

Worried about your weathered commercial roof and leaks? Tired of just patching the problem areas?

WE'VE GOT THE SOLUTION TO
YOUR ROOF WOES!

CRP Contractors is a go-to roofing solution provider for southern Indiana commercial building owners. We provide affordable and proven solutions for renewing your weathered roof, outside of standard (TPO) single-ply membranes or the synthetic rubber of an ethylene propylene diene monomer (EPDM) roofing longevity solution. As a Gaco Licensed Applicator, we are certified to install warranted solvent-free silicone roof coating systems, to affordably increase the lifespan of your existing roofs.

Whether your roof is large or small, flat or sloped, GacoFlex silicone roof coatings provide a proven, guaranteed solution for extending the longevity of your roof without compromising its integrity.

The 100% silicone roof coating creates a seamless membrane to seal and repair existing commercial roofs and permanently protect against leaks, ponding water, ultraviolet light and the damaging effects of severe weather. It is available in several colors to enhance the aesthetics of your roof and is ideal for use on flat and sloped roofs.

While you may be considering a new sheet metal roof, or an EPDM or TPO option to extend your roof's life, don't make a final decision without reviewing the solvent-free silicone roof coating system option. The high adhesion coating can be installed over any existing roof substrate and runs half the cost of all other options. Additionally, the durable, seamless product features 10 - 15 and 20 year material and labor warranties, plus it does not alter your current roof's warranty and could qualify you for current warranty repair/maintenance allowing for 100% first year deductions!

Silicone Roof Coatings Are An Excellent Option for:

- Aged Asphalt
- Aged EPDM or TPO/CPA
- Concrete, Fiberglass & Metal
- Low-Pitched & Flat Roofs
- & More

Ready to be leak free and increase the longevity of your existing roof? Give us a call today to schedule your free inspection and estimate. Not ready for a full solvent-free silicone roof coating system? We also do annual maintenance and spot repairs. As a full-service roofing company, our dedicated and highly skilled roofing experts are on a mission to transform aging commercial roofs throughout southern Indiana with affordable options and unmatched customer service and integrity. We look forward to working with you.
