

Questions every person needs to ask.

- ◇ Are you running a firewall with enterprise level security?
- ◇ Are you running Geo-IP filtering?
- ◇ Are you routinely updating your network appliances?
- ◇ Are you running anti-malware software?
- ◇ Are you routinely running deep scans and updating regularly?
- ◇ Are your systems actively monitored?
- ◇ Do you receive reports proving the success of all of the above?.

If you answered no or I don't know then we can help [contact us.](#)
