Our rose scent rating scale serves as a valuable tool to gauge the intensity of fragrance in our rose products. It's important to recognize that scent perception is subjective, varying among individuals. Consider this scale as a general reference point:

- **1 (Very Mild):** Almost no scent or an extremely faint fragrance.
- **2 (Mild):** Exhibits a subtle and delicate scent, noticeable up close.
- **3 (Moderate):** Features a moderate and pleasant fragrance easily detectable.
- **4 (Strong):** Presents a robust and prominent scent that becomes quite noticeable from a distance.
- **5 (Intense):** Boasts an extremely powerful and captivating fragrance that fills the air.

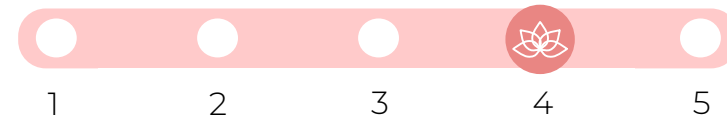

*Please bear in mind that the actual scent may differ based on the specific rose variety and environmental conditions. We trust that this scale will assist you in selecting the ideal rose product tailored to your preferences.*
