

Mission Statement

Our central mission is to provide an unforgettable, transformative student experience.

We aim to do this by...

- ...fostering a consistently professional and imaginative English learning environment for students of all nationalities.
- ...assisting students in making full use of their skills acquired in their countries of origin and to remove the barrier of language that so often obstructs overseas residents from fully participating in society.
- ...continuing to develop the skills of our teaching staff and the efficacy of our curriculum.
- ...encouraging students to take advantage of the rich culture and diversity of London and the UK through teaching materials, cultural days & social programme.
- ...listening to students' needs and develop staff and curriculum as appropriate. Equally, management will listen to teaching and administrative staff and endeavour to maintain a dynamic and supportive working environment.
- ...empowering students to achieve their individual language learning goals.
