EXPERIENCE MODIFICATION CONTROL

Practicing modification control techniques saves employer premiums and removes the mystery of experience rating.

☐ Review and update loss reserves with claim representatives prior to their preparation of Unit Stat cards.

☐ Forecast a test mod (and future premium) in advance.

☐ Verify experience modification promulgation to be sure any possible errors have been eliminated.

☐ Discuss effects of ownership changes on the mod prior to implementation.

☐ Track subrogation recoveries and request mod changes when appropriate.

It's our job to make sure the check you write is right!
