Slow Down and Enjoy the **Blazing Speeds**

On shore, you're on the go, rushing from meeting to meeting, then on to family events. Finally, you get down to the marina and onto your yacht. It's time to relax, but you're faced with the prospect of painfully slow data connections and downloads from the marina Wi-Fi or your existing satellite communications system. Why can't your onboard communications deliver the speed and reliability you want?

Well, the wait is over; now you can say goodbye to limitations...

Introducing the TracPhone V7HTS, a quantum leap in maritime satellite communications from KVH Industries that **delivers everything you want in a single package.**

- ▶ Fast data rates perfect for streaming HD content and video chatting with friends and family
- ▶ Built-in secondary unlimited data channel
- ▶ Affordable service with innovative hybrid airtime plans to meet every need

What's New? **Everything!**

The advanced 60 cm (24 in.) TracPhone V7HTS, the newest member of KVH's unique end-to-end SATCOM solution, offers global connections and unmatched speed using new, advanced Intelsat and SKY Perfect JSAT Ku-band satellites that add HTS capabilities to the mini-VSAT BroadbandSM network.

The result? **Uncompromised download speeds as fast as 10 Mbps and 3 Mbps upload speeds**, more than triple the download speed and six times the upload speed of KVH's already fast 60 cm antennas on our original VSAT service!

The TracPhone V7HTS offers all-new state-of-the-art hardware for exceptional reliability, sophisticated software for unmatched user control and management of data, and our exclusive dual channel configuration, with innovative hybrid airtime plans that deliver a **free unlimited use data channel running at the same time as your ultra-fast channel.**

The All-new Integrated CommBox Modem (ICM)

The ICM is the streamlined all-in-one belowdecks unit that drives the TracPhone V7HTS. It features a browser-based user interface and a convenient iPhone® app for system status, updates, and support. Replacing a full rack of components required for competitors' systems, the 2U-high ICM contains:

- ▶ IP-enabled antenna control unit
- ▶ CommBox™ Network Manager
- ▶ High-throughput modem
- ▶ Voice over IP (VoIP) adapter
- ▶ Built-in Wi-Fi and Ethernet switch
- ▶ Content storage and access for operations, entertainment and Videotel training content provided by IP-MobileCast™
- ▶ Support for over-the-air software updates for the ICM and antenna unit

The Most Advanced Maritime Network Available

TracPhone V7HTS's global connections and unmatched speed are made possible by new, advanced Ku-band satellites. Our managed HTS network offers valuable advantages for you, your guests, and your crew, including:

25 million square miles added to KVH's already industry-leading Ku-band network for outstanding coverage worldwide

A high-speed worldwide network delivering speeds as fast as 10 Mbps throughout our coverage area

Greater resilience to weather and rain fade than Ka-band services, so you are connected when you need it most

Sophisticated, elegant, sleek single-dome solution using a 60 cm antenna that is smaller and up to 34 kg (75 lbs) lighter than competitors' systems

Advanced network-level firewall with automated threat management to provide additional security

Automatic, fast switching among the network's high-speed beams, ensuring seamless communications wherever you travel

Creating Confidence through User-friendly Controls

Enjoy complete transparency into and control over data usage via the TracPhone V7HTS thanks to the secure myKVH™ mini-VSAT Manager,™ a comprehensive set of tools to manage your operational and individual use.

- ▶ Easily set daily or monthly allocations for Internet use for each person onboard, not just the yacht as a whole, while also permitting or blocking selected sites and protocols
- ▶ Customize and set text and email alerts for usage thresholds and never be surprised again
- ▶ Set your data usage levels to ensure that you have complete control over your monthly data consumption
- ▶ Use real-time vessel tracking for current and historic visibility of your yacht with up to one year of position data updated as frequently as every 90 seconds

“With the TracPhone V7HTS, I can now video chat with my kids for the first time when I’m offshore and, thanks to the high speed, the video quality is superb, far better than I ever get on the marina Wi-Fi at the dock!”

Captain, *AboutTime2*

Ensuring that You Stay Connected with Global Support

You're making an investment in the communications that are critical for your yacht's operations as well as ensuring that everyone on board enjoys the benefits of broadband connections. That's why the TracPhone V7HTS is designed with the rigors of the marine environment in mind and is backed by our global service and support network.

Proactive Monitoring

We not only monitor the status and health of the KVH onboard equipment, we continuously measure uptime and actual onboard data speeds to ensure maximum uptime and high performance. KVH engineers and technical support specialists analyze the data so they can recognize and respond proactively to potential issues.

Visit kvh.com/monitoring to hear a customer story.

KVH OneCare™

Our global support program protects your VSAT investment, minimizes your costs, and maximizes availability through a complete set of global services for every step of the journey, including Application Engineering, Solution Deployment, and Operating Support. We even offer annual preventative maintenance checks so that you never have to worry.

Enhancing Operations and Onboard Entertainment with Premium Content from KVH IP-MobileCast

The TracPhone V7HTS is fully compatible with KVH's IP-MobileCast for Superyachts content delivery service, allowing you to receive up to 500 GB per month of multicast content from a range of services, including:

Operations Content

IP-MobileCast delivers new data and the latest updates from our industry partners for weather, voyage planning, ECDIS-compatible chart updates, and training.

Entertainment Content

Keep everyone entertained and informed with licensed daily news, movies, TV programs, and sports.

Gigabytes of Data Delivered

As always, data delivered via IP-MobileCast does NOT count towards your monthly data usage or affect your data speeds.
