Bollard Covers

2

Post Guard Bollard Covers are the answer to property maintenance and safety. Cover your rusty steel bollards and never have to scrape or paint them again. Available in both flat top and dome top models.

All bollard covers are blow molded using HDPE-High Density Polyethylene plastic and are guaranteed to be fade resistant for 6 years.

All bollard covers include two foam strips for a secure fit installation.

- Easily slides over existing posts to make them maintenance free
- UV and fade resistant
- More forgiving surface when contact is made by a vehicle
- Protects equipment and structures

Flat Top

Flat Top Colors

Dome Top

- 1/8" thick with stronger intermolecular forces and tensile strength
- Insusceptible to solvents and extreme temperatures
- 6 year guarantee

Decorative Bollard Covers

3

Choose Simon's **Granite Finish Decorative Bollard Covers** when appearance really counts. They are aesthetically pleasing and the perfect solution when detail to style is important. Available in slant top or square top design.

- Easily installs over new or existing **steel pipe bollards**
- Refined designs complement any facility
- Cost savings as compared to aluminum, stainless steel or cast iron bollards

Standard Granite Colors:

- Brown granite
- Tan granite
- Charcoal grey granite
- Black granite
- Additional colors available by special order.

Decorative Plastic Bollard Covers are an ornamental addition to upscale residential communities and attractive office structures.

- LDPE - low density polyethylene plastic
- Contains ultraviolet additives that resist fading and withstands extreme temperatures
- Variety of shapes and sizes

Lincoln	Royal	Pawn	Lighthouse
Fits over pipe 6.6" OD - up to 54" high	Fits over pipe 8.6" OD - up to 72" high	Fits over pipe 4.5" OD - up to 43" high	Fits over pipe 6.6" OD - up to 50" high

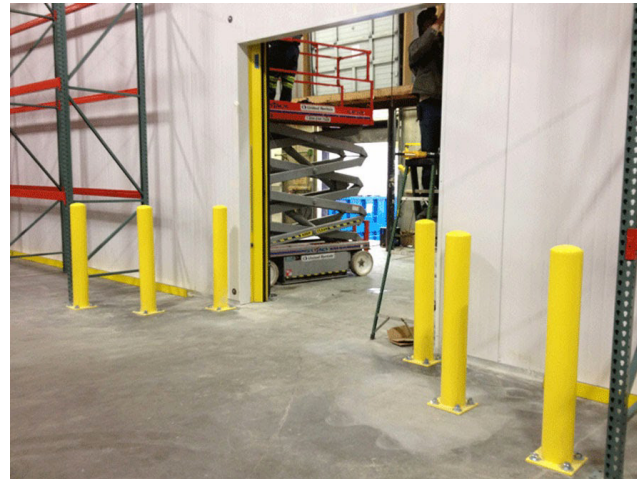

The **Connect-ALL** system offers a flexible strap and hooks that surrounds bollard covers. By adding a plastic chain, a barrier is established to avoid hazards, and provide crowd control and pedestrian safety.

Bolt Down Bollards

Made from Schedule 40 steel, these bolt down bollards do not require core drilling or excavation. Protects inside or outside fixtures such as utility meters, electrical systems and dock loading doors.

- 4" O.D. powder coated Safety Yellow on an 8" x 8" base plate 1/2" thick with four 3/4" corner holes
- 6" O.D. powder coated Safety Yellow on a 10" x 12" base plate 1/2" thick with four 3/4" corner holes
- Welded-on-cap

Steel Pipe Bollards

- ASTM 500B structural grade steel
- Permanent, fixed bollard
- 4, 6 8 and 10" diameter
- Can be custom cut

Height Guard Clearance Bars

The **Height Guard Clearance Bar** gains motorists' attention to warn them of maximum height requirements.

- Avoid major repairs and insurance claims
- Protect structures
- Standard and Optional Graphics Kits

Height Guard Colors

Standard Graphic Kit

Optional Graphic Kits

Height Guard Clearance Structure

The Height Guard Clearance Structure is manufactured in two pieces from heavy aluminum.

