*Founder and CEO*

### **Why English matters at work**

- Effective communication with clients, coworkers, and management
- Saves your company money by decreasing language confusion, expensive translation services, and costly business mistakes
- English is a global language in an increasingly competitive market
- English fluency empowers and encourages employee growth

# What we offer

## Individual tutoring

For individual employees, we personalize lessons to meet the specific goals of the individual. We focus on high-impact needs, such as accent reduction, reading/writing professionally, public speaking skills, and conversational fluency.

## Group tutoring

Designed for multiple employees, we focus on important business skills, such as: Advanced English vocabulary and phrases, reading/writing professionally, interpersonal communication, and cultural information. (We also provide helpful English content for New Employee Onboarding.)

## Online classes

**Business English** - Employees will become comfortable with commonly used professional and business English vocabulary, email best practices, understanding American business culture better and improving reading comprehension of business-related material.

**Phrasal Verbs** - Phrasal verbs, such as **Put up with** or **Call off**, can be confusing to English learners. We give examples, definitions and opportunities for students to practice using phrasal verbs commonly heard at work.

**Affordable rates** - Our mission is to teach and help others grow, and that starts by keeping prices affordable

## How we are successful

With years of experience, we've learned the most successful way to teach is through tracking progress of goals and having our students apply what they learn in their day-to-day activities at work. As such, you will see immediate results and improvement from your employees.

## Test it out for FREE...

With our "[Phrases of the Week](#)," your employees can receive emails twice per week that teach them commonly used phrases such as **Find out, Look up, Put up with, It's up to you, and The ball is in your court**. Without explanation of what these phrases mean, employees can sometimes be confused and have a difficult time communicating with customers, clients and even coworkers.
