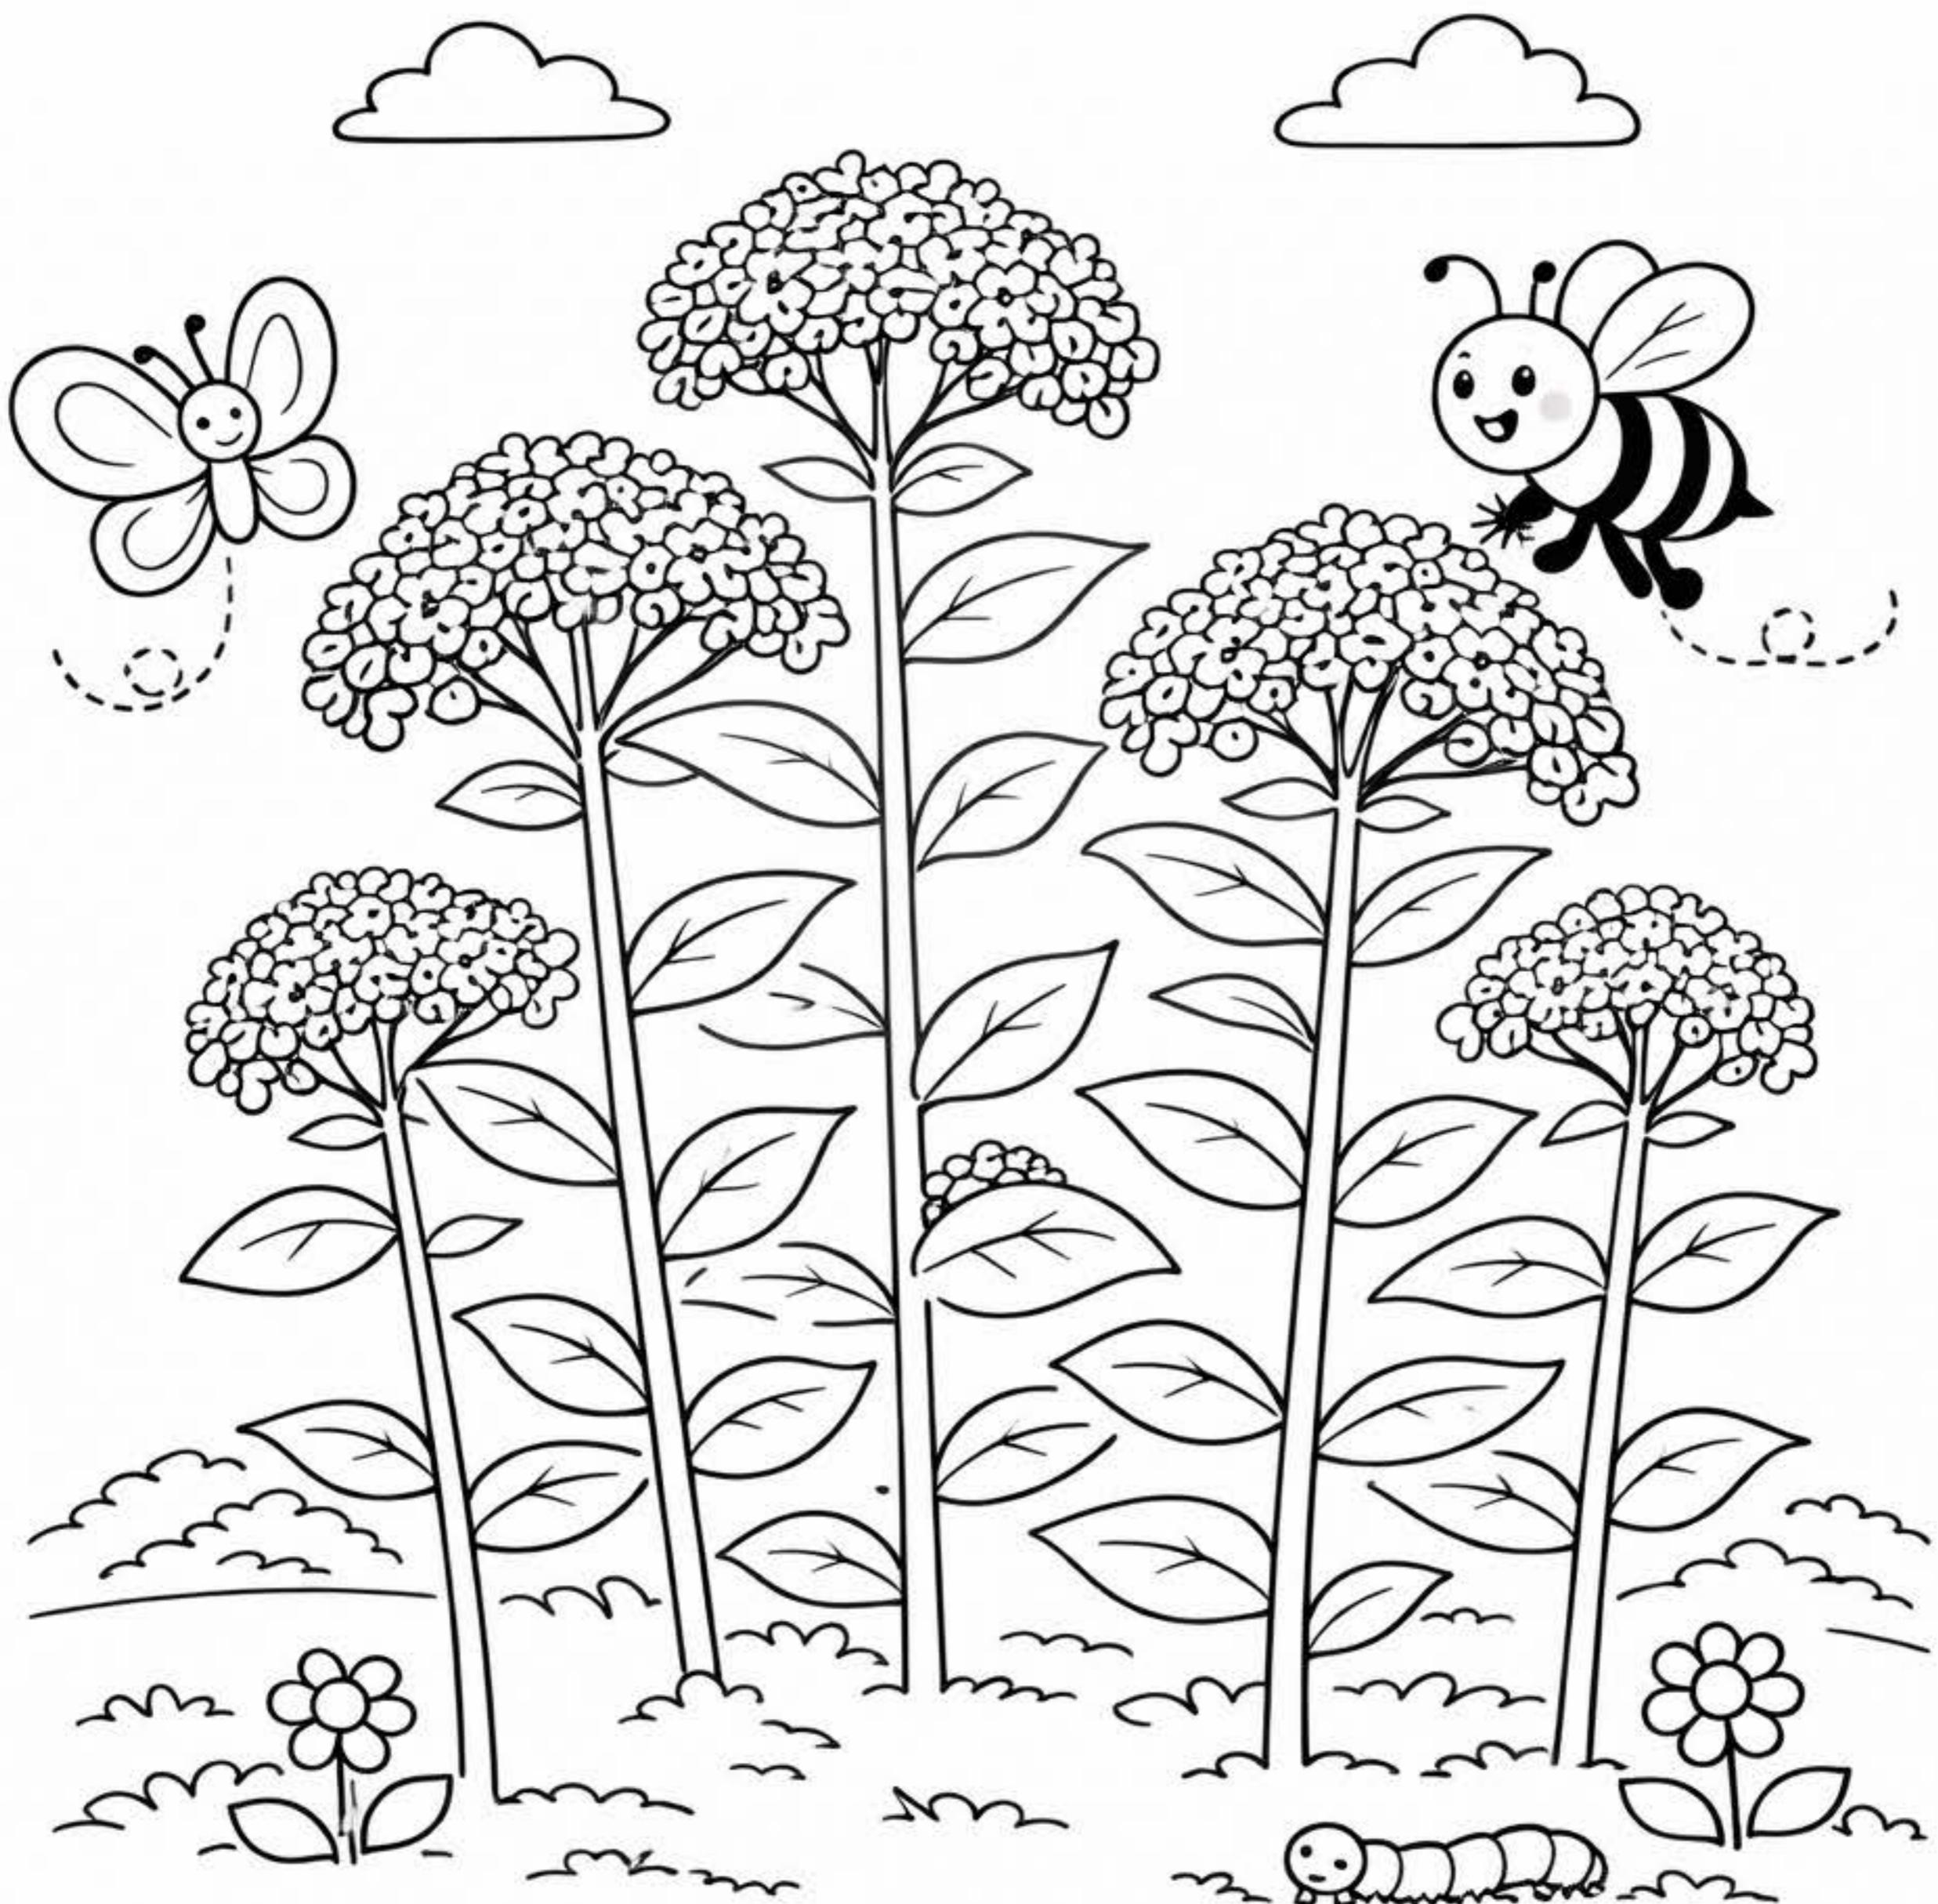

Mountain mint smells good and helps pollinators.

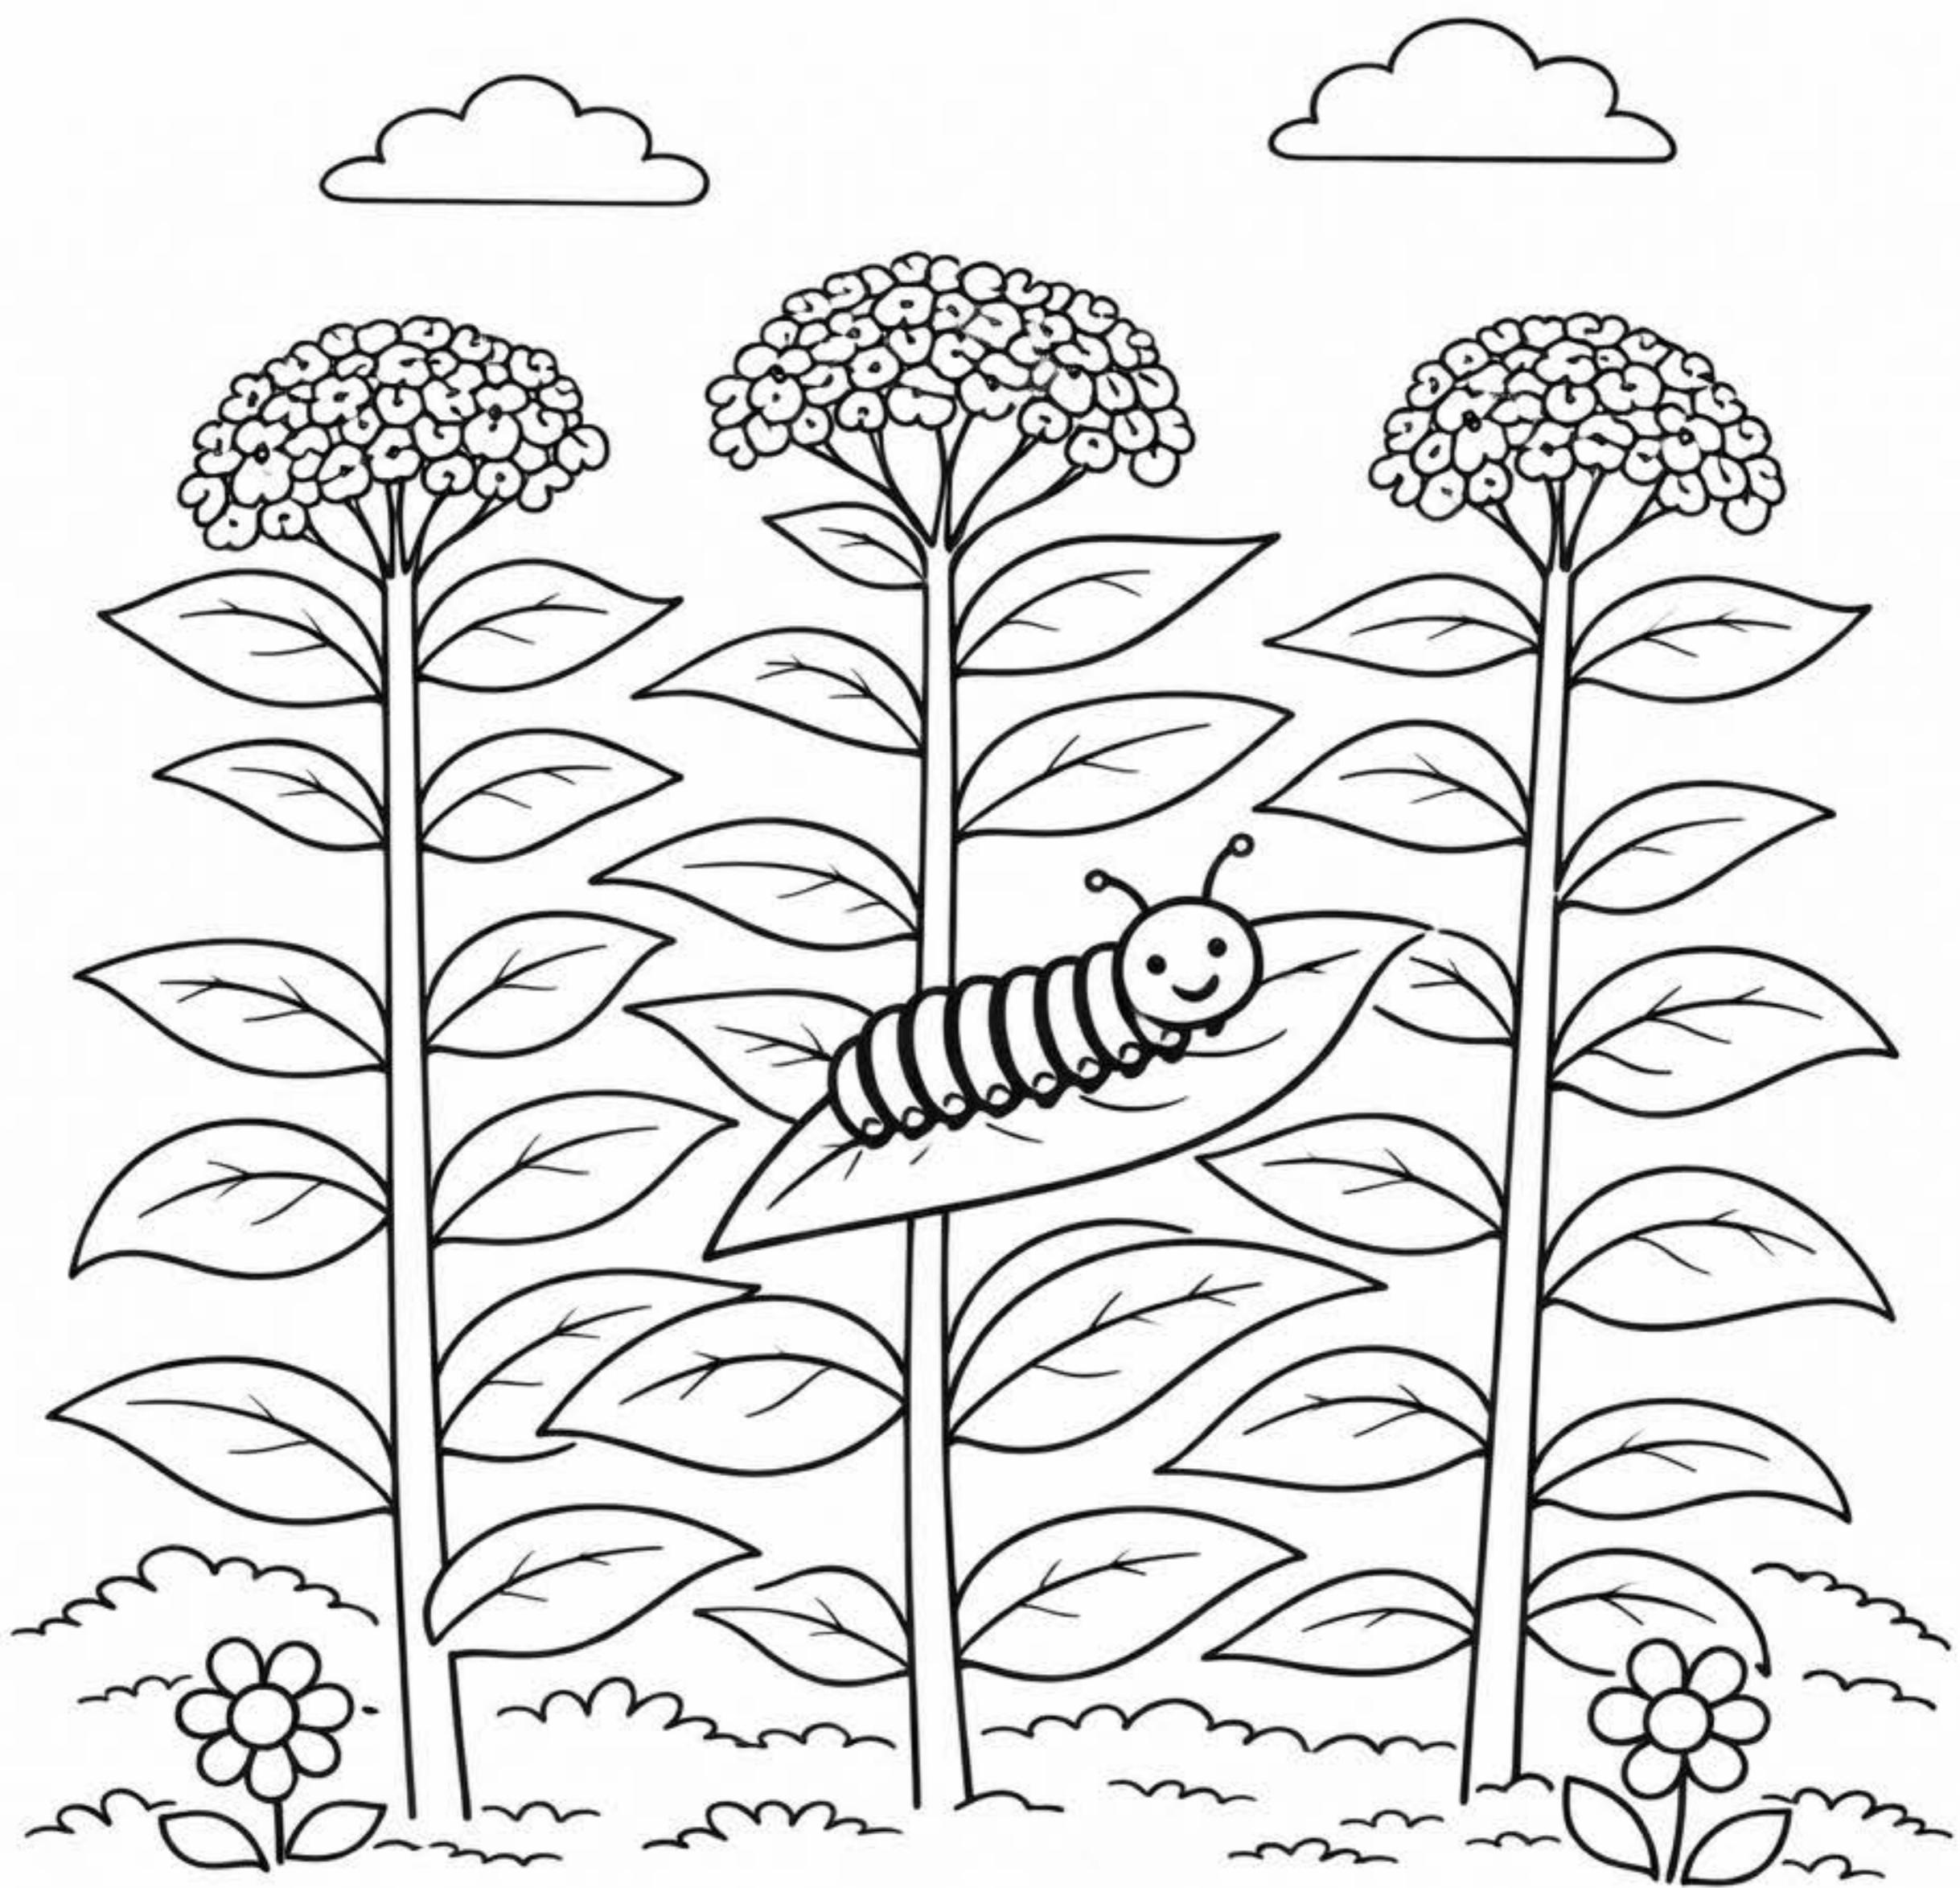

Some flowers feed birds too.

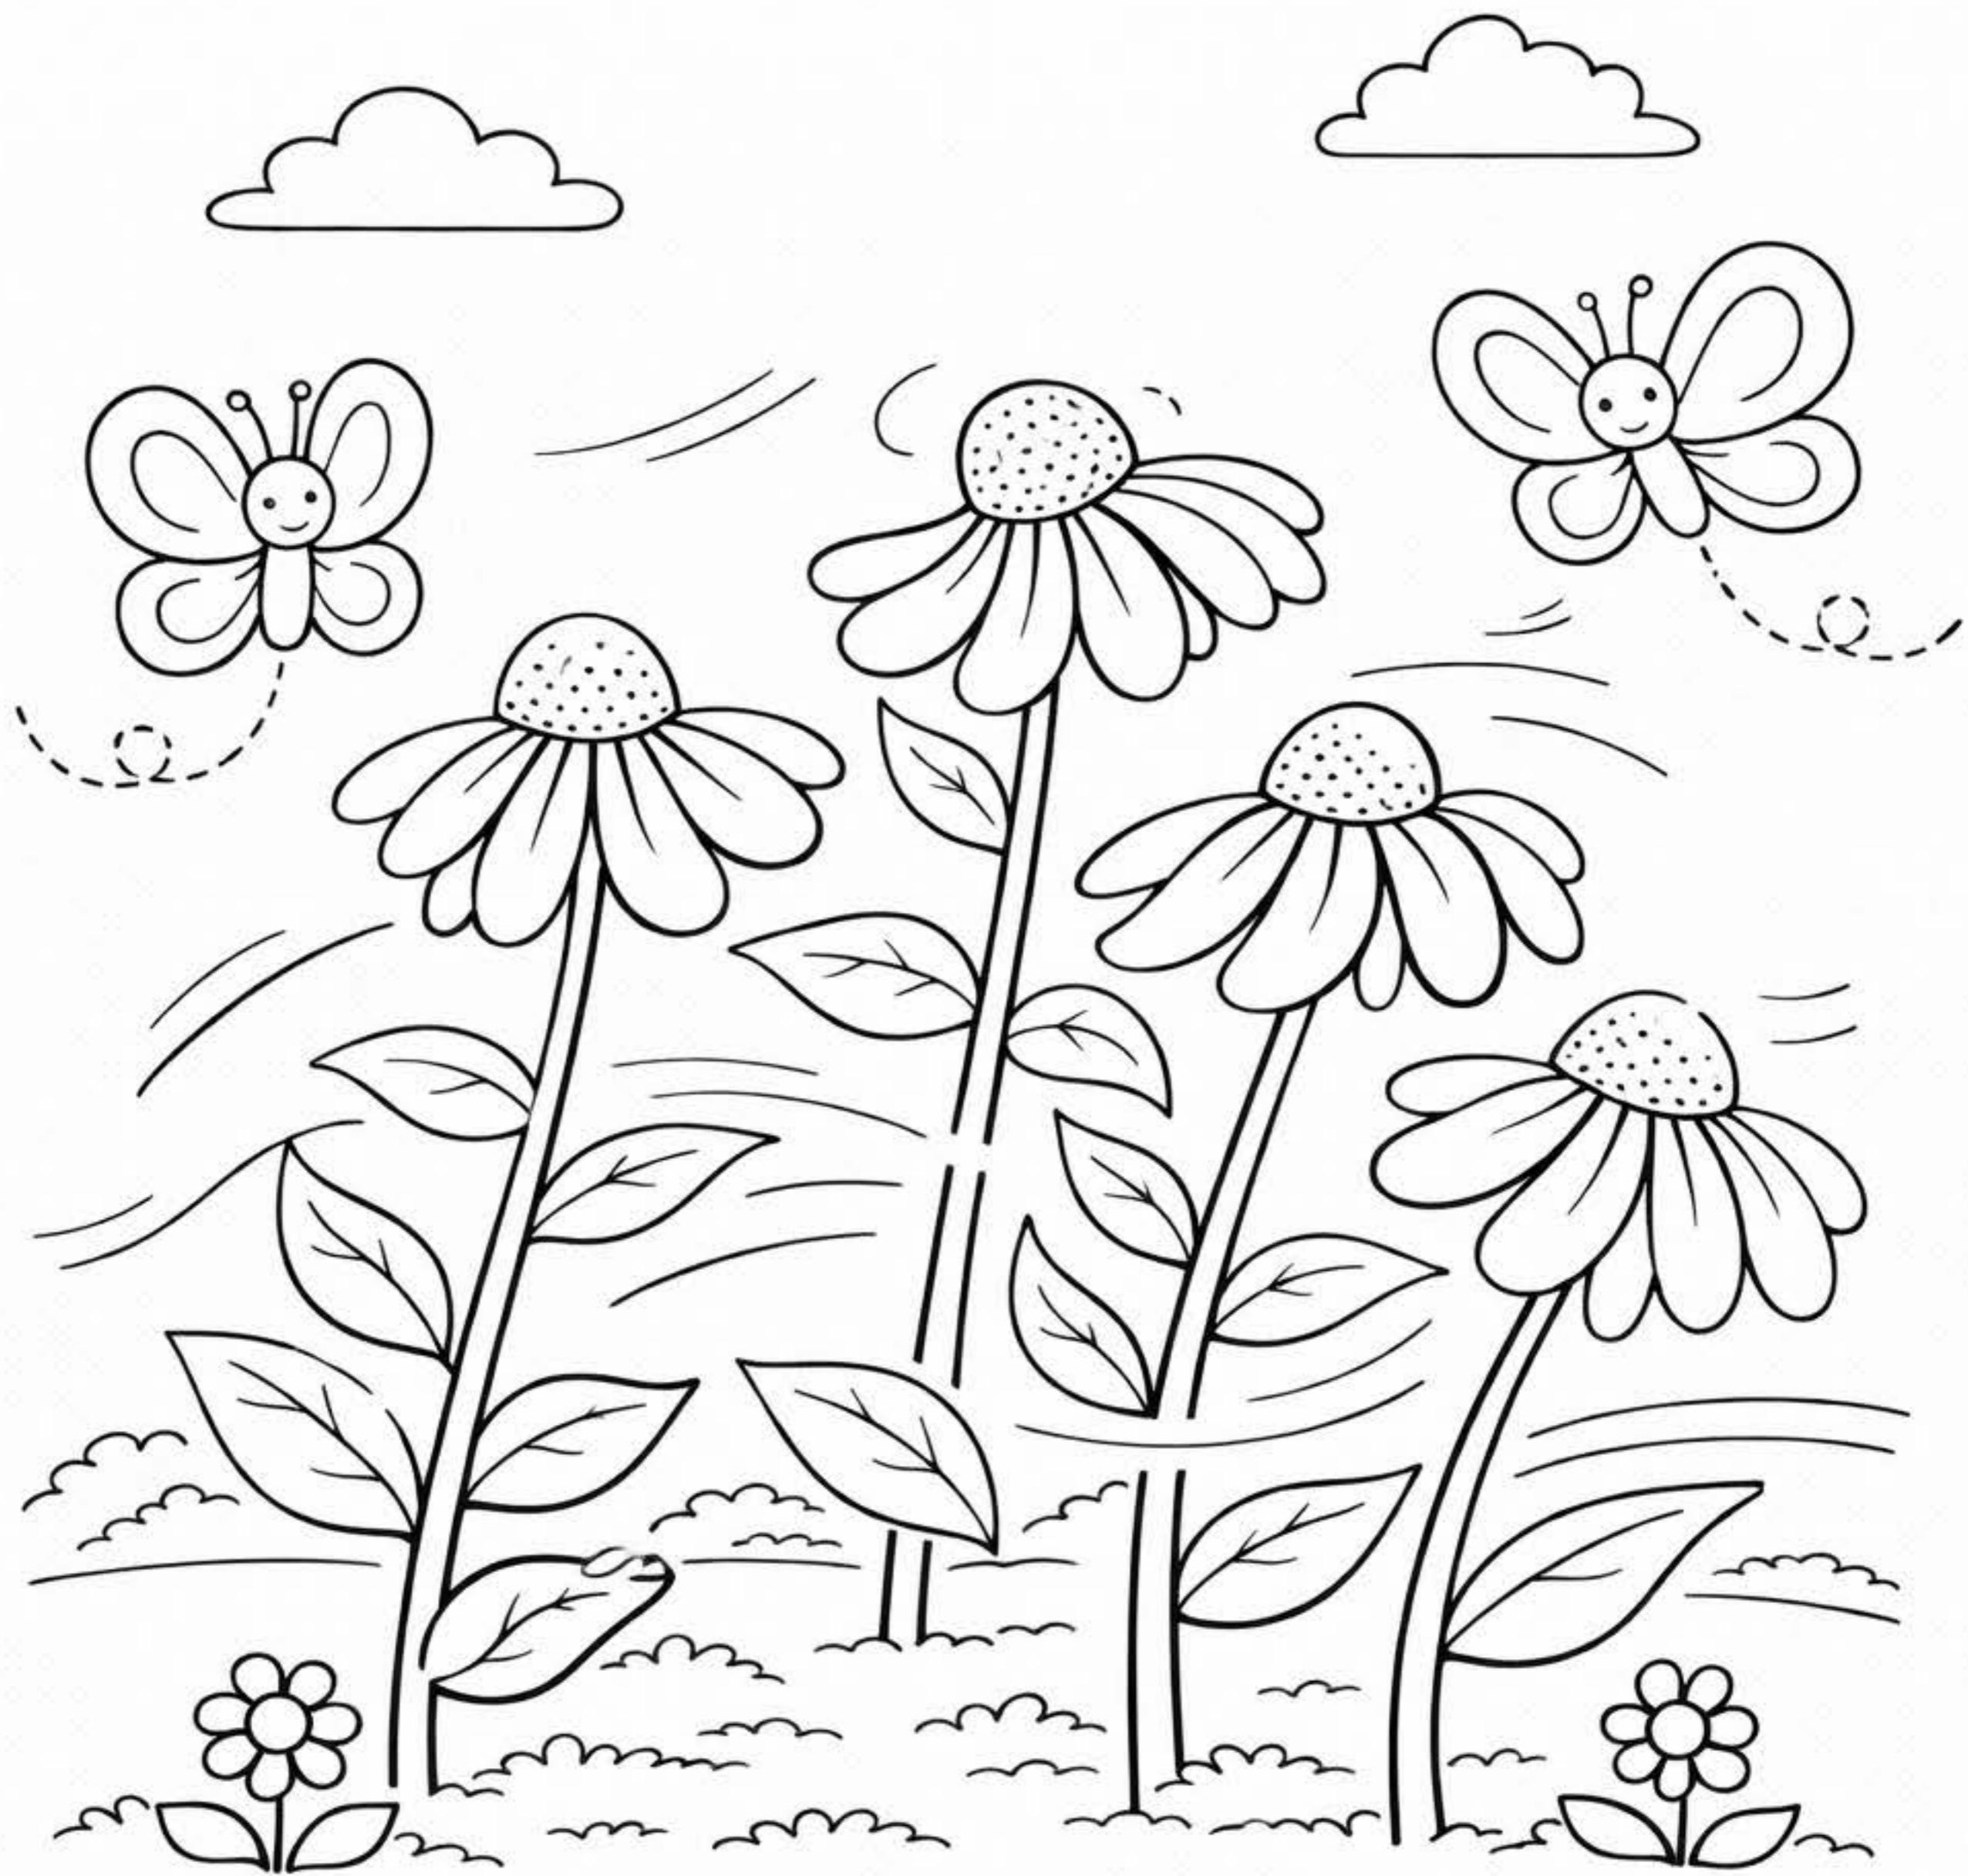

Purple Coneflowers are strong native plants.

