

Healthcare Worker Vaccination & Immunization Checklist

This checklist is intended for employee onboarding in healthcare facilities. Staff must provide documentation of vaccination or proof of immunity as required. Attach copies of immunization records or lab results where applicable.

Core Required Immunizations

Hepatitis B – 3-dose series or positive antibody titer

MMR (Measles, Mumps, Rubella) – 2 documented doses or positive titer

Varicella (Chickenpox) – 2 documented doses or positive titer

Tdap (Tetanus, Diphtheria, Pertussis) – 1 adult Tdap + Td/Tdap booster every 10 years

Influenza – Annual flu vaccination

COVID-19 – Full series per facility/state requirement

Tuberculosis (TB) Screening – 2-step PPD, QuantiFERON, or chest X-ray if positive

Additional / Role-Specific (If Applicable)

Meningococcal vaccine – For lab staff or high-risk areas

Hepatitis A – For exposure-prone assignments

Polio / Travel vaccines – If working in global health or outbreak regions

Notes / Exemptions
