

ALTITUDE DIVER COURSE REQUIREMENTS

Prerequisites:

- Minimum age 10 years
- Certified as (Junior) Open Water Scuba Diver

Performance Requirements:

Successfully complete the Knowledge Development module

Two dives demonstrating:

- Calculate a no stop dive profile for the theoretical depth and altitude at which the dive will take place
- Execute a descent using a reference (tactile or visual)
- Compare depth gauge to others
- Use a depth gauge and timer (or dive computer) to measure an ascent rate no faster than 9 m./30 ft. per minute
- Perform an ascent using a reference (tactile/visual)
- Perform 3 minute safety stop at a theoretical depth of 5 m./15 ft. before surfacing
