## GUARDING SERVICES

After a cumulative 23 years in the industry, Roger Taylor and Donovan Taylor decided to leave their fathers business and branch out on their own.

Taysec Security was born in 2012 and became a reality in 2016. It was the plan to bring a fresh look along with some new ideas to the guarding industry. Our mission statement speaks

volumes of what we will provide to our clients.

“Taysec Security will provide a reliable security service based on industry experience, Fair and competitive pricing and above all service”

Taysec guarantees an available management team at all times. A professional

guarding team is what will be delivered along with technology enhancements to ensure that each guard is maintaining the levels of service required.

Taysec security looks forward to the opportunity of supplying your business or residence with a security services quotation.

## MISSION

Taysec security will provide a reliable security service based on industry experience, fair and competitive pricing and above all service.

# WHAT WE OFFER

The Taysec management and senior team over the years in the industry have built up extensive knowledge on the risks and challenges faced by our clients.

-  **COMMERCIAL GUARDING**
-  **RESIDENTIAL GUARDING**
-  **COMPLEX AND ESTATE GUARDING**
-  **SHOPPING CENTRES**
-  **STREET PATROL GUARDING**
-  **FENCE MONITORING**
-  **CCTV SERVICES**
-  **LIVE GUARD MONITORING**
-  **ARMED REACTION**
-  **POLYGRAPH TESTING**
-  **CRIMINAL CHECKS**

We continue to work hard at improving our services and streamlining our operations. Taysec security specialises in guarding and CCTV services. This includes armed response services to both divisions.

# VALUE ADDED SERVICES

Taysec security is committed to ensuring we provide new technological enhancements to our guarding division and operations. This ensures peace of mind for the client and improves our service delivery.

Live guard tracking- guard secure. The guard movements are updated in our 24hr control room every 3 minutes. Our controllers will monitor and follow up on any missed points. A automated report is sent to the client every morning giving the exact movements of the patrol guard during the night.

Access control: We use the Eskin devices at Key access points to scan drivers license and vehicles licenses. This ensures strict access control procedures and accuracy in the information collected

Taysec Security will provide a reliable service.

# TAYSEC CCTV SERVICES

Taysec CCTV services provide you with the best possible price, ranging from CCTV surveillance kits to cutting edge analytical solutions.

A free site assessment could help you save money on your monthly security costs

**4K** ULTRA HD

HIKVISION  
**TURBO**  
SOLUTION

H.265+ SUPREME COMPRESSION

CHROMATIC NIGHT VISION **ULTRA LOW LIGHT**

SIMPLER THAN EVER SYSTEM **BUILT IN POC**

The Turbo HD DVR bundles smart features such as face detection, defocus detection and video analytics. These analytics include traversing a virtual plane, intrusion detection and scene change detection.

## 4K ULTRA HD

Sharp, precise, clear video can make all the difference in critical surveillance situations, enabling security staff to quickly identify suspicious individuals, objects, and movement, and take the right action at the right time.

While most analogue cameras offer only 2 MP resolution, Hikvision's Turbo HD 4.0 Cameras provide ultra-HD resolution up to 4K, resulting in superlative

image quality. The latest 4K cameras offer an astounding 8-Megapixel resolution.

With wider coverage and more details, 8 MP cameras reduce the blind areas efficiently. A complete, ultra-HD system can be secured from front-end 4K cameras to back-end 4K DVR and 4K HDMI monitors.

## H.265+

More than three years of research and accumulation empowered Hikvision to be the first to release H.265+ on an analogue system—a revolution for analogue.

H.265+ takes a huge step up in efficiency over H.264—reducing bitrates by 75% on average while maintaining high transmission quality. H.265+ compression technology takes analogue even further.

Based on the H.265/HEVC codec, H.265+ is an intelligent algorithm developed by Hikvision that can greatly decrease the bitrate of video.

Bandwidth is radically reduced, storage requirements are minimized, and image quality improves.

## ULTRA LOW LIGHT

Ultra-low illumination cameras from Hikvision vastly improve the efficiency of night monitoring.

High-definition 1080p displays come to life with the amazing ultra-low illumination surveillance cameras.

With 120 dB WDR and built-in PoC function, these cameras offer users the most advanced security

features available. Rest assured that you will see what's really there—in the shadows, at night, and under conditions that leave other cameras in the dark.

## POWER OVER COAX

With Hikvision's Turbo HD 4.0 Solution, installers don't have to pull wire. Power-over-coax (POC) supplies the technology to use coaxial cable to integrate video and DC power.

This innovation consists of a front-end POC camera and a back-end Turbo HD DVR, directly embedding the POC power supply into the back-end DVR device.

It then transmits the video signal through the coaxial cable and solves the power supply problem for front-end equipment.

Turbo HD 4.0 Solutions reduce the wiring area, save space, and reduce the costs of labour.
