

STROLLER ASSEMBLY INSTRUCTIONS

Howdee sisterchix!

Welcome to our Outrageously Ridiculous World of Fun!

- Your team will assemble this darling stroller with upholstery, garland, and wheel covers prior to the trip and pack them with all of this décor finished before leaving Texas.
- Work together to pack multiple folded up strollers in golf bags for transport. Miscellaneous prop items (dolly/stuffy) can be packed around strollers as fit.
- Character Actresses and BannerBabes will not need strollers. Props furnished for Banner. Walkers needed for Actresses. Slide show coming soon for Walker prep.

The **stroller kit** includes items pictured: 4 wheel covers. 1 green fabric. 1 silver garland. Pipe cleaners.

Use all of the pipe cleaners to ensure no gaps in garland. Use more as needed.

Assembly requires white duct tape and many Large safety pins.

Save yourself hassle and get pins with sharp points

This sample stuffie isn't fully decorated.

We may use light colored stuffies/dolls a minimum of 20" long

Decked out in any combination of green, silver, white.

Handlebars

Using white duct tape, cover handles on the stroller

Upholstery

Holding the short edge of the fabric, fold the selvage down and find center of that short edge. Find the center of the stroller seat and pin the center of the fabric to the seat, folding about two squares over the back of the seat. Secure the rest of the top of the upholstery with pins. We don't want to see any raw edges.

Smooth the fabric down the seat, keeping a bit of slack for your baby's bottom.

We will **NOT** be using the seat belt.

Pin the bottom of the fabric to the underside of the stroller seat – **again we want no raw edges.**

Secure along the stroller seat.

Using safety pins, secure the sides of the fabric to the sides of the stroller.

The raw edges aren't as critical here because they will be covered with the garland but make sure any extra fabric is pinned to the back or folded under and pinned.

Garland. Starting on the top right of the stroller (as you are facing the stroller), attach the garland to the stroller.

Use the pipe cleaners to secure it to the stroller tight and straight without gaps.

Continue down from the top right all the way to the foot rest, across the footrest...

Garland continued

..up the left side of the stroller and across the top of the stroller.

Keep the garland as tight as possible and also make the corners as square as possible.

Attaching the garland to the bottom outside frame of the footrest helps keep the corner square.

Cut off the extra
garland and
attach end.

Good Job Ladies!

Using MORE safety pins, go back along the garland and secure the garland to the fabric where possible and where needed.

Make it secure on the stroller!!!

...almost DONE!

Take the leftover garland,
match ends and cut in half.

Using pipe cleaners, attached the two pieces of garland to the V-shaped framework on each side of the stroller.

Wheel Covers

Cut/tear off three pieces of duct tape, fold it back over and place on the back side of the wheel cover and attach to the outside of the wheel. Repeat for the other three wheels.

Dolly

Using safety pins, pin your dolly to the stroller – back of head and as needed.

Fret NOT it does not hurt them and then they will not go AIRBORNE during parade!

Butterflies

Keep them safe from harm. Pack in check-on bag flat in protective cover. Bring on motorcoach to show and parade in protective cover. The prop team will attach them for everyone. You will unattach and place back in protective cover prior to loading strollers back on motorcoach after performances.

Green Bag

Place the handles of the green bag over the handles of the stroller, insert the bag between the stroller frame and fabric. We don't want it flapping in the wind.

....and now it's time for us
ALL to join up in....

Ireland
