

PRE-ENERGIZATION CHECKLIST

RELEASE DATE: February 24, 2024

TW BECKER
ELECTRICAL SAFETY CONSULTING

ELECTRICAL SAFETY BULLETIN

When low or high voltage energized electrical equipment is isolated (e.g. an Electrically Safe Work Condition has been established) for 3 or 5 year comprehensive planned maintenance it is important that before the electrical equipment is re-energized the electrical equipment is inspected to confirm it is safe to re-energize.

The Pre-Energization Checklist below provides some important questions that need to be validated by the Person-in-Charge (PIC, Qualified Electrical Worker Low or High Voltage) completing the re-energization.

PRE-ENERGIZATION CHECKLIST		
Jumpers & test leads removed?	Y <input type="checkbox"/>	N <input type="checkbox"/> N/A <input type="checkbox"/>
Tools & equipment accounted for?	Y <input type="checkbox"/>	N <input type="checkbox"/> N/A <input type="checkbox"/>
Electrical equipment inspected, clean & ready to energize?	Y <input type="checkbox"/>	N <input type="checkbox"/> N/A <input type="checkbox"/>
All personnel accounted for and clear?	Y <input type="checkbox"/>	N <input type="checkbox"/> N/A <input type="checkbox"/>
All temporary protective grounds removed & accounted for?	Y <input type="checkbox"/>	N <input type="checkbox"/> N/A <input type="checkbox"/>
All locks and tags removed?	Y <input type="checkbox"/>	N <input type="checkbox"/> N/A <input type="checkbox"/>
