## **JOB DESCRIPTION: PROJECT ENGINEER**

BUILD Renewables is a nation-wide, engineering, procurement and construction (EPC) company with a dedicated focus on utility-scale solar and battery energy storage systems. The company has been formed as a result of the increasing demand for renewables with the objective of assembling high performing project teams. Our goal is to hire the best people and offer them career opportunities that are unique to the industry. Learn more at [www.buildrenew.com](http://www.buildrenew.com)

The Project Engineer will manage a team of Field Engineers, Quality Assurance Specialists, and support the Project Management and Operations team. The Project Engineer will interact with clients regarding issues and questions to ensure clear communication.

Hiring Location: On the road

Job Type: Full-time

Schedule:

- Monday to Friday
- Weekends as needed

Pay: From \$88,000.00 per year

Essential Functions:

- In addition to quality, continually ensuring all employees follow health and safety regulations while monitoring operations to promote the wellbeing of the whole team.
- Responsible for mentoring, leading, and performance evaluations of field engineers.
- Validate field measured quantities in alignment with project progress.
- Assist Logistics Coordinator with all project materials, tools and supplies to ensure adherence to contract and design specifications.
- Work with Procurement/Logistics team to assure acceptable incoming delivery quality.
- Plan subtasks and lead meetings to cover upcoming work with Operations team and client.
- Supports Superintendents and Foremen on questions and issues in the field.
- Oversee the review of shop drawing, submittals, and RFIs.
- Participate in schedule reviews, cost to complete meetings, and change orders.
- Support project management with the facilitation of subcontract agreements.
- Incorporate all processes and procedures that support the project close-out phase.
- Perform other duties as assigned.

Qualifications:

- At least one year of experience on renewable energy projects preferred.
- Bachelor's Degree in Construction, Construction Management, Engineering or equivalent experience.
- Proficient in Microsoft Office, Blue Beam, Outlook, and related software programs. Knowledge of Procore and Auto CAD desired.
- Excellent time management skills and the ability to prioritize workload.
- Excellent oral and written communication skills with the ability to interact with all levels of BUILD Renewables' personnel, clients, and subcontractors.
- Problem solving and analytical skills.
- Ability to work well in a group environment and foster a team approach.
- Highly detail-oriented.
- Must be self-motivated with a strong sense of urgency.
- Must have a valid Driver's License and clean driving record.

Experience:

- Solar project: 1 year (Preferred)

Working Conditions:

- 100% travel required. Projects are nationally based. A competitive subsistence package is available for full time travelers.
- Construction Site Environment – physical ability to stand, walk, crawl, bend, reach and climb. Exposed to high noise levels.
- Office Environment – extensive sitting at desk and computer; some standing, bending at the waist, stooping and reaching required; ability to lift 5-20 pounds occasionally.
- Exposure to all forms of weather conditions (hot, cold, wet, dry, humid, windy) for the entire work day.
