

CAPABILITIES STATEMENT

Company Information

Industrial Seal & Pump Inc.
2210 N. Dodge St.
Iowa City, IA 52245

Contact: Alison Dockery-Jackson,
President

Phone: 319.359.6650

Fax: 319.359.6652

Email: inquiries@isp-seals.com

Website:

NAICS Codes:

423840 – Industrial Supplies
333914 – Pumps, General
339991 – Gasket, Packing, Sealing Devices
423830 – Industrial Machinery & Equip
423840 – Bearings

Cage Code: 4P0N9

DUNS, D&B: 123881901

Keywords: Reliability Consulting, Technical Troubleshooting, Reliability Training, Mechanical Seal Rebuild Program, Mechanical Seals, Single Cartridge Seals, Dual Cartridge Seals, Component Seals, Magnetic Seals, Shaft Seals, Reservoirs, Marine Bearings, Tail-shaft Bearings, Rudder Bearings, Main Guide Bearings, Wicket Gate Bearings, Linkage, Pump Bearings, Elastomers, High Performance Packing, Gaskets, Bearings, Polymer Coatings, Flexlip Seals, Mechanical Packing, Compressed Non-Asbestos Gaskets, Flexible Graphite Gaskets, PTFE Gaskets, Pumps, Stuffing Box, AST, Thordon, Seal-Ryt, Thermoseal

About Us

As a certified WOSB, we are technical troubleshooters, partnering with plant personnel and procurement professionals to problem-solve systems and extend the reliability of rotating equipment with the training, experience, and proven track record of delivering results for our customers.

Our Mission

Our mission is to help businesses by offering effective solutions to process and sealing challenges through process improvement, technical knowledge, diagnostic expertise, and highly reliable products.

Our History

With a combined experience of over 60 years in fluid processing and large-scale manufacturing environments, ISP was started with the goal of helping customers achieve a higher mean time between failure (MTBF) by:

1. Improving the reliability of seals & bearings compared to past performance.
2. Moving to more predictive maintenance on pumps, bearings, and systems based on wear instead of failure.
3. Superior life of seals, bearings, gaskets, and packings despite harsh chemicals, abrasives, elevated temperatures or pressures, and abusive or difficult services.

We are a distributor for our exceptional vendors with access to additional on-demand technical resources with over 30-year professional relationships. With high quality reliable sealing devices, engineered self-lubricating bearings, and extensive industry experience, we can make a difference in your reliability performance.

Industries Served

- Renewable Fuels
 - Ethanol
 - Bio-diesel
- Chemical Processing
 - Adhesives
 - Fertilizer
 - Herbicides/Pesticides
- Power Generation
 - Nuclear
 - Hydro
 - Fossil Fuel
- Water Treatment
 - Industrial
 - Municipal
- Mining
- Food Processing
- Biotech/Pharma
- Marine
- General Fluid Processing

Services

- Expert Failure Analysis
 - Mechanical Seals
 - Pumps
- Process Analysis & Troubleshooting
 - Fluid Systems
 - Bearing Failures
- Mechanical Seal Repair
 - AST Seals & Others
- Rotating Equipment Repair
 - Pumps
 - Gear Boxes
- Technical Training “Seal School”
- Specialized Machine Shop Services
 - Machining
 - Welding
 - Fabrication
- Customized Design & Fabrication
 - AST Mechanical Seals
 - Thordon Sleeve Bearings

Products

- **Advanced Sealing Technology (AST)**
Mechanical seals for pumps and rotating equipment
- **Thordon**
Industrial bearings, Hydraulic seals, Marine bearings and shaft seals
- **Seal-Ryt**
High performance mechanical packing (FDA approved)
- **Thermoseal**
Compressed and graphite gasket sheets (non-asbestos), *Sealex*, *Soft-Chem*, and *Top-Chem* Teflon gasket materials
- **O.G. Supply**
Handhole and Manhole gaskets
- **PacFlange**
Food grade self-lubricating or water-lubricated bearings

THORDON

PacFlange ^{Ltd}
Enterments Hardly Frings
Food Grade Corrosion-Free Grease-Free

Thermoseal **SEALRYT**
CORPORATION
