Page 2 Two-letter words are the goto when playing a new word parallel to an existing word, and there is quite a handful of them. The Official Scrabble Players Dictionary (OSPD6), as well as the Official Tournament Word List (TWL or OTCWL), have 107 accepted 2 letter words. This covers both the Mattel Inc scrabble words and Hasbro Inc. Scrabble words. Knowledge of these words is not only important in winning but also for calling out your opponents when they play an invalid word. Even if you can't commit all 107 to memory, a good place to start is with common two-letter words. Common Two-Letter Words If you ever find yourself close TO a bonus square, waste NO time — throw those two-letter word tiles right IN! Placing an AX or an OX can rack you up to 54 points on a triple square. And just in case you're surprised by that awesomeness, you can throw in some exclamations like AH, OH, and EW to express disgust. Other common 2-letter words include MY, AN, DO, IS, GO, AM, US, HE, BE, AT, BY, EX, MA, WE, HI, and AS. Gameplay Tips for Two-Letter Words For a serious player of word games like Scrabble or Words with Friends, knowing 2-letter words is more important than having a robust vocabulary. If you know how to use these short words well, you'll be able to maintain good rack management and earn huge points with unlikely words. Here are some tips you should know. If your rack is filled with vowels, useful 2-letter words to restore rack balance and make room for consonants include AA, AE, AI, OE, and OI. In the same vein, if you need to get rid of some consonants, you can play words like HM, MM, and SH. And if you're depending on the Collins Scrabble Words, you get some extra consonant words like CH, KY, NY, FY, and ST. While two-letter words can score a few points on their own, with parallel play you can get a few more points.

For instance, the moment you recognize that your opponent left a word like CHASE open on the board, playing a new word like HERON directly underneath is called parallel play. That way you score points for two-letter words like CH, HE, AR, SO, EN, and the main word HERON. Even without a bonus square, you'd have earned 26 points. The Collins Scrabble Word (CSW) dictionary has 20 extra 2-letter words. So, if you're relying on the CSW, you get 127 acceptable two-letter words instead of 107. Page 4 Although you may or may not use too many different four letter words in the course of a day, if you are into playing word games like Scrabble and Words With Friends, you might want to brush up on your four-letter vocabulary. Four letter words are extremely common in both games because of a lack of space on the board, lack of tiles suitable for use given the situation on the board, and the lack of game knowledge and language skills of the vast majority of casual players. 4 Letter Words Frequently Asked Questions If you like to play a word game or two in your spare time, you might want to take a look at the following questions that people ask about four letter words, as it might answer some questions you yourself might have.

How Many 4 Letter Words Are There? The answer to this depends on which dictionary you look into. For example, as far as the Scrabble dictionary is concerned, there are 3,996 words with 4 letters. From "bear" to "jack" to "date" all the way down to "zeal," they're all on that list. On the other end of the spectrum, the Free Dictionary states that there are 149,165 words of such length. What Are the Most Common Four Letter Words? This seems like a straightforward question at first, and is one of the most frequent searches regarding the topic. Although regions and dialects usually determine the frequency of words being used, some common 4 letter words such as "that," "what," "with," and "this" stand above the rest in terms of usage.

What Are Some Good 4 Letter Words? There are really no such things as good or bad words — whether they are common words or rarely used, begin with consonants or vowels. The only thing that matters is whether you are using them with the right context and meaning, and in the case of games, how much you can score with them! Are 4 Letter Words Good for Word Games? Four letter words are extremely useful for popular word unscrambling games like Words With Friends, Scrabble, and Boggle, and depending on the clues, they are also important for crosswords and other word puzzles. However, these words are definitely more important for the first two games mentioned, as Boggle invariably only gives 1 point for both 3 and 4 letter words. What 4 Letter Words Are in the Scrabble Dictionary? Although we have already mentioned that there are 3,996 such words in the game's dictionary, the answer may vary slightly depending on whether you look in the Scrabble US or Scrabble UK version of the book. While we naturally can't list them all here, you can always use our word finder to get every Scrabble-legal word of this length, and even choose between the two aforementioned dictionaries. What Are Some High-Scoring Four Letter Words? Since Scrabble is a game with many different aspects, the score of a word depends greatly upon other words formed on the side and bonus squares used. However, in terms of raw value, the following are some high-scoring Scrabble words. QUIZ - 22 points The world beater of 4 letter Scrabble words, "QUIZ" getting this over a word multiplier (or even letter multiplier under any of the chunky letters) lets you grab a whole bunch of points. There are also not many four letter words starting with the letter "Q," so this is important if you're short on space. JEZ - 20 points A colloquial contraction of the common exclamation "Jesus," this fun little word could surprise the best of Scrabble opponents, and is a word sure to deal your opponent a blow and leave them hazy in the eyes. JAZZ - 19 points Although this one requires a blank tile to pull off, you would do well to save this one in your head as it could come in handy. It's quite difficult to make because of the tiles required, but it could be a good way to rid yourself of some hard-to-place letters in a pinch. WHIZ - 19 points Another word that's quite difficult to pull off due to the individual rareness of its letters, this can nevertheless net you a lot of points since both W and H can easily dock with a wide range of vowels. JINX - 18 points This magical word is one of just two Scrabble-valid 4 letter words that start with J and end with X. The other is "jeux," which gives the same number of points. How Can I Learn More Four Letter Words? Learning words of this length are pretty easy. Instead of looking for related links on Google, just visit our website and use our word finder tool to generate a plethora of legitimate 4-letter words. We assure you that your research will be much faster, as you'll be able to find all the words you need sorted by length. Can I Use a Word Finder While Playing With Friends? If you are using a word finder site or app while playing with friends, make sure they either know about it or have access to the same thing. Otherwise, it would be unfair. Don't wait for the middle of the game to tell them, either. Inform them in the beginning and have a fair, balanced game. What 4 Letter Words Require Blank Tiles to Complete? Even in the case of such small words, any word that has two Zs will invariably require blank tiles to create. This is also why such words don't make the highest scoring list. Page 5 Just like 2-letter words and 3-letter words, knowing 5-letter words improves your vocabulary and language skills. However, you may not enjoy 5-letter words so much if you're focused on making guess after guess in word games, as you're likely to get stuck. You may want to sharpen your vocabulary and search a little deeper to score good points in 5-letter word games.

