

# GRANT COMPLIANCE

Grant programs require that funded projects be implemented in a manner consistent with the goals of the program. This means that once grant funding is received, the job isn't done even after the project is completed. Grant compliance comes in the form of annual reports. These reports are mandatory for a specified time to document actual benefits associated with the project. In many instances, annual reports are required for a 3 to 5-year period following project construction.

Jemison & Partners, Inc. has assisted clients with federal and state grant compliance over the years including:

- U. S. Transportation Investment Generating Economic Recovery (TIGER) quarterly and annual reports (2013 through present) – reporting on baseline and project data and expenditures.
- Louisiana Port Construction and Development Priority Program monitoring reports (2008 through present) – comparing estimated versus actual revenues and expenses under completed projects.
- Hazard Mitigation Plan annual updates – examining the record for any hazard event or incident that occurred during the year, the root cause and impact, updating the status of mitigation projects for the year, recommending or revising mitigation projects as necessary, and updating the risk assessment and asset inventory.