- The finish options are milled aluminum or baked enamel in black, blue, green, red, white and yellow.
- When ordering, please specify the post orientation as either the driver or passenger side.
- Optional Mounting Assembly Kit

Specifications:
Overall Dimension: 10' x 10'
Horizontal Beam: 2" x 5"
Mounting Plate: 11-3/4" x 11-3/4" x 1/2"

Clearance Structure Mounting

Optional Mounting Assembly Kit

The J Anchor Assembly Kit helps with mounting the Height Guard Clearance Structure. The kit contains four galvanized J anchors (1/2" x 18") bolted to a CNC cut template which matches the steel foot plate of the structure to make installation easier.

Poletector

Poletector 360 and 540XL Light Pole Base Covers

Deteriorating light pole bases are unsightly, hazardous and the cost to repair can put a burden on maintenance budgets. The Poletector Base Cover is a quick and easy fix for your parking areas.

- Easy Installation and is maintenance free
- Immediately improves the appearance
- Light weight and stain resistant

Poletector Standard Colors

Poletector 540XL
For use with 25" to 34" round or 24" square light pole cement bases.

Customized Poletector Light Pole Base Covers

Gorilla Post Removable Magnetic Delineators

When struck by a vehicle, the Gorilla Post absorbs impact and protects vehicles from damage and helps reduce the property owner's liability.

48" x 2-1/3" Diameter Magnetic Gorilla Post

- Available in 7 colors with optional reflective stripping
- Each ADA-compliant Magnetic Base is held in place by neodymium magnets
- Magnetic base's reactive spring system ensures the post will return to its original position impact after impact
- 360° swivel
- Can be removed with removal tool
- Adheres to surface with epoxy

The Gorilla Post with Post Guard Cover

- Temporary signpost designed for multi-use applications.
- Lightweight construction

Gorilla Post Bollard Mini

The Gorilla Post Bollard Mini is a smart choice over traffic cones and markers. The tamper-proof Mini stays in place and maintains distance and alignment.

- Made to original Gorilla Post specifications
- The 24-inch tall, 7-inch round Mini is flexible and yields to both vehicles and pedestrians.
- Easy installation and removal with the same removal tools used on the original Gorilla Post.

The **Sentry Protection family of products** offer the most complete impact protection available to fully protect your investments — your facility, your equipment, and your people. From parking garages to warehouses to materials-handling facilities, our full-line of column, corner, rack, and concrete cushion products absorb impact time and time again.

Park Sentry

Park Sentry is an attractive way to add a layer of effective protection around parking structure columns. Available in yellow and black.

- Scratch-resistant layer of protection around concrete columns
- Easy cinch-strap installation

Park Sentry Round

- Can fit around almost any size round column
- Round panels can be assembled in one or more layers

Column Sentry

- The Column Sentry is a versatile protector for columns and beams
- Fast and easy Installation for a secure fit

Column Sentry Fit

The Column Sentry FIT is a 4-sided, interlaced design that assures equal protection for every side.

- Distinctive air vent system, allows air to escape during impact
- 2-sided protectors have 2 flexible and 2 rigid sides
- The 4-sided design adjusts to fit exactly around columns to provide equal protection all around the column
- Molded from a mixture of HDPE and EVA
- Stackable, weatherproof, chemical resistant and UV stabilized

Rack Sentry

Protect your rack uprights from collision damage from forklifts. Manufactured of EVA, a flexible and durable material, the Rack Sentry is a highly-visible protector that installs directly to the rack without special tools.

- Designed to flex with a collision impact
- Available in a variety of sizes to accommodate any range of uprights
- Also available for end racks and low beam situations
- The LT model can withstand temperatures as low as -22°F

Corner Sentry

The Corner Sentry provides a protective, impact absorbing cushion to shield the corners from impact. Reduces or eliminates damage to both the corner and to the vehicle.

