

Bolt Down Bollards

Protect your structure, outside equipment and loading dock doors from damage with Bolt Down Bollards. Available in three heights, they come with a welded steel cap, and mounting hardware. Choose a square base or a rounded base.

Bolt Down Bollards create a visual obstacle to protect pedestrians, equipment, and property. They mount on concrete or hard surfaces along walkways, streets, or parking lots to help control traffic. Rugged steel construction with rounded top and heavy-duty base plate assures strong resistance to damage from vehicles and loading dock equipment.

- Powder coated safety yellow schedule 40 steel.
- 8" x 8" x 1/2" square base plate and 10" x 12" x 1/2" square plate.
