Setlist Planner: Your next 4 hits!

Alright rock stars, it's time to plan your next four tracks!

Think of this as your solo album launch plan. Every hit record starts with a setlist - not just a bunch of random tracks. It's intentional. Each track flows into the next with purpose. No more jamming - let's plan!

Each track is an action for you to take in the next 30 days to turn up your volume: in your business/leadership, your mindset, and your message.

Track	Focus	Action	Tour date (Deadline)
1	Simplify	What can you stop doing that's just noise?	
2	Amplify	What deserves more attention, energy, or visibility?	
3	Collaborate	Who can you jam with - a client, peer, or partner - to support you & hold you accountable?	
4	Improve the System	What workflow, habit, or tool can you tighten up for smoother performance?
