BuggyGirl ENTERPRISES LLC

REIMAGINE • RECYCLE • REUSE

Capability Statement

Recycling • Product Supply • Land Management

Circular Solutions • Sustainable Procurement • GIS & Remote Sensing

FROM RECOMMENDATION TO IMPLEMENTATION

People. Resources. A More Sustainable Tomorrow.

PRACTICAL SOLUTIONS. LASTING IMPACT.

Who We Are

BuggyGirl Enterprises, LLC is a woman-owned small business helping public agencies, institutions, and businesses improve how they procure, use, recover, and manage resources. Our work connects recycling and circular materials, government and institutional product supply, land management, GIS and remote sensing, and circular solutions with practical sourcing, coordination, and implementation support.

Core Services

Recycling & Circular Materials

Waste diversion, reuse, material recovery, recycling support, circular-material strategies, and textile/plastic recovery.

Product Supply & Sustainable Procurement

Nationwide sourcing of operational and environmentally preferable products for government and institutional buyers.

Land Management

Vegetation management, invasive removal, native planting, habitat restoration, grounds support, GIS/remote-sensing assessment, and practical stewardship.

GIS & Remote Sensing

Geospatial analysis, mapping, satellite imagery, land-use assessment, vegetation monitoring, and environmental decision support.

Circular Solutions

Operational assessments, procurement improvement, supplier coordination, implementation support, and resource-efficiency planning.

Key Differentiators

Connected Capabilities
One contractor linking recycling, product supply, land management, GIS/remote sensing, and sustainability.

Procurement + Sustainability
Environmental goals connected to actual products, suppliers, and purchasing decisions.

From Recommendation to Implementation
Support can continue into sourcing, coordination, and practical execution.

Flexible Teaming
Prime/subcontractor model using qualified suppliers and specialty partners when needed.

Documentation & Compliance
Documentation-forward delivery aligned with public-sector procurement requirements.

Demonstrated Experience

- Urban land stabilization, habitat restoration, invasive management, and low-maintenance ecological systems.
- Textile and plastic recovery, circular-material R&D, and prototype development.
- GIS and remote-sensing analysis for vegetation, land-use change, environmental conditions, and illegal-dumping assessment.
- Digital mapping, project data tools, and custom web-based public engagement platforms.

Contracting Data

Owner & Project Manager: Charla Henry

Phone: 877-284-4944
