

FIRST MEETING POINTS FOR YOUR COMMITTEE OF SAFETY

Things to be done

- **Gather** your fellow patriots for an in-person meeting.
- **Discuss** the 1st Amendment of the Constitution which lets the government know that you have a right to assemble and redress your grievances. Redressing grievances will be done through our affidavit process.
- Be careful of infiltrators. Once you start making progress, it never fails, someone will come into your group and start causing problems to try to stop your process. Come up with a vetting system, or a way to control this. Our Ohio State Jural Assembly does not let anyone into our business meeting without signing membership documents. Those documents protect you and your group and show you are standing on your God-given rights and not trying to overthrow any government.
- It's important for people to understand you are not creating anything new, you are bringing back the Republic, the way things were supposed to be done, but, haven't been. Sometimes, it's learn as we go, but we know 3 things.... We, the one People, follow the Declaration of Independence, our God-given rights (unalienable rights), and the Constitutions (national and state). These are the powers we enumerated for the elected officials to have in order to protect our rights. Anything outside of that is unlawful and a violation of our rights so we will put them on notice of this violation. If they are in violation, that would mean they are also in violation of their oath of office, which they swear to us to protect and defend the Constitution, NOT THE OHIO REVISED CODE.
- At this first meeting, **elect** your officers (document attached with descriptions). You can decide as a CoS (committee of safety) on

what kinds of officers and/or committees you wish to create, however, there are 4 that are a must. The Moderator, the Scribe, Bailiff, and Treasurer. The first elections are to get you going and familiar with things, so the first elections are for a 90-120 day interim commitment and then, official elections are had for a full 1 year term.

- Advise all members to create a Telegram account.
- Once the moderator is elected they should create 3 Telegram rooms for your county assembly to secure information privately and invite all PAPERED members only.

Example: Ohio Assembly Chat (for discussing current projects) Ohio Assembly Document Room (for documents ONLY to locate quicker) and Ohio Assembly Record or Minute Room (to place your minutes and recordings from meetings).

- Once the Treasurer is elected, they should collect funds for in preparation to order an embosser and seal for the county \$60-\$100. (If left over \$, it can go towards filing fees, etc.)
- Decide on a weekly time and day for your meetings. Each week discuss what you are working on and what the goal is for the following week. Keep things moving (always move forward).
- Advise all members to create a separate secure PROTONMAIL account for communications via the Assembly/CoS.

Example: JaneDoe@protonmail.com

- Create a protonmail account for your county CoS.

Example: MontgomeryCoCoS@protonmail.com

- At your first meeting, talk about what issues in your county you would want to start addressing and prioritize.

- There is a process to “settling” your county, which is laid out in the “Steps to Settle Your County Committee of Safety”. (attached)
- Fill in, then print out the Preamble and Article One document. (attached)
- Once you have gathered at least 3 people and decided you are ready to start the settling process, start by contacting the OSJU @ OhioStateJuralAssembly@protonmail.com to receive your Settlement of Covenant 12-page document.
- It takes about 3 weeks to “settle” your county, but in the meantime, start collecting what you need regarding the issues you have decided to address. You will need to think of everything as an investigation. Who, what, when, where and how. Start collecting who (public official) said what, where did they say it, how did they implement it, and when. Look on websites, get recordings, get public information requests through emails, etc.
- During the weeks of the settlement process, have the committee work on getting the oaths of office and bonding information for anyone demanding something that is against your rights. If it’s a school, you need the principals, vice principals, superintendent, school counselors, nurse and board of education all for your county.
- Also, have the committee start to read the Declaration of Independence, that is what the one People go by. Start reading the national and Ohio Constitutions and see what power we gave the government. From there, start matching up where the public servant is in violation.

Example: Your school website states that all children must wear a mask and be vaccinated with all CDC scheduled vaccines before entering school.

Your CoS: Find in the Constitutions (because that’s the only place we have given them any authority) where it states they have that

authority. And remember, they have created amendments that were not ratified by the people, but even so, no amendments can take away any of our rights. They can add to the constitutions, but nothing can take away our original rights. The 9th and 10th amendments deal with that issue.

- You will need to get a special stamp and a seal for your county. They are about \$60-\$80 for both of them. This is for documents you send and receive. They all need to be stamped or embossed. Let us know IF you want help with this step, OhioStateJuralAssembly@protonmail.com.

NOTE: Some printers say they won't make these for you because you are not a government agency. That's unlawful and against your rights. We will share our preferred printer to mitigate this issue. We can provide a previous design if you choose not to create your own design and stay consistent. But, it's not a must.

- You can create your own website or send people to our Ohio State Jural Assembly website, @ OhioStateJuralAssembly.org.
- IF you, or any member, do NOT want to use a home address to receive mail, an option would be to go to your post-office and buy a P.O. Box for your CoS. It's about \$80 for 6 months. You can take donations if needed.

That's enough to get you going until you are settled. Once you are settled, we will teach you the 3-step process to putting public servants on notice and holding them accountable to their oaths of office. We will also teach you about doing a Social Compact with your county, but that's down the road.

Added Info

- Now, once a scribe is elected, minutes of each meeting need to be taken, by hand. It's very important each meeting to make sure to state **in the beginning** of your meeting, the date and time, and that it is a meeting of the (your county) Committee of Safety. **At the end** of your meeting, it's very important to announce the next date and time of your next meeting.
- Minutes should be joined together in a manilla envelope each week and kept secure.
- Please join our weekly private phone calls to get an understanding of the process you must follow at the county level.
- All things get voted on by the Committee of Safety as a whole. It's a 50% plus 1 vote. So, whomever is at the meeting is the quorum and that's who votes.
- While joining the OSJA weekly private call the first week, you must abstain in a vote if you were not present the prior week as we would prefer you to have more knowledge of the situation before voting.
- If a vote passes, it's approved and put into action. If it doesn't pass, it's tabled until the next week. It's all noted in the minutes.
- You can decide how to run your meetings. Our Ohio State Jural Assembly uses some of Robert's Rules of Order to try to keep our meetings fair and on a schedule.
- Most importantly- There is nobody "in charge" and all things must be discussed and voted on by the CoS. EVERYONE is equal.

Once your county is through the settlement process and you have collected your investigative materials, it's time to put them on notice and you need to contact Ohioassembly@protonmail.com to learn the Affidavit process.

Thank you all for making your county a free county, a Republic!
