Powerful Marine Networking Solutions

Meticulously engineered solutions for all types of vessels including yachts, cruisers, sailboats, sportfish boats, and trawlers.

Why Choose Aigean?

Simplicity

We have engineered the most simplistic networking solutions for any type of vessel. By simplifying the process of creating and maintaining complex network connections, we not only make it easy for anyone to use our products, but, in turn, give our users more time to do the things they enjoy most.

Performance

All of our products are tested constantly throughout the development process, targeting specific industry-leading benchmarks. We know that what we build will perform as good, if not better, than comparable devices from other manufacturers. Additionally, every device that is built and shipped must pass our thoroughly rigorous evaluation process before it leaves our laboratory.

Quality

Through extensive research and development, we have ensured that all of our products have been fabricated with the highest-quality materials and hardware available to ensure our equipment provides you with many years of extraordinary service. We stand by our commitment to reliability.

Support

Aigean Networks provides world-class support. We do what we can to ensure our customers are as happy as can be. Our team has more industry experience and knowledge than anyone in the industry, and we're always here to help whenever and however possible. Customer satisfaction is paramount, and we do everything we can to ensure you will be an Aigean customer for life.
