

CAPITAL FACILITY PLANNING WITH GRANT FUNDING

Jemison & Partners, Inc. has assisted Louisiana ports with securing grant funding for \$500 million in capital improvements over the last decade. This was accomplished through a series of strategic competitive grant applications which resulted in state and/or federal funding for a variety of projects involving enhanced intermodal infrastructure (Mississippi River Intermodal Terminal and Yard Improvements), terminal expansion (Port of New Orleans Napoleon Avenue Container and Nashville Avenue Terminals), new technological renovations (Port of New Orleans Julia Street and Poland Avenue Cruise Terminals), energy-efficient innovations and hurricane recovery (Henry Clay Cold Storage), renovated transit sheds (Port of New Orleans Alabo and Harmony Street Terminals) and ship repair facilities (Port of Terrebonne).
