

About the Company.

a Greek company inspired by the value and rich tradition of Greek cuisine. Our focus is on specialized Greek olive oil, recognizing its significance in Mediterranean culture and diet due to its beneficial elements.

Our facilities are strategically located in Central Greece. A place filled with agricultural activity and olive groves, intentionally chosen to achieve our goal which is to highlight to consumers within and beyond Greek borders, the high nutritional value and quality that this land produces.

The company's vision is to provide consumers access to one of the purest and most beneficial products, and our mission is to bring our vision to life, by promoting Greek and Mediterranean diet globally.

The Innovation.

Our agronomist collaborates with selected producers, providing support and advice on cultivation and using technology that records the entire process, including the necessary time for harvesting and ensuring high-quality standards. Despite olives being harvestable at any point during ripening, we insist on early harvesting around mid-October, which is considered to be the ideal time for oil with distinct characteristics and high levels of polyphenols and antioxidants. Once harvested, our state-of-the-art equipment is employed for the cold oil extraction method, followed by storage and the final stage of standardization.

Company Ethos.

Commitment to Excellence.

methods and processes we apply, participating from start to finish, ensuring that the creation of our olive oil reflects the quality, spirit, and tradition of Greece.

Modern Facilities & Equipment.

Quality Control.

the best practices are applied: strict safety, hygiene and quality standards are met during the production, storage and handling.
