

Heritage Moulding Corporation

“Unsurpassed Quality – Outstanding Service – Competitive Pricing”

“Unsurpassed Quality” – Starts with the selection of the highest grades of the finest domestic and imported hardwoods. Continues with the constant quality control throughout the state of the art milling processes. And ends with the product produced for your project.

“Outstanding Service” - This isn't just a catch phrase for us, but an ongoing goal. Timely production and on time delivery are constantly being strived for. The old adage of time is money is never more critical than in today's business environment. Simply... we deliver on time!

“Competitive Pricing” – The selection of our mouldings are a value added part of your building project. But don't let the idea of premium mouldings be confused with premium pricing. We think you will be pleasantly surprised to find that our pricing structure rivals what you would find at public consumer outlets.

These separate, but equal, components are the cornerstones of the business philosophy and guiding principals of *Heritage Moulding Corporation*.

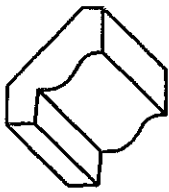

Your own unique sense of style can be brought to life with the use of our fine wood products. We welcome the opportunity to work with you, your architect, your designer and your builder to help you achieve just the look you are seeking.
