

**Poletector 360 & 540XL Specifications & Measuring Guide**

1. Verify if Poletector can fit diameter of light pole base. Poletector can cover round bases up to 24" and square bases up to 18" x 18". The Poletector 540XL covers 25" to 34" round or 24" square light pole bases.
2. Determine if you need a shorter or taller unit. Standard unit is 4-rings high, 41.27",
3. Specify square or round pole. We will custom cut top opening to your specification. Cut will be larger than the size of the light pole.\*
4. Chose color: Safety Yellow, Safety Blue, Imperial Blue, Red, Grey, Safety Orange, Architectural Brown, Black.

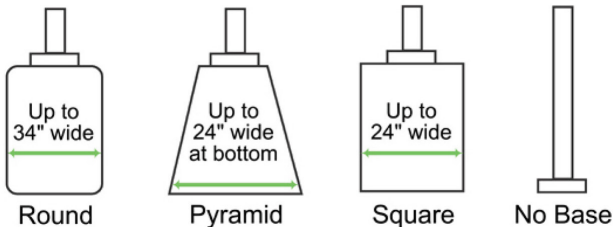

\*Contractor is responsible for providing accurate dimensions to Simon Marketing Group at the time of ordering.

Poletector height equals top (3.27") plus each ring height (9.50"). Shown below is 4-ring height of 41.27".