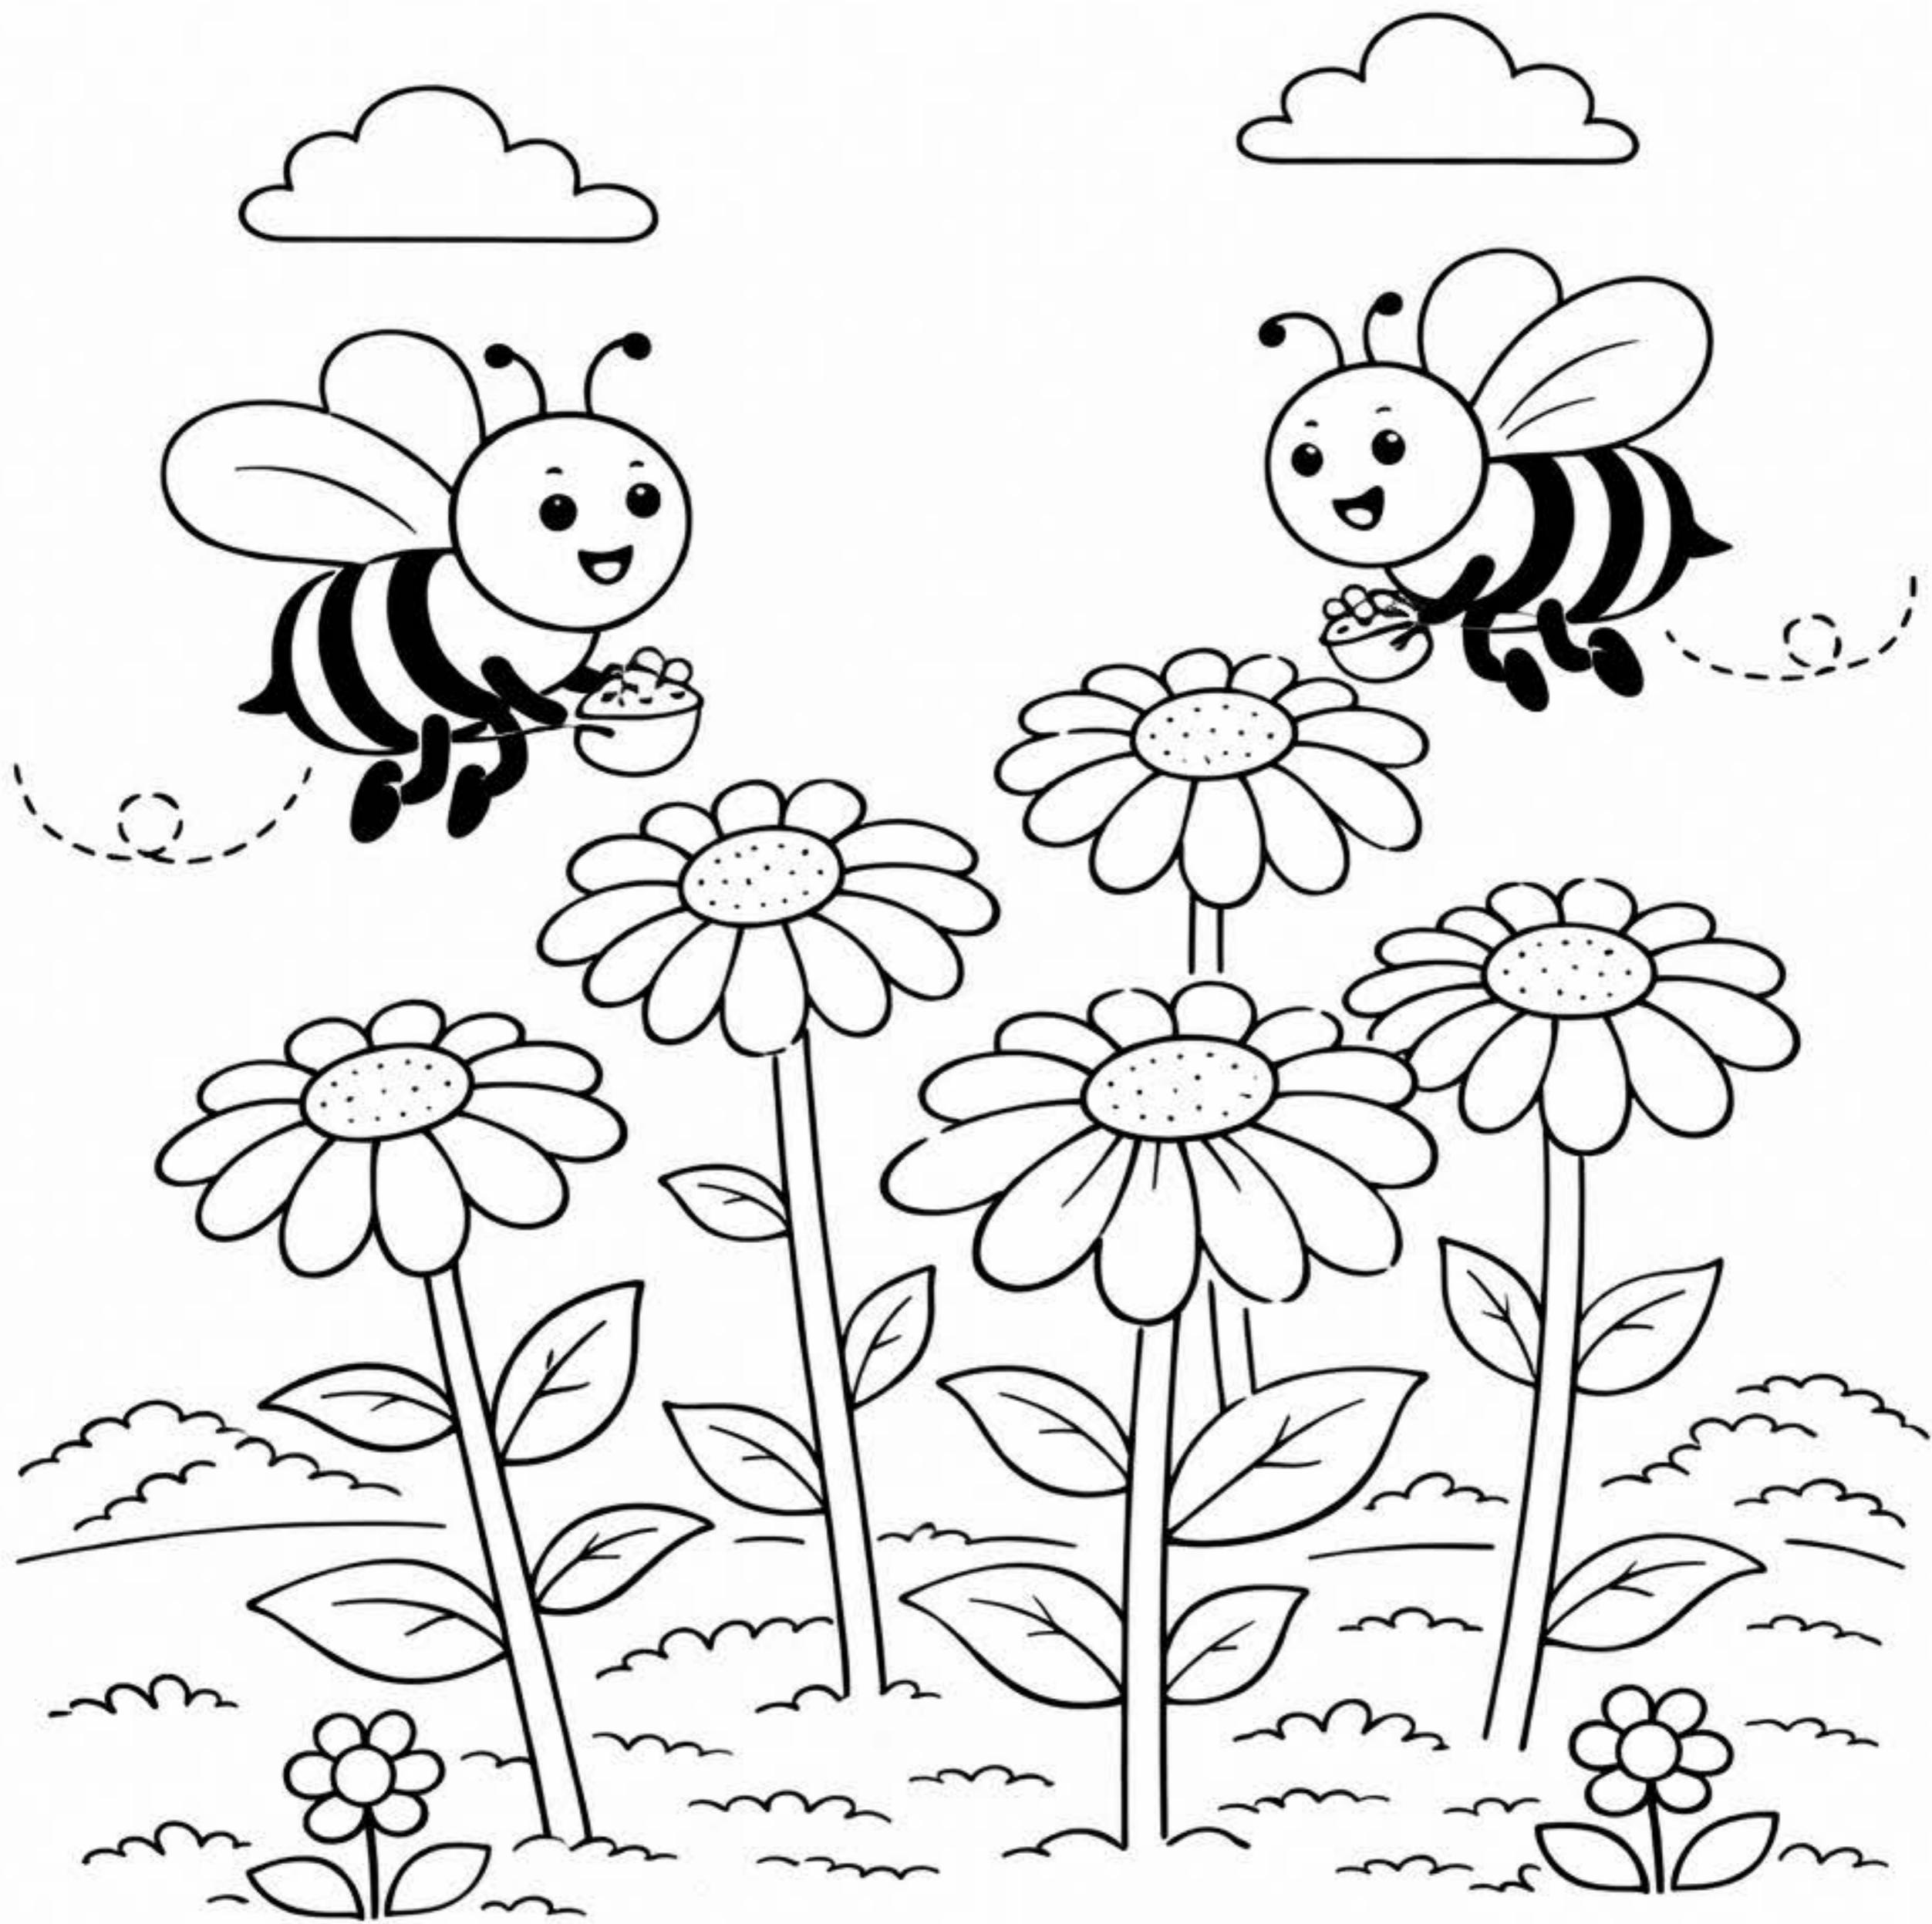

Tall plants make great habitats.

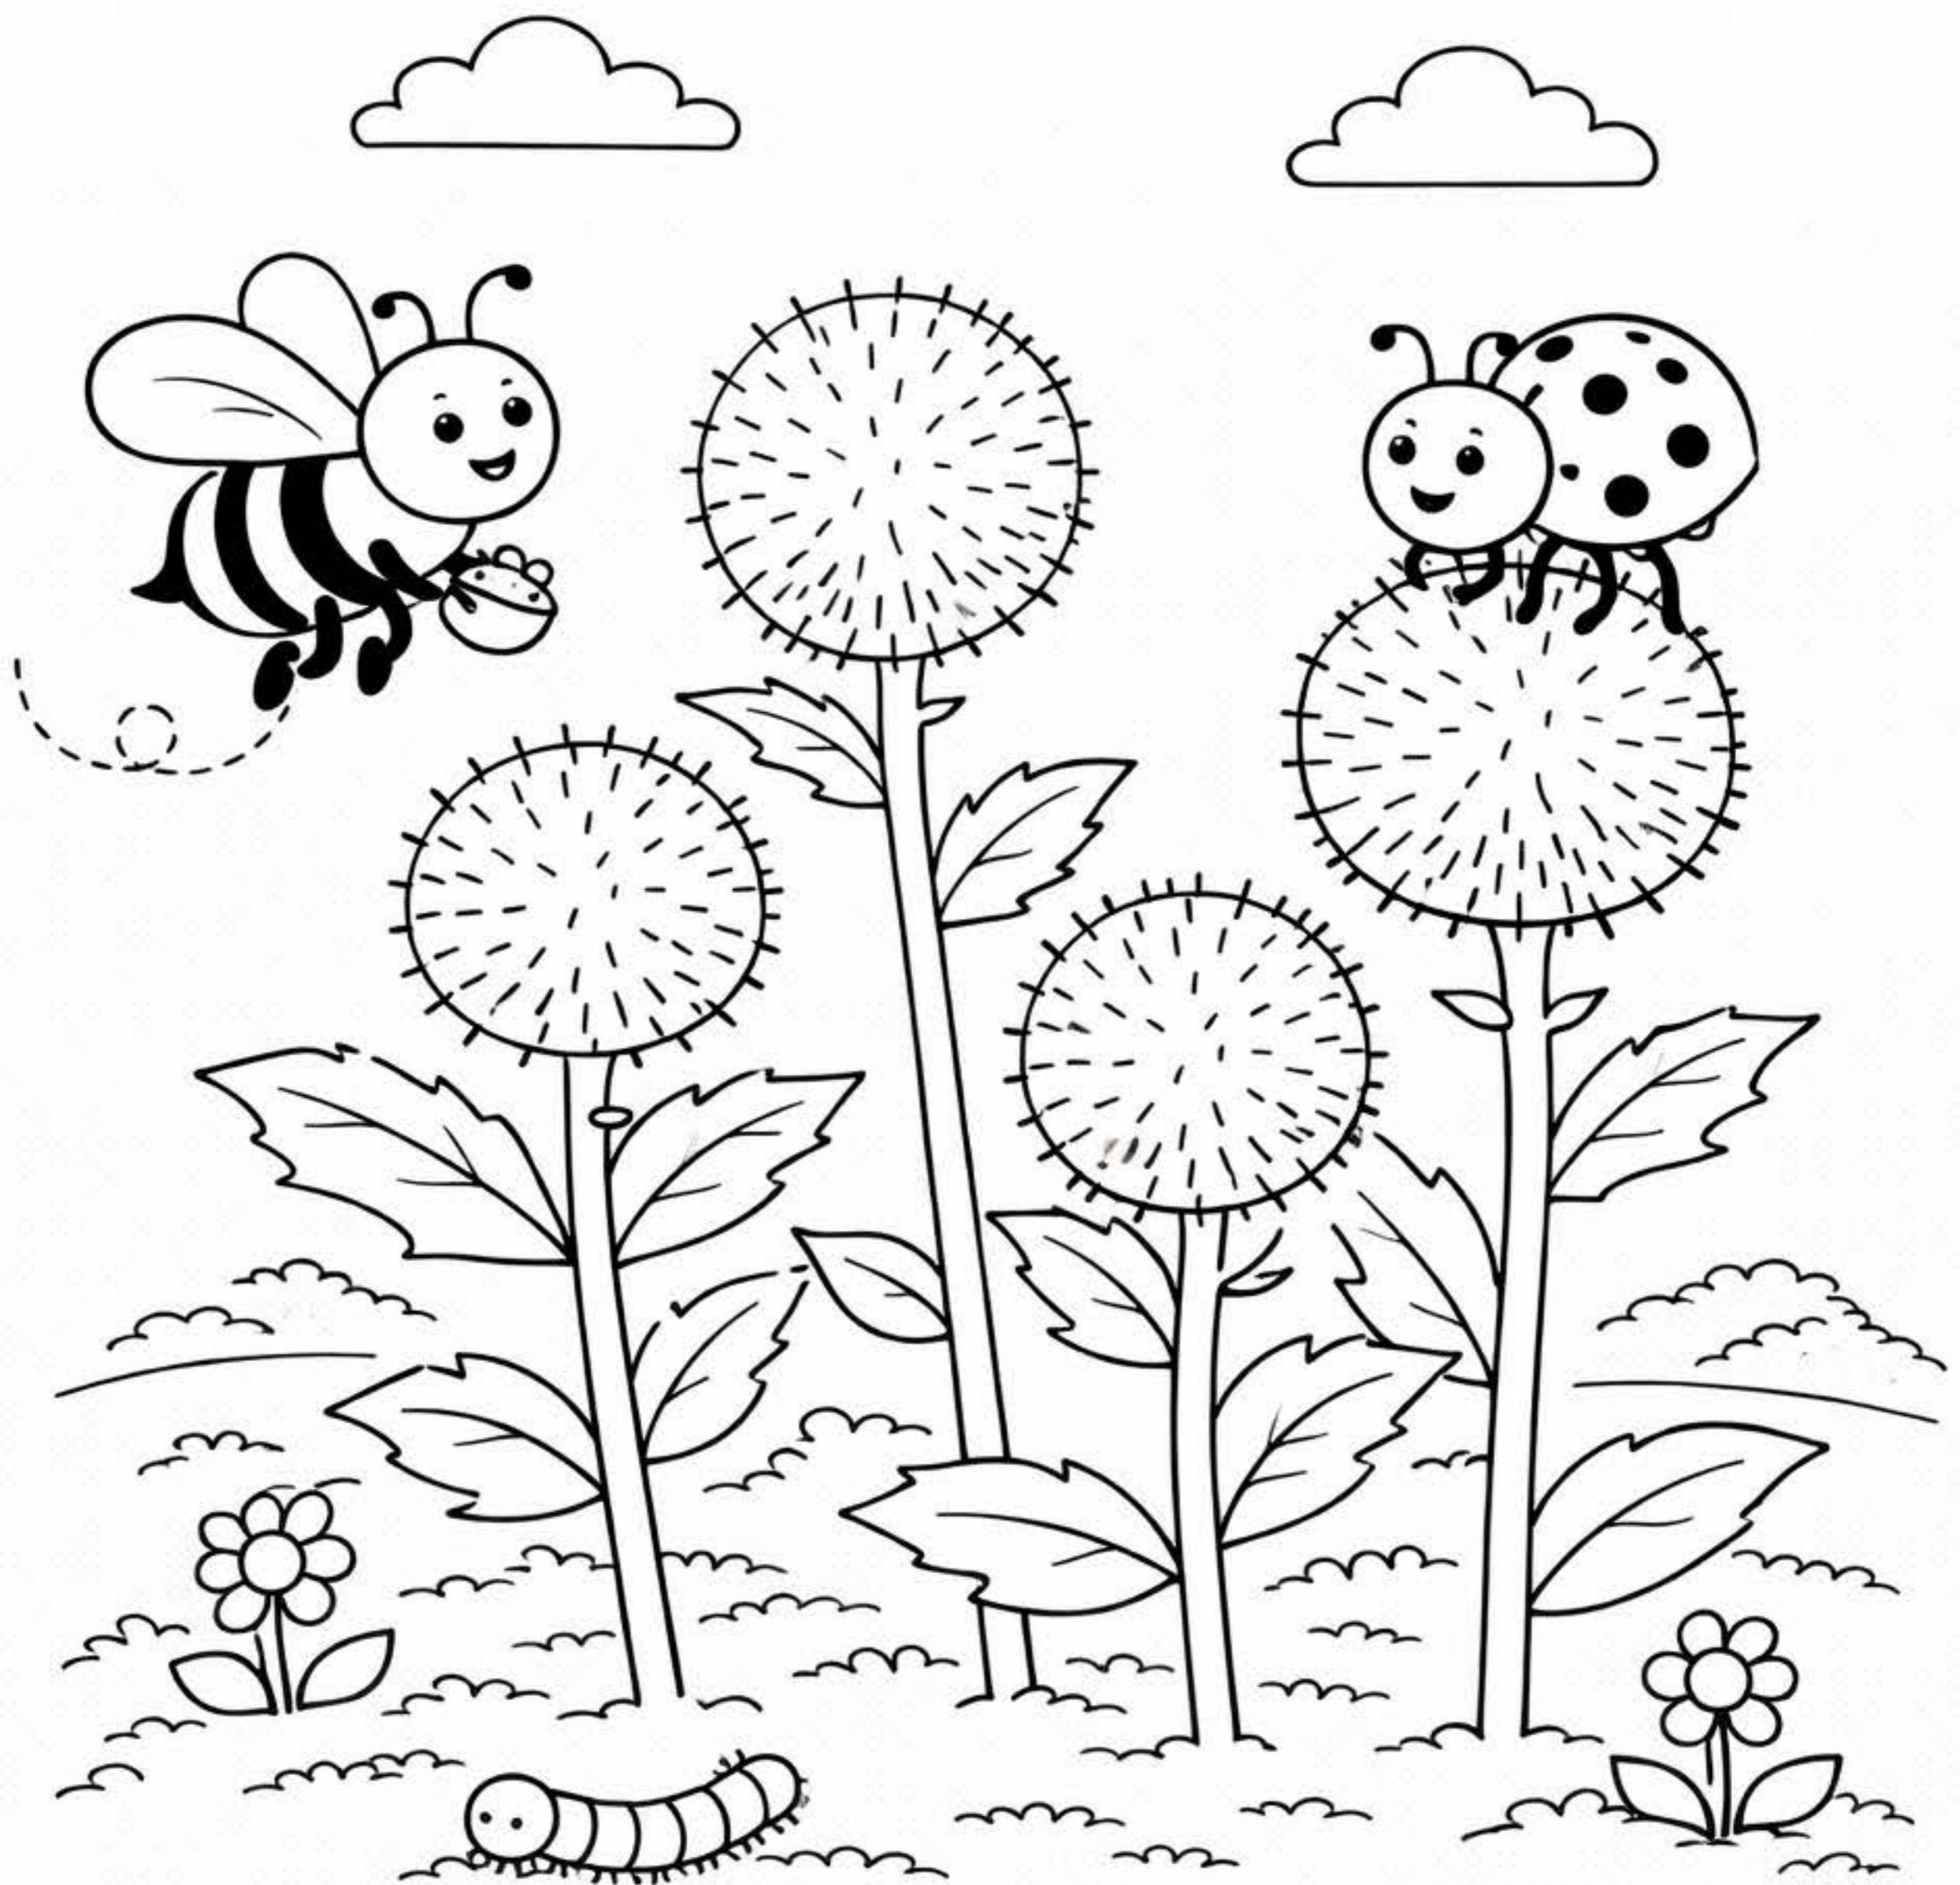

Monarch butterflies need milkweed.

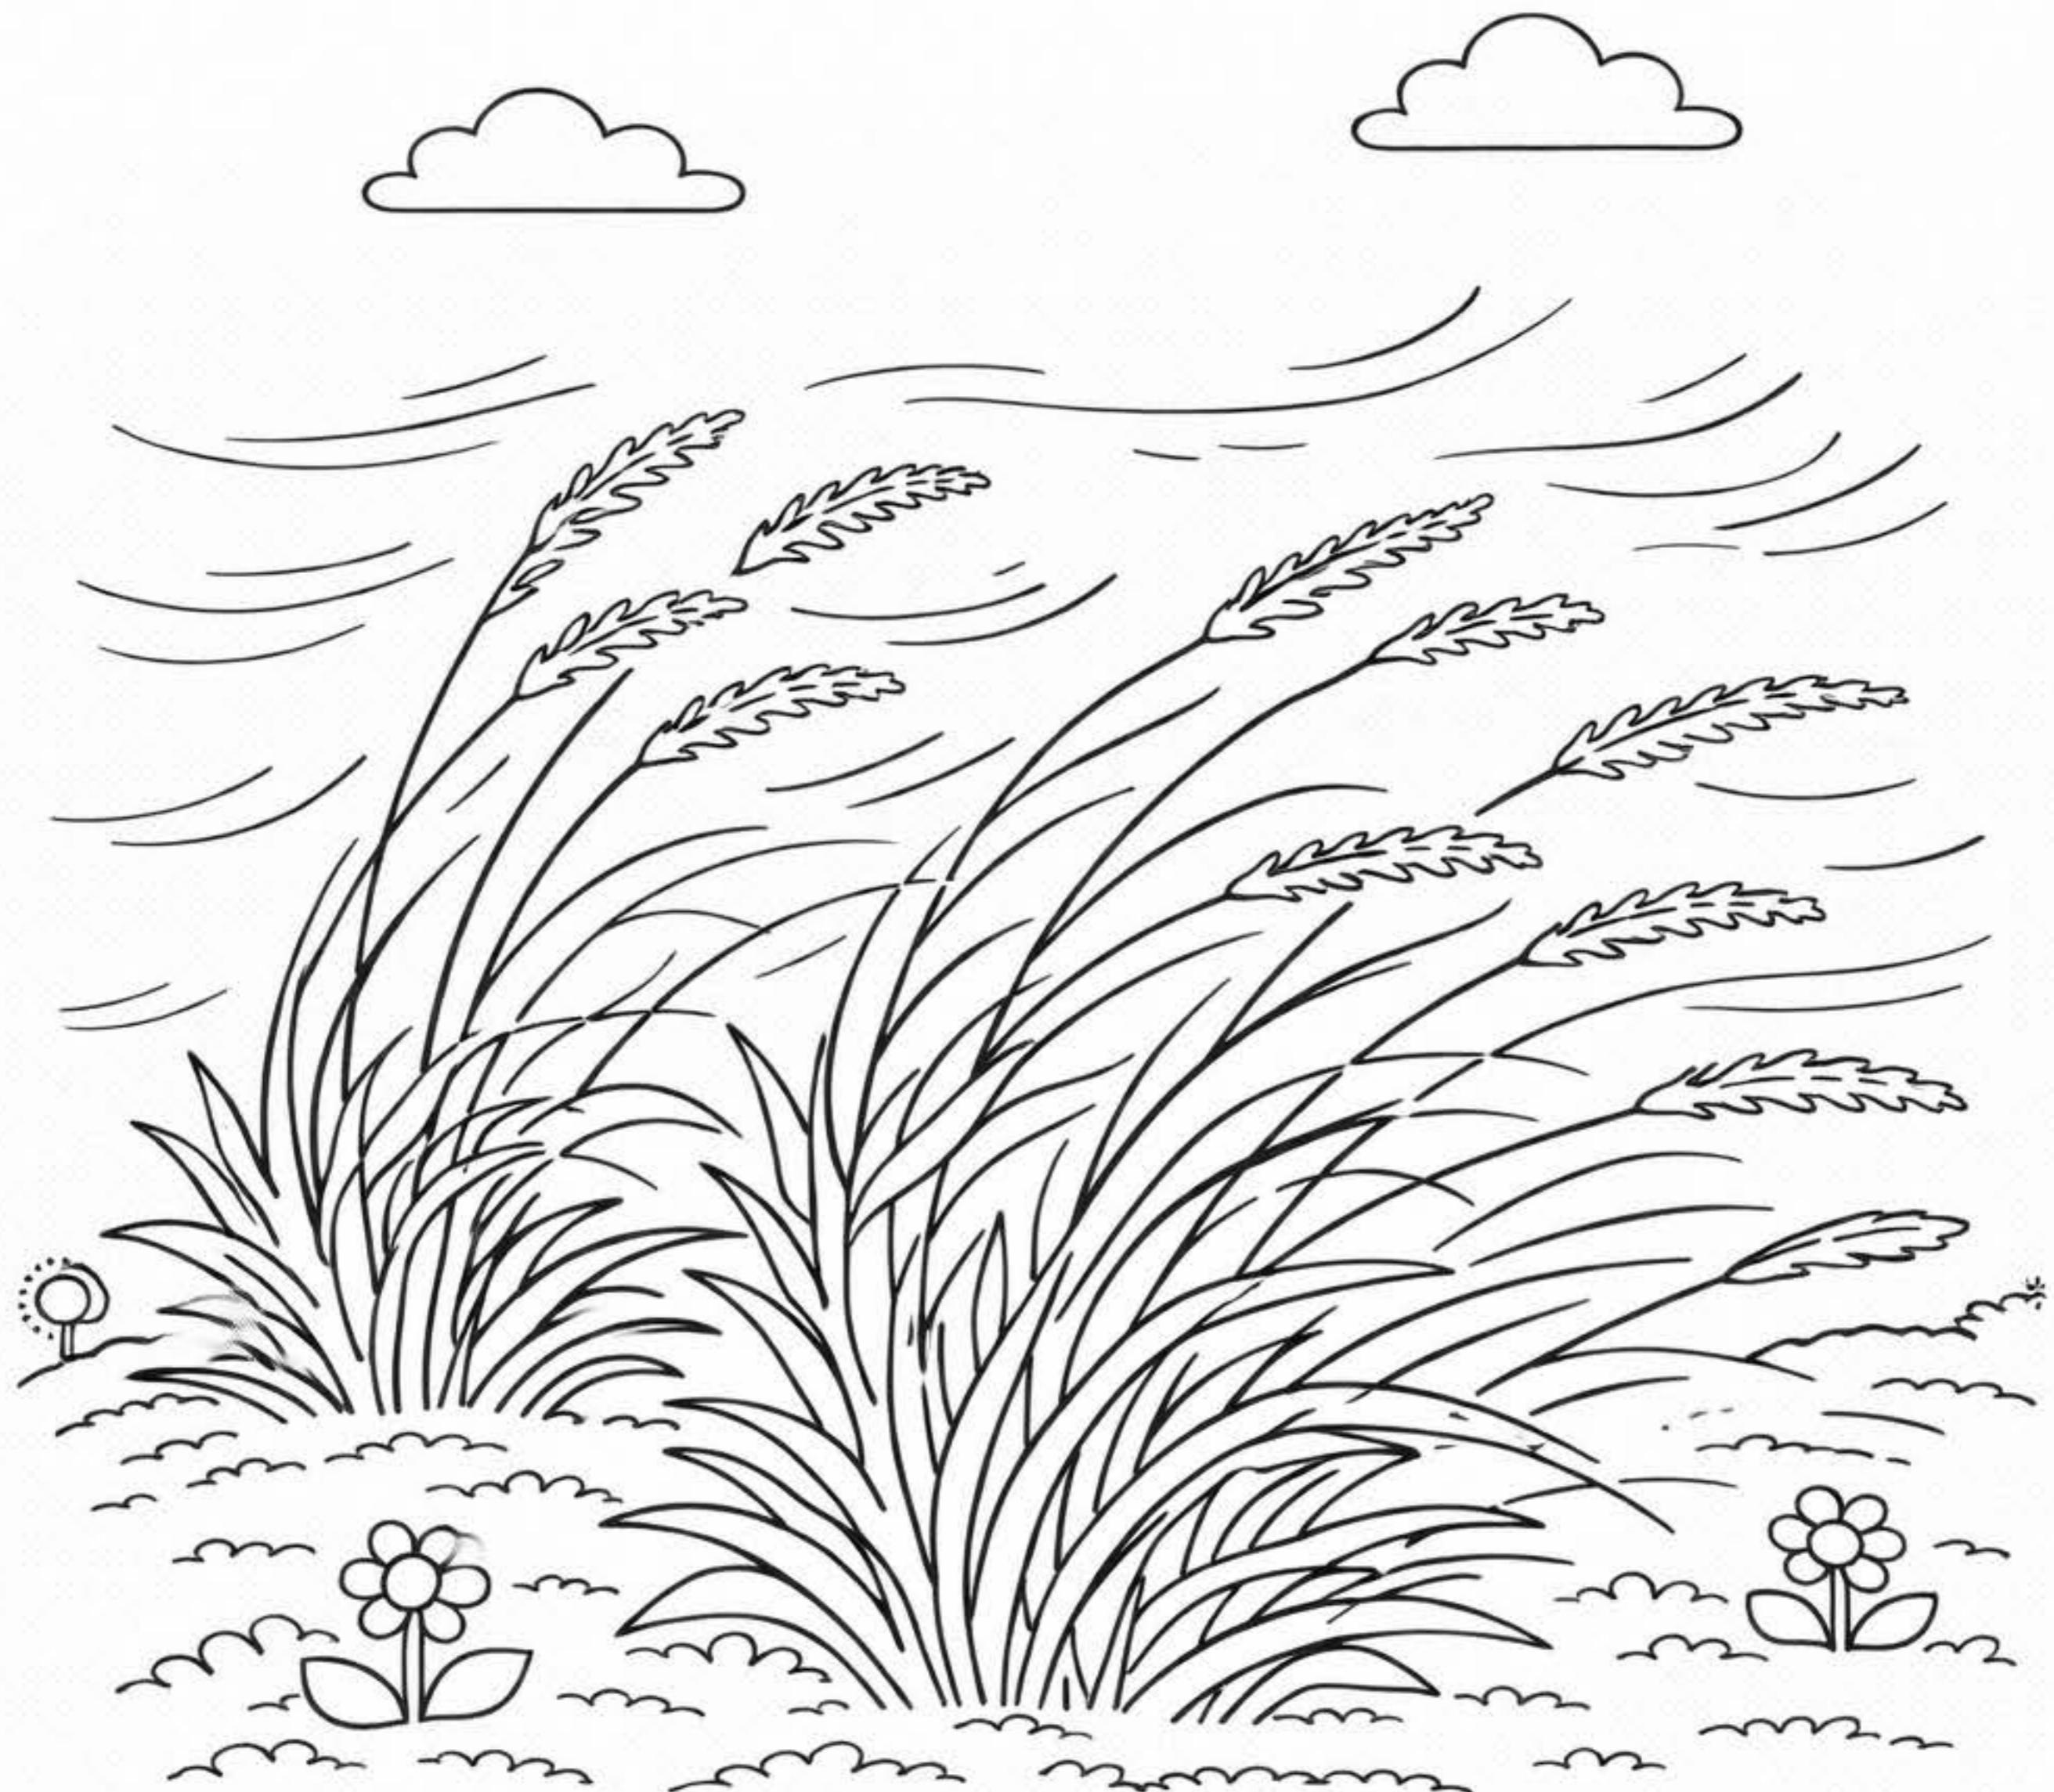

Yellow Coneflowers dance in the breeze.

