BIOGRAPHY

We are Martyrs For Rebellion!!

We bring a different sound to the table blending a lot of sounds. One thing is for certain that music runs in our blood and we want to create something to lift everyone up and grab the soul. When things are down and rough we all look to music to lift us and shake us to the very core of our souls. We are trying to give a voice to all the bad in the world and help rise a new movement.

Love us or hate us, the mission is the same for us all, and that is to never to give up, and strive to be better. So stand together and join the rebellion and let's create a Striving culture for great voices for the MUSIC!

We are here to make an impact with our music, rhythm, and lyrics. We both harmonize well together, therefore, the passion soars through the bloodstream! We want to affect people through the soundtrack of life! When one can listen to a band and later on in life one can go back to that band and pertain to one's life again, then that is the impact we are going for! Influences in life make the band that much better with other great artists and everyday life.
