**Aquarius (Jan 20–Feb 18)** Innovation attracts attention. Stand out.

**Pisces (Feb 19–Mar 20)** Compassion deepens connections. Kindness matters.

## TALK TO THE HAND!

*We've all heard the saying, "the heart wants what it wants" but what if the answer was literally in the palm of your hand and we just needed someone to help us understand what our Heart Line says about us?*

*Well, the Love Doctor will see you now!*

"You are here because you are looking for a line to the heart! Let's take time to reflect on our emotional state, romantic perspectives and even your physical heart health."

"The most important part of your Heart Line is where it stops, as this reveals your "romantic style" - For those lovelies with a Heart Line that ends under the finger of Jupiter; You are a romantic idealist. You my friend are, let's call it, choosey as you have high expectations for partners and seek a deep, soulful connection; a beautiful pursuit."

"In my many years as a love guru of sorts, I have worked with those who have a Heart Line that ends under the finger of Saturn. These dears are rational lovers; valuing stability and practicality while often keeping emotions more guarded or private."

"My sessions with those who have a Heart Line that ends between the fingers of Jupiter and Saturn have been short and sweet as this is the most balanced position. It suggests a person who is caring and warm but stays grounded and realistic in relationships. It is these Heart Liners that inspired me to move from an hourly rate to a flat rate..."

"Now, let us discuss the Heart Line quality and shape! A long and deep line indicates a person who is very expressive and open with their feelings. You hopeless romantics follow your heart over your head and often make for my most regular patients!"

"I've had less experience with those who have a short and straight line however it suggests someone who is more reserved, prioritizing logic and independence. I tend to brighten the lights and blow out the vanilla scented candles before they enter my office as they are less interested in the drama of romance."

"I like to dub those who have a line that curves upwards toward the fingers as The Physical Heart Line. My sessions with these lovers often go over time as they are assertive, passionate and have no trouble expressing their desires."

"My straight liners or Mental Heart Line guests show a more sensitive, refined or passive emotional nature."

"Before you leave, please remember that a broken line doesn't necessarily mean a broken heart but rather a major shift in your emotional perspective or a period of emotional struggle!"
