INSTALLING BALLOON GARLAND

What you get with your DIY balloon garland install package:

- Frog Tape (masking tape)
- Adhesive hooks
- Extra 260 balloons (long stretchy balloons used for tying)

Wall Application:

1. Wipe down the surface where you will be hanging the garland.
2. Once the surface is dry, apply the Frog Tape where you would like your first hook to be.
3. Put the adhesive hook on the Frog Tape (NOTE: ensure the adhesive hook is only on the tape and not touching the wall directly).
 - a. Do not hang any balloons until all hooks are in place.
 - b. For every 3 feet of garland, you will need 1 adhesive hook.
 - c. Once you have carefully placed ALL your hooks on the Frog Tape, you can start to hang the garland.
4. The garland will have 260 balloons (long stretchy balloons used for tying) installed along every 3 feet of the garland for you to use to hang it.

Removal:

1. Remove the garland by removing the 260 balloons from the hooks.
2. Then, carefully remove the Frog Tape (which has the hook attached) from the wall.
3. Dispose of balloons and all adhesive hooks and tape.
