This curated annual figurative exhibition of painting, drawing, and sculpture is drawn from a group of prominent Bay Area artists.

The work in the exhibition reflects today's narrative, expressive phase of The Bay Area Figurative Movement, as each artist continues to draw on the living world to express our stories, reaching beyond academic achievement and accuracy.

These artists might be responding to inspiration from models or sharing their personal struggles and tensions of the universe that surround our lives. As artists, teachers, and curators, we are shedding light on our world of life drawing, painting, and sculpting, which continues to grow and maintain a large following of dedicated artists.

Drawn from Life pays tribute to all artists who are working from life.

Five pieces will be shown as mini-shows by each artist.
