## Announcing New Tracks

We are excited to announce the addition of new tracks to our upcoming conference – the **Executive Track** and the **Cyber Security Track**. These tracks aim to cover a broad spectrum of topics which will be beneficial for professionals from various backgrounds.

The **Executive Track** is designed for leaders who want to gain insights into effective change management, strategic planning, and more. Attendees will also have a chance to participate in round table presentations with vendors. If you're a leader looking to enhance your strategy formulations skills or gain insights from industry experts, this track is for you!

Our **Cyber Security Track** covers an inclusive range of cyber security topics aimed at security specialists as well as all employees. With cyber threats becoming increasingly prevalent, we believe everyone should be equipped with knowledge about cybersecurity - not just specialists. We believe every team member plays a crucial role in preventing data breaches - understanding potential threats and knowing how to respond is key. The presentations in this track will equip you with knowledge needed to safeguard your organization's digital assets.

We invite you to explore these newly introduced tracks which are

designed keeping in mind industry trends and requirements.