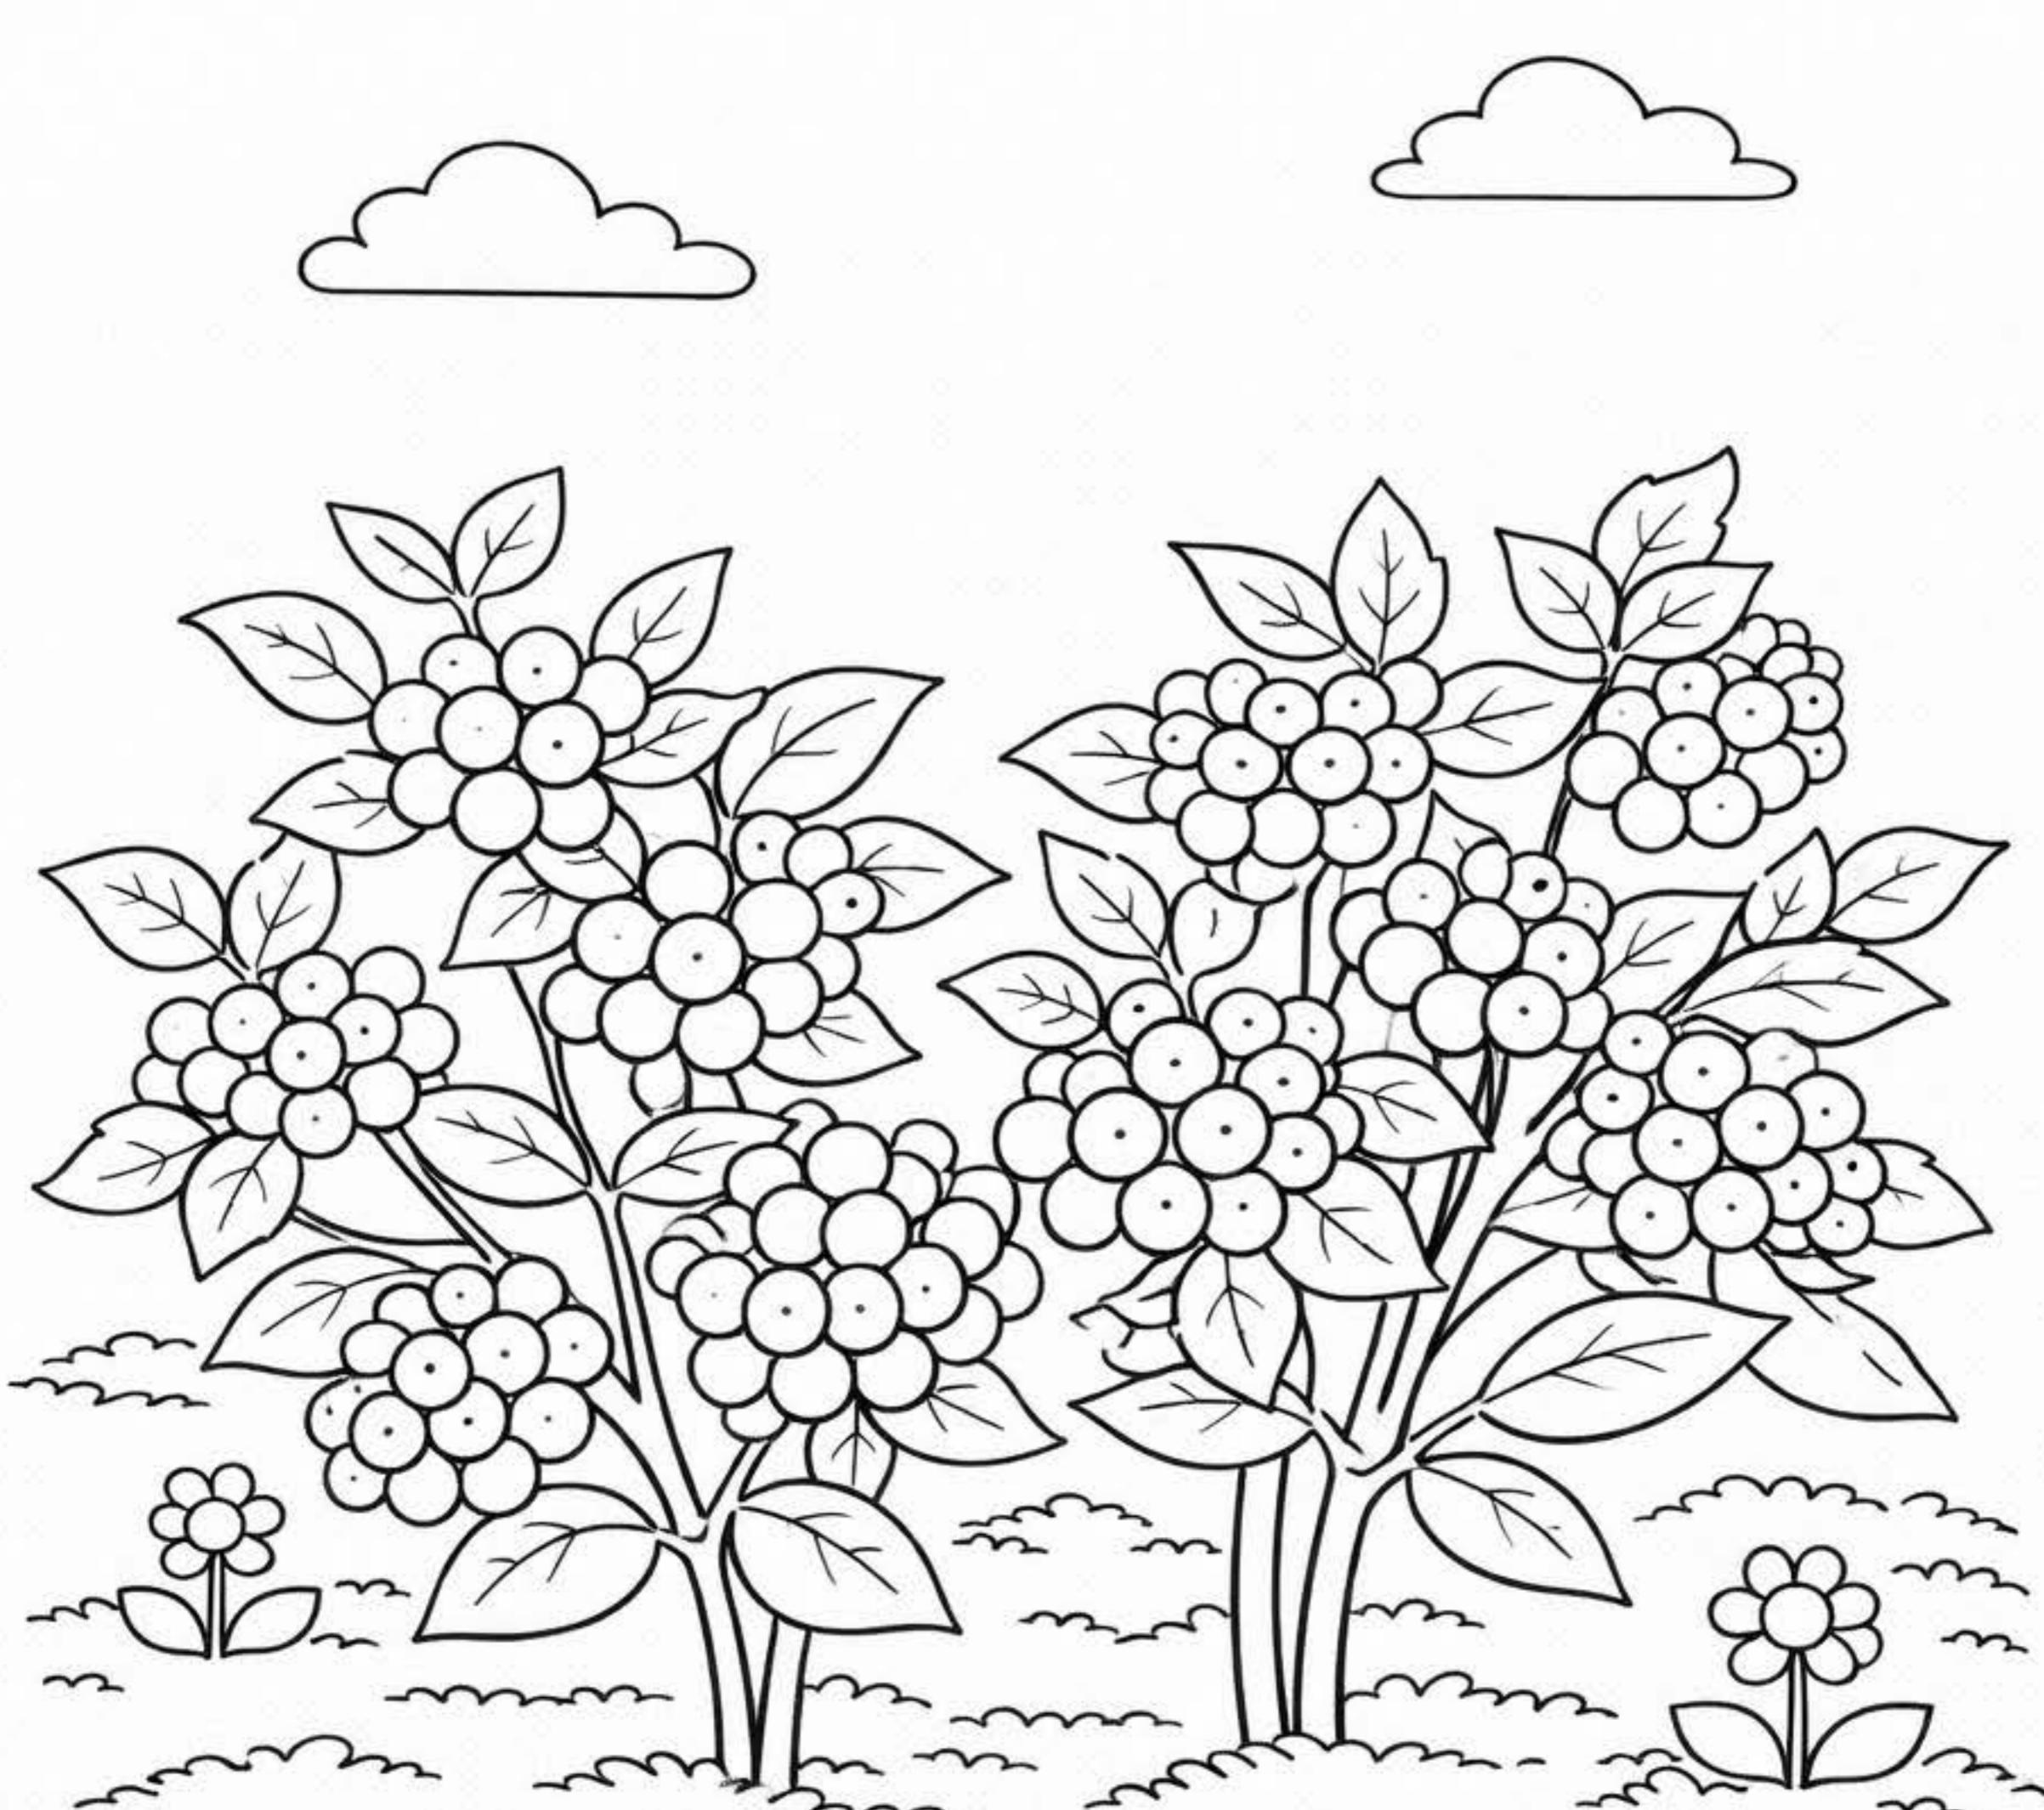

Bees visit many flowers every day.

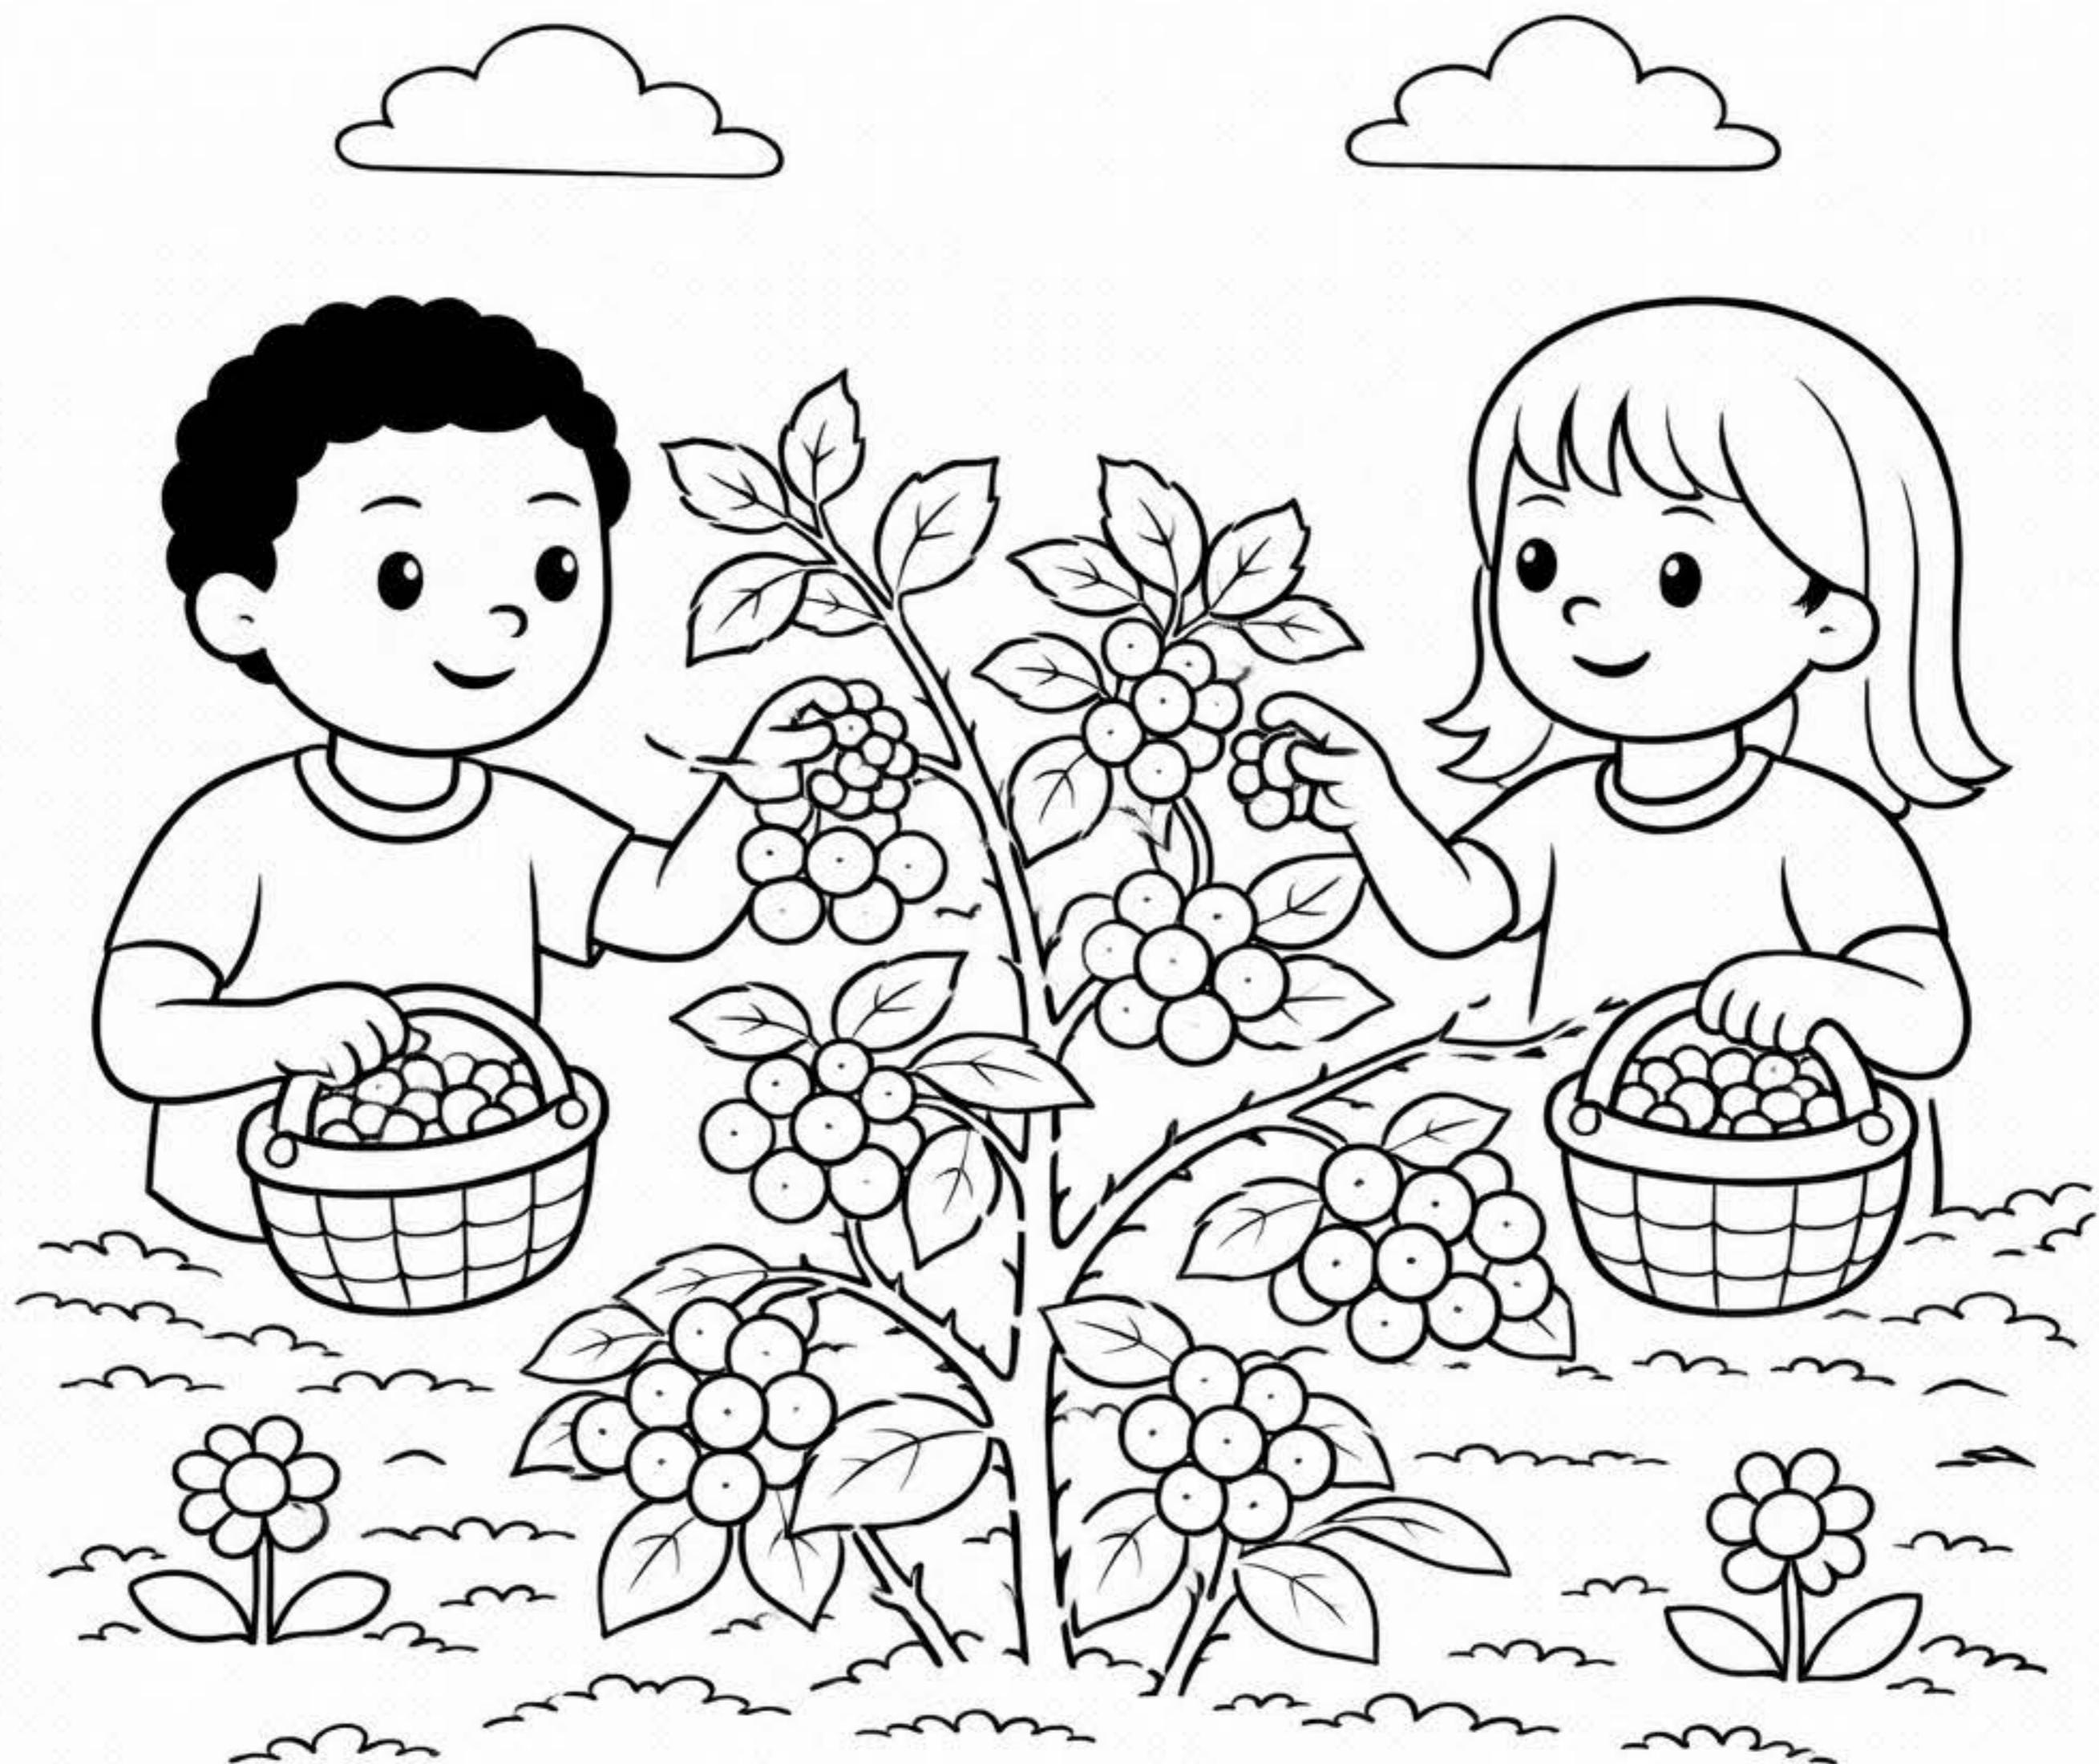

Some plants look very unique.

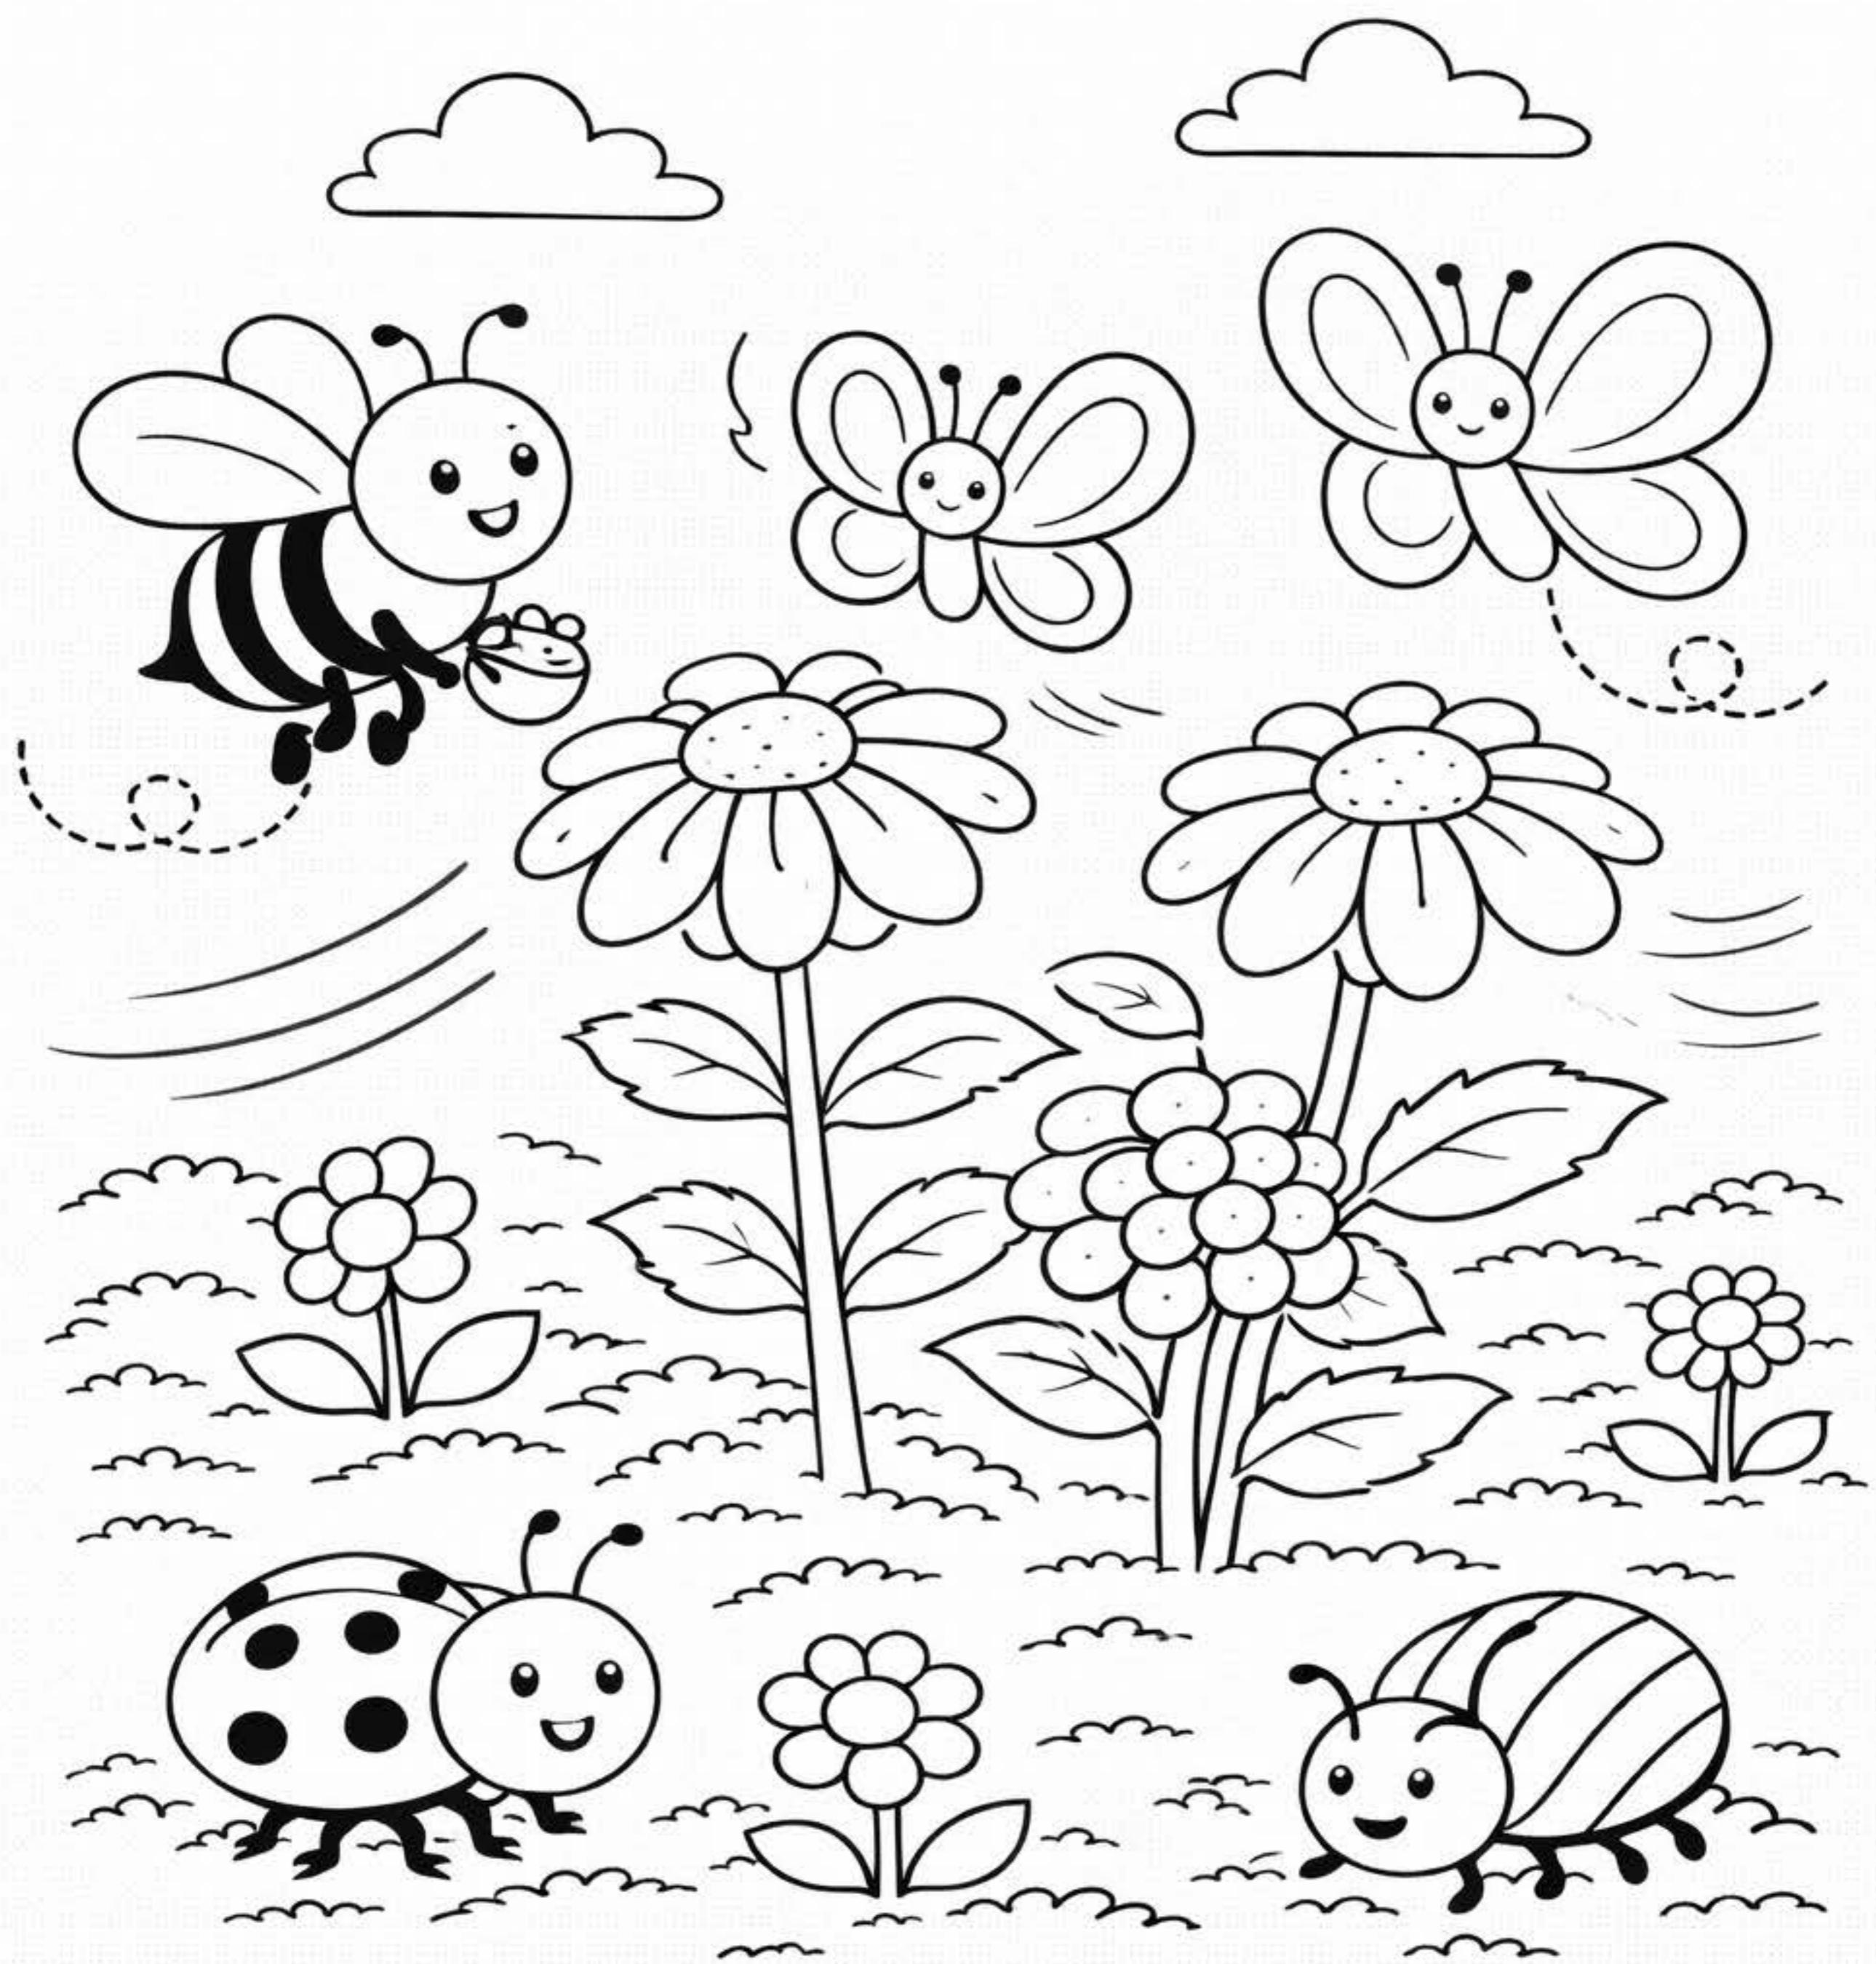

Grasses help protect the soil.

