

The Board of Education authorizes an investment program for the School District. Investments are viewed as a critical ingredient of sound fiscal management, the purpose of which is to secure a maximum yield of interest revenues to supplement other School District revenues for the support of the education program of the school system. It is the policy of the School District to diversify its deposits and investments by financial institutions, by investment instrument, and by maturity scheduling.

The objectives of the School District's investment program are to safeguard the School District's funds and to minimize risk, so that investments mature when cash is required to finance operations, and so that a competitive rate of return is achieved.

All participants in the investment process shall seek to act responsibly as custodians of the public trust and shall avoid any transaction that might impair public confidence in the School District to govern effectively.

Investments shall be made with judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the safety of the principal as well as the probable income to be derived.

All participants involved in the investment process shall refrain from personal business activity that could conflict with proper execution of the investment program, or which could impair their ability to make impartial investment decisions.

The Board of Education's responsibility for administration for the investment program is delegated to the Assistant Superintendent for Business. The School District authorizes the Assistant Superintendent for Business to manage all activities associated with the investment program in such manner as to accomplish all the objectives and intents of this policy.
