

To create Mustang Horseshoe League Shortcut on your iPhone:

1. Open the Shortcuts app on your iPhone.
2. On the **Shortcuts** tab, tap the plus icon at the top right.
3. Tap where it says **New Shortcut** at the top and tap **Rename** to choose a name for your shortcut (suggest MHL or Mustang League...). Make it descriptive and remember that the name you select will serve as the voice command for Siri to launch the shortcut. You can also tap **Choose Icon** to set a relevant icon. Click Done.
4. Tap **Add Action** to select the action you want this shortcut to perform (categories or Apps). Select App. You can then search for the Safari app.
5. Once on the Safari page, scroll down to “Open URL’s”, and tap.
6. Once on the next Safari page, Type in <https://mhl.today> after the word Open (This is where you place the URL link).
7. Press Done.
8. To add App to Home Screen: On the Shortcuts screen, tap and hold on the MHL shortcut you just created. Select **Share**.
9. Tap **Add to Home Screen**. The new MHL icon will now show up on your home page of your iPhone.
10. You can move Shortcuts around on your home screen or remove them like you would any app icon (tap and hold to drag around or long press to get a pop-up menu).