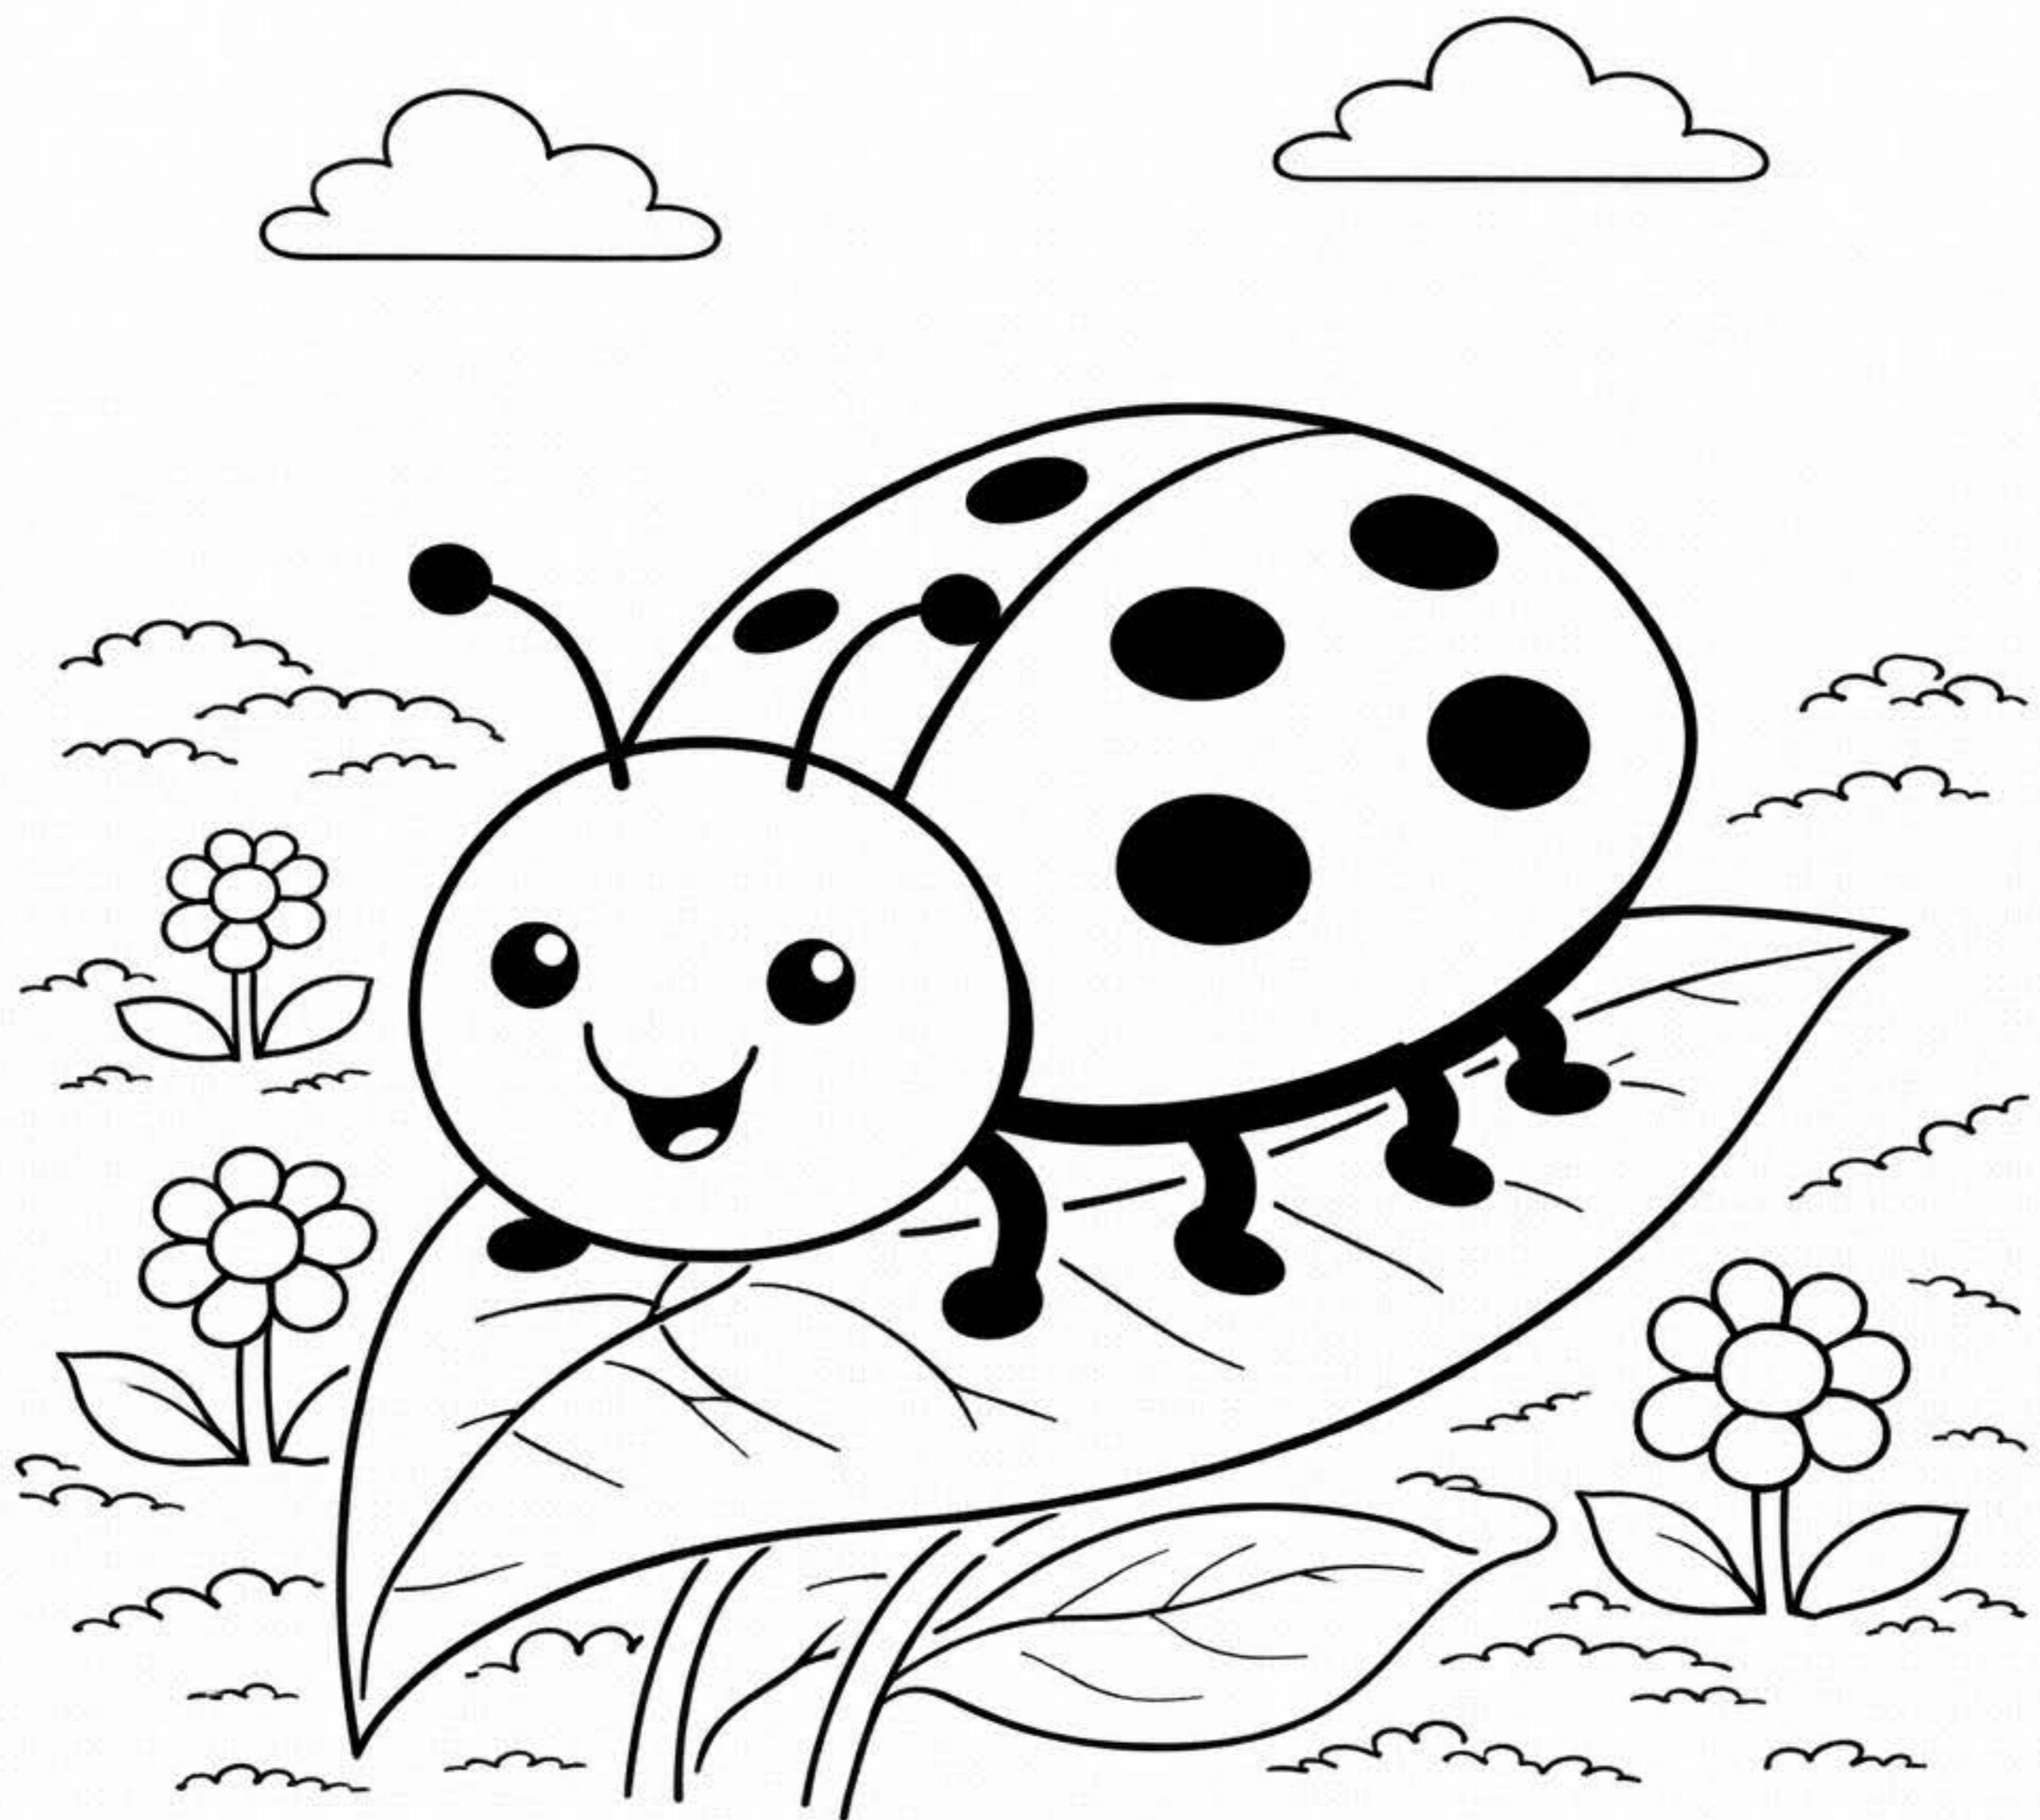

Berries grow on bushes, not trees.

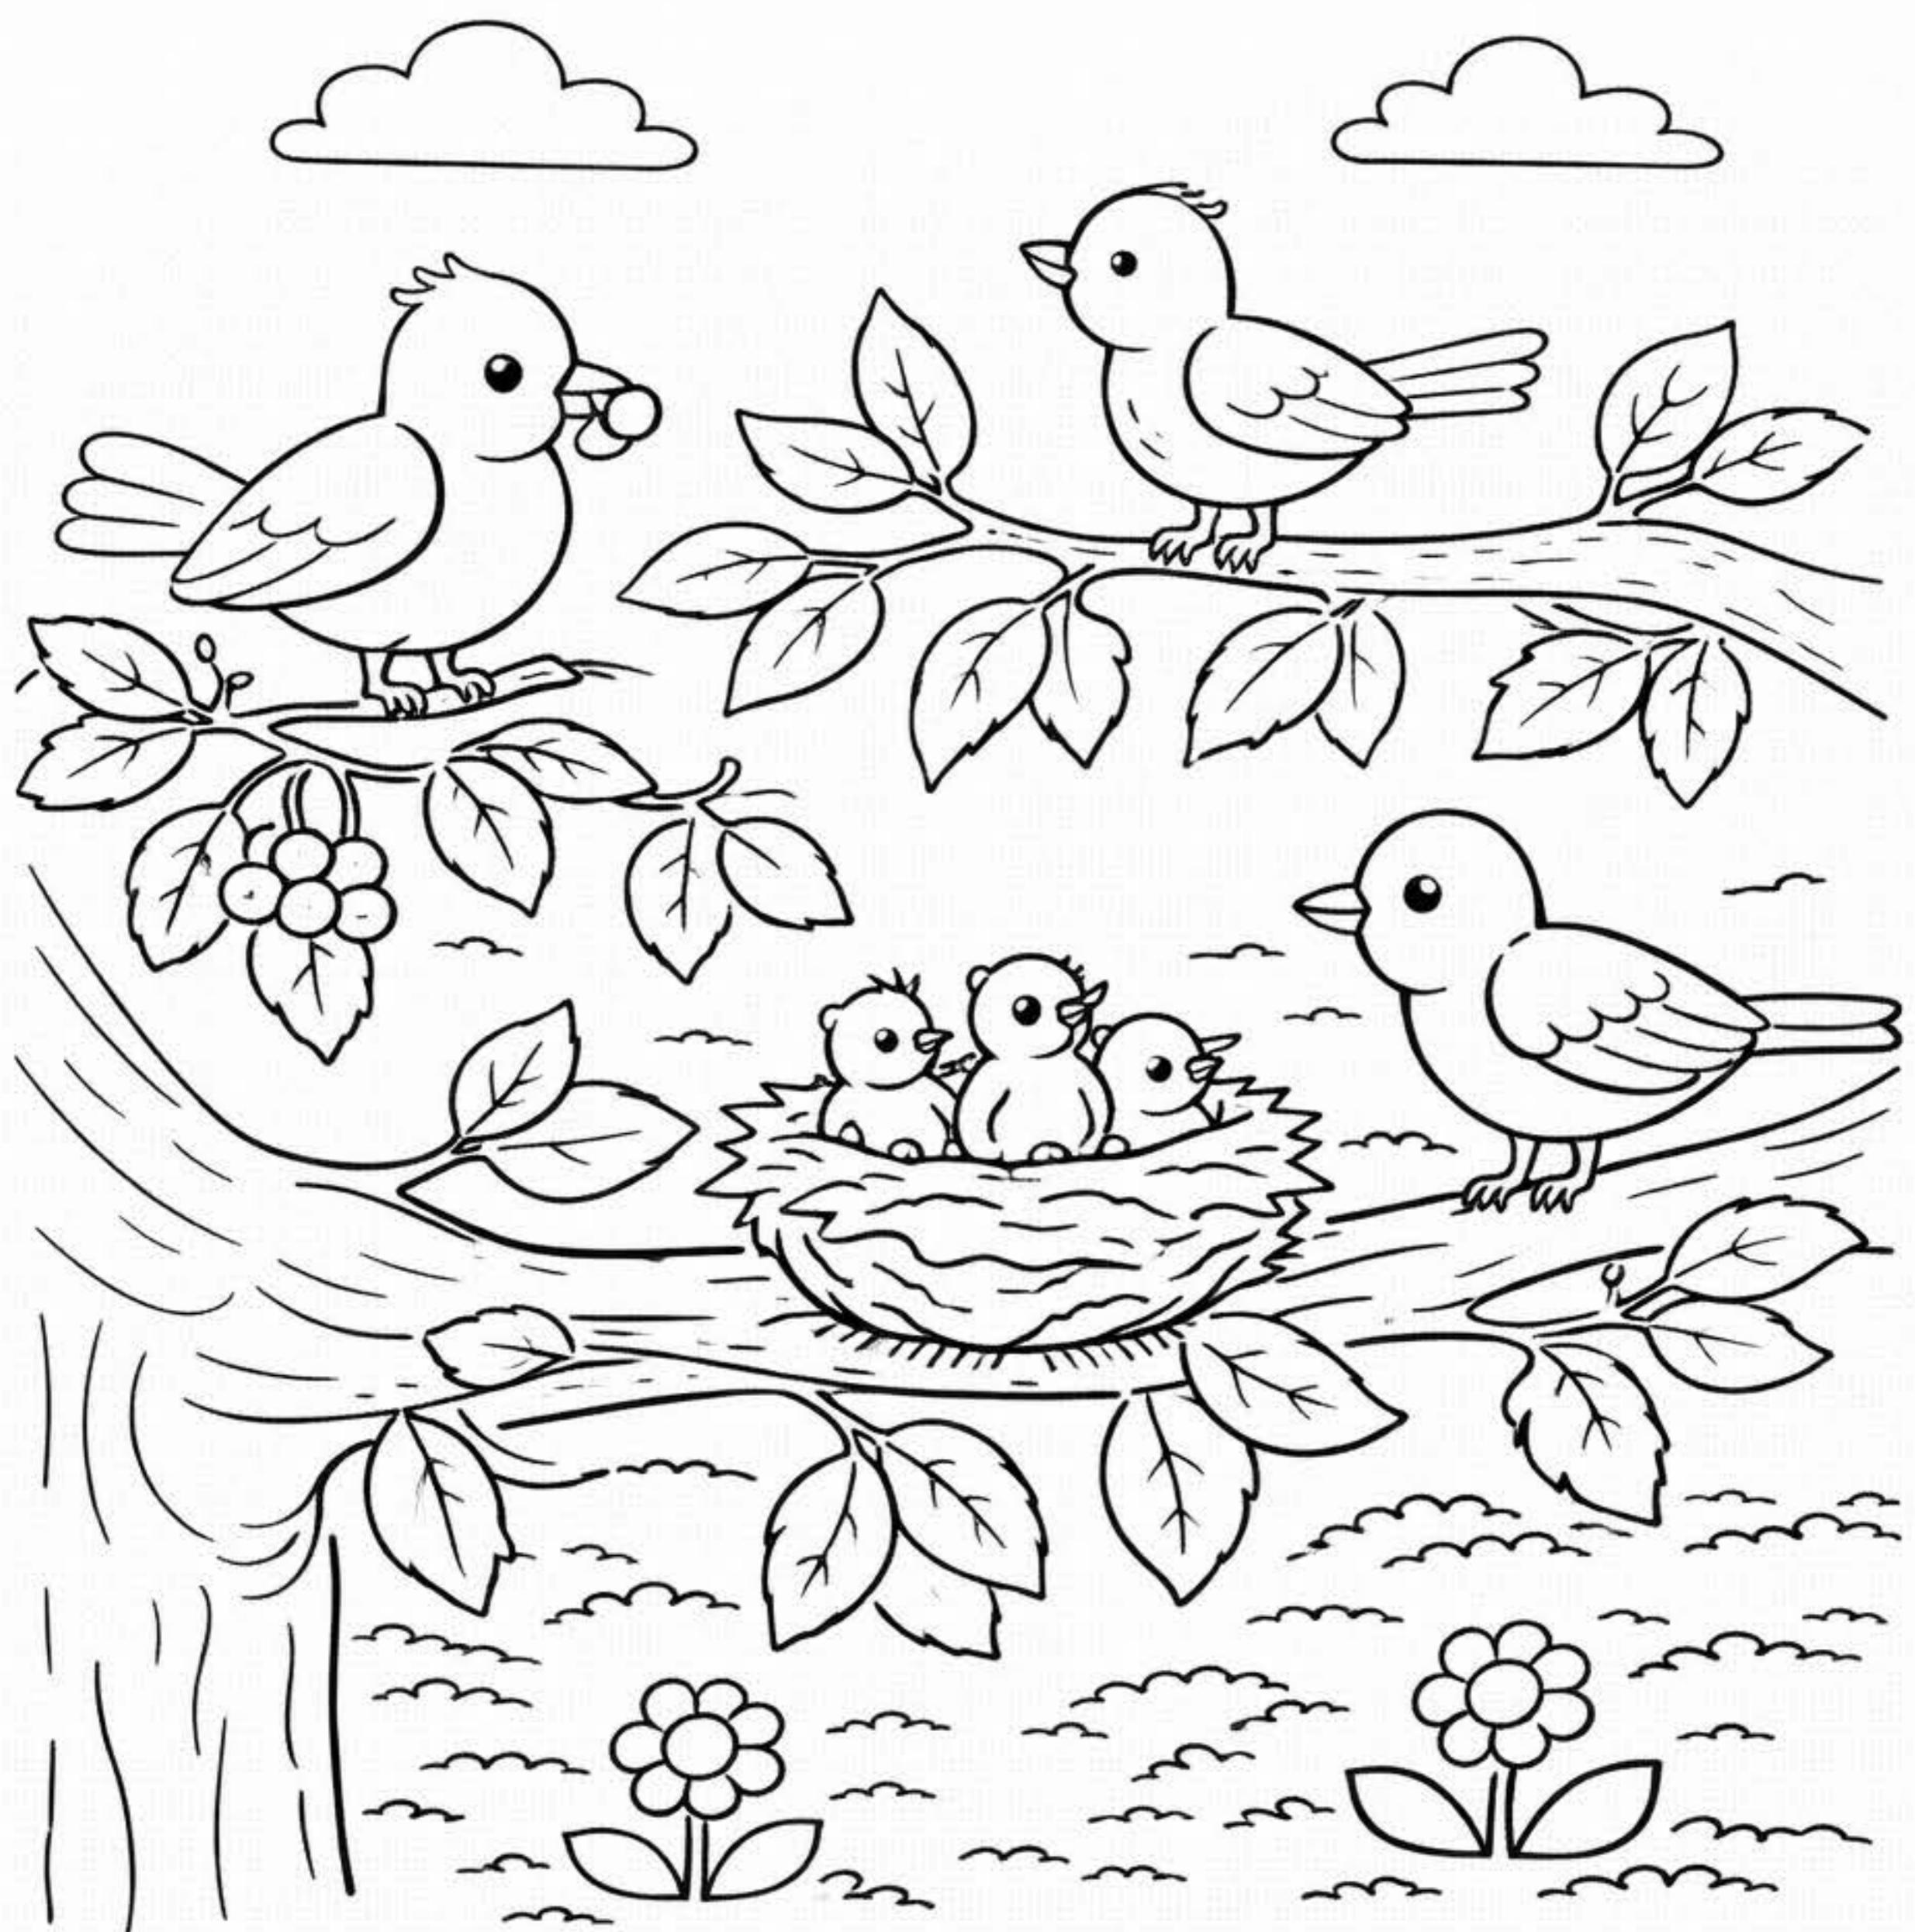

Some berries have thorns. Be gentle.

Many insects help plants grow.

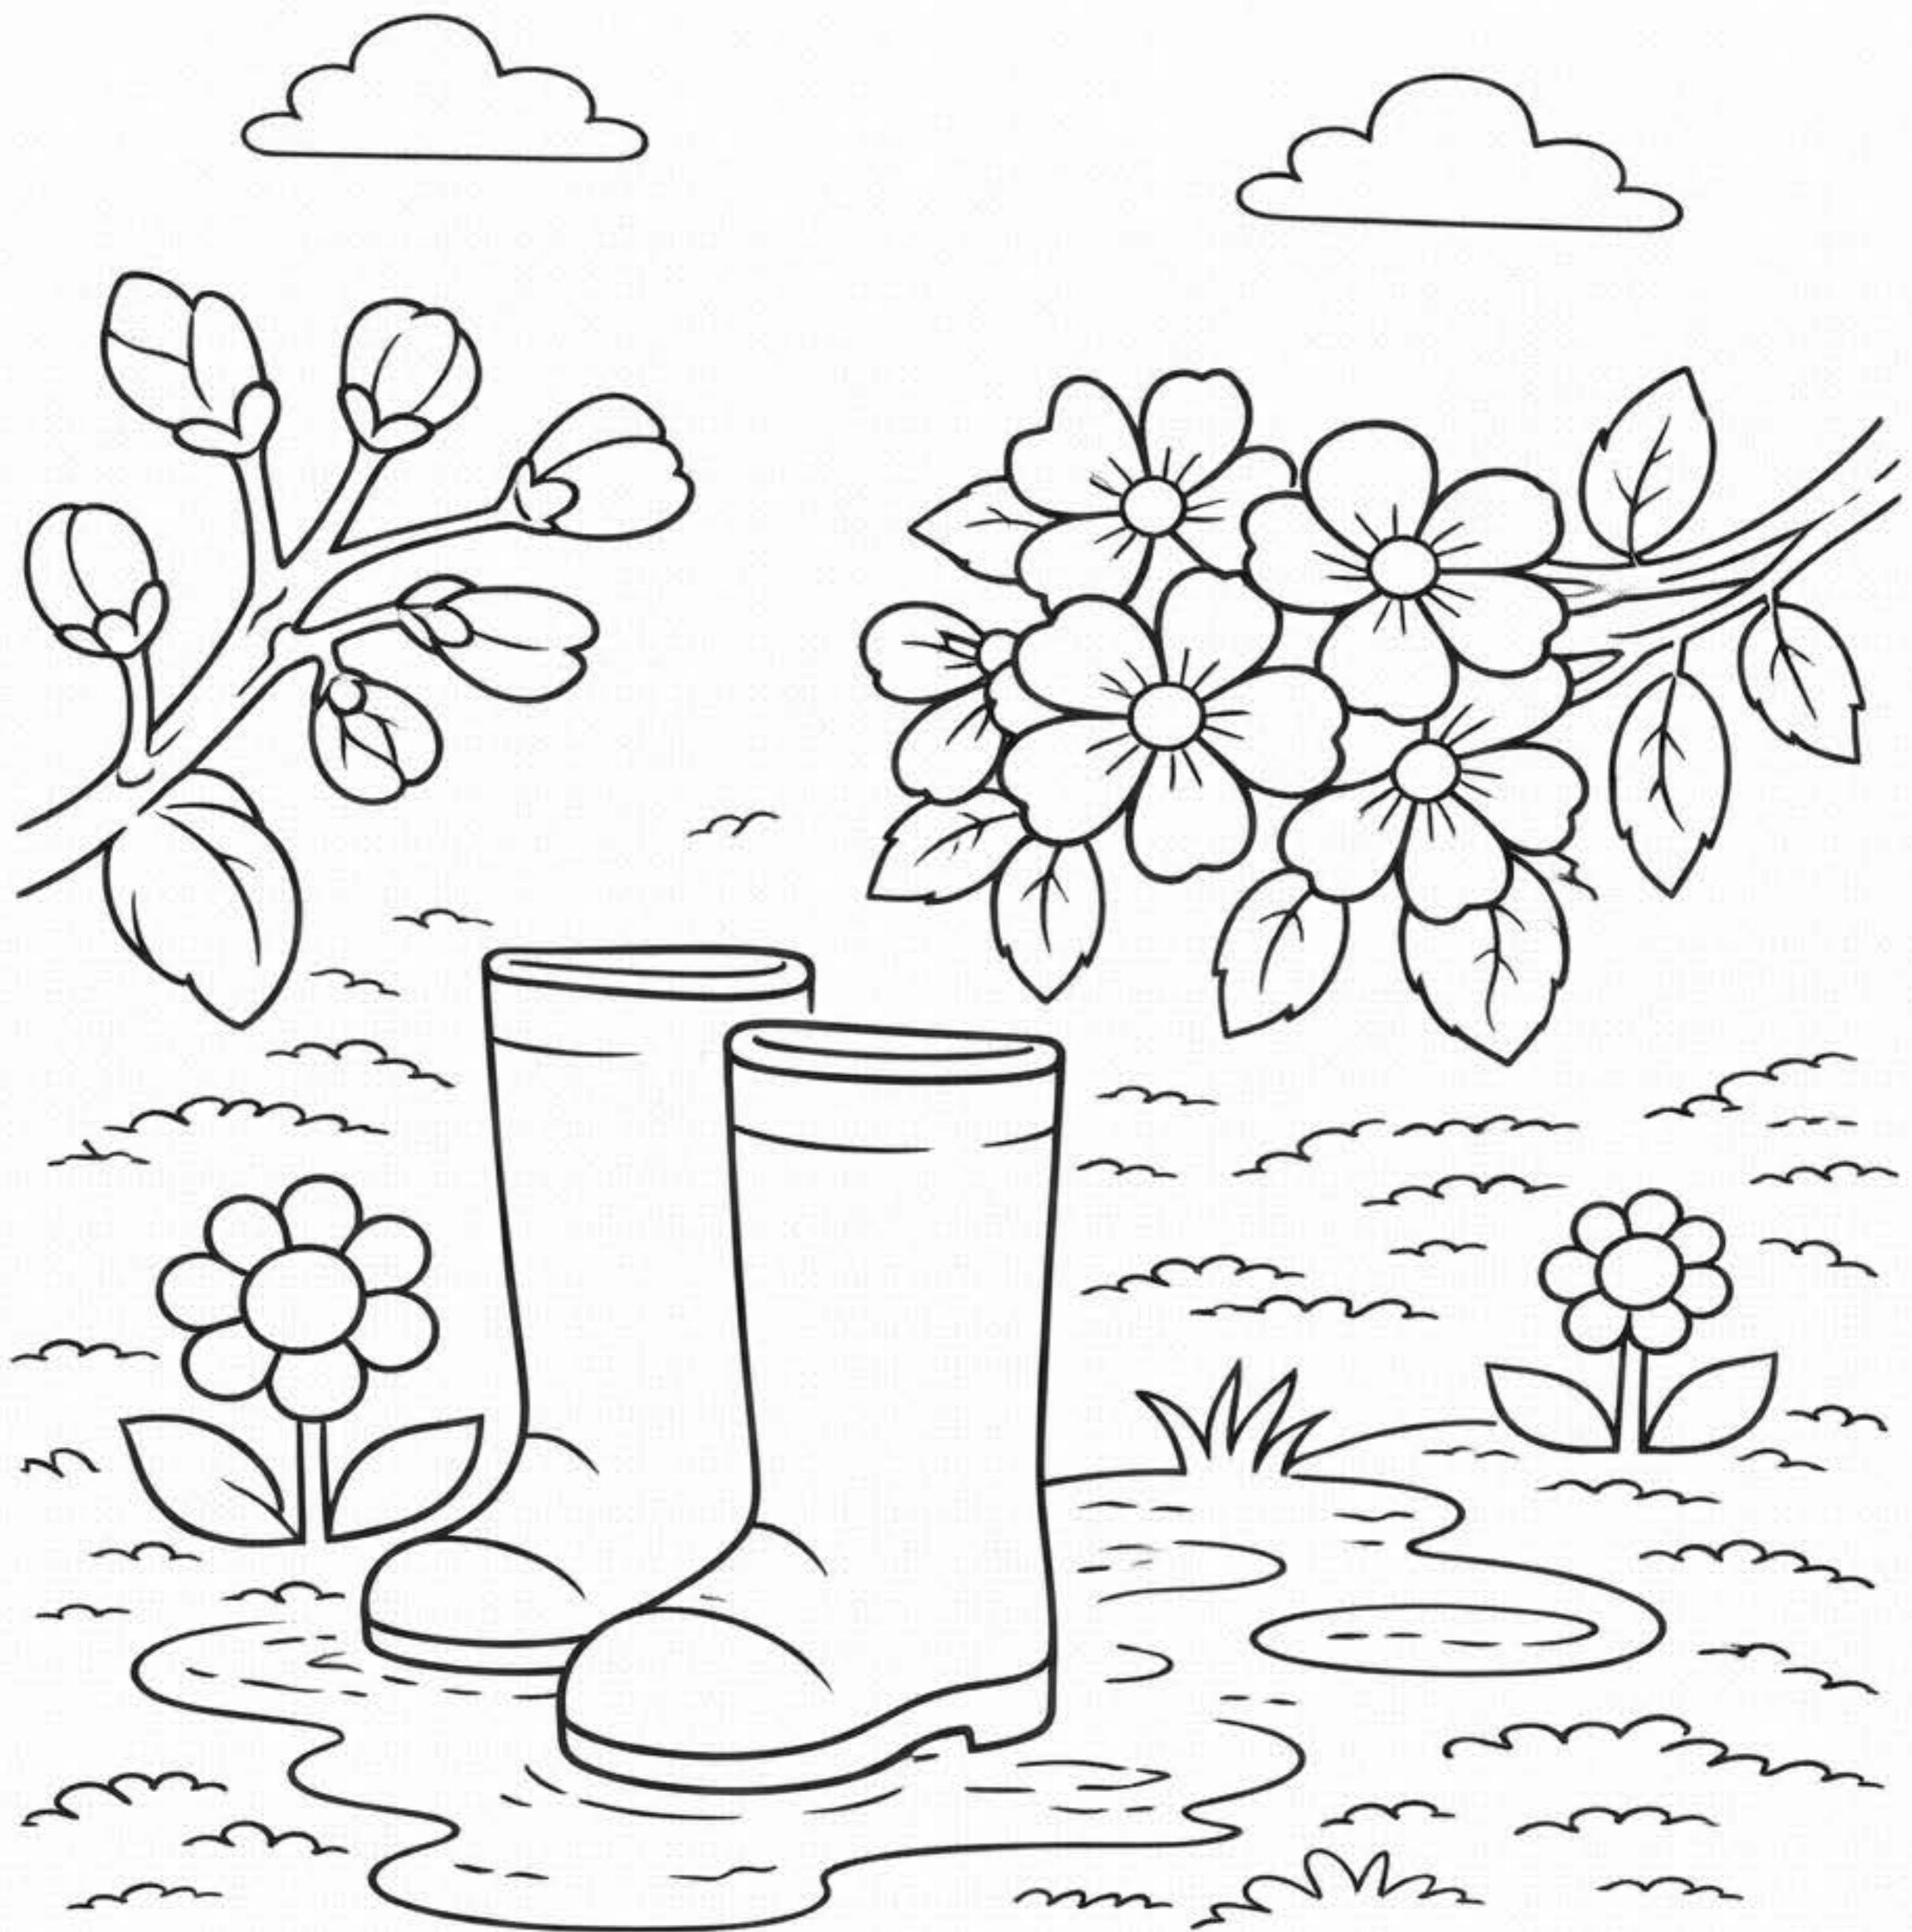

Ladybugs help keep plants healthy.

Birds find food and shelter here.

