

Date: September 25, 2017
Location: City Building @ 8:00 pm

attendees David Cameron
Mark Bailey
Tom Fernandez
Mitch Eberenz
Mark Collier
Jerald Noran
Frank Twehues

Introductions were made.

It was determined that meeting at Tuesdays at 4:00 would work for everyone in the Group. FT to forward a couple of dates in October to meet.

Preliminary questions were asked:

What do you love about Fort Thomas?

Tight knit community, friendly, strong sense of community, like "Mayberry", safe, a good balance between common values and respect of differences, holds onto right traditions lets of others.

What issues do you see with utilities, technology & city owned facilities?

1960's with technology, new opportunities with city building – make it a 3rd place to go for residents, city wide wifi, parking concerns (Do we have a parking problem, how big is it, where are the issues & what part of the day is the problem?)

What changes would you make?

How to attract & maintain residents? Outdoor lighting – convert to LED. Housing stock. Burying utility lines or partnering when improvements occur. Improve requirements for utility cuts in streets. Opening of reservoir trails.

Invite Nexigen / Cincinnati Bell to a future meeting to further understand city wide wifi issues and constraints.

FT to send out preliminary list of public input questions.