- Constructed from highly visible yellow EVA (Ethylene Vinyl Acetate)
- Flexible and durable
- Tapered design hugs the corner while providing a low profile
- Installation uses fasteners, adhesives or a combination of both

Collision Sentry

Forklift collision avoidance warning system alerts drivers and pedestrians to approaching traffic.

- LED lights
- Infrared motion detectors
- Warning is flashed in both directions around a corner to prevent a possible collision

Guard Post

This versatile portable bollard is available for a wide variety of uses, indoors and out.

- Water-tight hollow unit that can be filled with ballast
- Can be attached with fasteners into a floor, dock, or any other flat surface

Speed Bumps

Speed Bumps come in many sizes and shapes and are made from rubber or plastic.

Rubber Speed Bump reduces vehicle speeds making parking lots and residential streets safer for pedestrians and motorists.

Safety-Striped Rubber Speed Bumps

BUMPIE Speed Bumps

Made from recycled tires, the **Bumpie** 6-foot speed bump will safely slow vehicle speeds. The reflective yellow stripes and cats-eye reflectors provide enhanced visibility at night. Installation is fast and easy with recessed bolt holes.

- 6' long x 12" wide x 2 1/4" tall
- Five Mounting Holes
- Mounting Hardware Included
- Weight is approx. 50 lbs
- End caps available

End Cap

The Bumpie Alley Bump is higher to assure the reduction of vehicle speed. Channels effectively protect cables, pipes and electrical wiring.

Plastic Speed Bumps

Speed Humps

- When you need to slow traffic, mini speed humps provide a gentler safety solution
- Can be quickly removed and stored or relocated
- Available in a variety of profiles and travel lengths
- Ideal for areas where there is a need to slow traffic for pedestrian safety

Parking Blocks

Rubber Parking Blocks helps reduce damage to low, front end cars. Because of the flexibility of rubber, these parking blocks lay flat, even in uneven areas.

- 100% recycled rubber - environmentally friendly
- Molded with highway reflective tape to increase visibility and safety
- Lightweight and low maintenance
- Lag bolts for concrete installation and rebar spikes for asphalt installation

The **Curbie Rubber Parking Blocks** are made of 100% Recycled Rubber which means they will not warp, chip, crack, crumble or corrode. Reflective tape in either yellow or white, is positioned on the panels and end of the block for optional visibility.

- Available In three sizes: 3', 4' and 6'
- The 6 foot parking block is recommended for retail, commercial, and business parking lots, garages, and municipalities.

Plastic Parking Blocks come in a variety of available sizes and colors to match your specific need.

- White can be used to match parking striping
- Blue can be used to mark handicap spaces
- Safety Yellow plastic block is highly visible, even at night
- These blocks never need painting and won't chip, crack or deteriorate from weather or road salts
- Lag bolts for concrete installation and rebar spikes for asphalt installation

Gate Arm Guard Covers

Gate Arm Guard

Gate Arm Guards, moving gate arm covers, are designed to cover parking equipment gate arms.

- Added protection for parking gate arms, vehicles and pedestrians
- Custom made to fit any size and shape, straight or articulating gate arm
- A custom clear plastic sleeve on the face of the gate arm cover allows you to change your message
- Easy installation - Slide the sleeve over the gate arm and attach the Velcro tabs at the ends

Scrape Guard

Scrape Guard

Scrape Guard is manufactured from a non-marring, highly visible flexible vinyl.

- Flexible column protection
- Use for small posts or large cement lighting bases
- Flexible enough to fit around rectangular bases, odd shaped barriers and I-beams

Repeat customers and referrals from satisfied customers are the heart of our success. The only way to achieve such success is to provide honest, reliable, and quality services. Simon has a deep knowledge of what companies need and what our customers expect. Working one-on-one with your maintenance personnel, Simon can easily assist you with parking lot safety products that will meet and exceed your expectations and would like the opportunity to discuss your options with you. Whether you are an existing client or a new customer calling us for the first time, your business is important, and you will be treated that way.

Please contact Simon to explore your options for controlling traffic, parking lot safety and facility improvement.