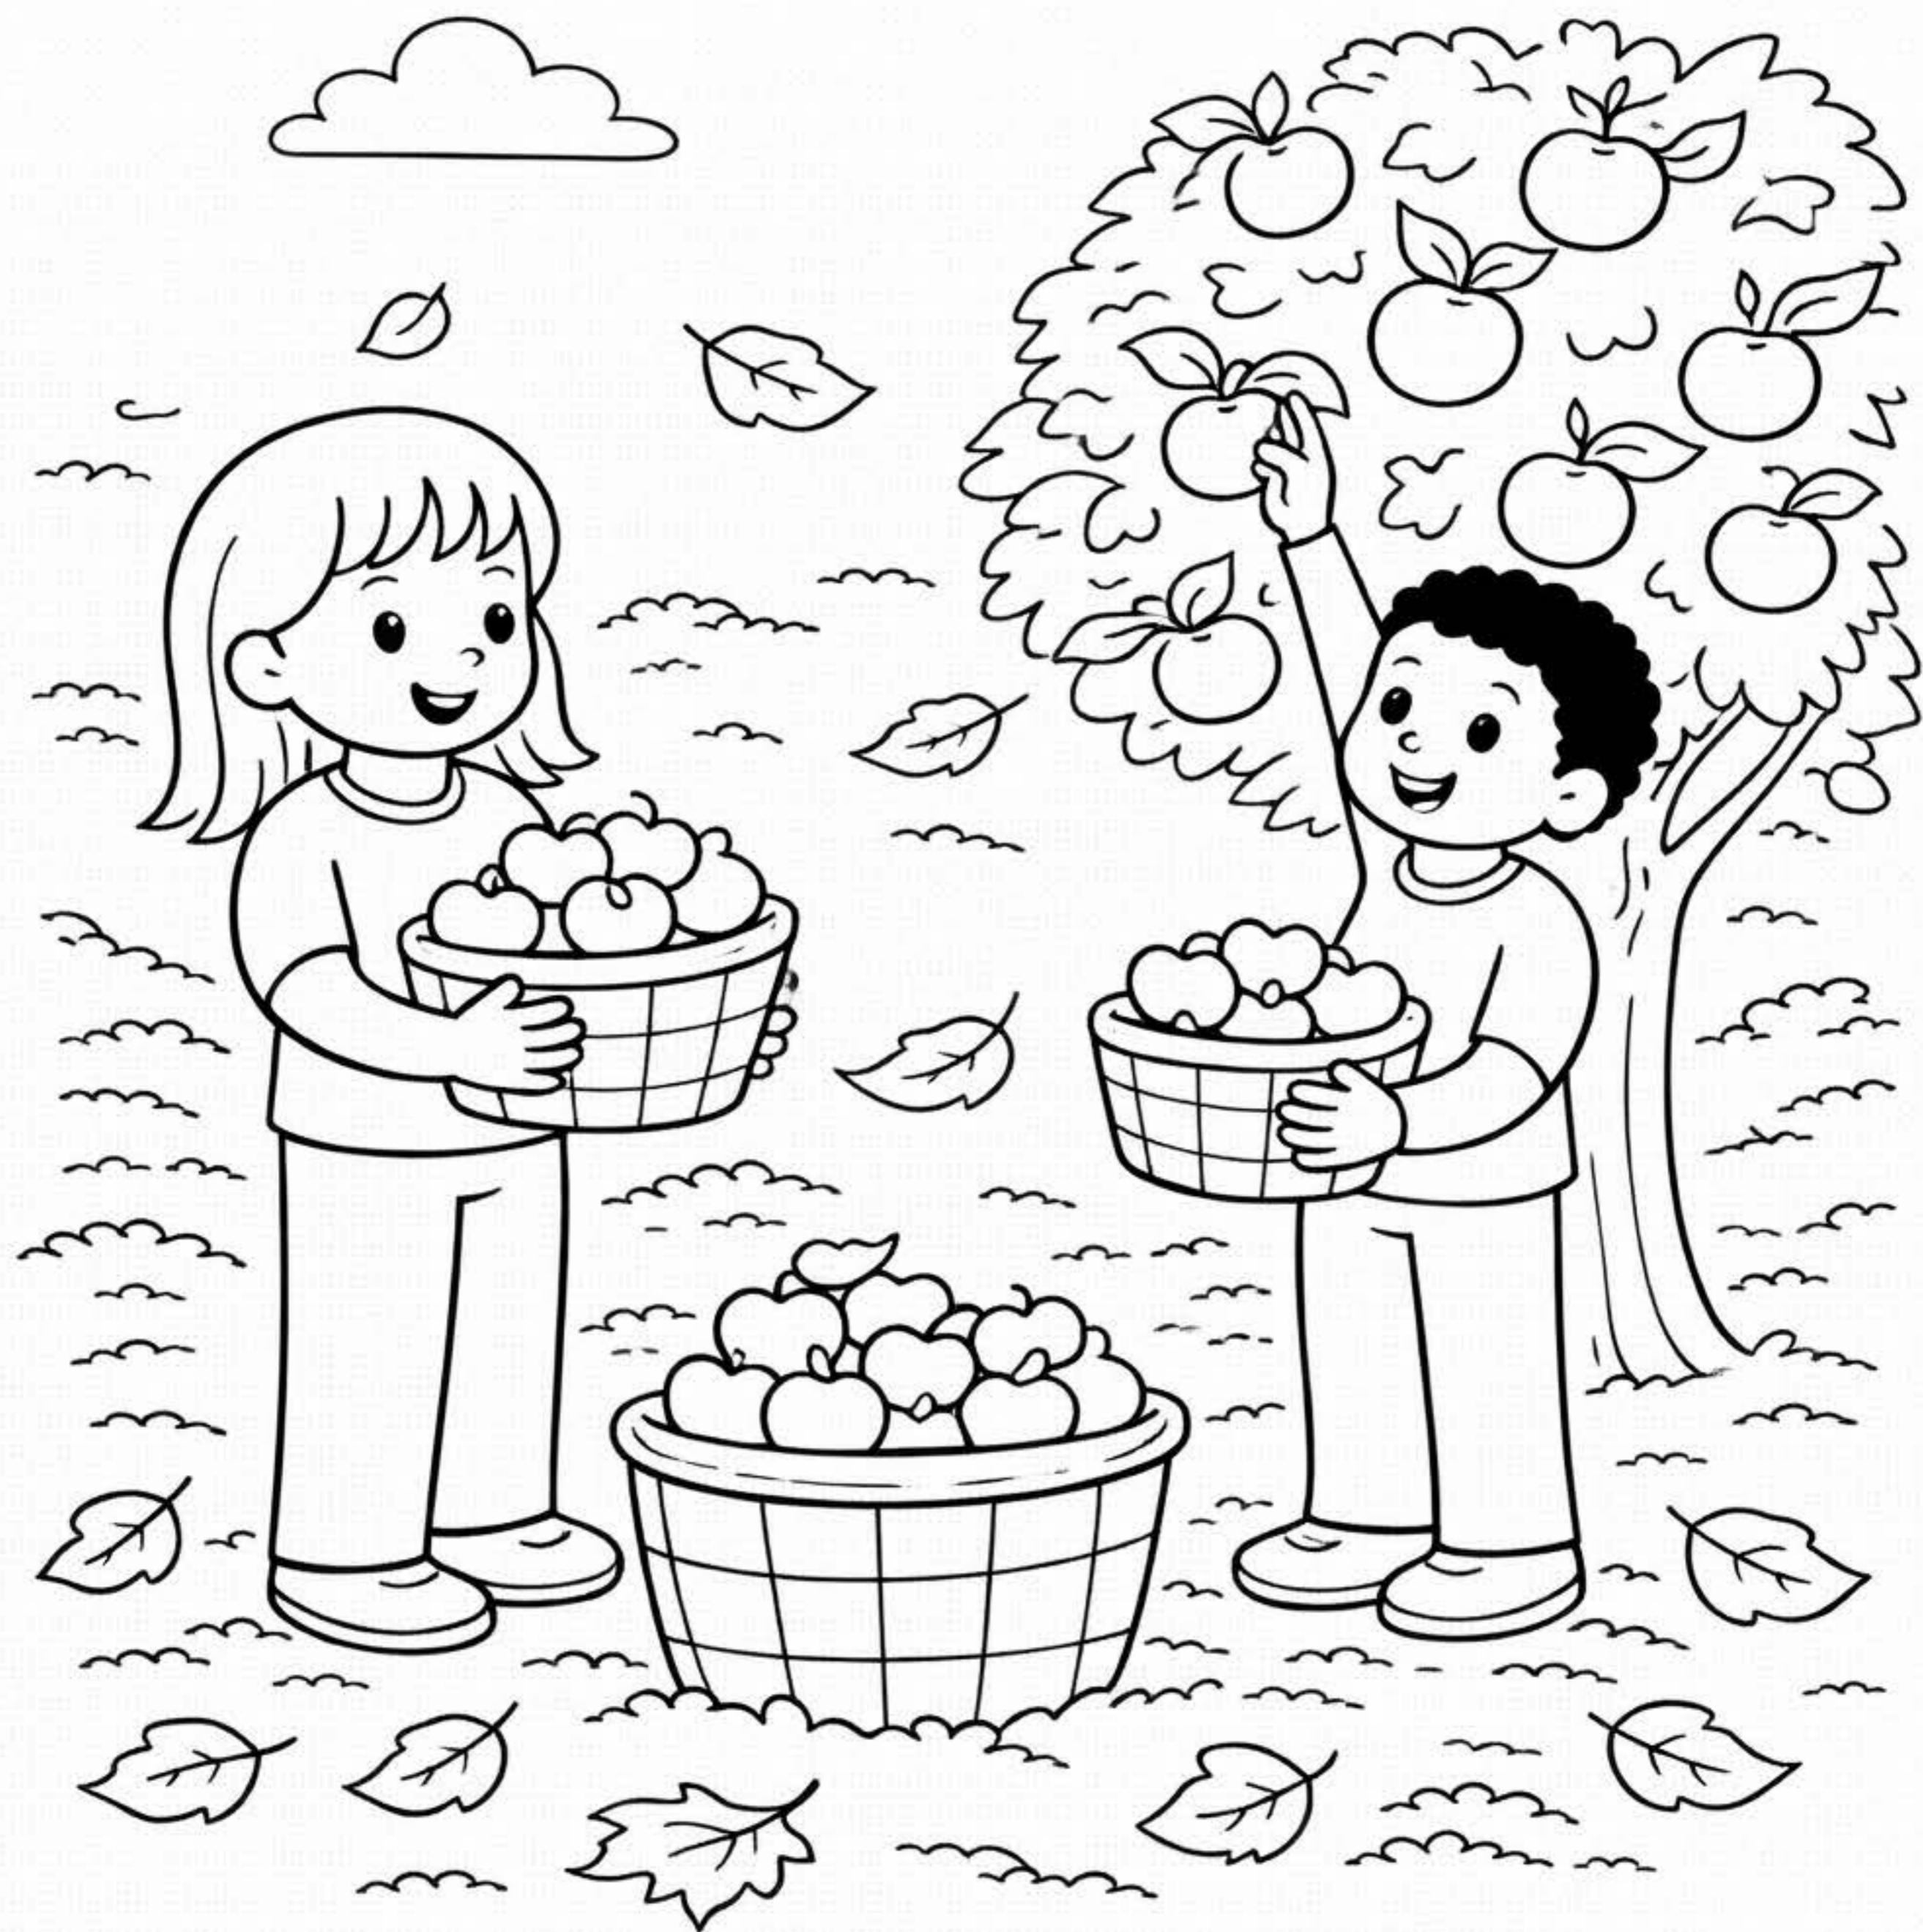

Reading and nature go together.

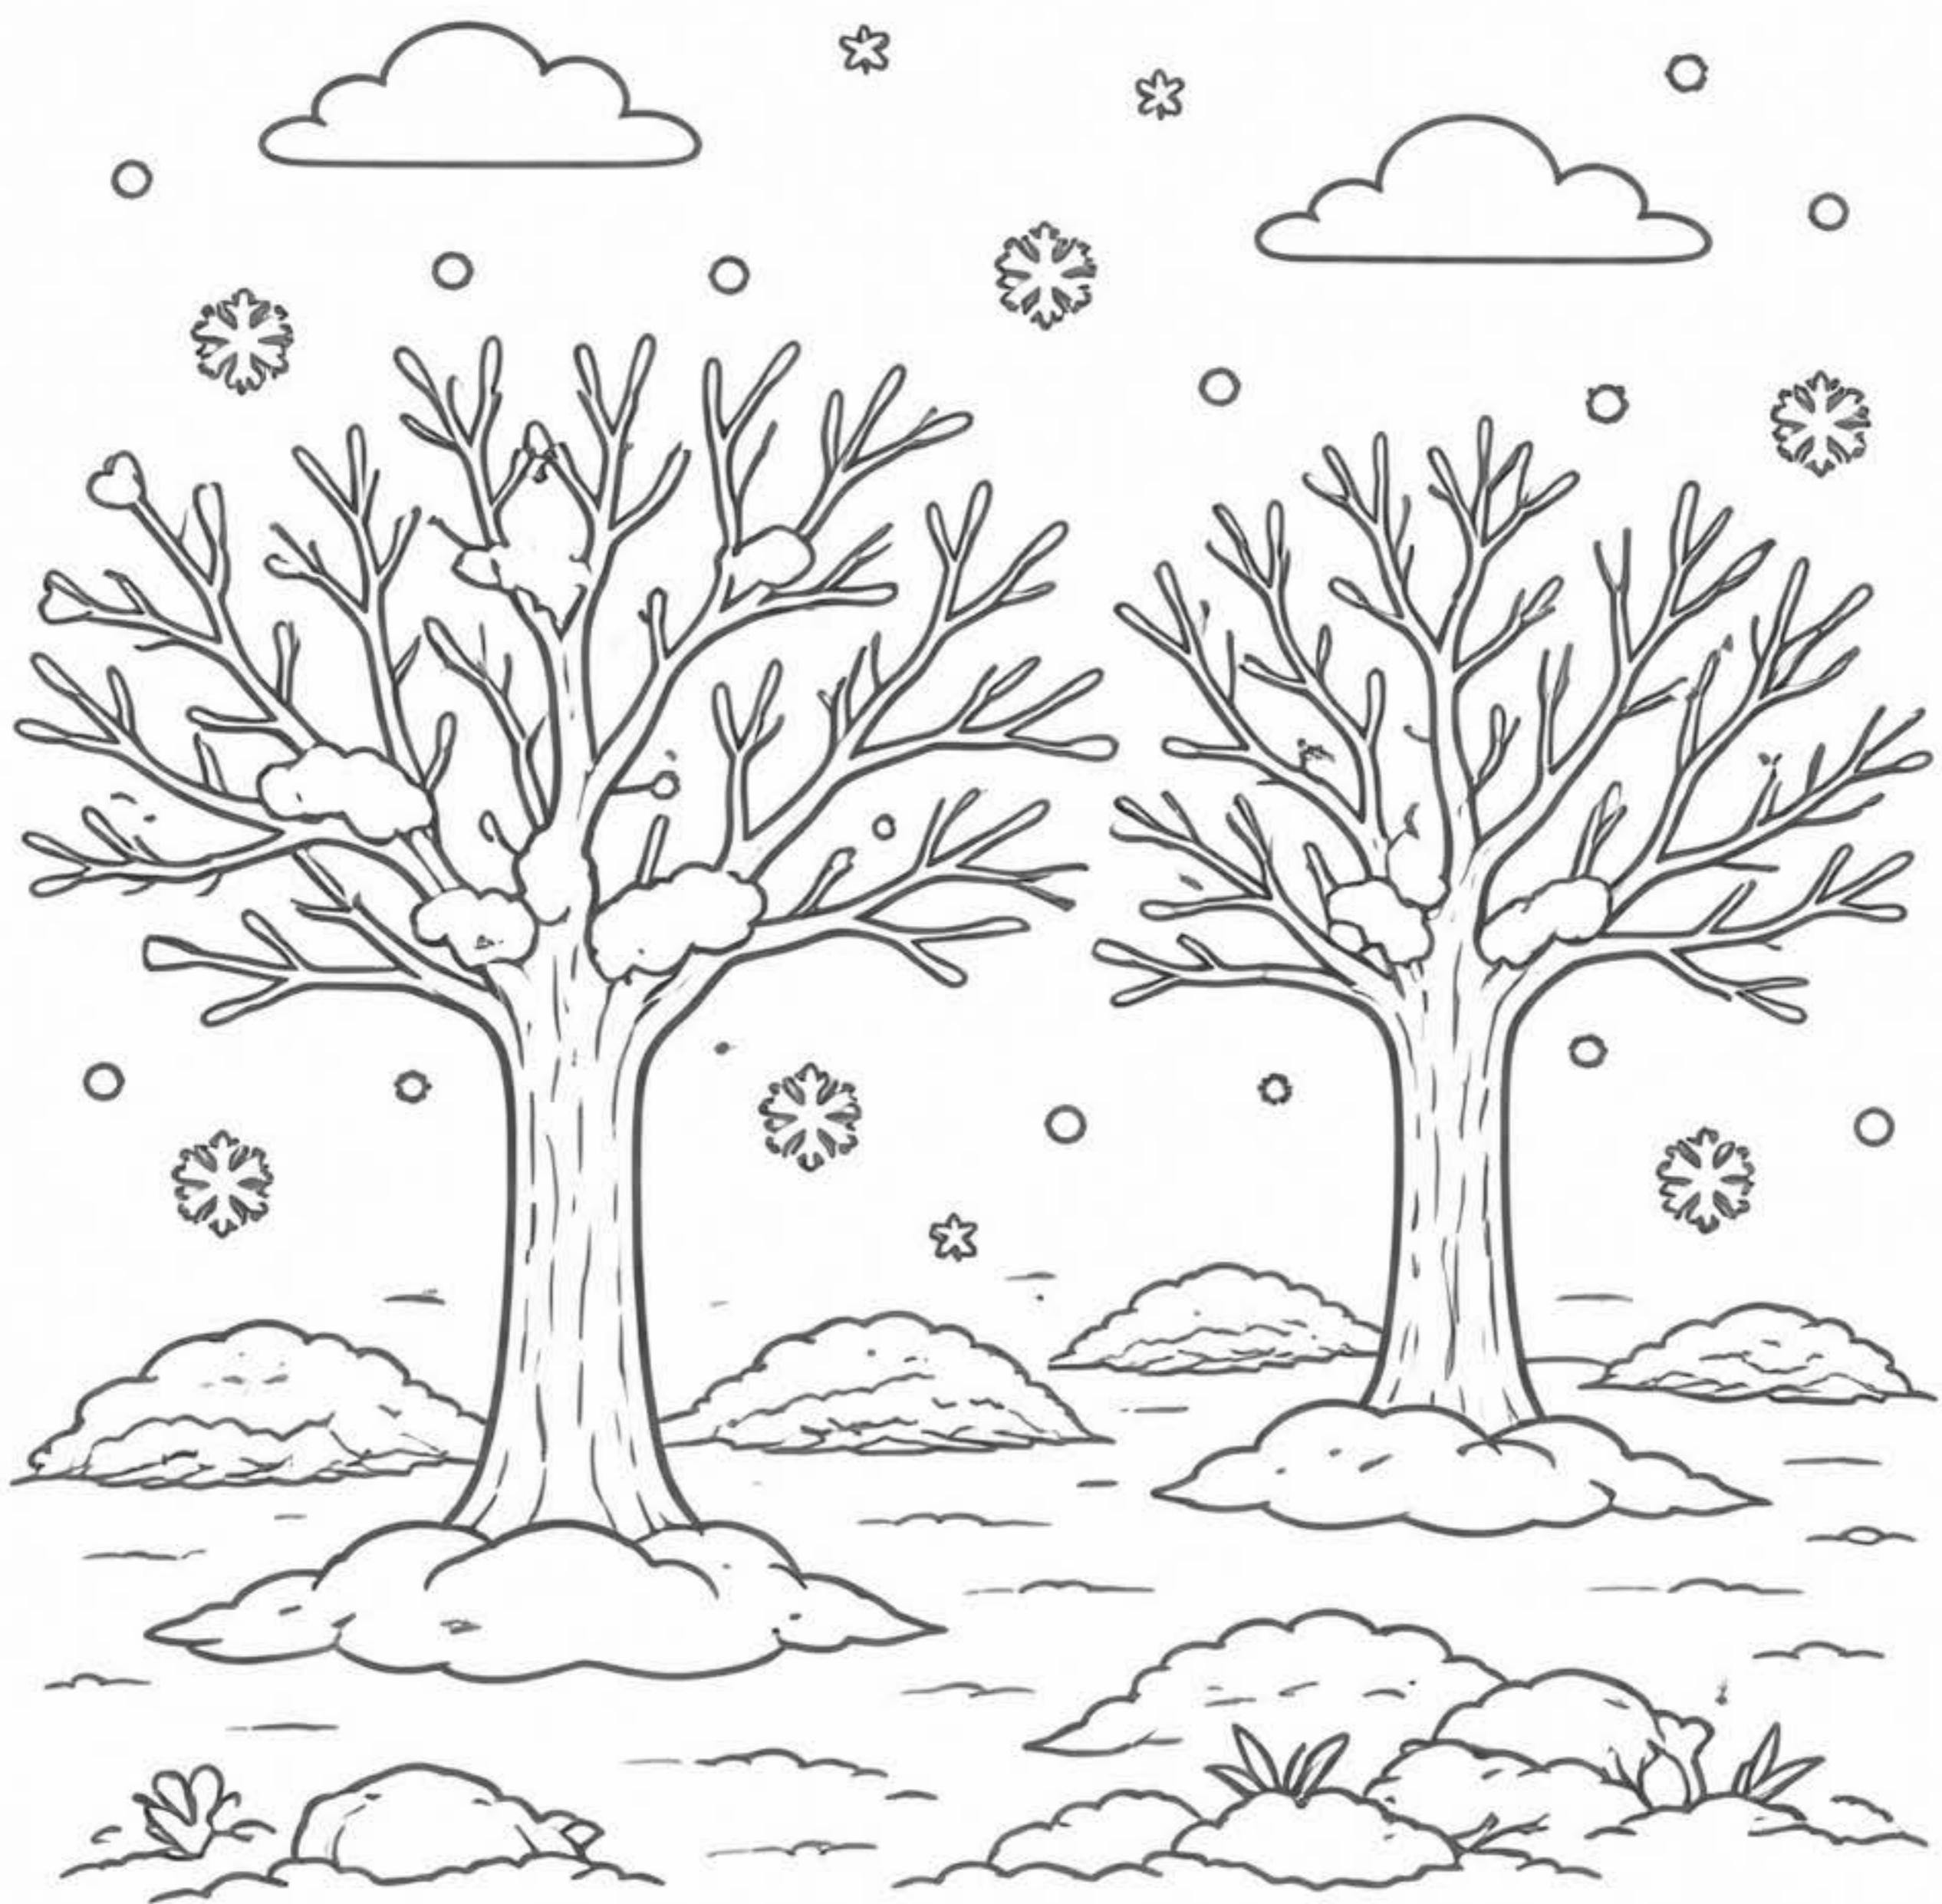

Spring brings new growth.

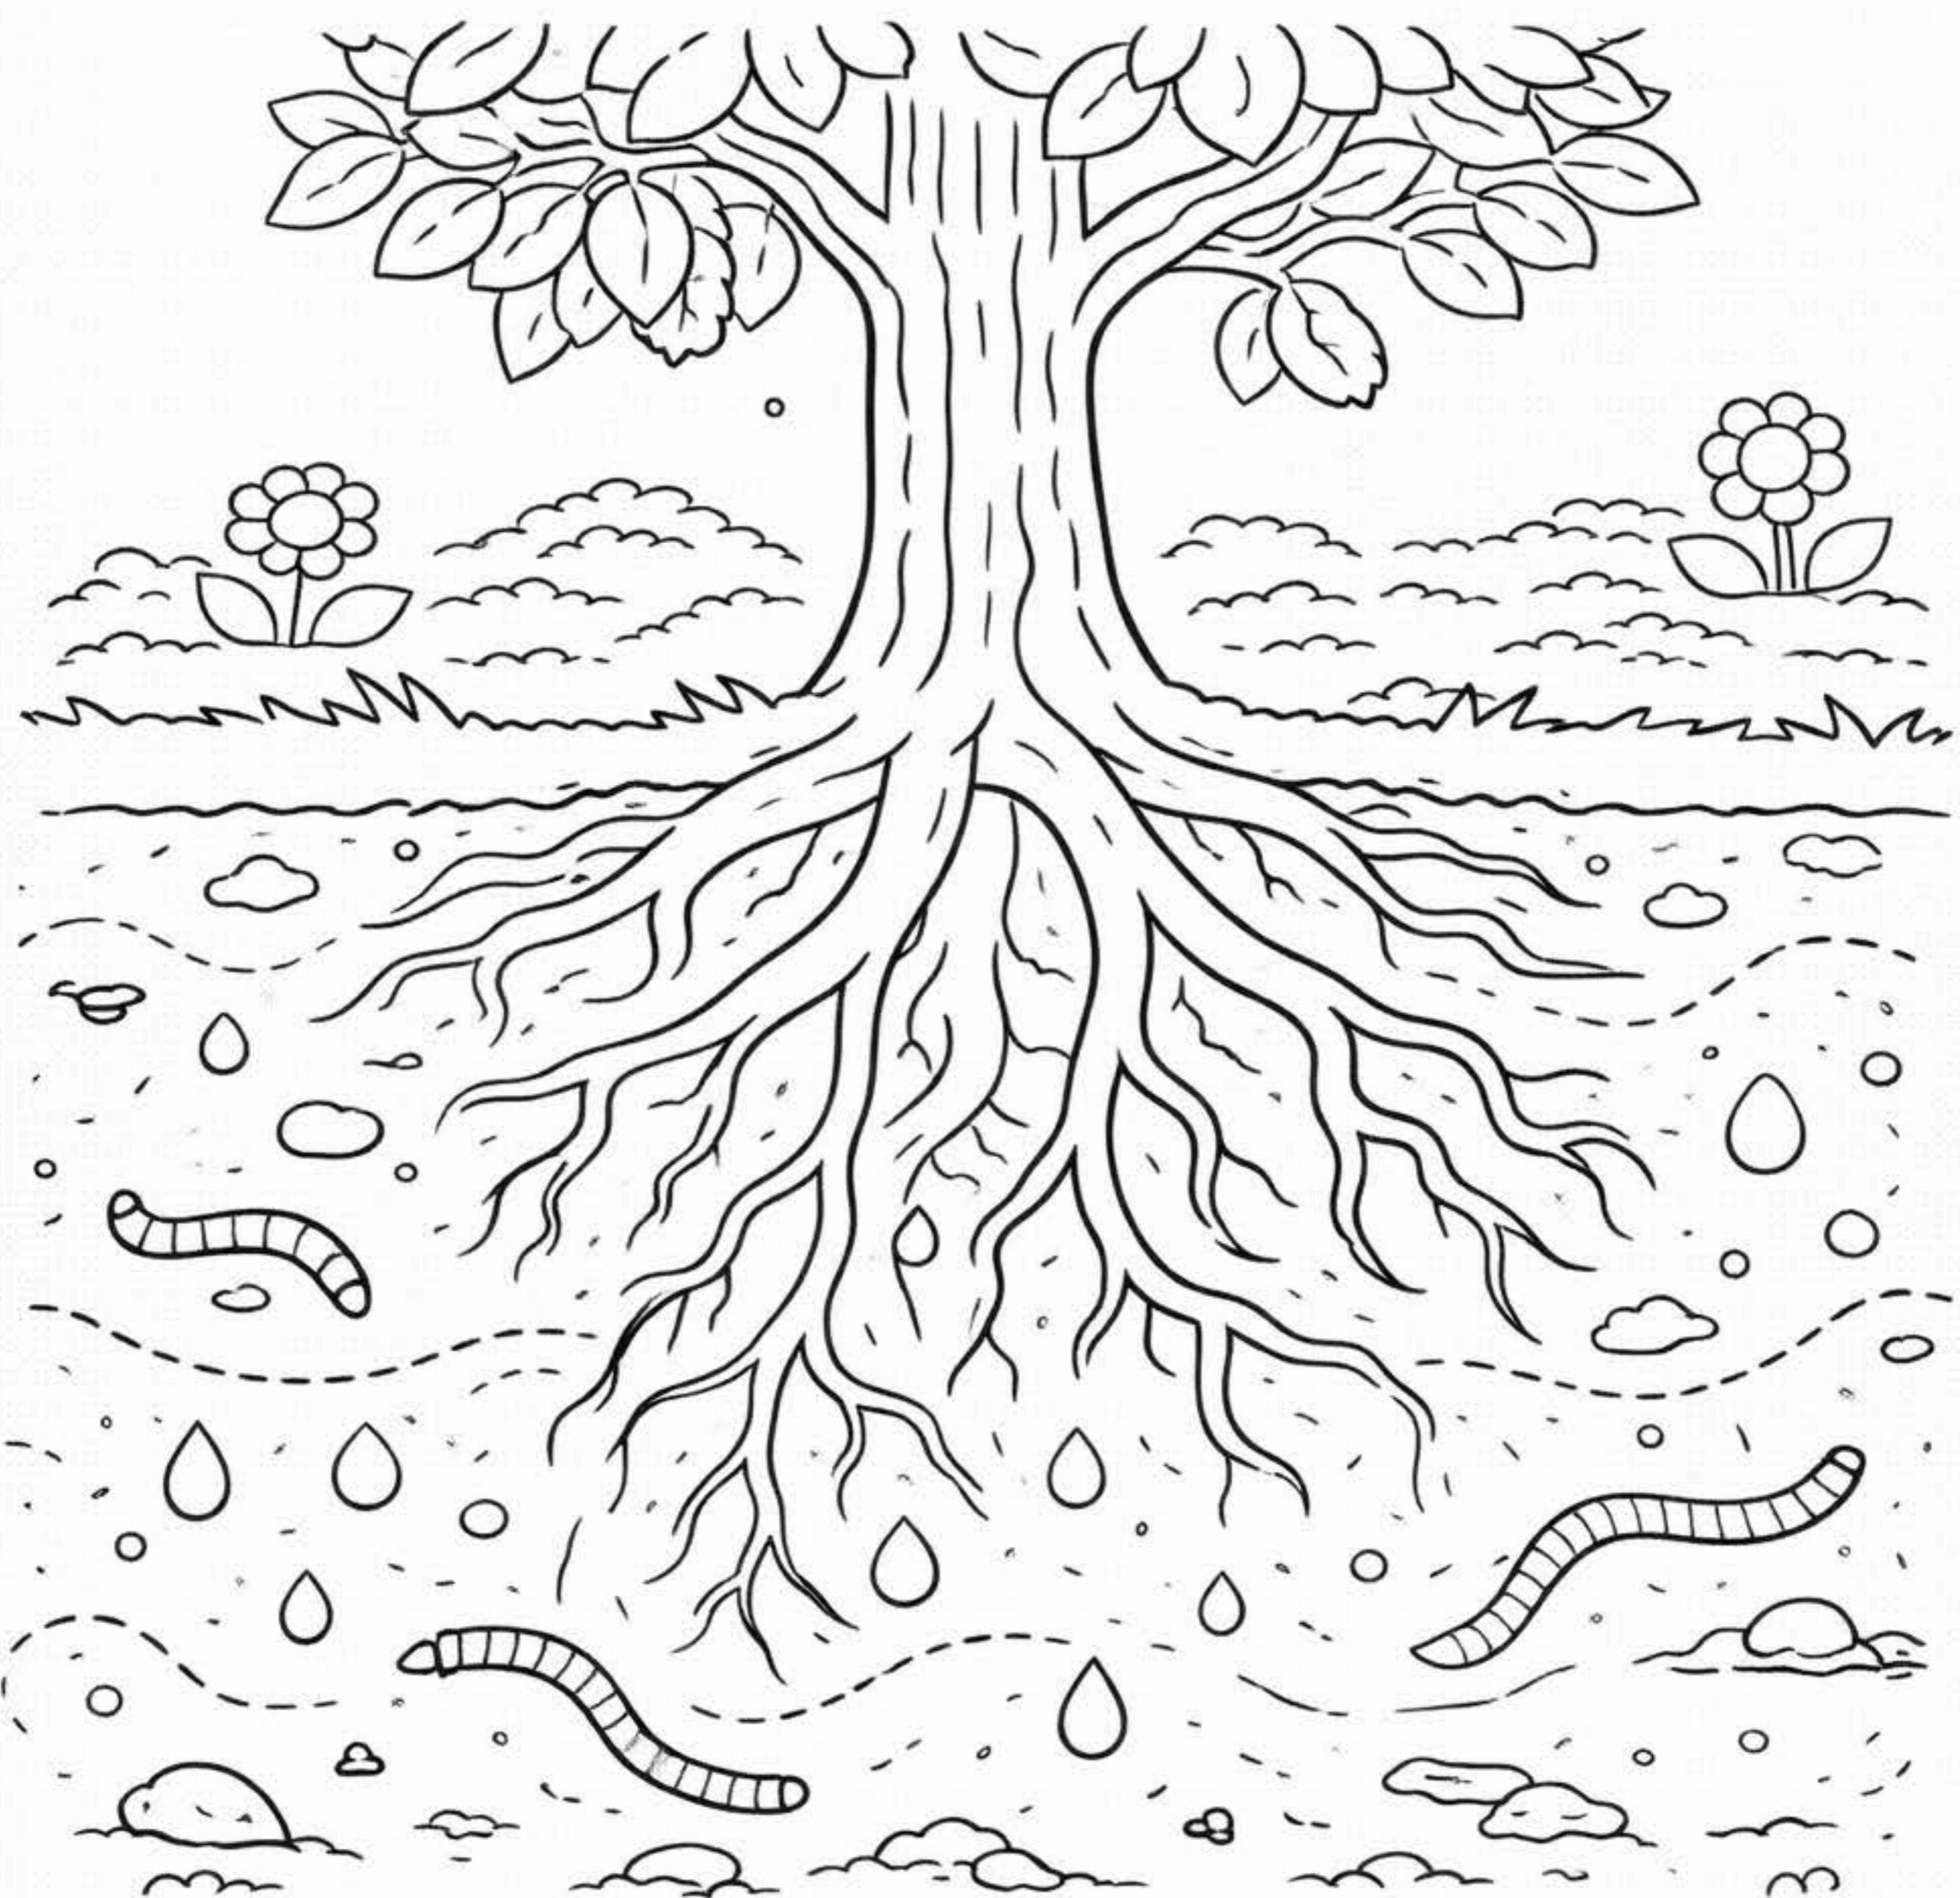

Summer is busy and bright.

Fall is harvest time.

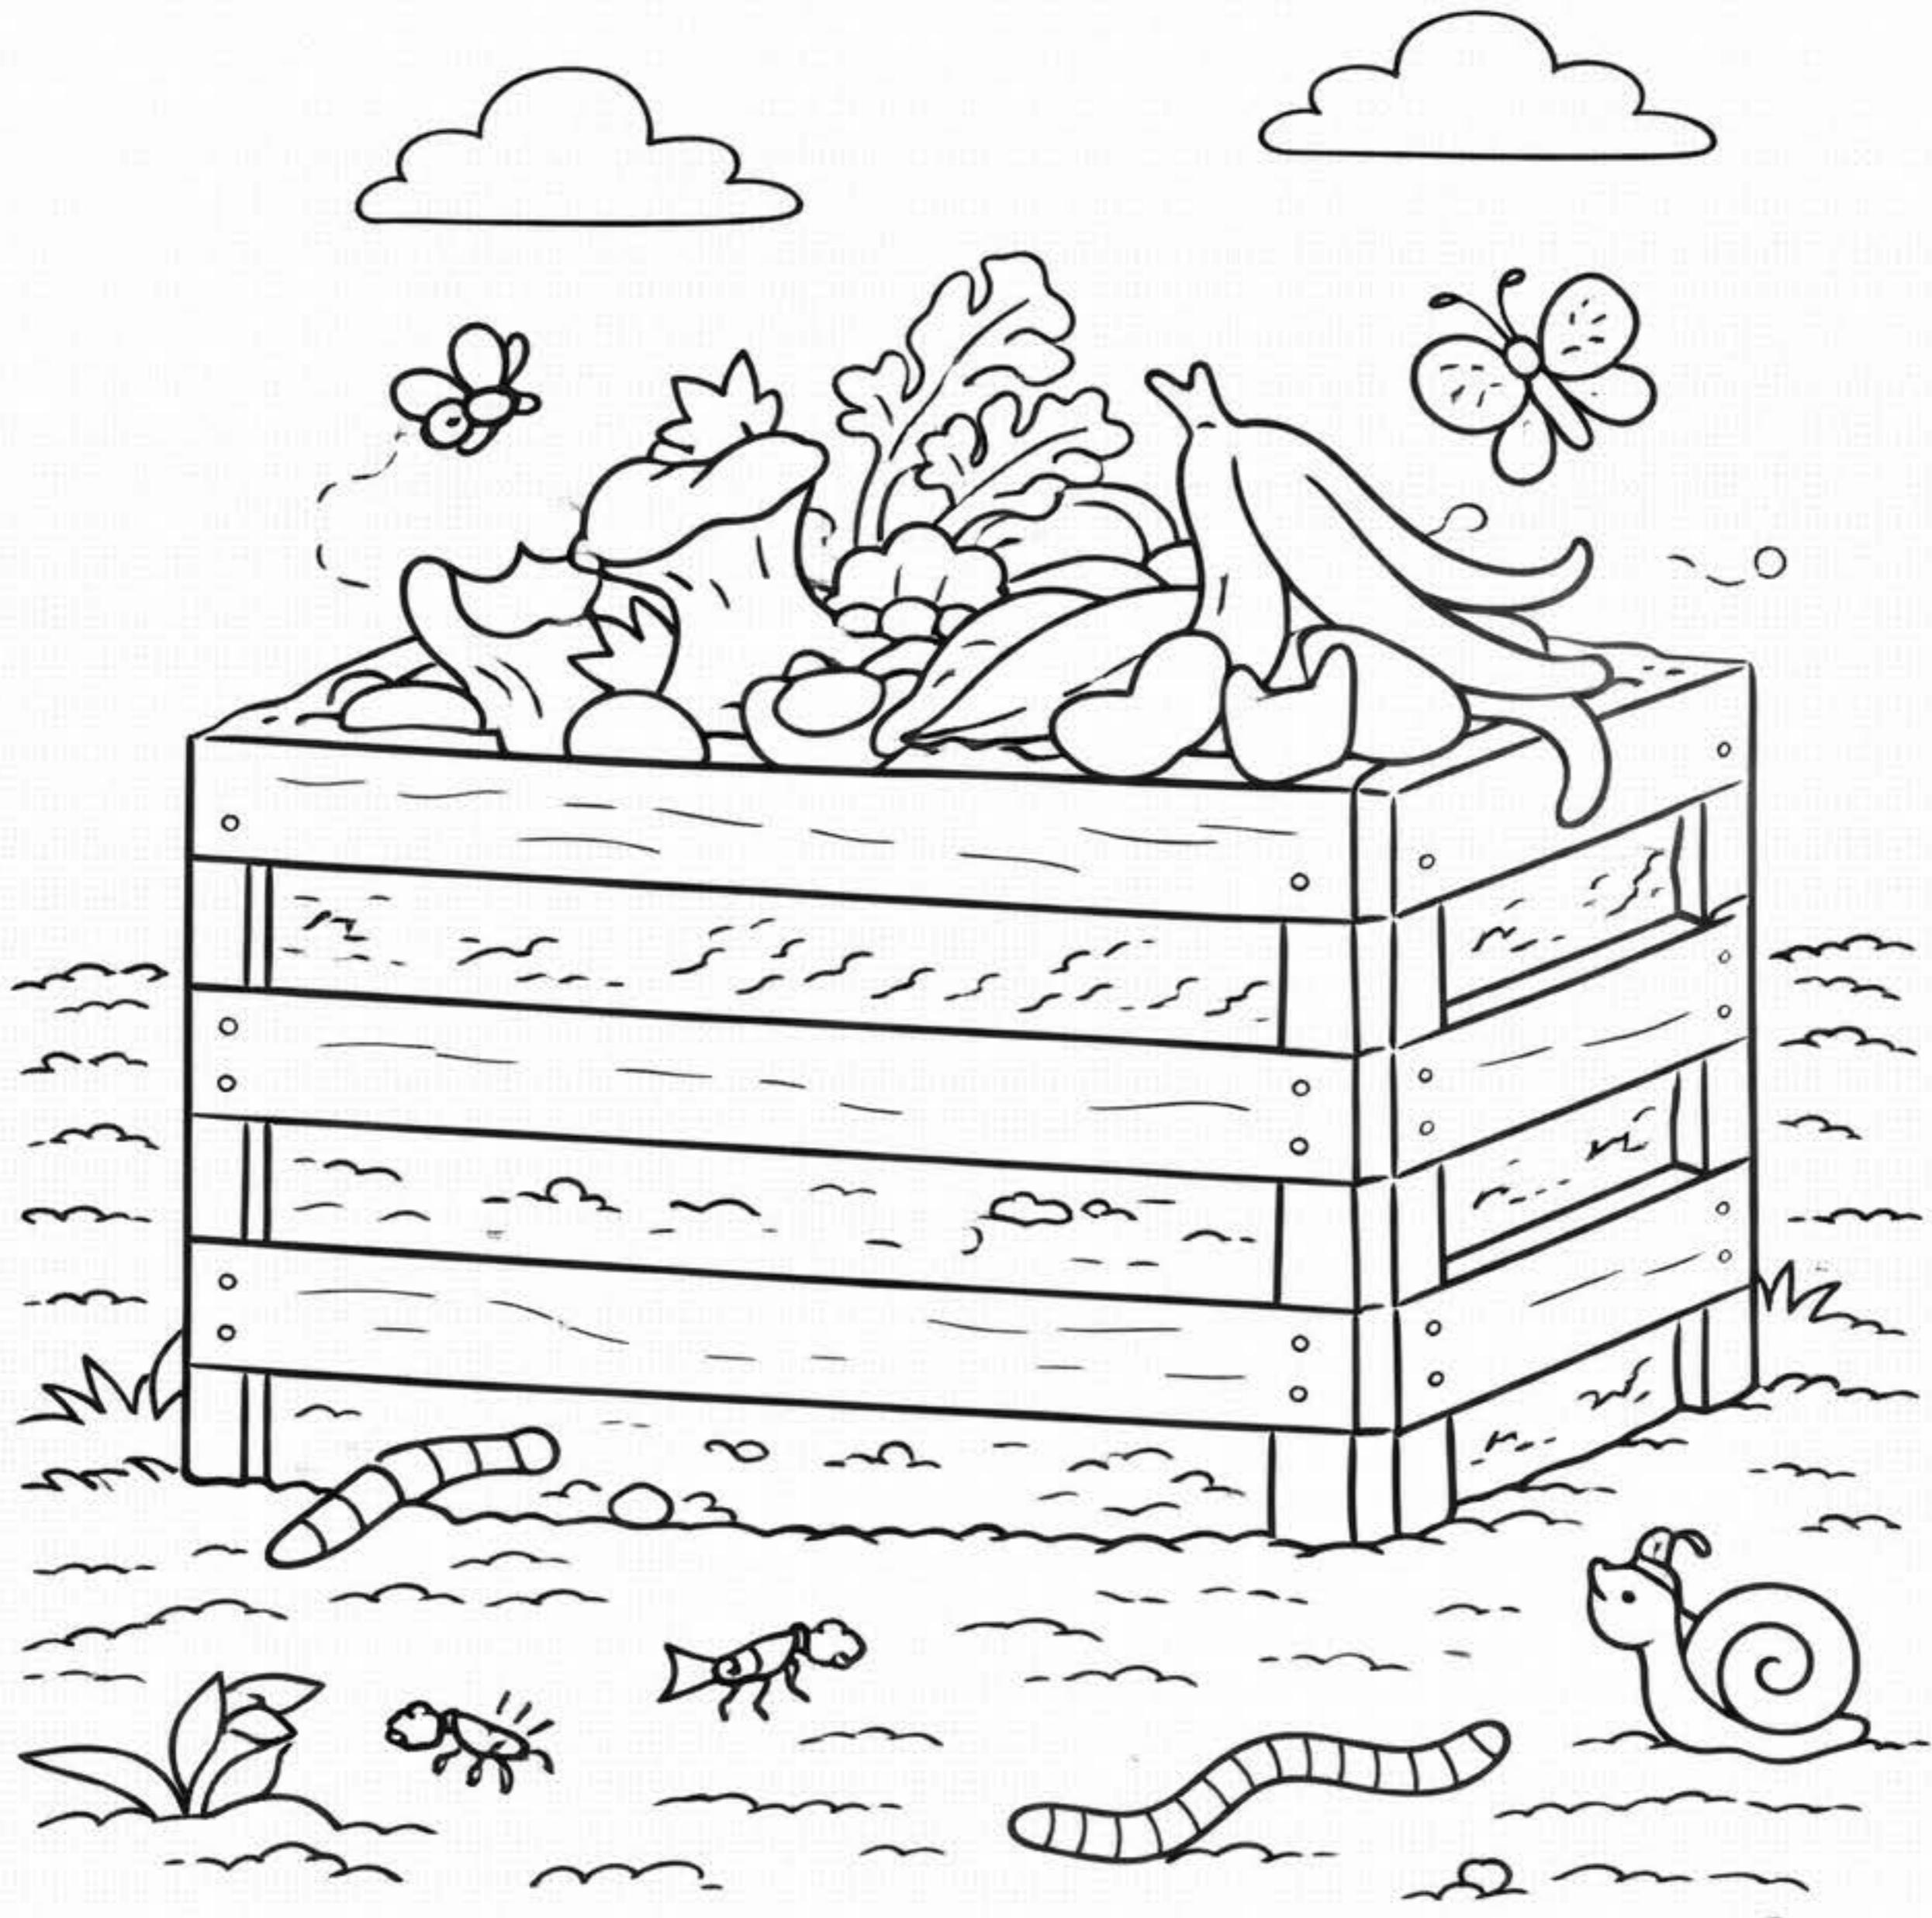

Trees rest in winter.