It's common to consider word length in popular word games like Words With Friends and Scrabble. Short words are usually easy to play and can score decent points. Five-letter words are a bit rarer. Five-letter words frequently have a below-average score relative to the number of letters they require. However, they come in handy if you want to clear letters off your rack to make a 7-letter bingo play more feasible. What Are the Most Common Five-Letter Words? Some 5-letter words occur more frequently than others in Word With Friends, Scrabble, and other word games. Becoming familiar with these words will help you win points faster and may even give you an advantage when playing Wordle. The most popular five-letter words are THERE, OTHER, and WHICH. Knowing how and when to use these words will help you clear your rack faster and will earn you a good score. The word WHICH should be used to dispose of the letters H, W, and C for good points. Using up these letters will present you with a higher chance of getting bingo plays in your rack. However, I don't recommend using the words OTHER and THERE, as they don't give a lot of points and use up good bingo letters. Five-Letter Words Strategy To get the best points when playing 5-letter words, I suggest following an effective strategy. One of the popular strategies for 5-letter words is to use the letter S to form two words: one new word is a plural of an existing word on the board, while the other new word is the made up of the letters you play in the other dimension. You can sometimes manage to do this by arranging S on a Double or Triple bonus square. However, players often focus on scoring the most possible points, and they end up with the difficult letters in their racks.

It's important to keep two nice letters in your rack after playing a five-letter word. This is much better than scoring the most points possible and then having to deal with tough letters the next turn. For instance, if your rack contains SYNCSIT, you can easily hook SYNC onto an existing word and retain the letters SIT. Even if SYNC was hooked on a Double Word bonus tile, it wouldn't make much sense to play the second S in your rack for the extra two points. Instead, you may be able to achieve a bingo next turn by keeping the letters SIT. SCHUL, SKUTE, and SKAIF are other 5-letter words that start with S and serve as brilliant hooks. Five-letter words that start with C are also very important in word games. CIVVY, CHYME, and CLOZE are the only Cs in the game. These three Cs are crucial to people that play 5-letter word games as they are a three-point tile that can't be used in any two-letter word.

The 3 Cs are great words to get rid of consonants in your rack. Scrabble words starting with E could be instrumental when you're nearing the end of a Scrabble or Words With Friends game. E is one of the best letters for hooking.

EH, ES, EF, EL, EN, ET, and EX create endless possibilities. Common 5-letter words starting with the letter "E" are EAGER, ESTER, EXAMS, and EFFED are very good examples.

There is usually a pattern but the ability to identify and make sense of it is the real challenge. Five-Letter Words and Wordle Proficiency in 5-letter words could prove to be decisive when playing Words With Friends, Wordle, or any other word game. You should be able to spell each five-letter word correctly as well as how to group these words according to peculiarities. If you ever get stuck on a 5-letter word, you can use a word finder to search for an example. A word finder or dictionary features an up-to-date list of words. The word lists are often arranged in alphabetical. However, you may come across a frequent searches section. Five-Letter Words FAQs How many five-letter words exist? The answer to this question depends on the dictionary you consult. According to Free Dictionary, there are 158,390 words with five letters. However, there are 8,996 words with five letters in Volume 6 of the Official Scrabble Players Dictionary. There is no specific but I'd always advise searching a dictionary with consistent links to Scrabble, Words with Friends, or the word game you're playing. Which five-letter words begin with the letter C? General examples 5-letter words that begin with see are CABAL, CELEB, CHARR, CHUNK, CLAWS, CODES, COLTS, CORKS, CRABS, CRIED, and CYSTS.

However, in a 5-letter word game, CLOZE, CIVVY, and CHYME are the relevant words with five letters. These words often prove to be crucial in a daily puzzle. You can check the dictionary for other common 5-letter words that begin with "C". Which five-letter words begin with the letter E? When compared with other letters, especially vowels, there are relatively fewer words that start with the letter "E". Examples of words that begin with "E" are EAGLE, EDGED, EFFED, EIGHT, EJECTS, EMITS, ENDED, EVILS, EXAMS, and EYRIR. Which five-letter words begin with the letter S? Five-letter words that begin with "S" include SABER, SCENT, SEEMS, SHAKE, SILLY, SKEED, SLAIN, SLOTS, SNACK, and SWIPE. S 5-letter words offer a wide range of choices, you can check more words in the Official Scrabble Player's Dictionary. Conclusion In this guide, I explained what a 5-letter words game is and how to play it. I also gave a working strategy to follow to unscramble letters to achieve the most points possible. You can use these strategies to beat your opponents at Scrabble UK, Words With Friends, and other word games. To win points in Word With Friends, Scrabble, or crosswords games, you have to pay more attention to bingos. However, when it comes to getting the most points in five letters, you should try to start your word with the letters "C" and "S", they are necessary to position your racks for possible bingos. As mentioned earlier, 5-letter words that start with "E" can bail you out of a tight play at the end of the game. You may bookmark this page as this guide will be updated regularly. I hope you've found this guide helpful. Happy unscrambling.
