

7 Ways Residents Can Reduce the Risk that their Homes & Property Will Become Fuel for a Wildfire

#1

Clear

Clear off pine needles, dead leaves & anything that can burn from your rooflines, gutters, decks, porches, patios & along fence lines. Falling embers will have nothing to burn.

#3

Screen & Seal

Wind-borne embers can get into homes easily through vents 8 other openings and burn the home from the inside out. Walk around your house to see what openings you can screen or temporarily seal up.

#5

Trim

Trim back any shrubs or tree branches that come closer than 5 feet to the house and attachments, and any overhanging branches.

#7

Close

If ordered to evacuate, make sure all windows & doors are closed tightly, and seal up any pet doors.

Many homes are destroyed by embers entering these openings and burning the house from the inside out.

#2

Store Away

Store away furniture cushions, rattan mats, potted plants & other decorations from decks, porches & patios. These items catch embers and help ignite your home if you leave them outside.

#4

Rake

Embers landing in mulch that touches your house, deck or fence is a big fire hazard. Rake out any landscaping mulch to at least five feet away.

#6

Remove

Walk around your house and remove anything within 30 feet that could burn, such as woodpiles, spare lumber, vehicles and boats – anything that can act as a large fuel source.