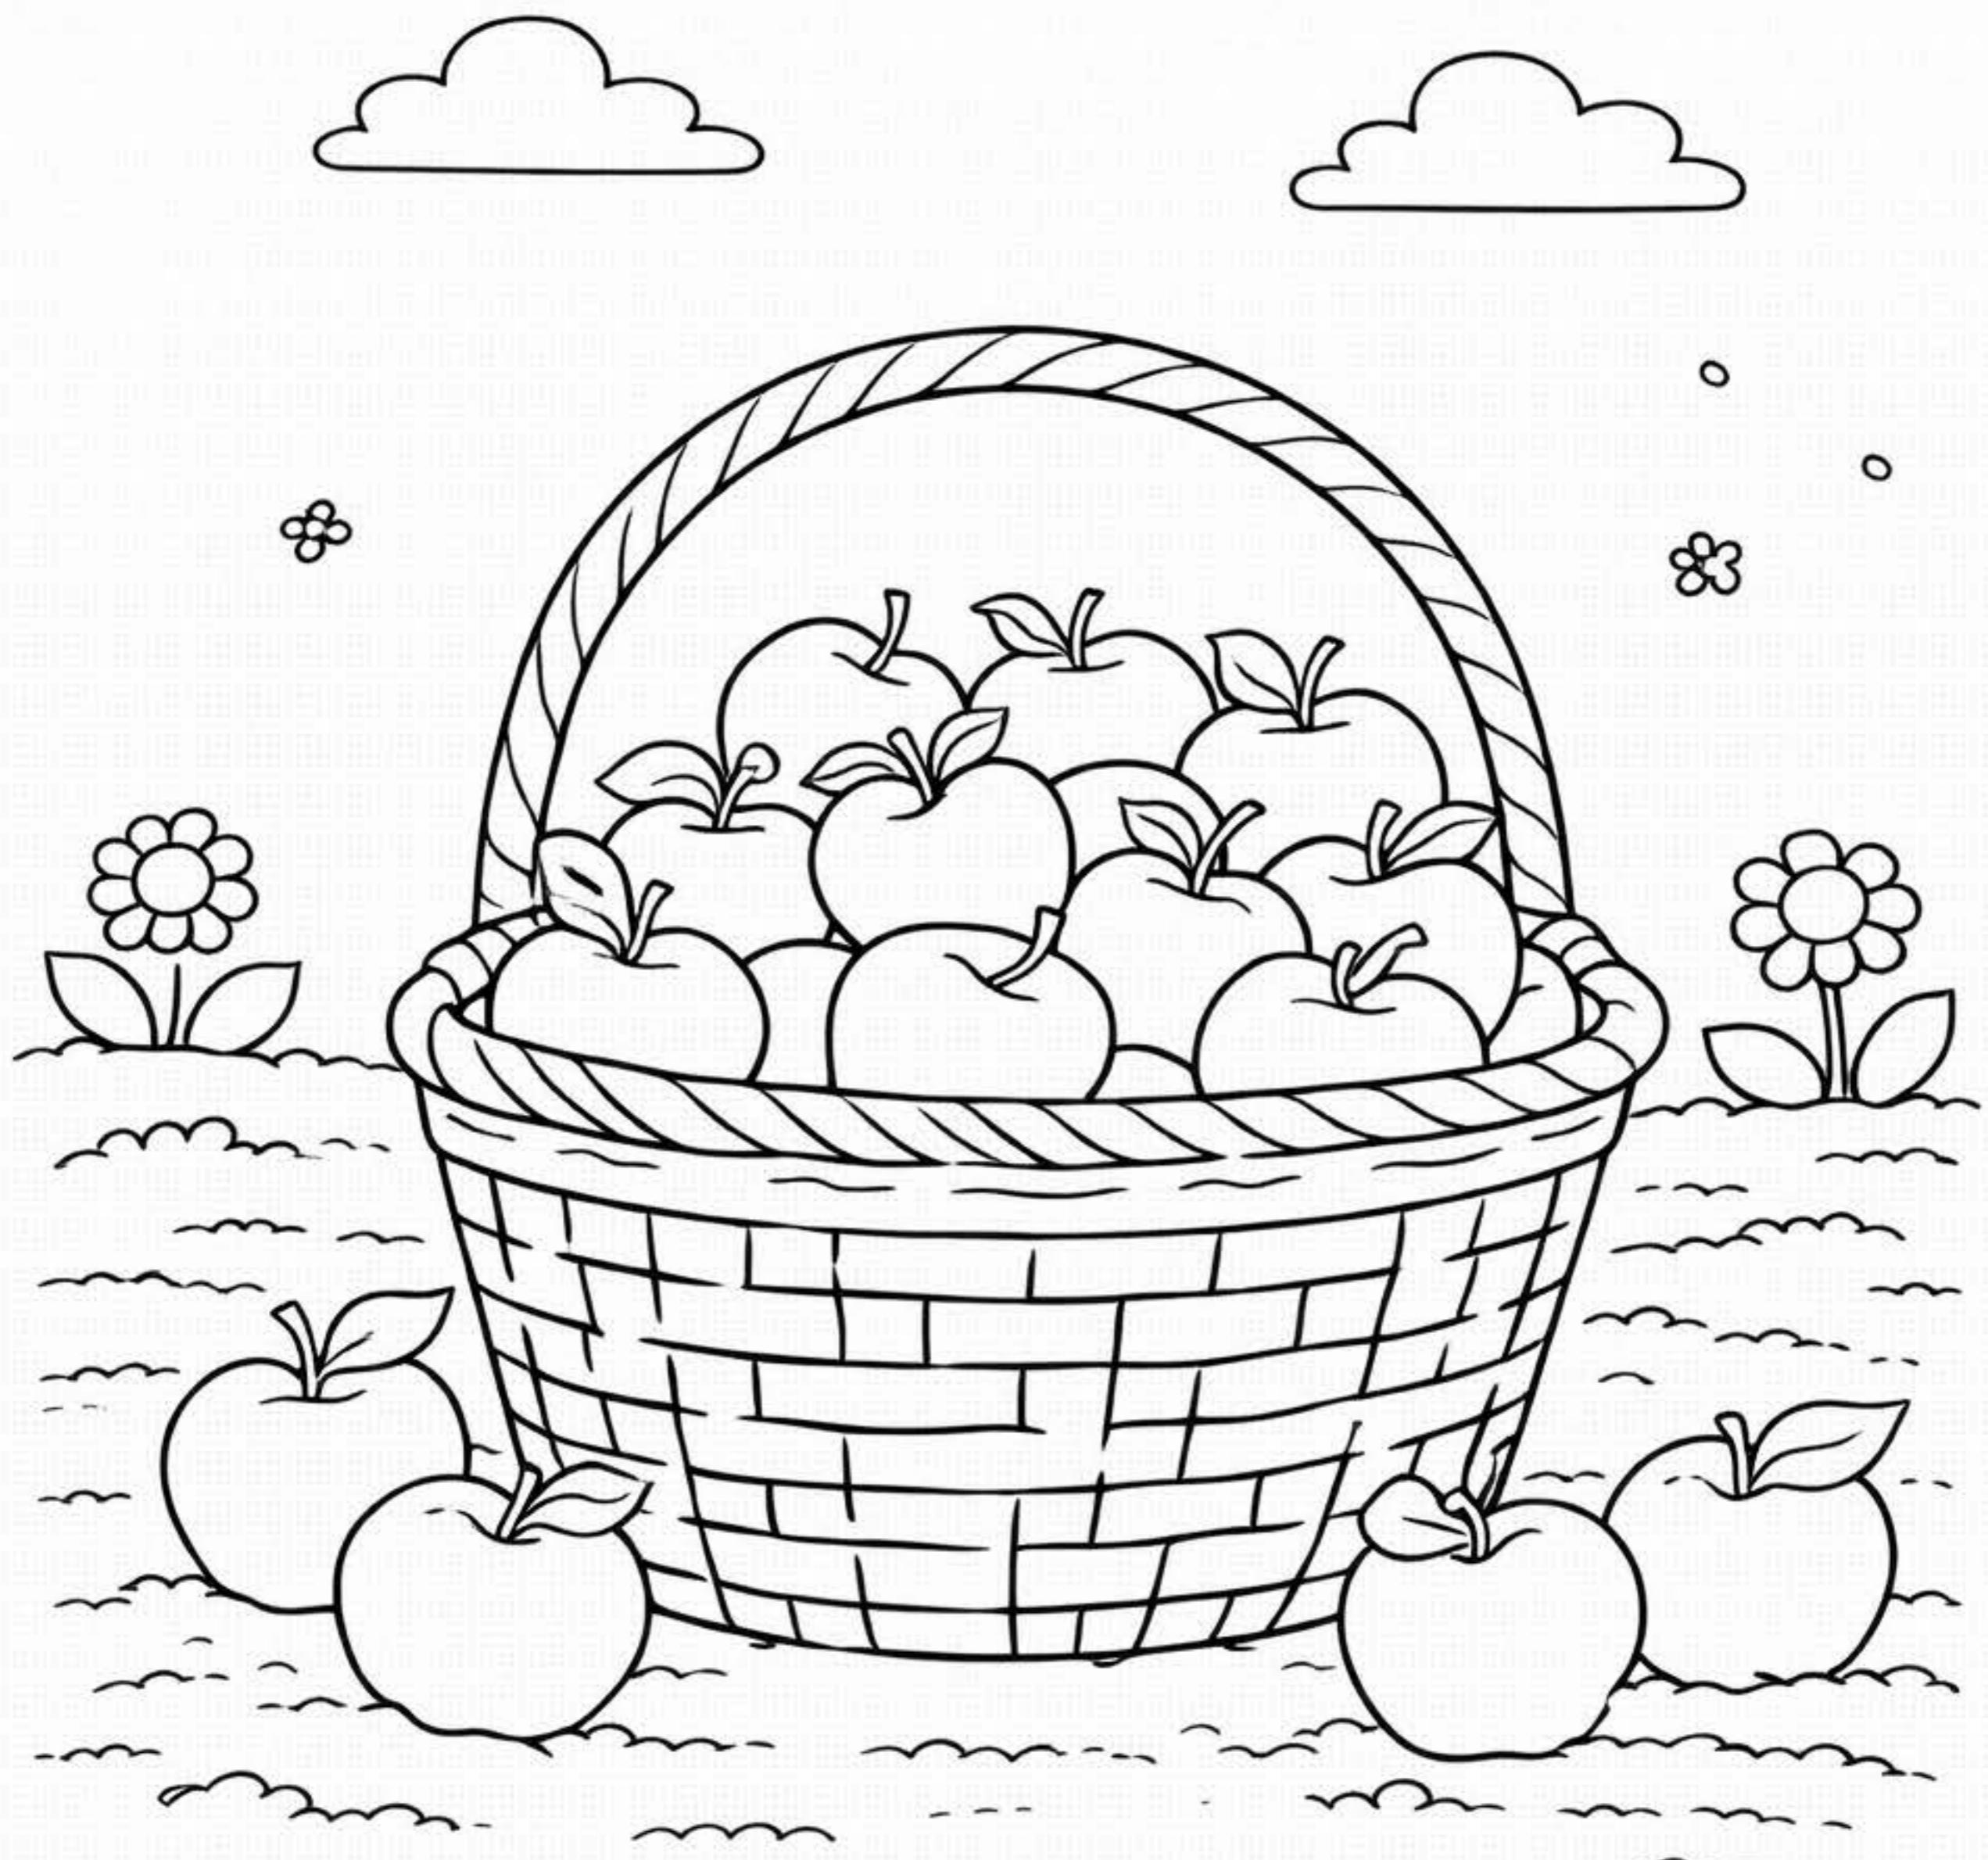

Roots drink water from the soil.

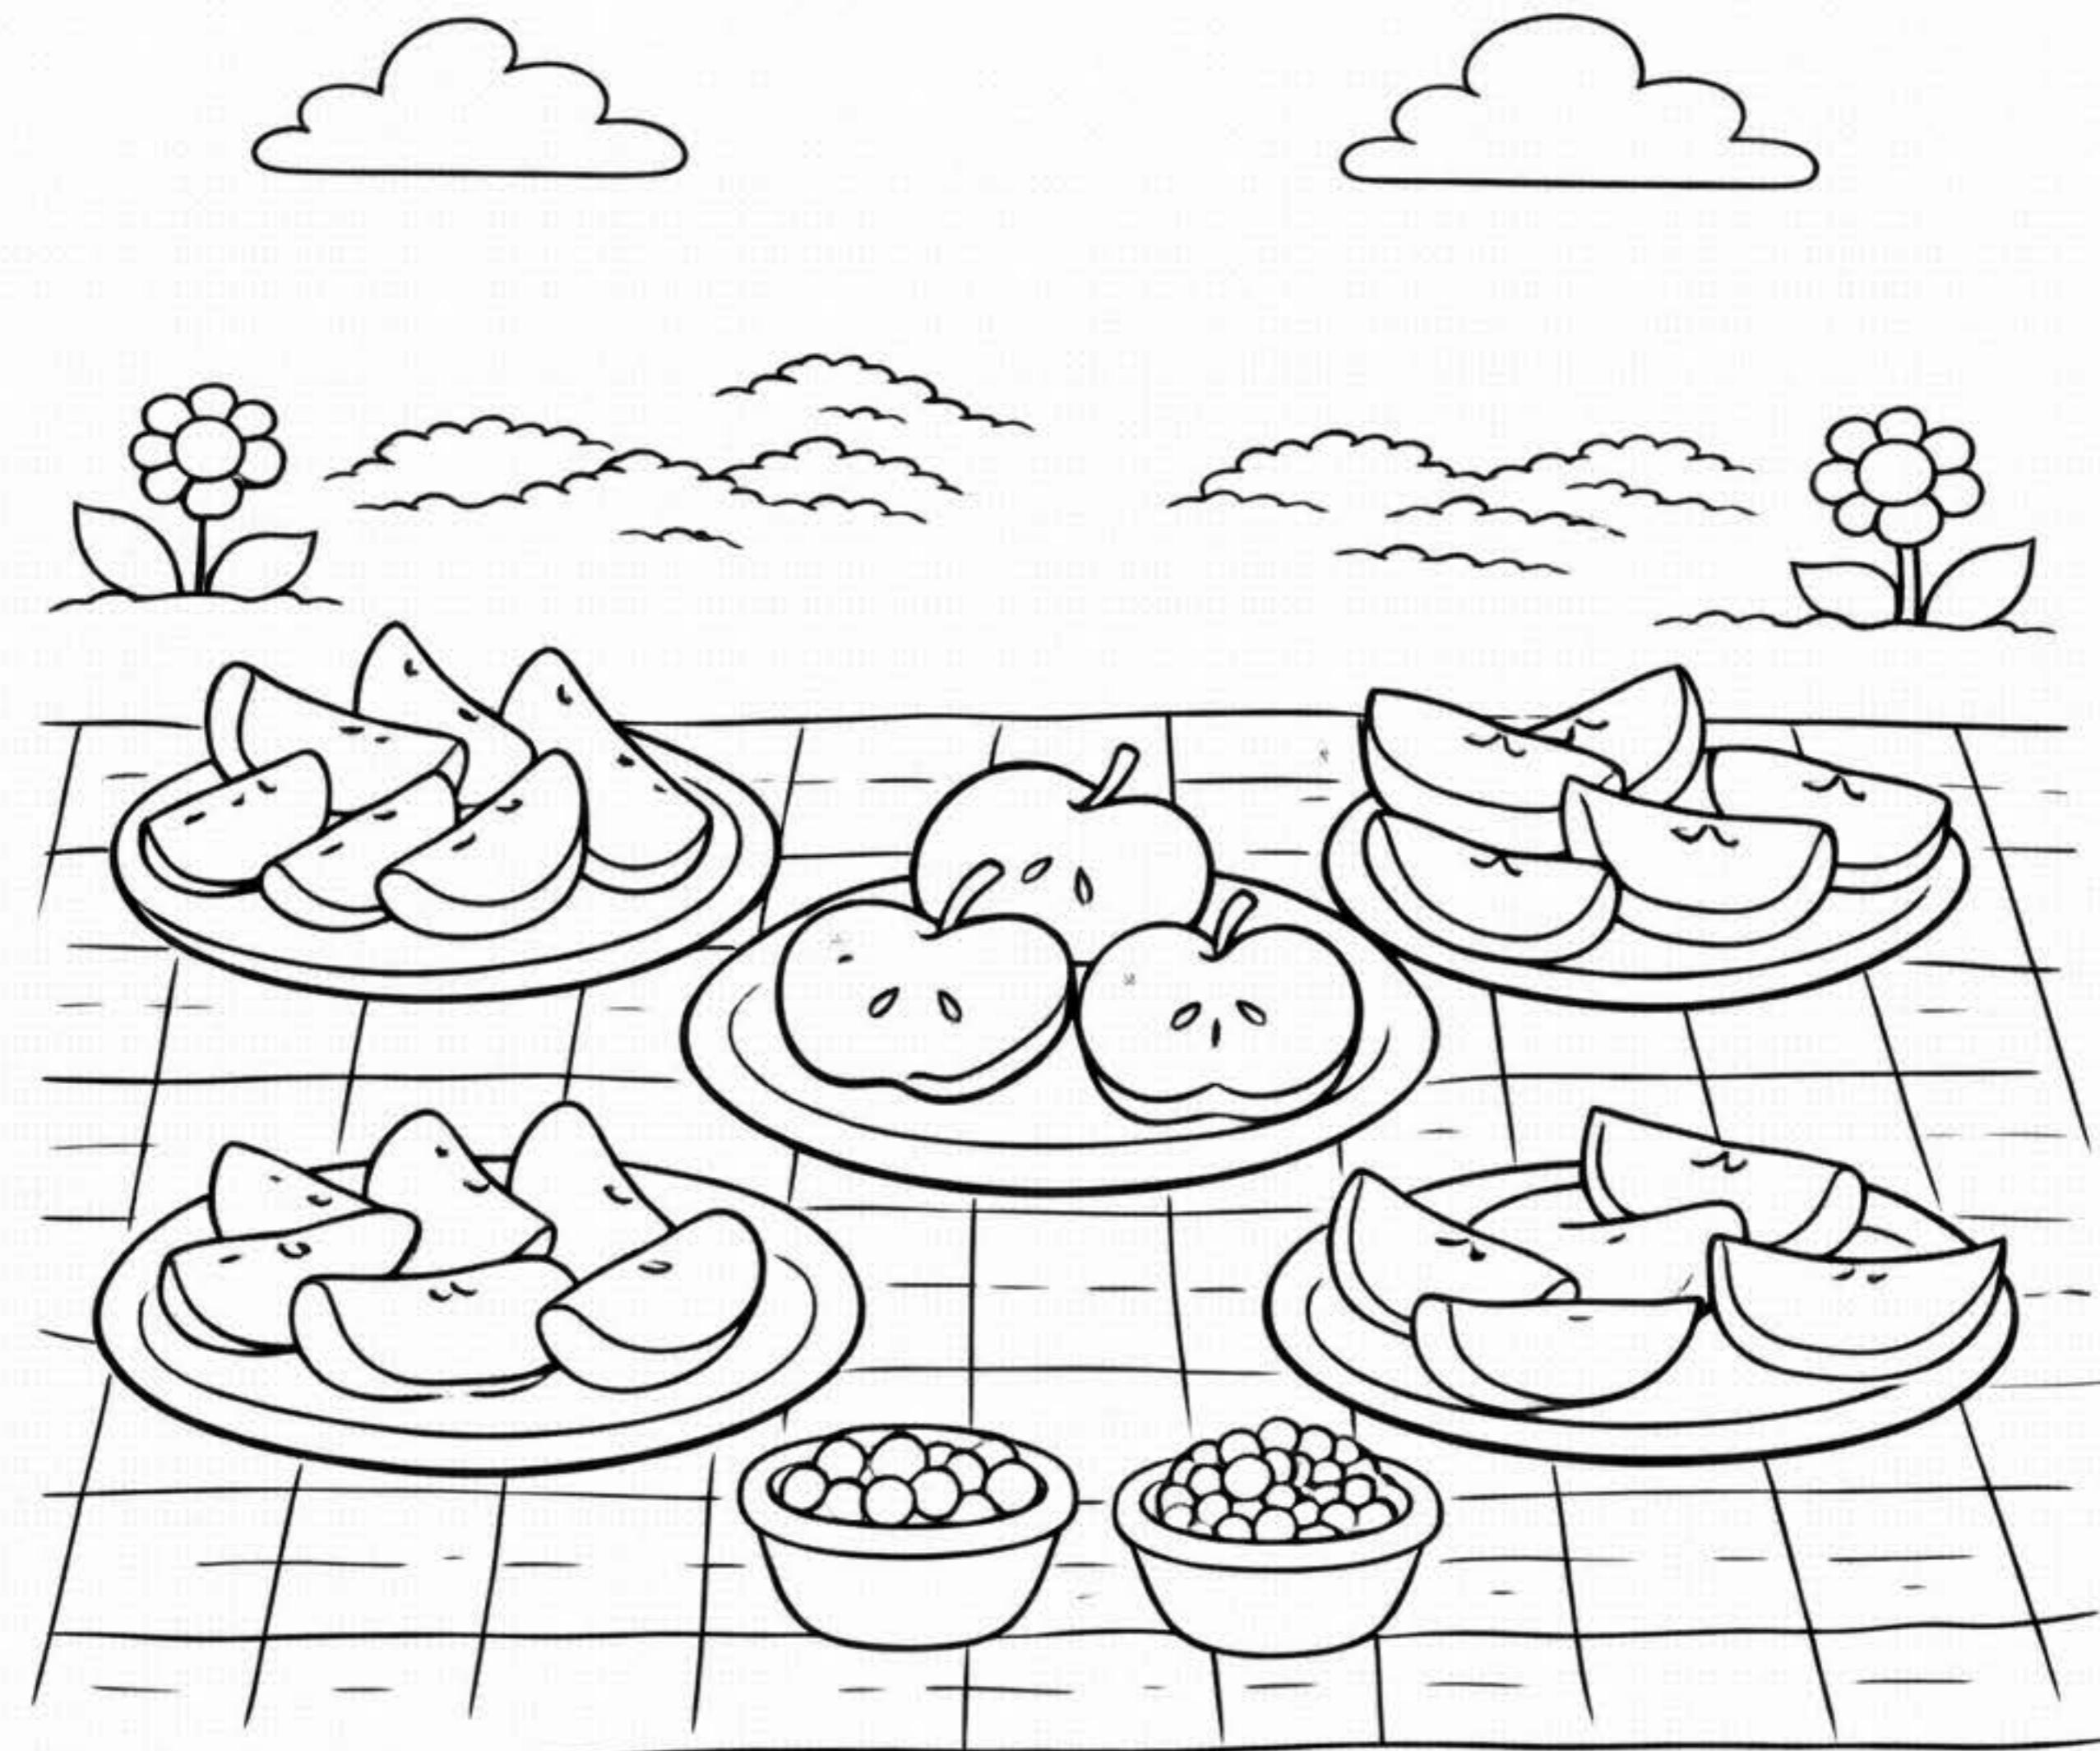

Trees need water from the soil.

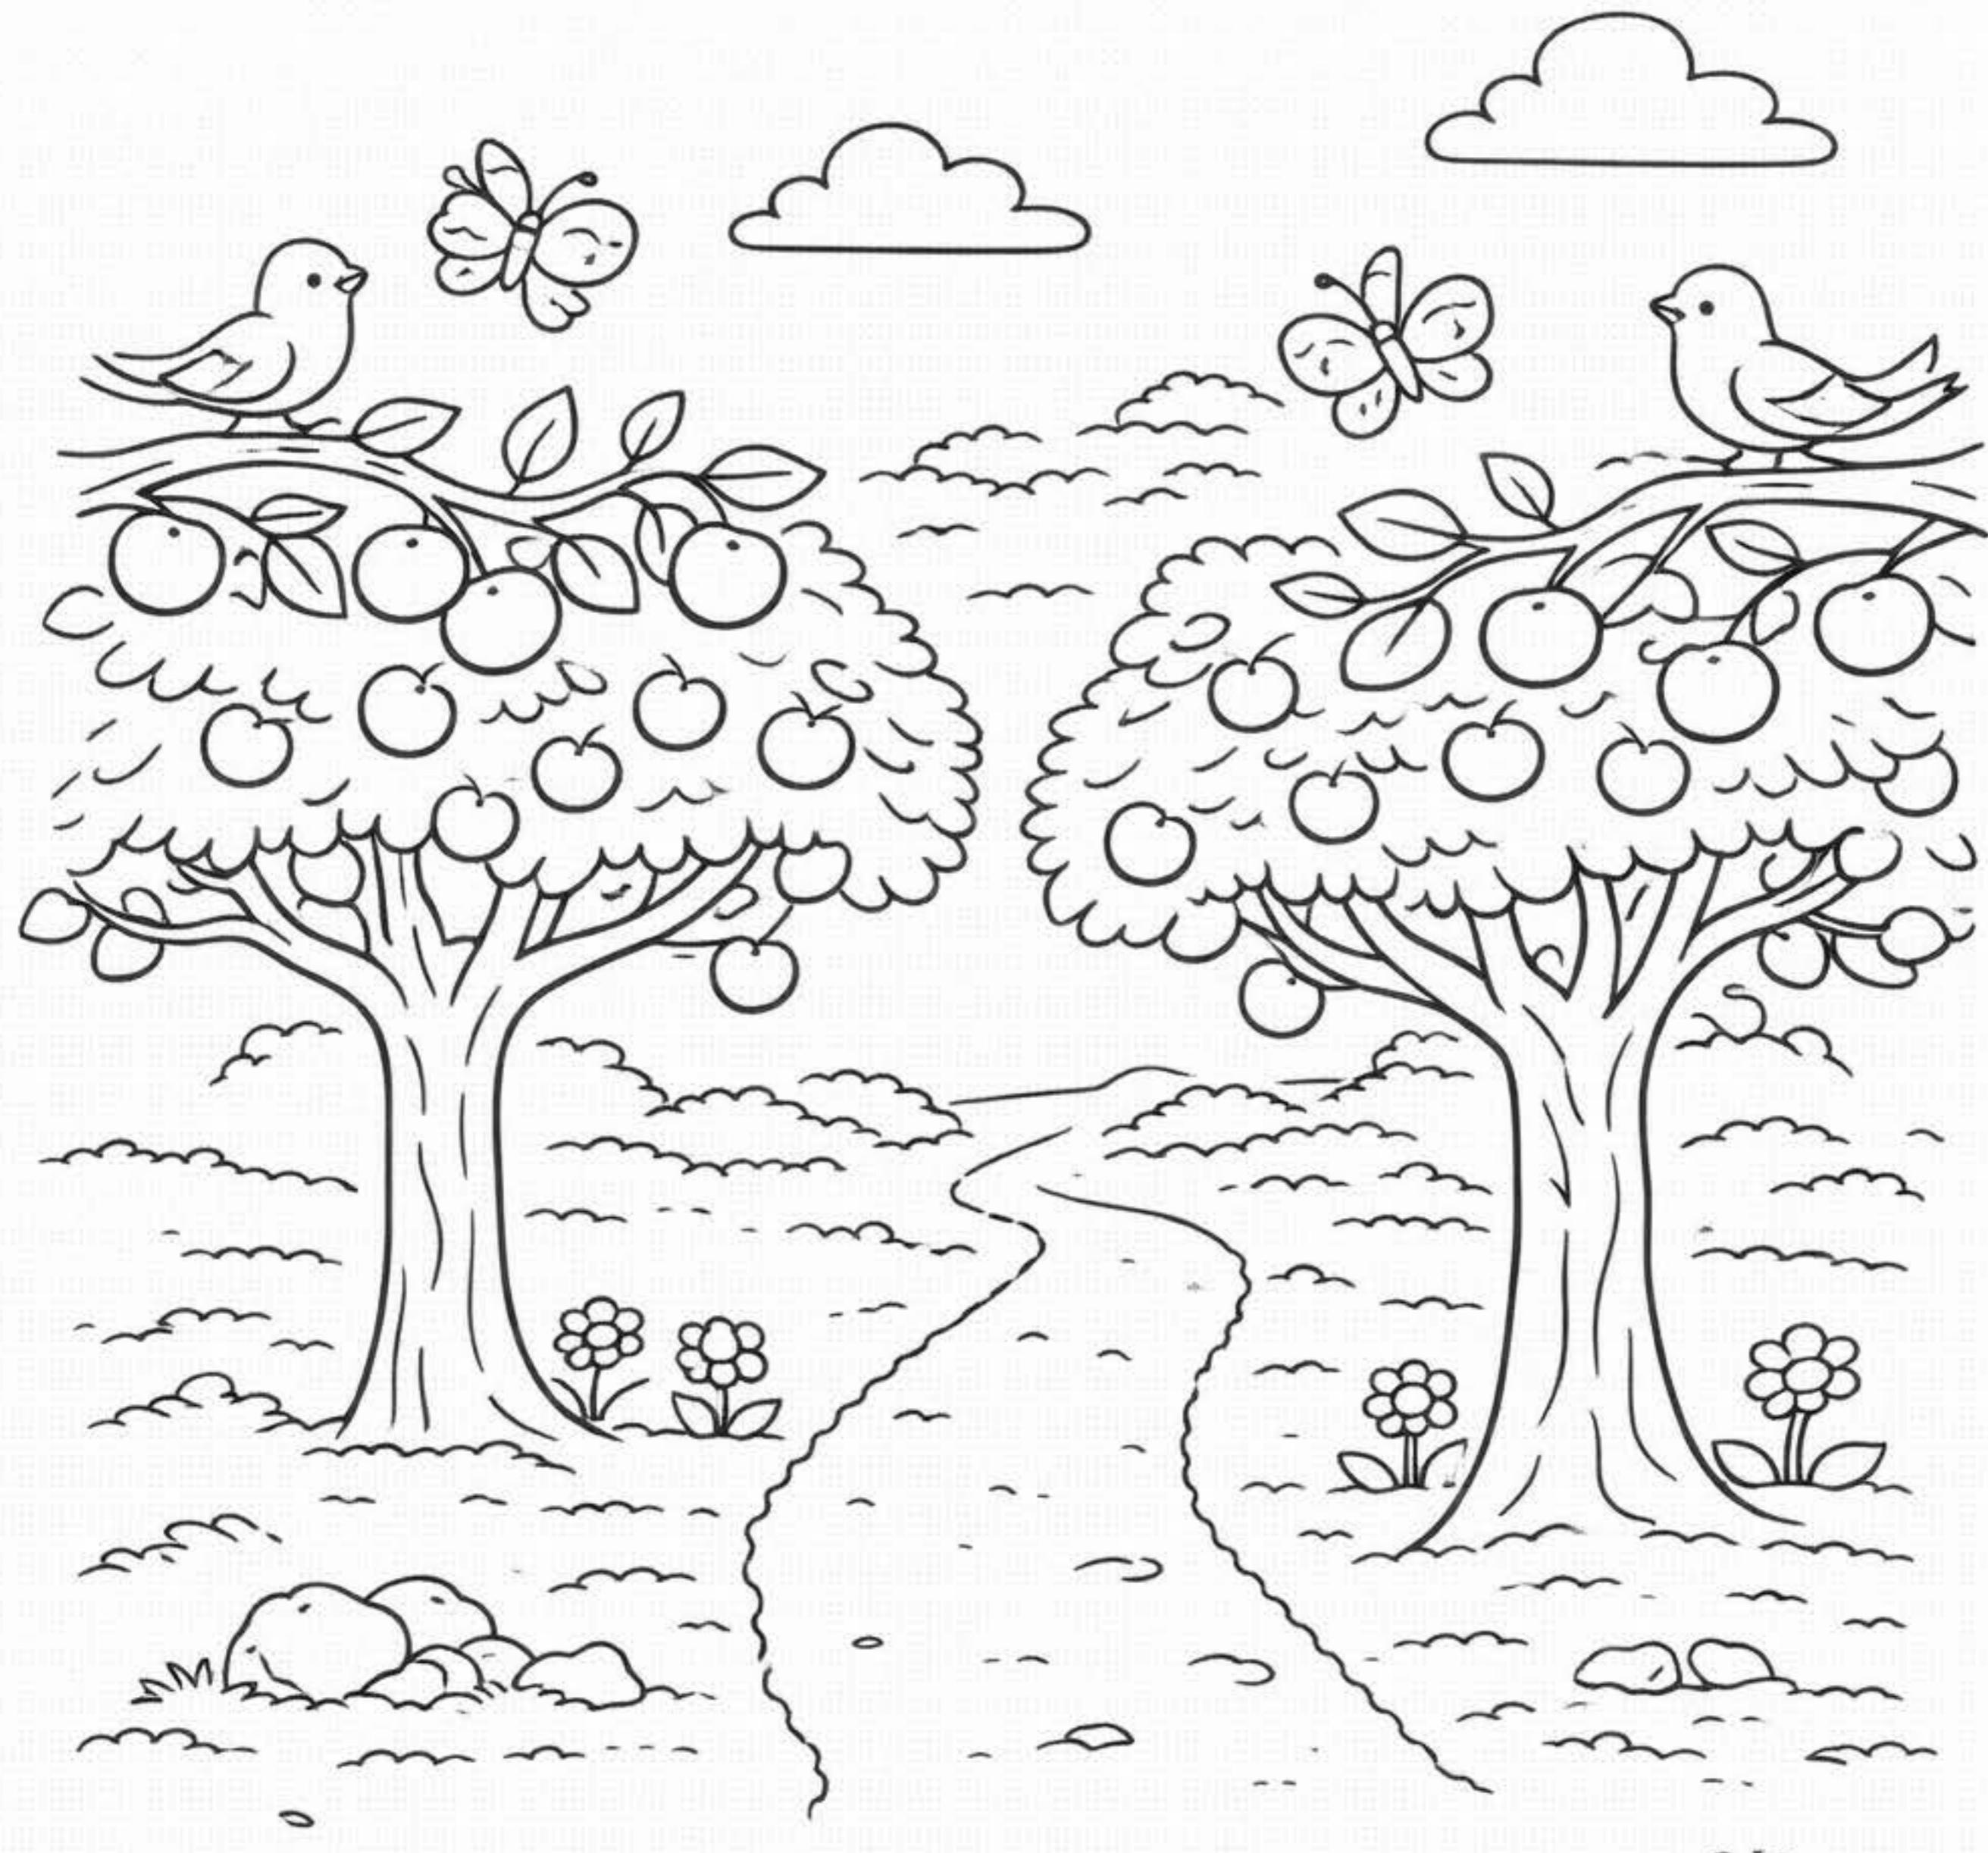

Food scraps can help the soil.

