

## Case Study #1: 10 Trailer Loads of PolyIso Foam Insulation

Job Location: Allen, TX

Job Size: 120,000 sf

Yield: Ten (10) 48' trailer loads of 2.5" PolyIso

Nationwide Foam Recycling (NFR) provided recycling services for the re-roofing project at Allen Premium Outlets in Allen, TX.

NFR provided live load pick-ups of 2.5" PolyIso foam insulation using 48' flatbed trailers. In just two weeks, NFR picked up ten (10) truckloads of insulation which saved the roofing contractor over \$16,000 in avoided disposal costs.

Prior to bringing NFR onto the job, the roofer had a full-time person staged at the 30 yd trash dumpster cutting, fitting and stacking the insulation to try to reduce the number of dumpster swaps needed. The project manager stated that stacking and loading insulation onto NFR trailers was simpler, more efficient and actually reduced their labor costs.

When asked to critique NFR's service, the project manager said that NFR communicated well and showed up for pick-ups when scheduled. The only regret he had was not finding NFR sooner.

*Nationwide Foam Recycling helps re-roofing contractors save money and reach their sustainability goals by recycling ISO, XPS and EPS Foam Insulation Board as well as EPDM, PVC and TPO roofing membrane.*

*Unlike traditional recyclers that focus on straightforward waste streams like corrugated cardboard and metal, we specialize in recycling difficult wastes. If you have a re-roofing project that will produce a sizable volume of foam insulation or membrane waste give us a call. We'll implement a collection, transportation, processing and recycling program that will save you time, labor and money.*

**Nationwide Foam Recycling collects and recycles ISO, XPS and EPS Foam Insulation Board as well as EPDM, PVC and TPO Roofing Membrane**

**Our recycling programs save re-roofing contractors money and help them win bids**

**Re-roofing contractors that recycle with NFR help their building owners exceed their LEED and sustainability goals**

**We've successfully recycled re-roofing wastes since 1992!**
