PROTECTIVE HEADWEAR

**SAFETY AND
STYLE COMBINED
TO PROTECT (AND
TURN) HEADS.**

HEKA's headwear offers superior protection, comfort, and adaptability. Key features include robust impact resistance for maximum safety, an ergonomic, lightweight design for comfort, enhanced visibility for low-light conditions, and an advanced ventilation system for coolness. It's versatile, accommodating accessories like face shields and earmuffs, and is built for durability. Compliant with global safety standards, it's ideal for construction, mining, and industrial work. Choose HEKA for dependable head protection.

PROTECTIVE HEADWEAR

It's also important to remember

The other types of head hazards that can be encountered while working such as: sunburn, particles and chemical spray injuries and loud or persistent noise.

Heka Technology supplies products that protect against all these hazards in their head protection range, often in combination, such as browguards, face shields, sun flaps and ear muffs that fit with the Pro Choice Safety Gear hard hats. The Heka Technology range of hard hats and accessories has been designed and manufactured for our tough working conditions.

How to Choose Your Helmet?

Impact: energy spread to the head form must not exceed 4900N after the fall of an object of 5kg at 1m high.

Penetration: the tip of the test mass used (3kg 1m) must not come into contact with the skull.

Temperature: testing impact and penetration is made at room temperature, at +50°C, at -10°C.

 **+150°C** Extreme temperature: testing impact and penetration are made at room temperature at +50°C, at -20°C, at -30°C.

440VAC Protects against accidental contact with a short conductor electrical voltage up to 440V.

LD Protects against lateral compression. The maximum deformation of the helmet should be ≤ 40mm.

DESIGNED TO REV YOUR ENGINE!

After years of development, Heka Technology's Hard Hat challenges traditional head protection with a great looking, low profile, ergonomic design that won't make you look like you are wearing an icecream container.

02

AIR FLOW

The Heka Hard Hat does not sacrifice safety standards, or performance for looks. The strategically placed air vents and harness cradle will encourage air flow, greatly reducing your chances of "blowing a gasket."

03

HELMET

Complete with multiple ventilation points. Also available un-vented. Lightweight ABS plastic vented hard hat. Short Peak to assist in and around work sites that require the worker to be looking up. Replaceable cotton sweatband.

PROTECTIVE EYEWEAR

**PROTECT YOUR EYES,
PROTECT YOUR LIFE:
GUARD YOUR SIGHT,
SECURE YOUR FUTURE**

Industrial-related eye injuries are commonly caused by chemical splashes, metal, plastic or wood debris hitting the eye, tools accidentally striking the face, and improper use of equipment. Another area of sight damage that should not be forgotten is that caused by ultraviolet (UV) radiation from the sun. It can lead to eye complaints ranging from mild irritation to cataracts and cancer of the conjunctiva.

HEKA PROTECTIVE EYEWEAR TECHNOLOGY

AQUA SHIELD TECHNOLOGY

HEKA AQUA SHIELD Technologies takes anti-fog coating durability to a whole new level. This innovative technology combines premium Hardened Anti-Fog Coating with superior chemical and abrasion/scratch resistance, capable of performing in the harshest environments. This highly stable product has excellent long term adhesion under extreme temperature and high humidity conditions, prevents fogging even after repeated cleaning.

PROTEUS AQUA SHIELD coating is Permanent Hydrophilic lens coating.

So what is a Hydrophilic lens coating?

Moisture loving coatings are known as hydrophilic. Unlike hydrophobic coatings that repel water, hydrophilic coatings act like a microscopic sponge. Moisture droplets interact and absorb into the coating, eliminating fogging. The coating is able to hold a high amount of moisture and naturally releases that moisture at the edge of lenses, making them difficult to fog up.

Because hydrophilic coatings are not soap-based, they won't wash off like hydrophobic coatings will.

MEDIUM IMPACT

MEDIUM IMPACT is the industry standard requirement for safety glasses. PROTEUS Eyewear are certified by Independent 3rd Party Accredited Auditors ensuring PROTEUS products will give you the level of protection needed every time you put them on your face.

DI TECH ARMS

DI TECH ARMS are designed for ultimate wearer comfort. Featuring Dual Injection over moulded TPR rubber which is flexible, durable and provides exceptional grip for the wearer to enable continuous work in the most extreme of environments.

UV 385/UV 400

UV 400 TINTED Lenses are ideal for working outdoors. Your eyes are regularly exposed to harmful UV radiation even when it is cloudy which increases a risk of dangerous long-term damage. UV400 provides complete protection against UVA and UVB radiation up to a wavelength of 400nm.

DUST GUARD

DUST GUARDS are critical in high dust particle environments. They ensure eyes are kept free of debris and in optimum shape to keep you working longer, more accurately and safer. Remember eyesight once lost, is gone forever!

ADJUSTABLE

ADJUSTABLE design features allow best possible fit to the wearer which in turn creates ultimate long wear comfort and high protection levels. Also suitable for additional PPE integration such as Dust Masks and Hearing protectors.

FEATHER LIGHT

The weight of Safety glasses can impact on a wearers comfort levels and general wellbeing. PROTEUS FEATHER LIGHT Specs offer class leading performance without feeling the burden of heavy specs on your face.

HEARING PROTECTION

PRESERVE YOUR SOUND: GUARD AGAINST WORKPLACE NOISE, PROTECT YOUR HEARING

Continual exposure to noise from machinery, tools, traffic and general workplace activity can cause significant, irreversible hearing loss. Hearing loss has a dramatic impact on quality of life and may contribute to other safety problems, such as lack of awareness and reduced concentration.

Correctly designed and fitted ear protection will keep industrial noise below harmful levels. The choice of the appropriate protection device for each job is also vitally important.

USER INSTRUCTION - PU foam earplugs

The best rebound time in the ear canal is around 30-40 seconds under human body temperature, neither too fast nor too slow as it allows the plug fully insert the ear canal. However, Rebound time will vary with the ambient temperature goes too hot or too cold when fitting the earplug.

New Concept Design:

Adjustable noise reduction rating at SNR 25-SNR 35dB by turning the centre physical knob. When the knob turn to "+", the SNR is 35dB, when the knob turn to "-", the SNR is 25dB. It helps you to use in different working surroundings without taking off the headphone.

Safety and Trusted:

ANSI S3.19, EN352-2 and AS/NZS 1270 approved, Suitable for Military, Hunting, Yard work, Racing, Noisy work sites and etc.

New arrival headband wrapped with soft TPE out cover and an adjustable telescopic metal rack for personalized fit.

Comfortable Cushion:

Ultra soft and wide ear cushion can fit ear perfect. No squeezing head and ear. Suitable for long time wear.