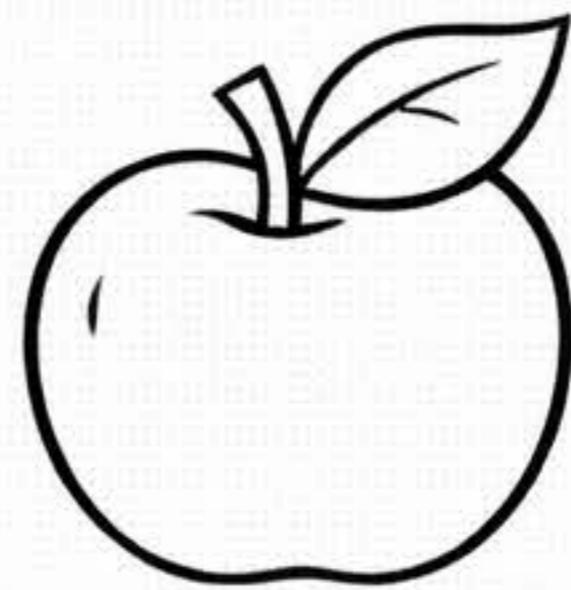

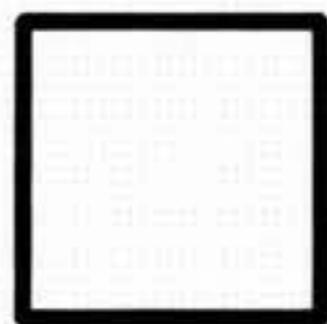

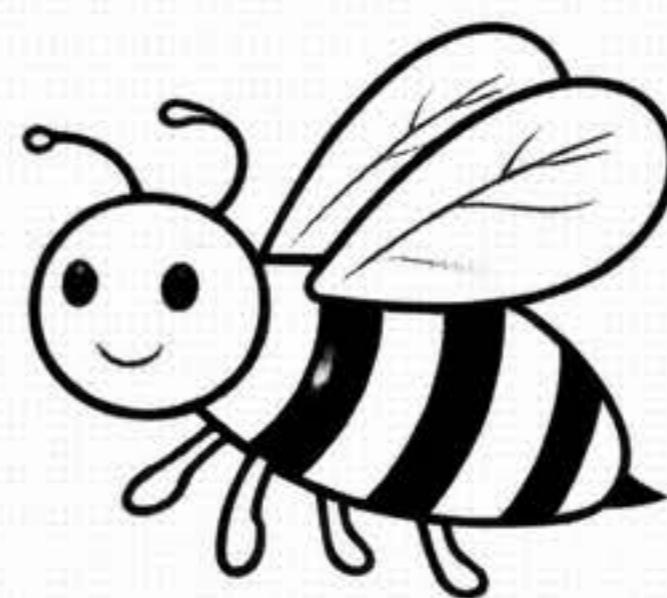

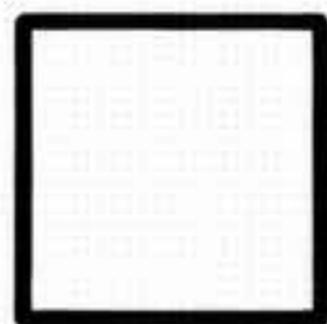

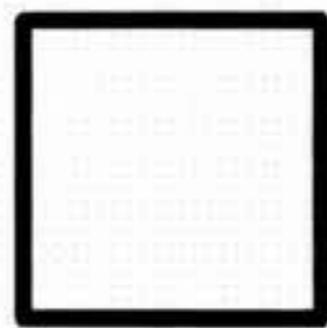

Fresh apples are a reward for care.

Which apple would you try? //

Slow walks help us notice nature.

Can you find these things?

Community gathers here.

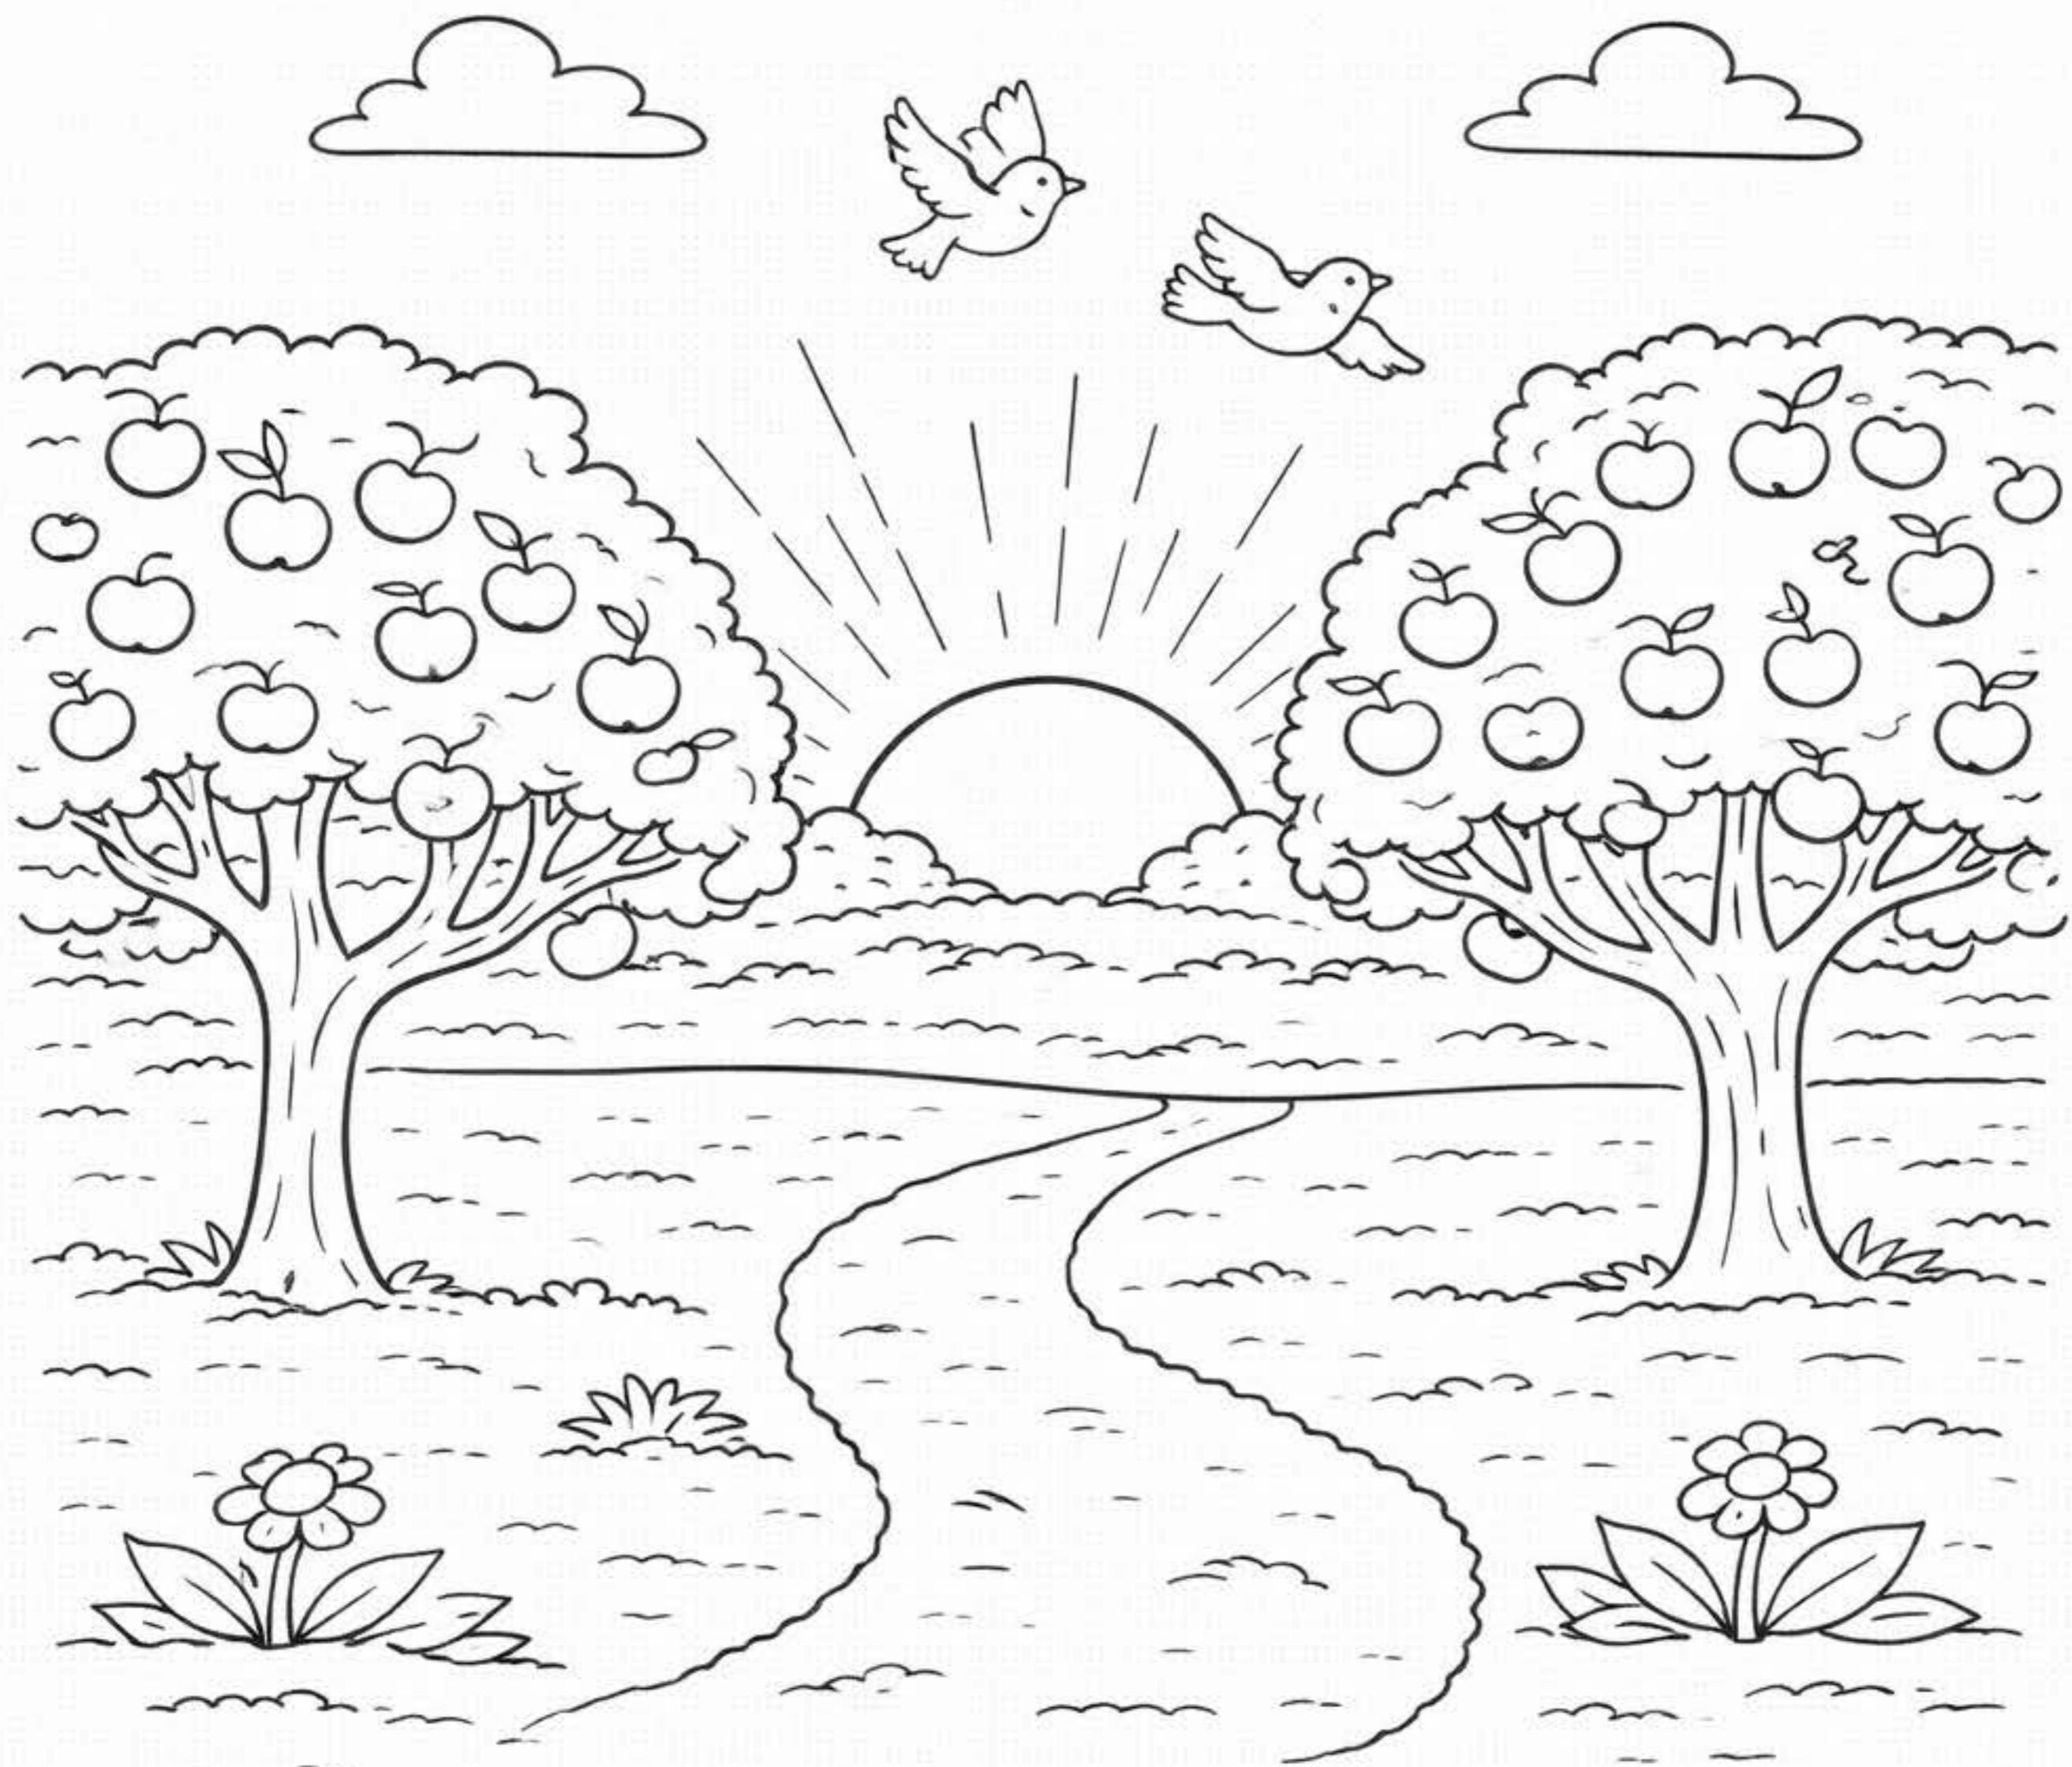

Working together makes a difference.

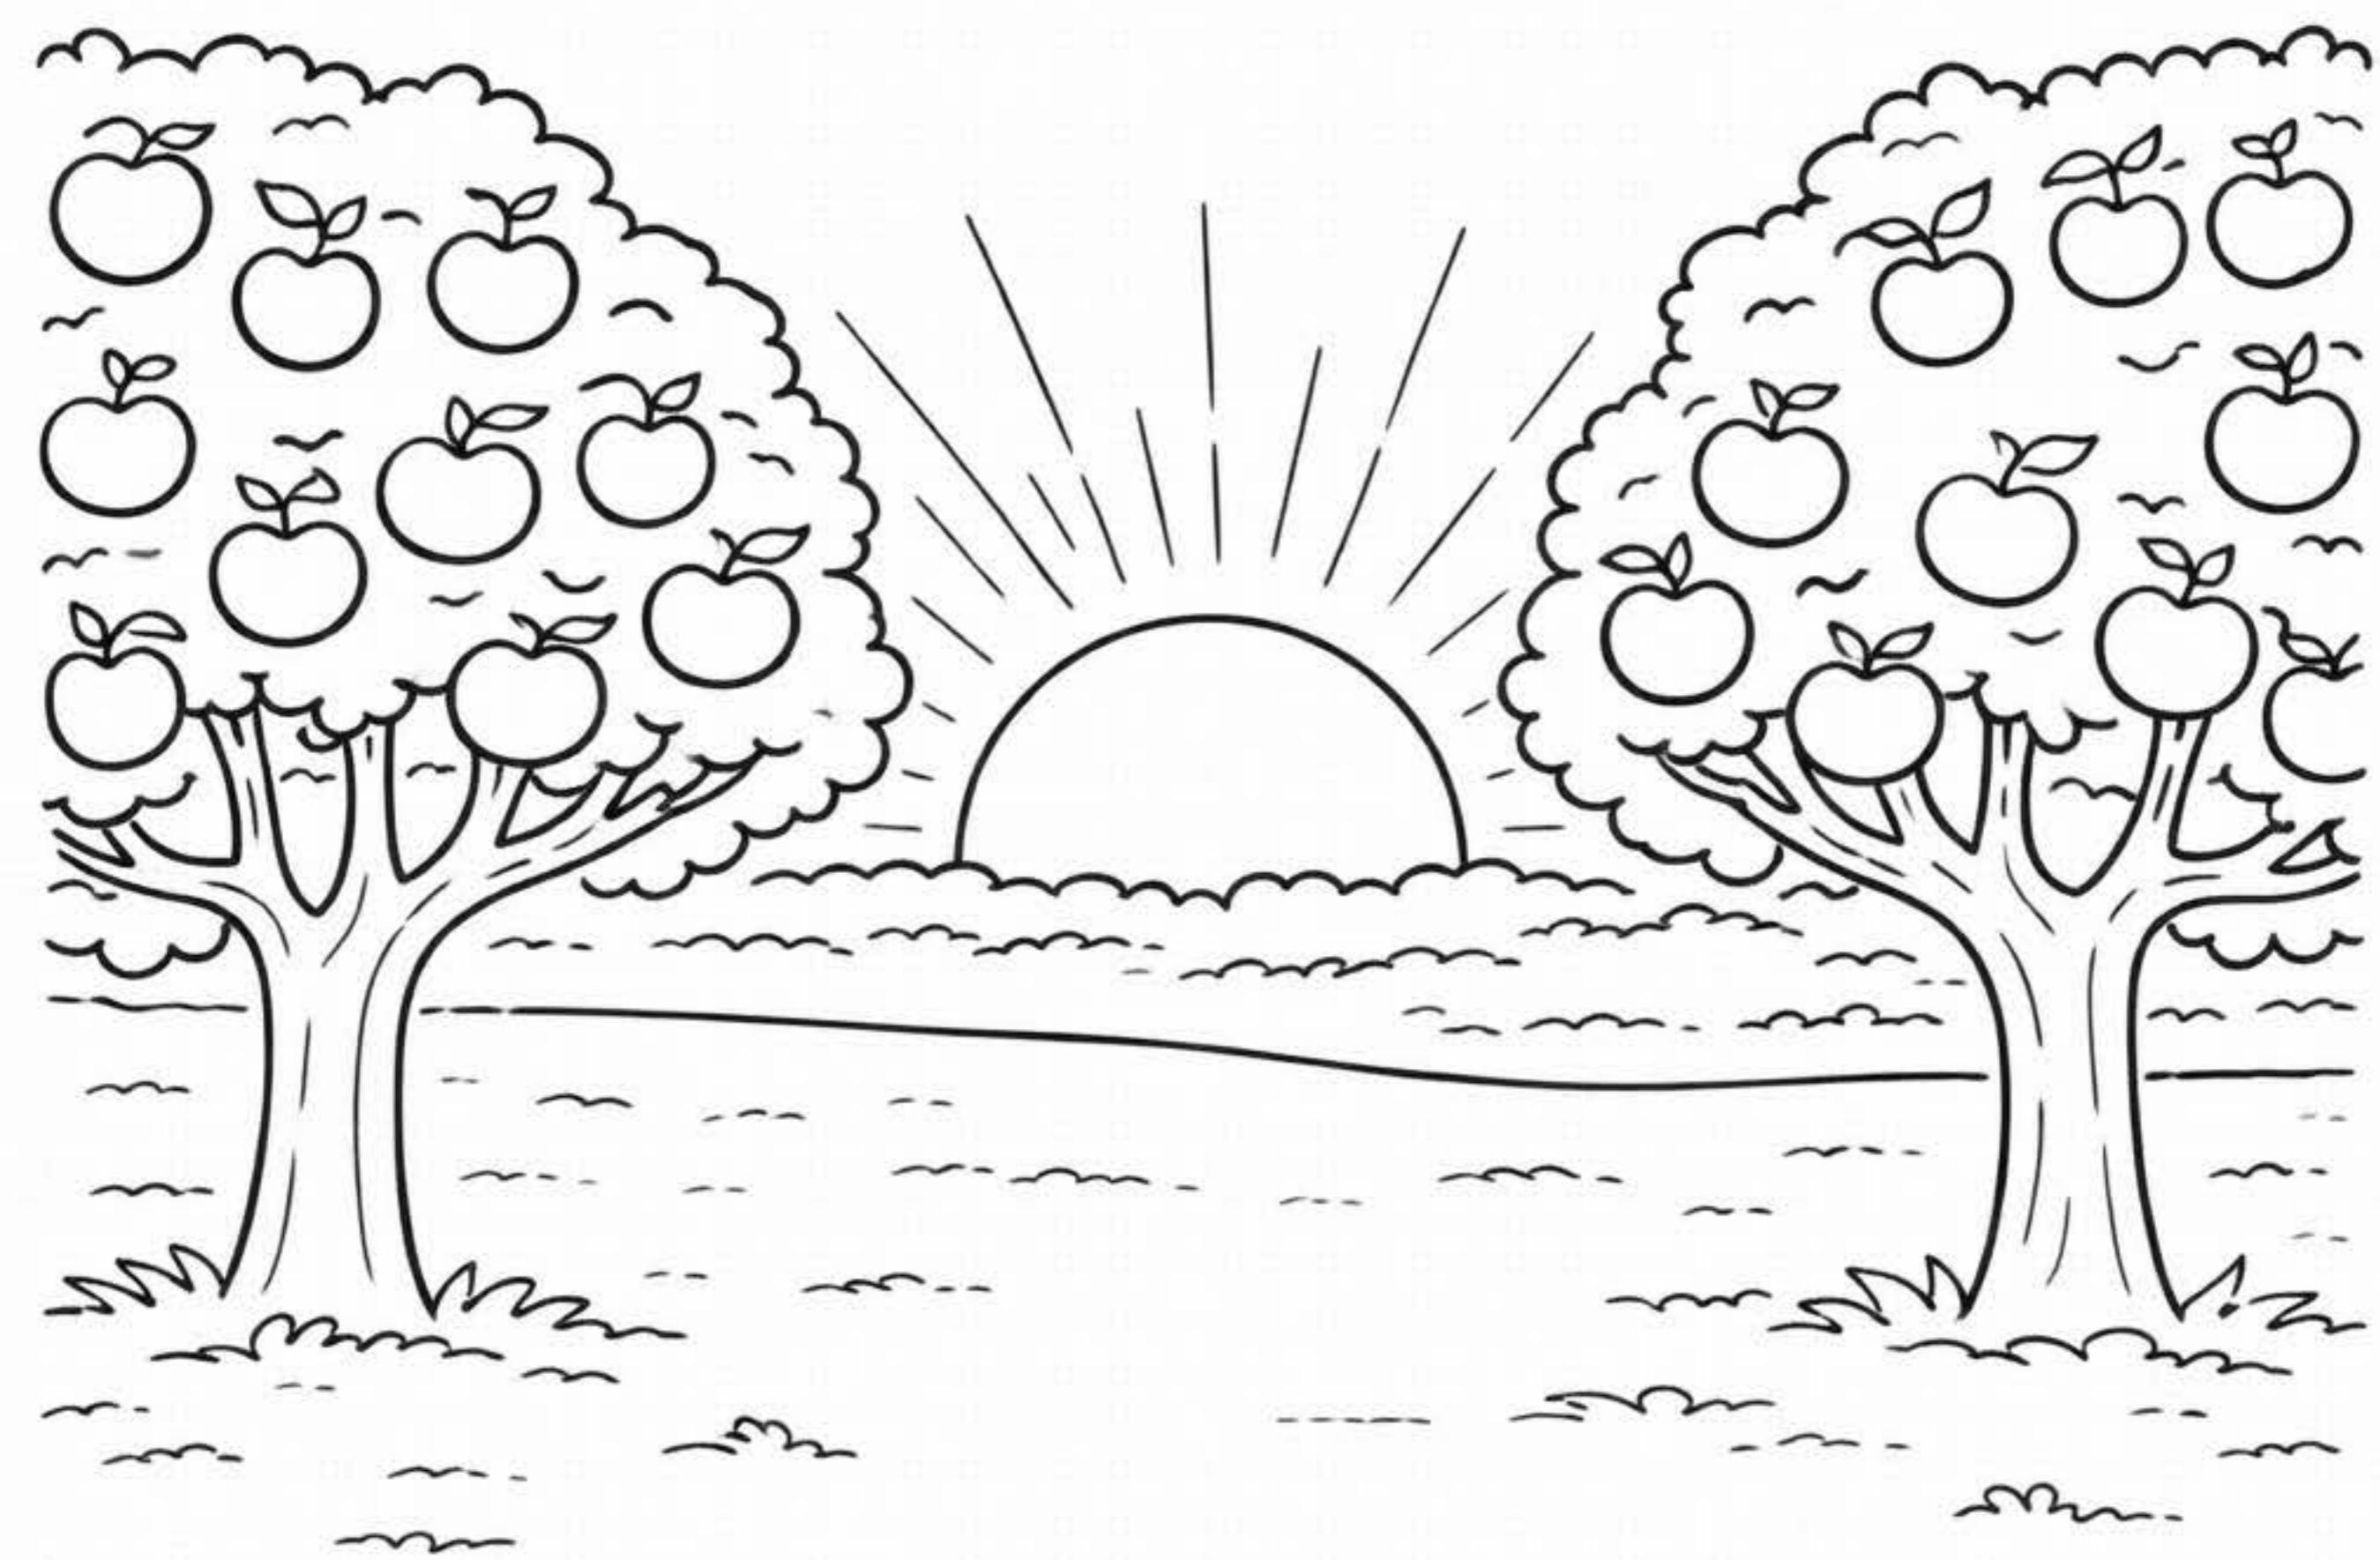

Every tree starts small.

Thank you for
helping the orchard.

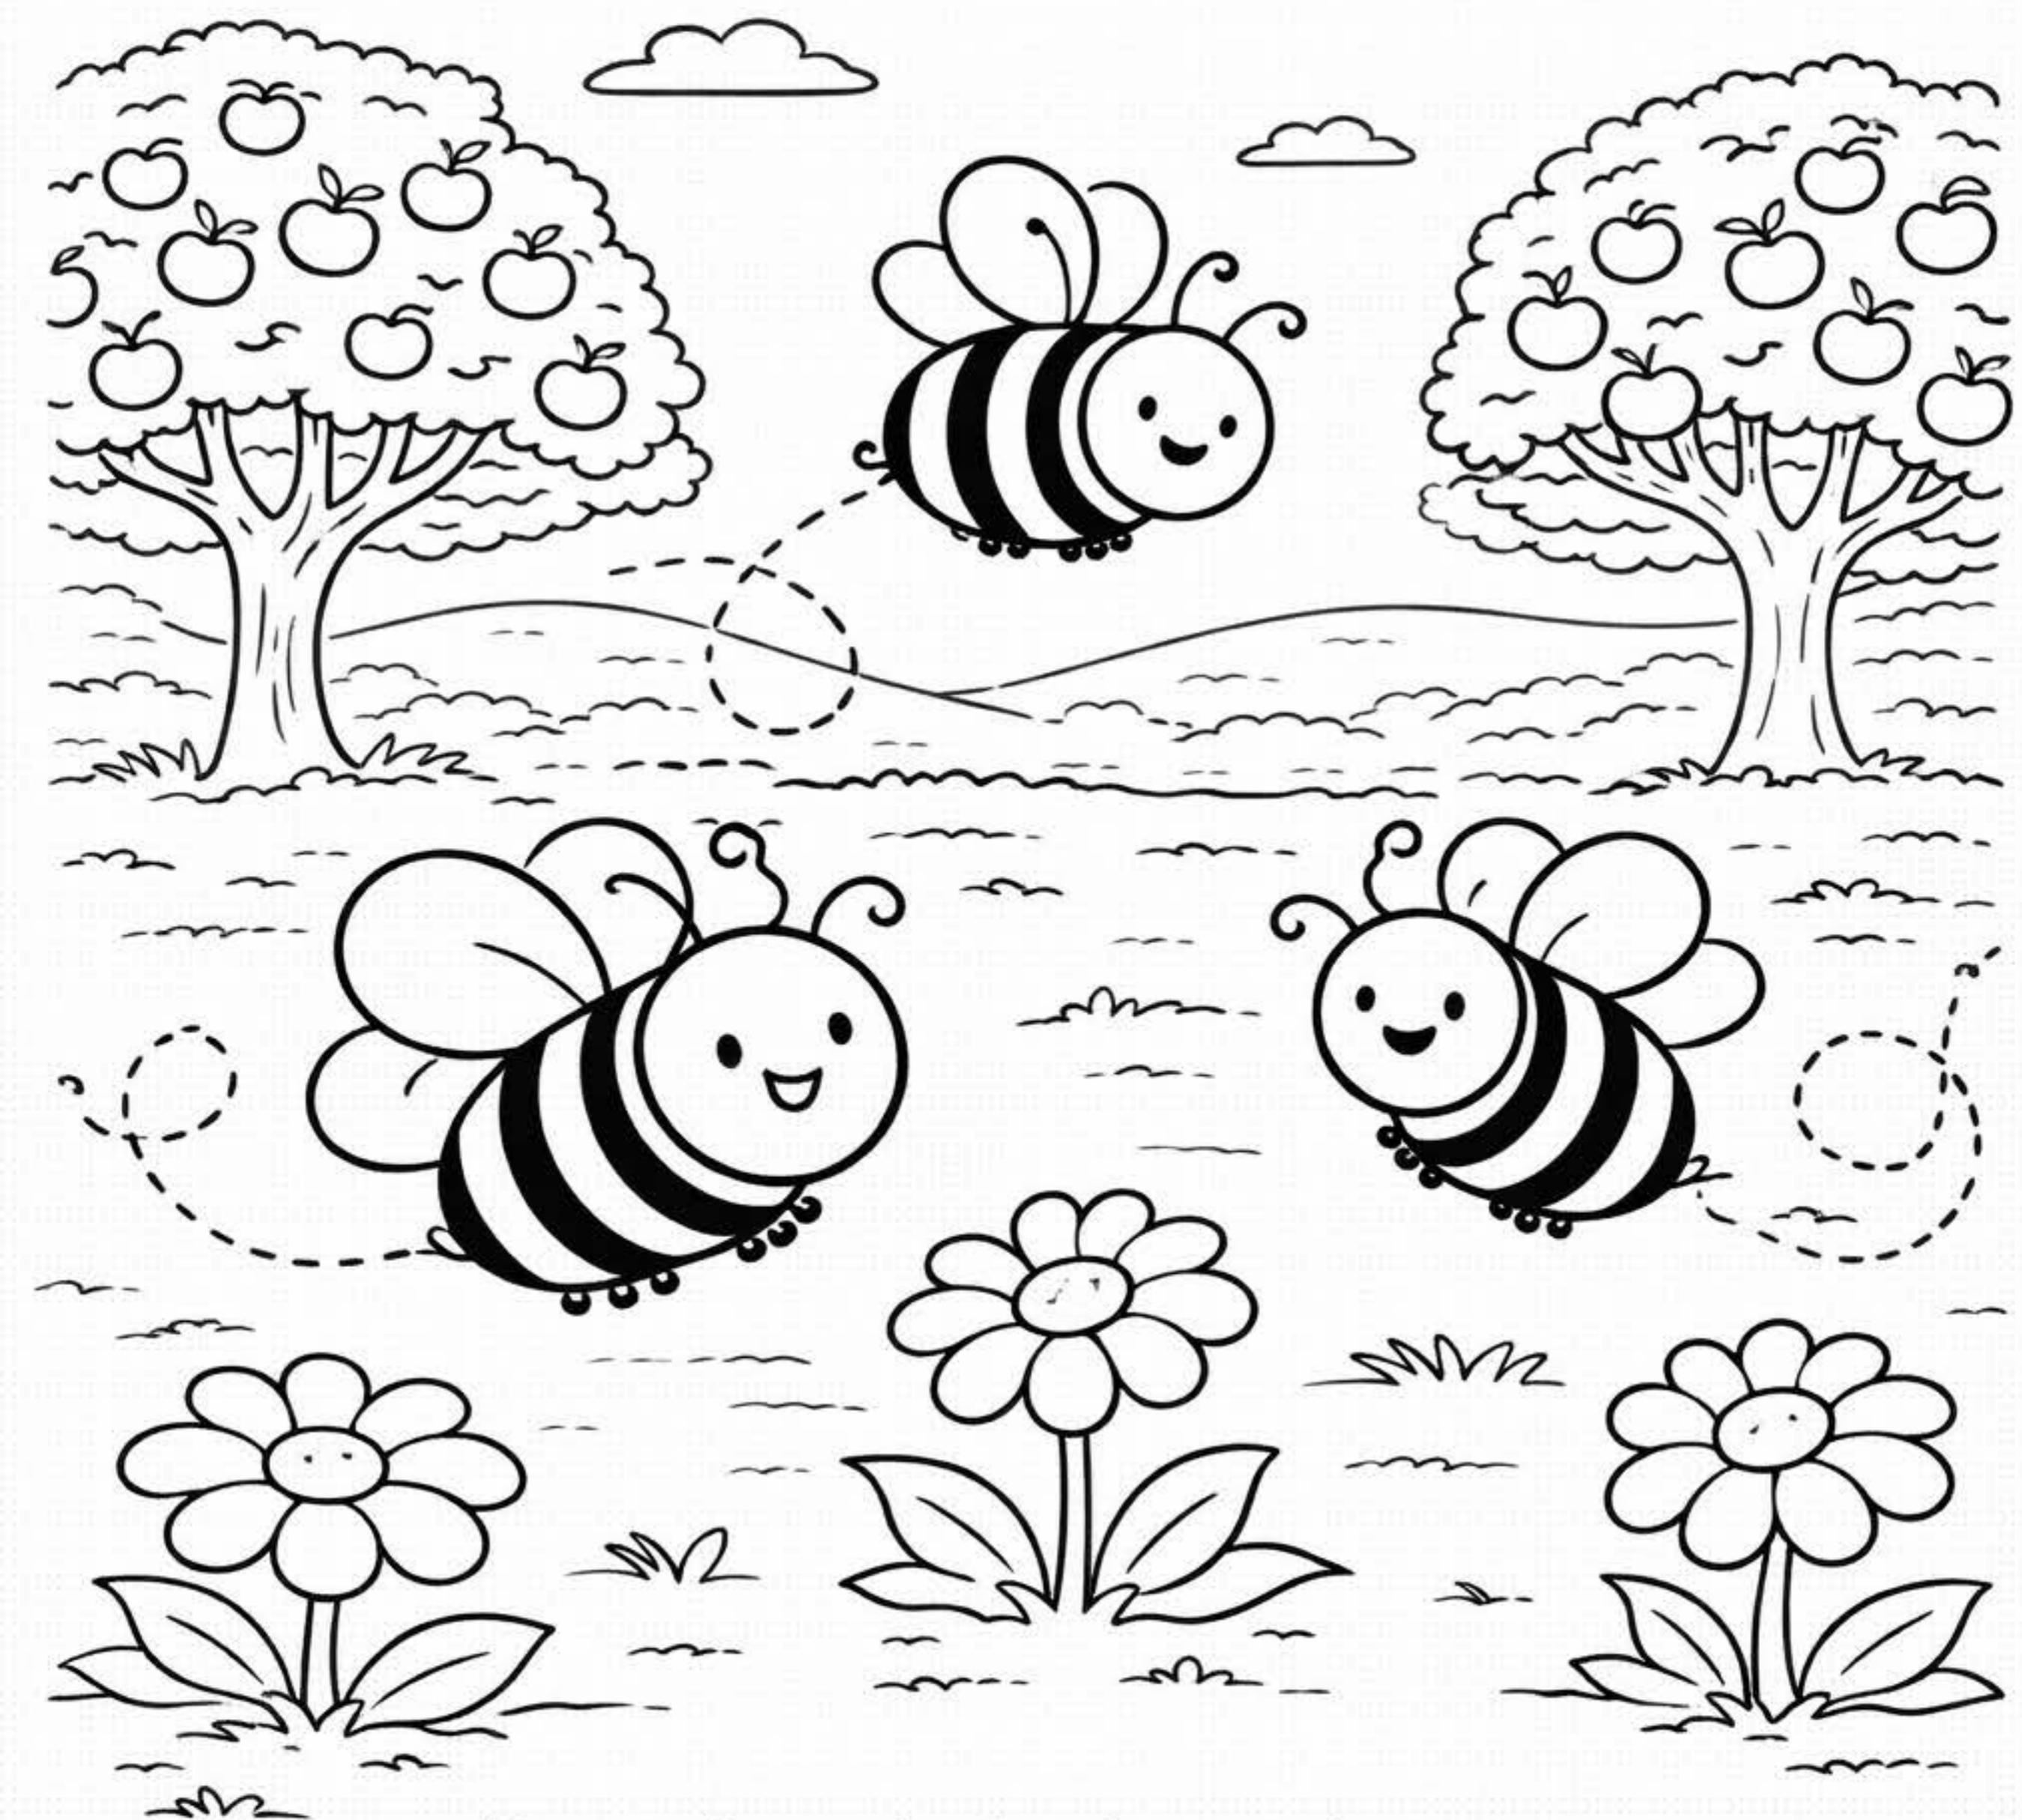

The day ends gently.

