

Owl Workshop

Sponsored by OM System

Friday 11 July

1000 **Graeme Lyons**
Pan Species Listing
Bioblitz – how to start and bioblitz plus time in the nearby field getting to work!

1100 **Paul Hackett**
Phonescoping for beginners
Learn how to phonescope with tips and advice from one of the leading Phonescopers in the world

1200 **Paul Howden-Leach**
Seeing birdsong: How to identify birds through sonograms.
A canter through user-friendly methods to extract and identify bird sounds in sonograms, from the dawn chorus to nocturnal migration.

1300 **David Tipling, OM System**
Looking Back
David recounts the highs and lows of a professional wildlife photography career spanning more than four decades.

1400 **Alli Smith, Cornell Lab**
Behind the scenes of Merlin Sound ID
Learn how Merlin magically identifies birds by sound, and how you can help to make it better.

1500 **Rebecca Nason, OM System**
Shetland Reflections & Migrants at 60o North
Join OM SYSTEM ambassador Rebecca Nason as she highlights her last year of bird photography on the Shetland Islands. With its geographical location, isolated out in the North Sea, Shetland attracts birds from America on Westerly winds and Asia in strong Easterlies. Spring and Autumn migration can bring many surprises! Either side of migration the summer is short and full of breeding seabirds, enjoy some seabird highlights from land and sea with her favourite photo gear!

1600 **Influencer Panel with TJ Focus: Get to Know Thermal Imaging**
Join Thomas Jacks and their panel of wildlife influencers as they answer your questions and discuss how Pulsar and Pixfra's range of thermal imaging devices have revolutionised the way they work.

1700 **Geoff Carss and Stephen Moss**
Large scale bioacoustics monitoring using AI as seen on Springwatch
Session will describe how large-scale audio monitoring using AI can better quantify changes to biodiversity, species richness and bird behaviour.

We hope you enjoyed your visit to Global Birdfair.