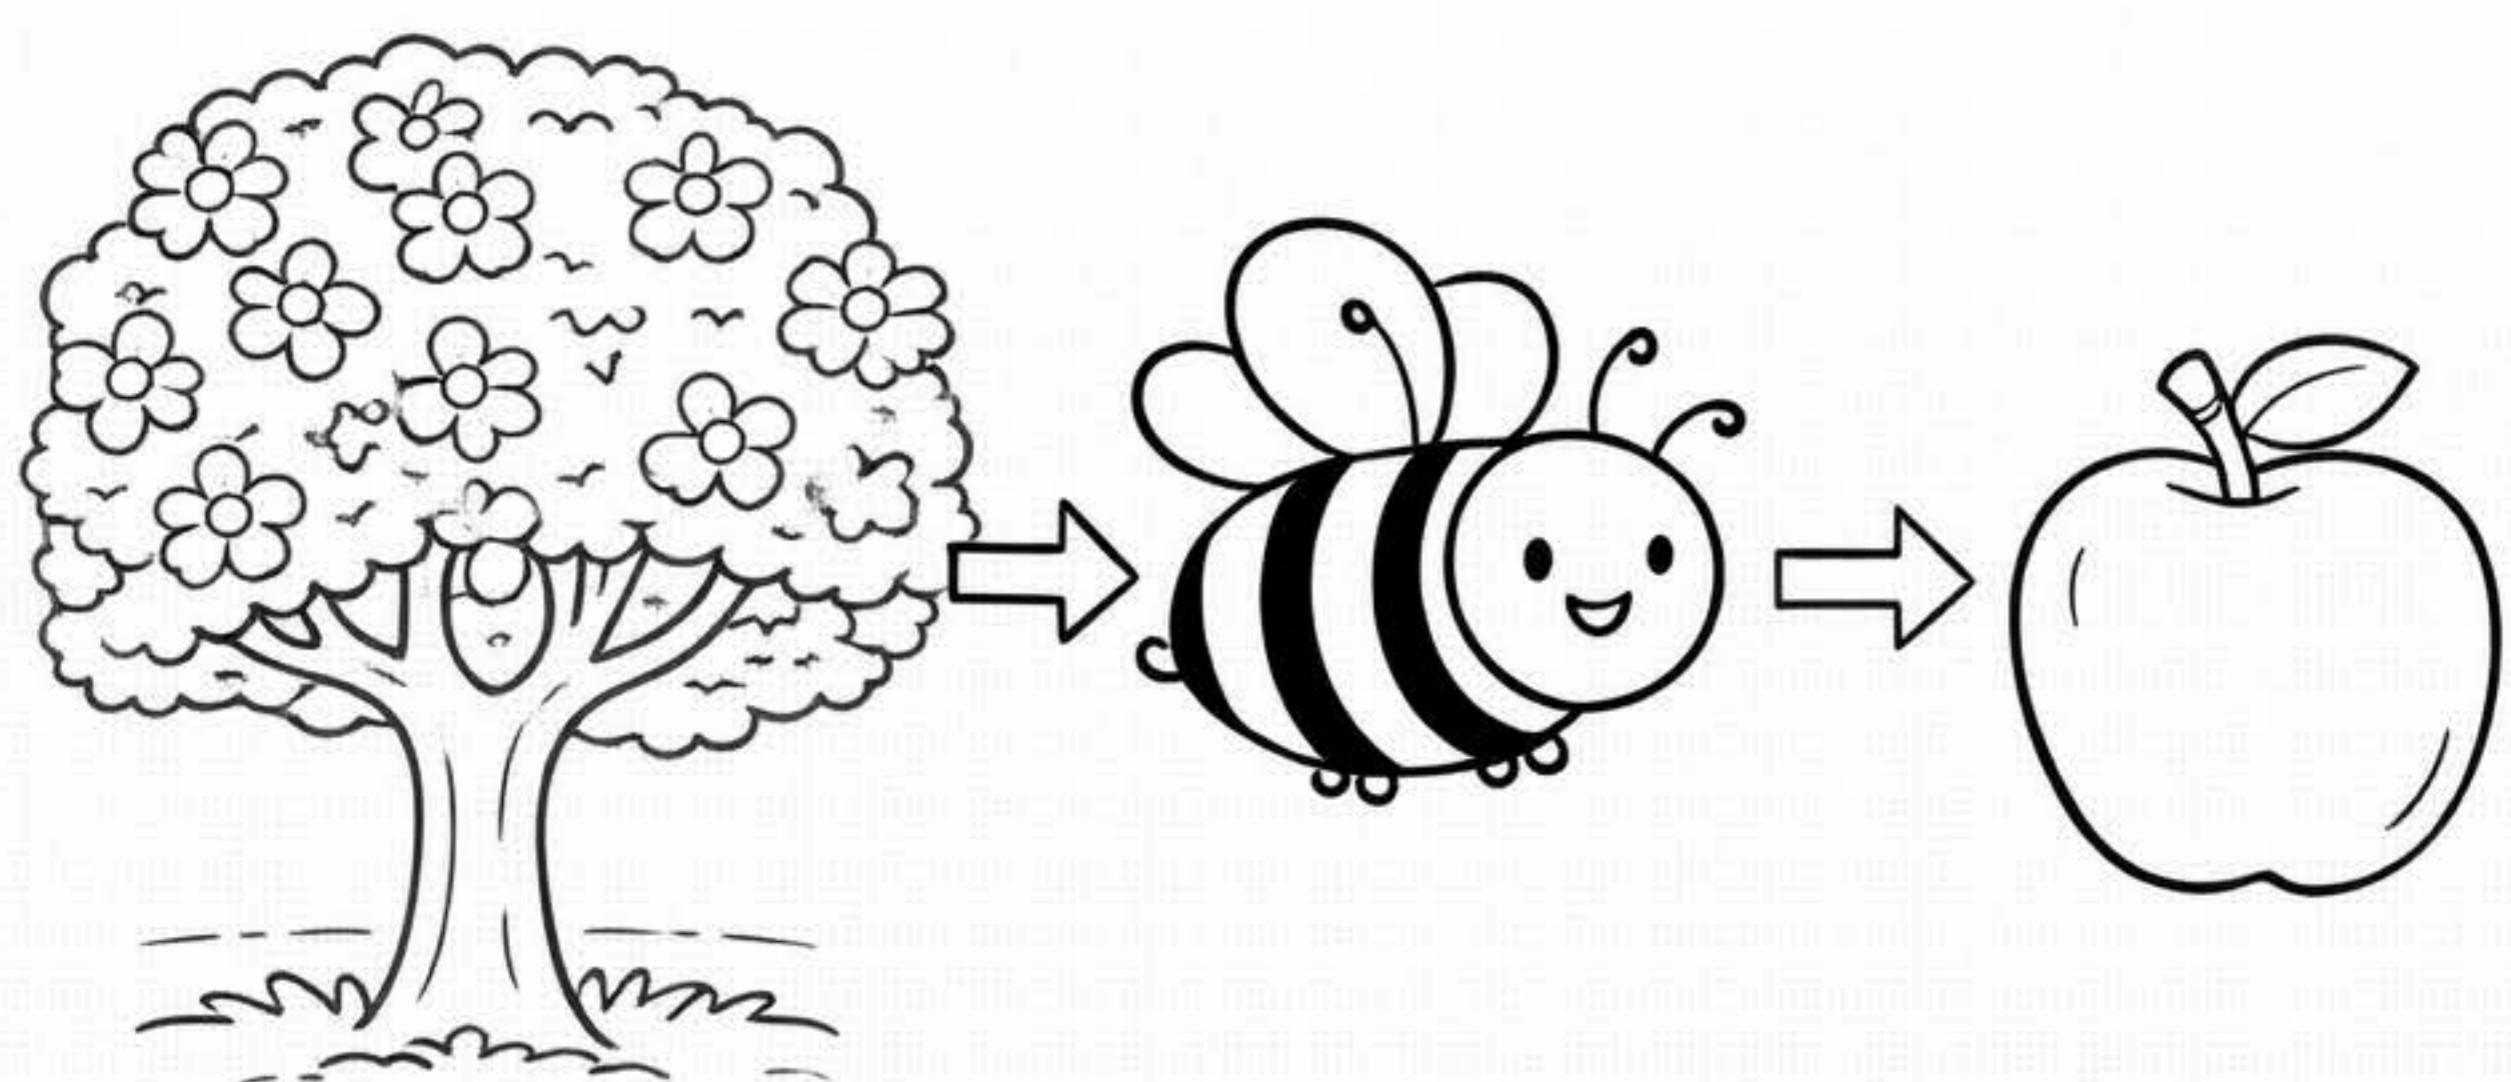

A new day begins.

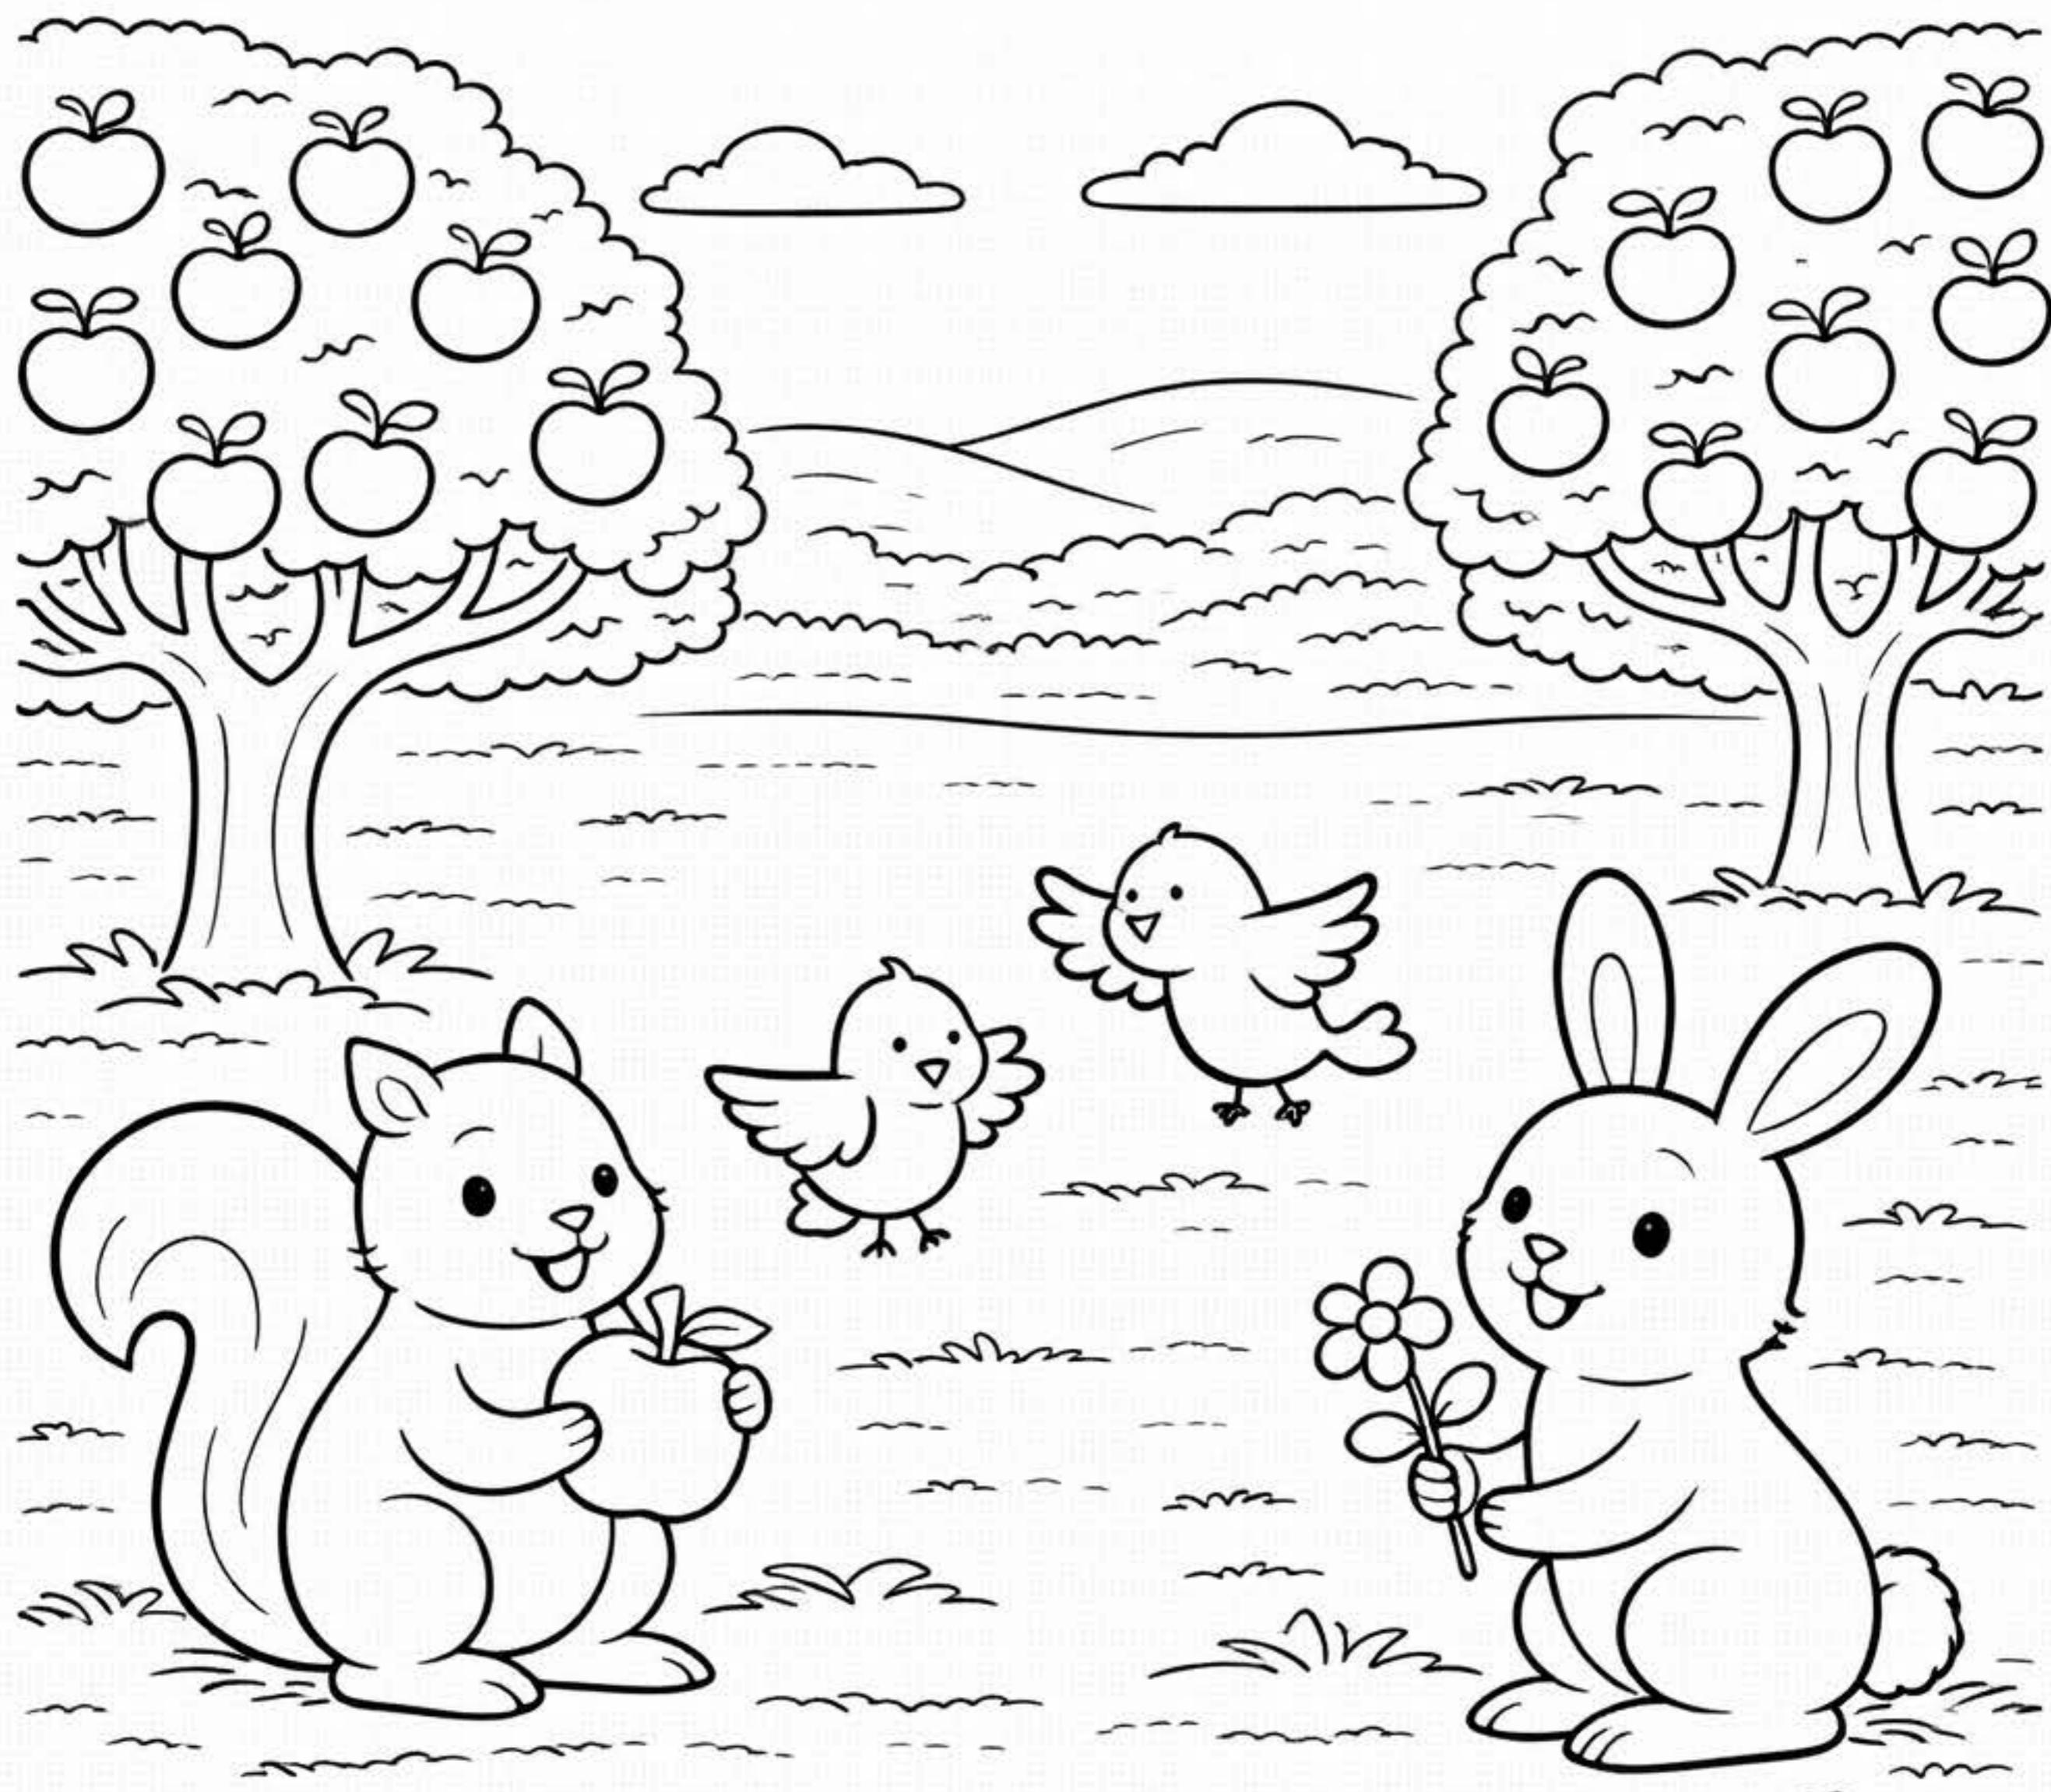

Nature inspires creativity.

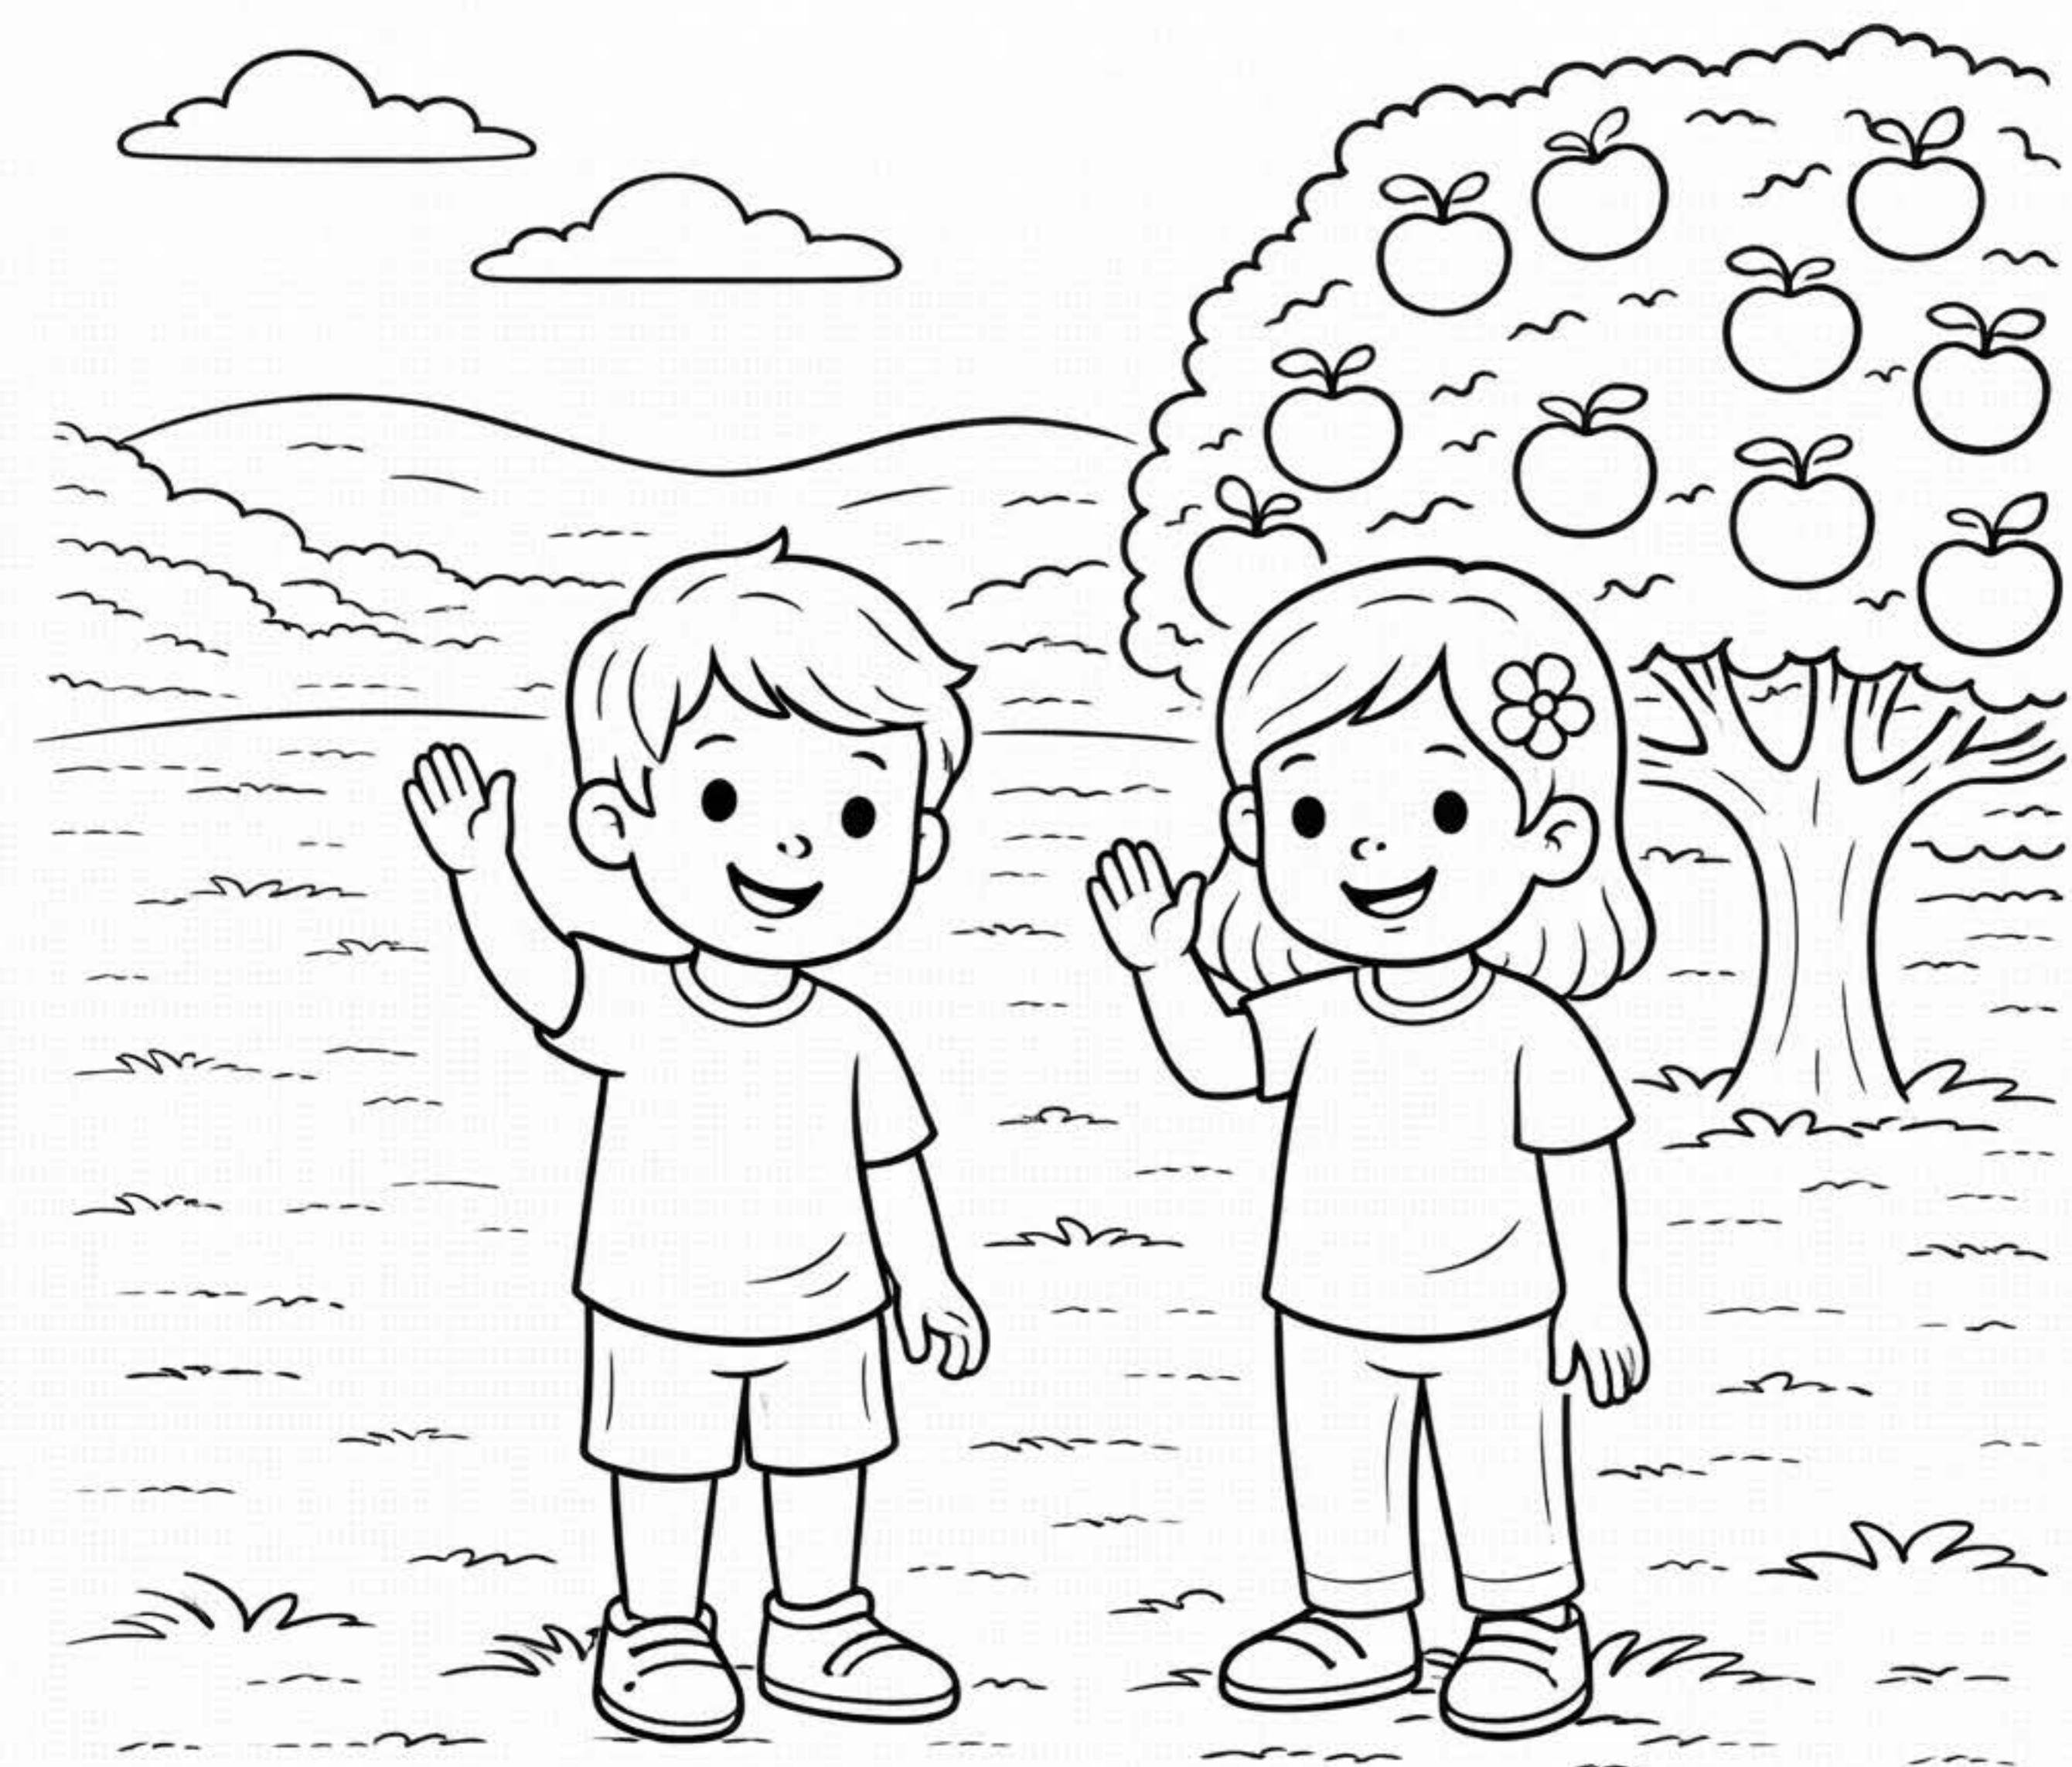

Busy bees help the orchard grow.

Pollination makes fruit.

Animals share the orchard too.

Thanks for visiting the orchard!
